Article 24 Education

1. States Parties recognize the right of persons with disabilities to education...States Parties shall **ensure an inclusive education system** at all levels and life long learning...
2. ...States Parties shall ensure that:
 - (a) Persons with disabilities are **not excluded from the general education system** on the basis of disability, and that children with disabilities are not excluded from free and compulsory...education, on the basis of disability;
 - (b) Persons with disabilities can access an **inclusive**, quality and free ...education on an equal basis with others in the communities in which they live;
 - (c) Reasonable accommodation of the individual's requirements is provided;
 - (d) Persons with disabilities receive the support required, **within the general education system**, to facilitate their effective education;
 - (e) Effective individualized support measures are provided in environments that maximize academic and social development, consistent with the **goal of full inclusion**.

District Policy, Priorities, & Placements

Policies and Priorities

- Inclusive vision and priorities
- All administrators committed to and responsible for inclusive education for all students
- Professional learning on inclusive education provided for all school personnel

Student Placements

- All students fully educated within district schools, and no schools set aside for students with disabilities
- Chronologically age-appropriate schools and classrooms, regardless of ability or primary language
- Number of students with disabilities in classrooms reflects total school population

Activity 3: Appreciative Inquiry

Moving Forward without Losing the Past

Appreciate Inquiry toward Inclusive Educational Systems: What it is and How to do It

Appreciative Inquiry

The Appreciative Inquiry approach to organizational renewal was developed by David Cooperrider and Suresh Srivastava. The approach is based on the premise that organizations change in the direction in which they inquire. An organization that inquires into problems will keep finding problems, but an organization which attempts to appreciate what is best in itself will discover more and more that is good. It can then use these discoveries to build a new future where the best becomes more common. In short, the process of Appreciative Inquiry requires that those engaged in change choose to see possibilities, capabilities, and assets of systems, focus on what's right, rather than what's wrong, develop questions to uncover moments of top performance, and create the future they desire.

The Focus of Appreciative Inquiry: Seeing Assets and Possibilities

In everyday life, most people and organizations are constrained by the perception that their resources, and hence their horizons, are limited. This perception that we must "face realities" is without a doubt the greatest single constraint on human imagination, vision and enterprise. Appreciative inquiry begins with a different set of assumptions. We begin with the belief that we have a choice in which we can consciously choose what we "see" and act upon. In both the personal and social realms, we can choose to focus on problems, needs and deficits: the traditional problem-solving approach. Or, we can choose to see possibilities, capabilities and assets the basis of appreciative inquiry. By focusing on what's right, rather than what's wrong with an organization, an individual or even a society, Appreciative Inquiry gives us access to the kind of energy that can be transformative. Having that kind of energy to work with gives us the confidence to develop and pursue a new image of the future. A key question that guides the rationale for appreciative inquiry is: "If you want to inspire, mobilize, and sustain human energy, which is the most effective way- by focusing on problems or pursuing possibilities?"

Appreciate Inquiry toward Inclusive Educational Systems: What it is and How to do It

The Outcomes of Appreciative Inquiry: Generating, Proving, and Creating

Appreciative Inquiry is a *generative* process that gives us a way to bring possibilities to life and develop our capacities. Through a carefully developed set of questions and a process of dialogue, we uncover stories of our "peak experiences" – those moments in our lives when we felt most effective, most connected, most alive. These stories provide irrefutable *proof* of our actual capabilities. They give rise to new *images* of what the future could be. They raise our sights, energize us and give us the courage to dream and act boldly. Rather than "accepting reality," we see that what we call "reality" is defined by what we choose to see, what we choose to think and talk about, what we choose to act upon. It follows that we have the capacity to *create* the kind of future we desire. The following table compares the Problem Solving and Appreciate Inquiry Approaches to Change

Problem Solving Approach to Change		Appreciative Inquiry Approach to Change	
Focus	Results	Focus	Outcomes
Problems	Incremental advances	Possibilities	Unprecedented
"The glass is half empty"	Token promises	"The glass is half full"	Full of meaning
Problem-driven	Using others	Vision-led	Collaboration with others
Money	Transactions	Meaning	Relations
Scarcity of resources	Professionally directed	Abundance of resources	Self directed
Critical thinking	Taught, as admonitions	Energy	Learned, by example

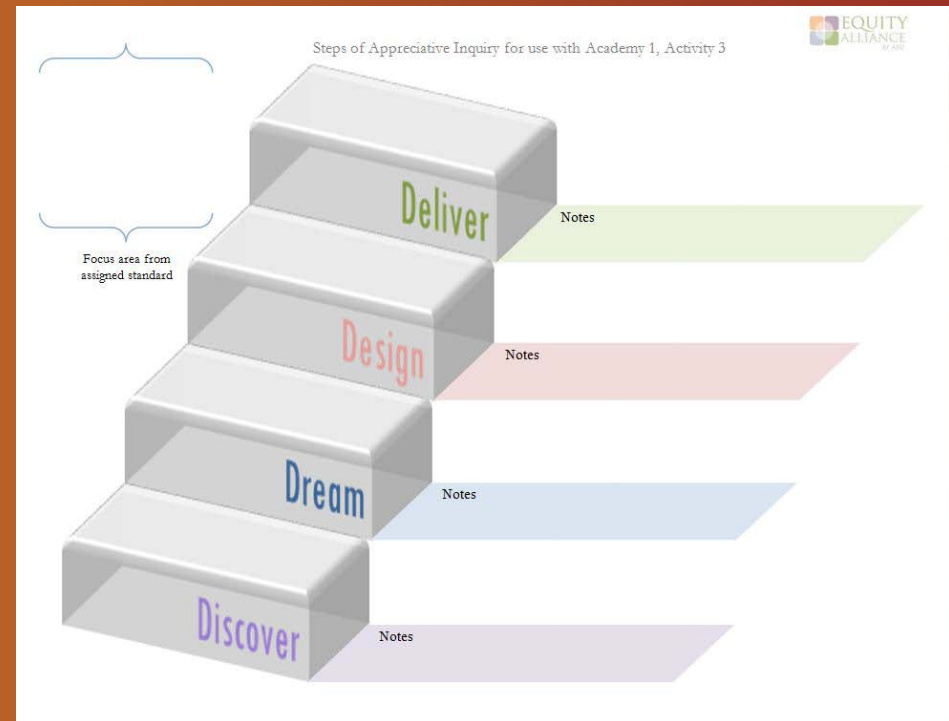

The Steps of Appreciative Inquiry: The 4-D model

Appreciative Inquiry pervades all levels of education – from administration and the act of including all students, to students and the act of learning. Whatever your role, appreciative inquiry is a useful procedural tool for engaging in the process of systems change for inclusive education. By

Activity 3: Appreciative Inquiry Moving Forward without Losing the Past

- Same-district triads or quads:
 - Each group is assigned one of the four standards of inclusive educational systems (Core Functions, etc.).
 - Select *one focus area from their assigned standard*.
 - Use handout and go through the A.I. process as applied to the area of focus selected.
- Whole group re-convenes to share experience.
