The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

## FOREWORD

The 2017 edition of the *Digest of Education Statistics* is the 53rd in a series of publications initiated in 1962. The *Digest* has been issued annually except for combined editions for the years 1977–78, 1983–84, and 1985–86. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from prekindergarten through graduate school. The *Digest* includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). To qualify for inclusion in the *Digest*, material must be nationwide in scope and of current interest and value. The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to data on educational attainment, finances, federal funds for education, libraries, and international comparisons. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the *Digest* contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices.

The *Digest* contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Funds for Education and Related Activities, Outcomes of Education, International Comparisons of Education, and Libraries and Use of Technology. Each chapter is divided into a number of topical subsections. Preceding the seven chapters is an Introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The *Digest* concludes with two appendixes. The first appendix, Guide to Sources, provides a brief synopsis of the surveys used to generate the *Digest* tables; the second, Definitions, is included to help readers understand terms used in the *Digest*.

The *Digest* can be accessed from <https://nces.ed.gov/programs/digest>. Tables from each *Digest* edition since 1995 can be viewed by selecting the edition year from a drop-down menu. All tables that appear in the print version of the *Digest* are also included in the online version. In addition, the online version of recent editions includes a number of supplemental “web-only” tables. (Web-only

tables are identified as such in the print version’s comprehensive List of Reference Tables.) In the online version, *Digest* tables are available both in HTML format and as downloadable Excel files. The most current versions of *Digest* tables are posted to the NCES website on a rolling basis before the entire edition of the report has been completed. The “Most Current Digest Tables” page provides access to the most recent versions of all tables, including any tables already completed for an edition currently in progress.

In addition to providing updated versions of many statistics that have appeared in previous years, this edition incorporates new material on the following topics:

- Percentage distribution of children who were under 6 years old and not yet in kindergarten, by main reason household wanted a child care program, primary reason for difficulty finding child care, and selected child and family characteristics (table 202.30a)
- Percentage distribution of children who were under 6 years old and not yet in kindergarten, by reported availability of good child care choices, amount of difficulty finding the type of child care wanted, and selected child and family characteristics (table 202.30b)
- Number of children under 6 years old and not yet in kindergarten whose families paid for child care, and their families’ average out-of-pocket expense, by type of child care arrangement and selected child and family characteristics (table 202.30c)
- Number and percentage distribution of teachers in public traditional and charter elementary and secondary schools, by instructional level and selected teacher and school characteristics (table 209.21)
- Number and percentage distribution of teachers in public elementary and secondary schools, by instructional level and selected teacher and school characteristics (table 209.22)
- Number and percentage distribution of teachers in public elementary and secondary schools, by race/ethnicity and selected teacher and school characteristics (*web-only table 209.23*)
- Number and percentage distribution of teachers in public elementary and secondary schools, by whether they entered teaching through an alternative route to certification program and selected teacher and school characteristics (table 209.24)

- Number and percentage of teachers who are military veterans, by control of school, sex, race/ethnicity, age group, region, and level of instruction (*web-only tables 209.27 and 209.27a*)
- Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and private schools, by selected characteristics (table 221.32)
- Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and Catholic schools, by selected characteristics (*web-only table 221.32a*)
- Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and private schools, by selected characteristics (table 222.32)
- Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and Catholic schools, by selected characteristics (*web-only table 222.32a*)
- Percentage of public schools that took a serious disciplinary action in response to specific offenses, by type of offense and selected school characteristics (table 233.12)
- Percentage of public schools providing training for classroom teachers or aides in specific safety and discipline topics, by safety and discipline training topic (table 233.67a) and by safety and discipline training topic and selected school characteristics (table 233.67b)
- Percentage of public schools with security staff present at least once a week, by full-time or part-time status and selected school characteristics (table 233.70a)
- Percentage of public schools with security staff present at least once a week, by type of security staff, school level, and selected school characteristics (table 233.70b)
- Among public schools with any sworn law enforcement officers present at least once a week, percentage with officers present at specific times and with officers present for all instructional hours every day (table 233.72), with officers who routinely carry or wear specific items (table 233.74a), with officers participating in selected activities (table 233.74b), and with formalized policies or written documents defining the roles of officers at school (table 233.74c), by school level and selected school characteristics
- Enrollment and degrees conferred in Asian and Pacific Islander-serving institutions, by selected institution and student characteristics, degree level, and state or jurisdiction (*web-only table 312.60*)
- Average amount of financial aid awarded to full-time, full-year postbaccalaureate students, by type of aid, level of study, and control and level of institution (*web-only table 332.35*)
- Percentage of graduate degree completers with student loan debt and average cumulative amount owed, by level of education funded and graduate degree type, institution control, and degree program (table 332.45)
- Number, percentage, and percentage distribution of persons 16 to 65 years old who have work credentials or have completed a work experience program, by selected characteristics (table 507.50a)
- Percentage and percentage distribution of those 16- to 65-year-olds who have work credentials or have completed a work experience program, by college degree attainment status and selected characteristics (table 507.50b)
- Percentage distribution of persons 16 to 65 years old, by labor force and employment status and earnings, college degree attainment status, and work credential and work experience program status (table 507.50c)
- Average online reading literacy scale scores of fourth-graders and percentage distribution, by international benchmark level and country or other education system (table 602.15)
- Percentage distribution of 15-year-old students in various countries, by extent to which their schools reported that student learning is hindered by student absenteeism or truancy (table 602.90a), by students skipping classes (table 602.90b), by student use of alcohol or illegal drugs (table 602.90c), by students intimidating or bullying other students (table 602.90d), and by students lacking respect for teachers (table 602.90e)
- Number and percentage of public schools with libraries/media centers and average number of staff per library/media center, by staff type and employment status and school level, enrollment size, and locale (table 701.15)

## List of Figures

Figure	Page
1. The structure of education in the United States . . . . .	14
2. Fall enrollment, total expenditures, and expenditures as a percentage of the gross domestic product (GDP), by level of education: Selected years, 1965–66 through 2016–17 . . . . .	15
3. Percentage of persons 25 years old and over, by highest level of educational attainment: Selected years, 1940 through 2017 . . . . .	16
4. Percentage of persons 25 through 29 years old, by highest level of educational attainment: Selected years, 1940 through 2017 . . . . .	16
5. Percentage distribution of persons 25 through 29 years old, by highest level of educational attainment: 2017 . . . . .	17
6. Percentage of persons 25 through 29 years old, by selected levels of educational attainment and race/ethnicity: 2007 and 2017 . . . . .	17
7. Enrollment, number of teachers, pupil/teacher ratio, and current expenditures in public elementary and secondary schools: Selected years, 1960–61 through 2015–16 . . . . .	73
8. Percentage change in public elementary and secondary enrollment, by state: Fall 2010 to fall 2015 . . . . .	74
9. Total and full-day preprimary enrollment of 3- to 5-year-olds: October 1970 through October 2016 . . . . .	74
10. Percentage of revenue for public elementary and secondary schools, by source of funds: 1970–71 through 2014–15 . . . . .	75
11. Current expenditure per pupil in fall enrollment in public elementary and secondary schools: 1970–71 through 2014–15 . . . . .	75
12. Fall enrollment, degrees conferred, and total expenditures in degree-granting postsecondary institutions: 1960–61 through 2016–17 . . . . .	385
13. Percentage change in total enrollment in degree-granting postsecondary institutions, by state: Fall 2011 to fall 2016 . . . . .	386
14. Enrollment in degree-granting postsecondary institutions, by age of student: Fall 1970 through fall 2027 . . . . .	386
15. Ratio of full-time-equivalent (FTE) students to total FTE staff and to FTE faculty in degree-granting postsecondary institutions, by control of institution: 1995, 2005, and 2016 . . . . .	387
16. Number of bachelor's degrees conferred by postsecondary institutions in selected fields of study: 2005–06, 2010–11, and 2015–16 . . . . .	387
17. Percentage distribution of total revenues of public degree-granting postsecondary institutions, by source of funds: 2015–16 . . . . .	388
18. Percentage distribution of total revenues of private nonprofit degree-granting postsecondary institutions, by source of funds: 2015–16 . . . . .	389
19. Percentage distribution of total revenues of private for-profit degree-granting postsecondary institutions, by source of funds: 2015–16 . . . . .	390
20. Federal on-budget funds for education, by level or other educational purpose: Selected years, 1965 through 2017 . . . . .	640
21. Percentage distribution of federal on-budget funds for education, by agency: Fiscal year 2015 . . . . .	640
22. Unemployment rates of persons 25 to 34 years old, by highest level of educational attainment: Selected years, 1990 through 2017 . . . . .	657

23.	Employment to population ratios of persons 25 to 34 years old, by highest level of educational attainment: Selected years, 1990 through 2017 . . . . .	657
24.	Percentage distribution of 2015–16 high school dropouts and high school completers not enrolled in college, by labor force status: October 2016 . . . . .	658
25.	Median annual earnings of full-time year-round workers 25 years old and over, by highest level of educational attainment and sex: 2016 . . . . .	658
26.	Median annual earnings of 25- to 29-year-old bachelor’s degree holders employed full time, by field of study: 2010 and 2016 . . . . .	659
27.	Percentage change in enrollment, by major areas of the world and level of education: 2000 to 2015 . . . . .	719
28.	Percentage of the population 25 to 34 years old with an associate’s or higher degree, by country: 2016 . . . . .	720
29.	Government and private expenditures on education institutions as a percentage of gross domestic product (GDP), by country: 2014 . . . . .	721
30.	Percentage of children ages 3 to 18 living in households with a computer, by parents’ highest level of educational attainment and type of computer: 2016 . . . . .	767
31.	Percentage of persons age 25 and over using the Internet anywhere, at home, and at the workplace, by highest level of educational attainment: 2011 and 2015 . . . . .	768

## List of Text Tables

<b>Table</b>	<b>Page</b>
A. Total elementary and secondary school enrollment, by overall trends: Selected years, 1949–50 through fall 2027 .....	12
B. Number of public school staff, by selected categories: 1969–70, 1980, and 2015 .....	66
C. Suspension of eligibility for Title IV federal student financial aid due to a drug-related conviction or failure to report conviction status on aid application form: 2007–08 through 2016–17 .....	383
D. Federal on-budget funding for education, by category: Selected fiscal years, 1965 through 2017 .....	631
E. Median annual earnings of full-time year-round workers 25 years old and over, by selected levels of educational attainment and sex: Selected years, 1995 through 2016 .....	656
F. Population and enrollment at different levels in major areas of the world: 2000 and 2015 .....	714

## List of Reference Tables

### Chapter 1. All Levels of Education

#### Population

101.10.	Estimates of resident population, by age group: 1970 through 2017 . . . . .	18
101.20.	Estimates of resident population, by race/ethnicity and age group: Selected years, 1980 through 2017 . . . . .	19
101.30.	Number, percentage, and percentage distribution of total resident population and population under 18 years old, by nativity, race/ethnicity, and selected racial/ethnic subgroups: 2005, 2010, and 2016 . . . . .	20
101.40.	Estimated total and school-age resident populations, by state: Selected years, 1970 through 2016 . . . . .	23

#### Characteristics of Households With Children

102.10.	Number and percentage distribution of family households, by family structure and presence of own children under 18: Selected years, 1970 through 2016 . . . . .	24
102.20.	Number and percentage distribution of children under age 18 and under age 6, by living arrangements, race/ethnicity, and selected racial/ethnic subgroups: 2016 . . . . .	25
102.30.	Median household income, by state: Selected years, 1990 through 2016 . . . . .	27
102.40.	Poverty rates for all persons and poverty status of related children under age 18, by region and state: Selected years, 1990 through 2016 . . . . .	28
102.50.	<i>Poverty status of all persons, persons in families, and related children under age 18, by race/ethnicity: Selected years, 1960 through 2016 . . . . .</i>	Web-Only
102.51.	<i>Supplemental Poverty Measure estimates for all persons, persons in families, and related children under age 18, by race/ethnicity: 2009 through 2016 . . . . .</i>	Web-Only
102.60.	Number and percentage of related children under age 18 living in poverty, by family structure, race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2016 . . . . .	29
102.62.	Percentage of children under age 18 living in poverty, by parents' highest level of educational attainment, child's race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2016 . . . . .	31
102.70.	<i>Number and percentage of students in prekindergarten through grade 12 living in poverty, by control of school: 2000 through 2016 . . . . .</i>	Web-Only

#### Enrollment Rates

103.10.	Percentage of the population 3 to 34 years old enrolled in school, by sex, race/ethnicity, and age group: Selected years, 1980 through 2016 . . . . .	33
103.20.	Percentage of the population 3 to 34 years old enrolled in school, by age group: Selected years, 1940 through 2016 . . . . .	35

#### Educational Attainment

104.10.	Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and sex: Selected years, 1910 through 2017 . . . . .	37
104.20.	Percentage of persons 25 to 29 years old with selected levels of educational attainment, by race/ethnicity and sex: Selected years, 1920 through 2017 . . . . .	40
104.30.	Number of persons age 18 and over, by highest level of educational attainment, sex, race/ethnicity, and age: 2017 . . . . .	43
104.40.	Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment, race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2016 . . . . .	45
104.50.	Persons age 25 and over who hold a bachelor's or higher degree, by sex, race/ethnicity, age group, and field of bachelor's degree: 2016 . . . . .	47
104.60.	<i>Number of persons 25 to 34 years old and percentage with a bachelor's or higher degree, by undergraduate field of study, sex, race/ethnicity, and U.S. nativity and citizenship status: 2016 . . . . .</i>	Web-Only

104.70.	Number and percentage distribution of children under age 18, by parents' highest level of educational attainment, child's age group and race/ethnicity, and household type: 2010 and 2016 . . . . .	48
104.75.	<i>Total number of persons 25 to 64 years old, number with disabilities, and percentage with disabilities, by highest level of educational attainment and other selected characteristics: 2010 and 2017 . . . . .</i>	Web-Only
104.80.	Percentage of persons 18 to 24 years old and age 25 and over, by educational attainment and state: 2000 and 2016 . . . . .	50
104.85.	Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by race/ethnicity and state: 2016 . . . . .	51
104.88.	Rates of high school completion and bachelor's degree attainment among persons age 25 and over, by sex and state: 2016 . . . . .	52
104.90.	<i>Percentage distribution of spring 2002 high school sophomores, by highest level of education completed through 2012 and selected student characteristics: 2012 . . . . .</i>	Web-Only
104.91.	<i>Number and percentage distribution of spring 2002 high school sophomores, by highest level of education completed, and socioeconomic status and selected student characteristics while in high school: 2013 . . . . .</i>	Web-Only
104.92.	<i>Number and percentage distribution of spring 2002 high school sophomores, by highest level of education completed, socioeconomic status and educational expectations while in high school, and college enrollment status 2 years after high school: 2013 . . . . .</i>	Web-Only
104.93.	<i>Sources of college information for spring 2002 high school sophomores who expected to attend a postsecondary institution, by highest level of education completed and socioeconomic status while in high school: 2013 . . . . .</i>	Web-Only
104.95.	<i>Number of persons age 25 and over in metropolitan areas with populations greater than 1 million and rates of high school completion and bachelor's degree attainment among persons in this age group, by sex: 2017 . . . . .</i>	Web-Only

**Summary of Enrollment, Teachers, and Schools**

105.10.	Projected number of participants in educational institutions, by level and control of institution: Fall 2017 . . . . .	53
105.20.	Enrollment in elementary, secondary, and degree-granting postsecondary institutions, by level and control of institution, enrollment level, and attendance status and sex of student: Selected years, fall 1990 through fall 2027 . . . . .	54
105.30.	Enrollment in elementary, secondary, and degree-granting postsecondary institutions, by level and control of institution: Selected years, 1869–70 through fall 2027 . . . . .	55
105.40.	Number of teachers in elementary and secondary schools, and faculty in degree-granting postsecondary institutions, by control of institution: Selected years, fall 1970 through fall 2027 . . . . .	56
105.50.	Number of educational institutions, by level and control of institution: Selected years, 1980–81 through 2015–16 . . . . .	57

**Summary of Finances**

106.10.	Expenditures of educational institutions related to the gross domestic product, by level of institution: Selected years, 1929–30 through 2016–17 . . . . .	58
106.20.	Expenditures of educational institutions, by level and control of institution: Selected years, 1899–1900 through 2016–17 . . . . .	59
106.30.	Amount and percentage distribution of direct general expenditures of state and local governments, by function: Selected years, 1970–71 through 2014–15 . . . . .	60
106.40.	Direct general expenditures of state and local governments for all functions and for education, by level of education and state: 2013–14 and 2014–15 . . . . .	61
106.50.	Direct general expenditures of state and local governments per capita for all functions and for education, by level of education and state: 2013–14 and 2014–15 . . . . .	63
106.60.	<i>Gross domestic product, state and local expenditures, national income, personal income, disposable personal income, median family income, and population: Selected years, 1929 through 2017 . . . . .</i>	Web-Only

106.70.	Gross domestic product price index, Consumer Price Index, education price indexes, and federal budget composite deflator: Selected years, 1919 through 2017 .....	64
---------	---	----

## Chapter 2. Elementary and Secondary Education

### *Historical*

201.10.	Historical summary of public elementary and secondary school statistics: Selected years, 1869–70 through 2014–15 .....	76
201.20.	Enrollment in grades 9 through 12 in public and private schools compared with population 14 to 17 years of age: Selected years, 1889–90 through fall 2017 .....	78

### *Enrollment Status and Child Care Arrangements of Young Children*

202.10.	Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by age of child, level of program, control of program, and attendance status: Selected years, 1970 through 2016 .....	79
202.20.	Percentage of 3-, 4-, and 5-year-old children enrolled in preprimary programs, by level of program, attendance status, and selected child and family characteristics: 2016 .....	81
202.25.	<i>Percentage of 3- and 4-year-old children enrolled in school, by race/ethnicity and state: 2016</i> .....	Web-Only
202.30.	Number of children under 6 years old and not yet enrolled in kindergarten, percentage participating in center-based programs, average weekly hours in nonparental care, and percentage in various types of primary care arrangements, by selected child and family characteristics: 2016 .....	82
202.30a.	Percentage distribution of children who were under 6 years old and not yet in kindergarten, by main reason household wanted a child care program, primary reason for difficulty finding child care, and selected child and family characteristics: 2016 .....	84
202.30b.	Percentage distribution of children who were under 6 years old and not yet in kindergarten, by reported availability of good child care choices, amount of difficulty finding the type of child care wanted, and selected child and family characteristics: 2012 and 2016 .....	86
202.30c.	Number of children under 6 years old and not yet in kindergarten whose families paid for child care, and families' average out-of-pocket expense, by type of child care arrangement and selected child and family characteristics: 2001 and 2016 .....	88
202.35.	<i>Percentage distribution of 4- and 5-year-old children who are not yet in kindergarten, by type of child care arrangement and selected characteristics: Selected years, 1995 through 2016</i> .....	Web-Only
202.40.	<i>Child care arrangements of 3- to 5-year-old children who are not yet in kindergarten, by age and race/ethnicity: Selected years, 1991 through 2016</i> .....	Web-Only
202.50.	<i>Percentage distribution of children at about 2 and 4 years of age, by type of child care arrangement and selected child and family characteristics: 2003–04 and 2005–06</i> .....	Web-Only
202.60.	<i>Percentage distribution of quality rating of child care arrangements of children at about 4 years of age, by type of arrangement and selected child and family characteristics: 2005–06</i> .....	Web-Only
202.65.	<i>Percentage distribution of first-time kindergartners, by primary type of child care arrangement during the year prior to kindergarten entry and selected child, family, and school characteristics: 2010–11</i> .....	Web-Only
202.70.	<i>Number and percentage distribution of 3- to 5-year-olds not enrolled in school and children of any age enrolled in prekindergarten through second grade, by grade level and selected maternal and household characteristics: Selected years, 2001 through 2016</i> .....	Web-Only

### *Enrollment in Public Schools*

203.10.	Enrollment in public elementary and secondary schools, by level and grade: Selected years, fall 1980 through fall 2027 .....	90
203.20.	Enrollment in public elementary and secondary schools, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2027 .....	91

203.25.	Public school enrollment in prekindergarten through grade 8, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2027 . . . . .	93
203.30.	Public school enrollment in grades 9 through 12, by region, state, and jurisdiction: Selected years, fall 1990 through fall 2027 . . . . .	95
203.40.	Enrollment in public elementary and secondary schools, by level, grade, and state or jurisdiction: Fall 2015 . . . . .	97
203.50.	Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and region: Selected years, fall 1995 through fall 2027 . . . . .	99
203.60.	Enrollment and percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and level of education: Fall 1999 through fall 2027 . . . . .	100
203.70.	Percentage distribution of enrollment in public elementary and secondary schools, by race/ethnicity and state or jurisdiction: Fall 2000 and fall 2015 . . . . .	102
203.75.	Enrollment and percentage distribution of enrollment in public schools, by family poverty rate of 5- to 17-year-olds living in the school district, student race/ethnicity, region, and school locale: 2013–14 . . . . .	103
203.80.	Average daily attendance (ADA) in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2014–15 . . . . .	105
203.90.	Average daily attendance (ADA) as a percentage of total enrollment, school day length, and school year length in public schools, by school level and state: 2007–08 and 2011–12 . . . . .	106

**Participation in Public School Services**

204.10.	Number and percentage of public school students eligible for free or reduced-price lunch, by state: Selected years, 2000–01 through 2015–16 . . . . .	107
204.20.	English language learner (ELL) students enrolled in public elementary and secondary schools, by state: Selected years, fall 2000 through fall 2015 . . . . .	108
204.27.	English language learner (ELL) students enrolled in public elementary and secondary schools, by home language, grade, and selected student characteristics: Selected years, 2008–09 through fall 2015 . . . . .	109
204.30.	Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by type of disability: Selected years, 1976–77 through 2015–16 . . . . .	110
204.40.	Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by race/ethnicity and age group: 2000–01 through 2015–16 . . . . .	111
204.50.	Children 3 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by age group and sex, race/ethnicity, and type of disability: 2015–16 . . . . .	112
204.60.	Percentage distribution of students 6 to 21 years old served under Individuals with Disabilities Education Act (IDEA), Part B, by educational environment and type of disability: Selected years, fall 1989 through fall 2015 . . . . .	113
204.70.	Number and percentage of children served under Individuals with Disabilities Education Act (IDEA), Part B, by age group and state or jurisdiction: Selected years, 1990–91 through 2015–16 . . . . .	114
204.75a.	Homeless students enrolled in public elementary and secondary schools, by grade, primary nighttime residence, and selected student characteristics: 2009–10 through 2015–16 . . . . .	115
204.75b.	Number and percentage of homeless students enrolled in public elementary and secondary schools, by school district locale, primary nighttime residence, and selected student characteristics: 2015–16 . . . . .	116
204.75c.	Number and percentage of homeless students enrolled in public elementary and secondary schools, by state or jurisdiction: 2009–10 through 2015–16 . . . . .	117
204.75d.	Number and percentage of homeless students enrolled in public elementary and secondary schools, by primary nighttime residence, selected student characteristics, and state or jurisdiction: 2015–16 . . . . .	118
204.75e.	Number and percentage of homeless students enrolled in public elementary and secondary schools in the 120 largest school districts, by primary nighttime residence and selected student characteristics: 2015–16 . . . . .	119

204.80.	<i>Number of public school students enrolled in gifted and talented programs, by sex, race/ethnicity, and state: Selected years, 2004 through 2013–14</i> . . . . .	Web-Only
204.90.	Percentage of public school students enrolled in gifted and talented programs, by sex, race/ethnicity, and state: Selected years, 2004 through 2013–14 . . . . .	122

### **Private School Education**

205.10.	Private elementary and secondary school enrollment and private enrollment as a percentage of total enrollment in public and private schools, by region and grade level: Selected years, fall 1995 through fall 2015 . . . . .	123
205.15.	Private elementary and secondary school enrollment, percentage distribution of private school enrollment, and private enrollment as a percentage of total enrollment in public and private schools, by school orientation and grade: Selected years, fall 1999 through fall 2015 . . . . .	124
205.20.	Enrollment and percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and grade level: Selected years, fall 1995 through fall 2015 . . . . .	126
205.30.	Percentage distribution of students enrolled in private elementary and secondary schools, by school orientation and selected characteristics: Selected years, fall 2005 through fall 2015 . . . . .	128
205.40.	Number and percentage distribution of private elementary and secondary students, teachers, and schools, by orientation of school and selected characteristics: Fall 1999, fall 2009, and fall 2015 . . . . .	129
205.50.	<i>Private elementary and secondary enrollment, number of schools, and average tuition, by school level, orientation, and tuition: Selected years, 1999–2000 through 2011–12</i> . . . . .	Web-Only
205.60.	<i>Private elementary and secondary school full-time-equivalent (FTE) staff and student to FTE staff ratios, by orientation of school, school level, and type of staff: 2007–08 and 2011–12</i> . . . . .	Web-Only
205.70.	<i>Enrollment and instructional staff in Catholic elementary and secondary schools, by level: Selected years, 1919–20 through 2016–17</i> . . . . .	Web-Only
205.80.	Private elementary and secondary schools, enrollment, teachers, and high school graduates, by state: Selected years, 2005 through 2015 . . . . .	131

### **Homeschooling and School Choice**

206.10.	Number and percentage of homeschooled students ages 5 through 17 with a grade equivalent of kindergarten through 12th grade, by selected child, parent, and household characteristics: Selected years, 1999 through 2016 . . . . .	132
206.20.	Percentage distribution of students ages 5 through 17 attending kindergarten through 12th grade, by school type or participation in homeschooling and selected child, parent, and household characteristics: Selected years, 1999 through 2016 . . . . .	133
206.30.	Percentage of students enrolled in grades 1 through 12, by public school type and charter status, private school type, and selected child and household characteristics: 2016 . . . . .	135
206.40.	Percentage of students enrolled in grades 1 through 12 whose parents reported having public school choice, considered other schools, reported current school was their first choice, or moved to their current neighborhood for the public school, by school type and selected child and household characteristics: 2016 . . . . .	136
206.50.	Percentage of students enrolled in grades 3 through 12 whose parents were satisfied or dissatisfied with various aspects of their children’s schools, by school type: Selected years, 2003 through 2016 . . . . .	137

### **Parent Involvement in Education**

207.10.	Number of 3- to 5-year-olds not yet enrolled in kindergarten and percentage participating in home literacy activities with a family member, by type and frequency of activity and selected child and family characteristics: 2001, 2012, and 2016 . . . . .	138
---------	---	-----

207.20.	Percentage of kindergartners through fifth-graders whose parents reported doing education-related activities with their children in the past month, by selected child, parent, and school characteristics: 2003, 2012, and 2016 . . . . .	140
207.30.	Percentage of kindergartners through fifth-graders whose parents reported doing education-related activities with their children in the past week, by selected child, parent, and school characteristics: 2003, 2012, and 2016 . . . . .	142
207.40.	Percentage of elementary and secondary school children whose parents were involved in school activities, by selected child, parent, and school characteristics: 2003, 2012, and 2016 . . . . .	143

**Teachers and Pupil/Teacher Ratios**

208.10.	Public elementary and secondary pupil/teacher ratios, by selected school characteristics: Selected years, fall 1990 through fall 2015 . . . . .	144
208.20.	Public and private elementary and secondary teachers, enrollment, pupil/teacher ratios, and new teacher hires: Selected years, fall 1955 through fall 2027 . . . . .	145
208.30.	Public elementary and secondary teachers, by level and state or jurisdiction: Selected years, fall 2000 through fall 2015 . . . . .	146
208.40.	Public elementary and secondary teachers, enrollment, and pupil/teacher ratios, by state or jurisdiction: Selected years, fall 2000 through fall 2015 . . . . .	147

**Teacher Characteristics, Class Sizes, and Assignments**

209.05.	<i>Number and percentage of persons completing a teacher preparation program and receiving an initial teaching credential, by state or jurisdiction: 2012–13 . . . . .</i>	Web-Only
209.10.	Number and percentage distribution of teachers in public and private elementary and secondary schools, by selected teacher characteristics: Selected years, 1987–88 through 2015–16 . . . . .	148
209.20.	Number, highest degree, and years of teaching experience of teachers in public and private elementary and secondary schools, by selected teacher characteristics: Selected years, 1999–2000 through 2015–16 . . . . .	150
209.21.	Number and percentage distribution of teachers in public traditional and charter elementary and secondary schools, by instructional level and selected teacher and school characteristics: 2015–16 . . . . .	152
209.22.	Number and percentage distribution of teachers in public elementary and secondary schools, by instructional level and selected teacher and school characteristics: 1999–2000 and 2015–16 . . . . .	153
209.23.	<i>Number and percentage distribution of teachers in public elementary and secondary schools, by race/ethnicity and selected teacher and school characteristics: 2015–16 . . . . .</i>	Web-Only
209.24.	Number and percentage distribution of teachers in public elementary and secondary schools, by whether they entered teaching through an alternative route to certification program and selected teacher and school characteristics: 2015–16 . . . . .	155
209.27.	<i>Number and percentage of teachers who are military veterans, by control of school; sex, race/ethnicity, and age group of teacher; region; and level of instruction: 2016 . . . . .</i>	Web-Only
209.27a.	<i>Number and percentage of teachers who are military veterans, by control of school; sex, race/ethnicity, and age group of teacher; region; and level of instruction: 2006 . . . . .</i>	Web-Only
209.30.	Highest degree earned, years of full-time teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 2011–12 . . . . .	156
209.50.	Percentage of public school teachers of grades 9 through 12, by field of main teaching assignment and selected demographic and educational characteristics: 2015–16 . . . . .	157

**Teacher Attitudes and Teacher Mobility**

210.10.	Percentage of teachers indicating that certain issues are serious problems in their schools, by level and control of school: Selected years, 1987–88 through 2015–16 . . . . .	158
210.20.	<i>Percentage of teachers agreeing with statements about teaching and school conditions, by control and level of school: Selected years, 1993–94 through 2015–16 . . . . .</i>	Web-Only

210.30.	Mobility of public elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987–88 through 2012–13 .....	159
210.31.	<i>Mobility of private elementary and secondary teachers, by selected teacher and school characteristics: Selected years, 1987–88 through 2008–09 .....</i>	Web-Only

### **Teacher Salaries**

211.10.	<i>Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 2011–12 and 2015–16 .....</i>	Web-Only
211.20.	Average base salary for full-time teachers in public elementary and secondary schools, by highest degree earned and years of teaching experience: Selected years, 1990–91 through 2015–16 .....	160
211.30.	Average base salary for full-time public elementary and secondary school teachers with a bachelor's degree as their highest degree, by years of teaching experience and state: Selected years, 1993–94 through 2011–12 .....	162
211.40.	Average base salary for full-time public elementary and secondary school teachers with a master's degree as their highest degree, by years of teaching experience and state: 1993–94 through 2011–12 .....	163
211.50.	Estimated average annual salary of teachers in public elementary and secondary schools: Selected years, 1959–60 through 2016–17 .....	164
211.60.	Estimated average annual salary of teachers in public elementary and secondary schools, by state: Selected years, 1969–70 through 2016–17 .....	165

### **School Principals**

212.08.	Number and percentage distribution of principals in public and private elementary and secondary schools, by selected characteristics: Selected years, 1993–94 through 2015–16 .....	166
212.10.	<i>Highest degree, average years of experience, and salaries of principals in public and private elementary and secondary schools, by selected characteristics: Selected years, 1993–94 through 2015–16 .....</i>	Web-Only
212.20.	<i>Mobility of public elementary and secondary principals, by selected principal and school characteristics: 2007–08 to 2008–09 and 2011–12 to 2012–13 .....</i>	Web-Only
212.30.	<i>Number and percentage distribution of public and private school principals who left the profession during the past year, by total years of experience as a principal and occupational status: 2012–13 .....</i>	Web-Only

### **School Staff**

213.10.	Staff employed in public elementary and secondary school systems, by type of assignment: Selected years, 1949–50 through fall 2015 .....	168
213.20.	Staff employed in public elementary and secondary school systems, by type of assignment and state or jurisdiction: Fall 2015 .....	169
213.40.	Staff, teachers, and teachers as a percentage of staff in public elementary and secondary school systems, by state or jurisdiction: Selected years, fall 2000 through fall 2015 .....	170
213.50.	Staff, enrollment, and pupil/staff ratios in public elementary and secondary school systems, by state or jurisdiction: Selected years, fall 2000 through fall 2015 .....	171

### **Overview of Schools and School Districts**

214.10.	Number of public school districts and public and private elementary and secondary schools: Selected years, 1869–70 through 2015–16 .....	172
214.20.	Number and percentage distribution of regular public school districts and students, by enrollment size of district: Selected years, 1979–80 through 2015–16 .....	173
214.30.	Number of public elementary and secondary education agencies, by type of agency and state or jurisdiction: 2014–15 and 2015–16 .....	174
214.40.	Public elementary and secondary school enrollment, number of schools, and other selected characteristics, by locale: Fall 2012 through fall 2015 .....	175

**Large School Districts**

215.10.	<i>Selected statistics on enrollment, teachers, dropouts, and graduates in public school districts enrolling more than 15,000 students: Selected years, 1990 through 2015</i> . . . . .	Web-Only
215.20.	<i>Revenues, expenditures, poverty rate, and Title I allocations of public school districts enrolling more than 15,000 students: 2014–15 and fiscal year 2017</i> . . . . .	Web-Only
215.30.	Enrollment, poverty, and federal funds for the 120 largest school districts, by enrollment size in 2015: Selected years, 2014–15 through 2017 . . . . .	177

**Public Schools**

216.10.	Public elementary and secondary schools, by level of school: Selected years, 1967–68 through 2015–16 . . . . .	180
216.20.	Number and enrollment of public elementary and secondary schools, by school level, type, and charter and magnet status: Selected years, 1990–91 through 2015–16 . . . . .	181
216.30.	Number and percentage distribution of public elementary and secondary students and schools, by traditional or charter school status and selected characteristics: Selected years, 2000–01 through 2015–16 . . . . .	182
216.40.	Number and percentage distribution of public elementary and secondary schools and enrollment, by level, type, and enrollment size of school: 2013–14, 2014–15, and 2015–16 . . . . .	183
216.43.	<i>Number of public elementary and secondary schools reporting enrollment, by enrollment size of school and state: 2014–15</i> . . . . .	Web-Only
216.44.	<i>Enrollment of public elementary and secondary schools reporting enrollment, by enrollment size of school and state: 2014–15</i> . . . . .	Web-Only
216.45.	Average enrollment and percentage distribution of public elementary and secondary schools, by level, type, and enrollment size: Selected years, 1982–83 through 2015–16 . . . . .	184
216.50.	Number and percentage distribution of public elementary and secondary school students, by percentage of minority enrollment in the school and student’s racial/ethnic group: Selected years, fall 1995 through fall 2015 . . . . .	185
216.55.	Number and percentage distribution of public elementary and secondary school students, by percentage of student’s racial/ethnic group enrolled in the school and student’s racial/ethnic group: Selected years, fall 1995 through fall 2015 . . . . .	186
216.60.	Number and percentage distribution of public school students, by percentage of students in school who are eligible for free or reduced-price lunch, school level, locale, and student race/ethnicity: Fall 2015 . . . . .	187
216.70.	Public elementary and secondary schools, by level, type, and state or jurisdiction: 1990–91, 2000–01, 2010–11, and 2015–16 . . . . .	188
216.75.	Public elementary schools, by grade span, average school enrollment, and state or jurisdiction: 2015–16 . . . . .	189
216.80.	Public secondary schools, by grade span, average school enrollment, and state or jurisdiction: 2015–16 . . . . .	190
216.90.	Public elementary and secondary charter schools and enrollment, by state: Selected years, 2000–01 through 2015–16 . . . . .	191
216.90a.	<i>Percentage distribution of enrollment in public traditional and charter schools and percentage of schools, by race/ethnicity, racial/ethnic concentration, and state: Fall 2014</i> . . . . .	Web-Only
216.90b.	<i>Percentage distribution of public traditional and charter school enrollment and schools, by school’s level of free or reduced-price lunch eligibility and state: Fall 2014</i> . . . . .	Web-Only
216.90c.	<i>Percentage distribution of public traditional and charter schools, by school level, school size, and state: Fall 2014</i> . . . . .	Web-Only
216.90d.	<i>Percentage distribution of public traditional and charter schools, by school locale and state: Fall 2014</i> . . . . .	Web-Only
216.95.	<i>Number and enrollment of public elementary and secondary schools that have closed, by school level, type, and charter status: Selected years, 1995–96 through 2015–16</i> . . . . .	Web-Only

**School Facilities**

217.10.	<i>Functional age of public schools' main instructional buildings and percentage of schools with permanent and portable (temporary) buildings, by selected school characteristics and condition of permanent and portable buildings: 2012</i> . . . . .	Web-Only
217.15.	<i>Percentage of public schools with plans for major repair, renovation, or replacement of building systems or features in the next 2 years and percentage distribution of schools with such plans, by selected school characteristics, type of system or feature, and main reason for the plans: 2012–13</i> . . . . .	Web-Only
217.20.	<i>Percentage of public schools with enrollment under, at, or over capacity, by selected school characteristics: 1999 and 2005</i> . . . . .	Web-Only

**Use of Computers and Technology**

218.10.	Number and internet access of instructional computers and rooms in public schools, by selected school characteristics: Selected years, 1995 through 2008 . . . . .	192
218.20.	<i>Percentage of public school districts with students enrolled in technology-based distance education courses and number of enrollments in such courses, by instructional level and district characteristics: 2002–03, 2004–05, and 2009–10</i> . . . . .	Web-Only
218.40.	<i>Percentage of 4th-, 8th-, and 12th-grade public school students with their own or a shared digital device at home, by selected student and school characteristics: 2015</i> . . . . .	Web-Only
218.45.	<i>Percentage distribution of 4th-, 8th-, and 12th-grade public school students, by when student first used a laptop or desktop computer and selected student and school characteristics: 2015</i> . . . . .	Web-Only
218.50.	<i>Percentage distribution of 8th-grade public school students, by number of hours they spend using a laptop or desktop computer for schoolwork on a weekday and selected student and school characteristics: 2015</i> . . . . .	Web-Only
218.70.	<i>Number and percentage distribution of 5- to 17-year-old students, by home internet access, poverty status, and locale: 2015</i> . . . . .	Web-Only
218.71.	<i>Number and percentage distribution of 5- to 17-year-old students, by home internet access, race/ethnicity, and locale: 2015</i> . . . . .	Web-Only

**High School Completers and Dropouts**

219.10.	High school graduates, by sex and control of school: Selected years, 1869–70 through 2027–28 . . . . .	193
219.20.	Public high school graduates, by region, state, and jurisdiction: Selected years, 1980–81 through 2027–28 . . . . .	194
219.30.	Public high school graduates, by race/ethnicity: 1998–99 through 2027–28 . . . . .	196
219.32.	Public high school graduates, by sex, race/ethnicity, and state or jurisdiction: 2012–13 . . . . .	197
219.35.	Public high school averaged freshman graduation rate (AFGR), by state or jurisdiction: Selected years, 1990–91 through 2012–13 . . . . .	199
219.40.	Public high school averaged freshman graduation rate (AFGR), by sex, race/ethnicity, and state or jurisdiction: 2012–13 . . . . .	200
219.46.	Public high school 4-year adjusted cohort graduation rate (ACGR), by selected student characteristics and state: 2010–11 through 2015–16 . . . . .	201
219.50.	Number and percentage of 9th- to 12th-graders who dropped out of public schools (event dropout rate), by race/ethnicity, grade, and state or jurisdiction: 2009–10 . . . . .	202
219.55.	Among 15- to 24-year-olds enrolled in grades 10 through 12, percentage who dropped out (event dropout rate), by sex and race/ethnicity: 1972 through 2016 . . . . .	203
219.57.	Among 15- to 24-year-olds enrolled in grades 10 through 12, percentage who dropped out (event dropout rate), and number and percentage distribution of 15- to 24-year-olds in grades 10 through 12, by selected characteristics: Selected years, 2006 through 2016 . . . . .	204
219.60.	Number and percentage of people taking, completing, and passing high school equivalency tests, by test taken and state or jurisdiction: 2013 and 2015 . . . . .	205

219.62a.	<i>Percentage distribution of 2009 ninth-graders, by high school persistence status in 2012 and selected student characteristics: 2009 and 2012</i> . . . . .	Web-Only
219.62b.	<i>Percentage distribution of 2009 ninth-graders who were current high school dropouts, stopouts, and continuous students in 2012, by selected student characteristics: 2009 and 2012</i> . . . . .	Web-Only
219.62c.	<i>Among 2009 ninth-graders who were dropouts in 2012, percentage citing various reasons for leaving high school, by selected student characteristics: 2012</i> . . . . .	Web-Only
219.65.	High school completion rate of 18- to 24-year-olds not enrolled in high school (status completion rate), by sex and race/ethnicity: 1972 through 2016 . . . . .	207
219.67.	Number and high school completion rate of 18- to 24-year-olds not enrolled in high school (status completion rate), by selected characteristics: Selected years, 2006 through 2016 . . . . .	208
219.69.	<i>High school completion rate of 18- to 24-year-olds not enrolled in high school (status completion rate), by English speaking ability and race/ethnicity: 2003, 2005, and 2013</i> . . .	Web-Only
219.70.	Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by sex and race/ethnicity: Selected years, 1960 through 2016 . . . . .	209
219.71.	Population 16 to 24 years old and number of 16- to 24-year-old high school dropouts (status dropouts), by sex and race/ethnicity: Selected years, 1970 through 2016 . . . . .	210
219.73.	Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate) and number and percentage distribution of 16- to 24-year-olds, by selected characteristics: Selected years, 2006 through 2016 . . . . .	212
219.75.	Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by income level, and percentage distribution of status dropouts, by labor force status and years of school completed: Selected years, 1970 through 2016 . . . . .	213
219.76.	<i>Population 16 to 24 years old and number of 16- to 24-year-old high school dropouts (status dropouts), by income level, labor force status, and years of school completed: 1970 through 2016</i> . . . . .	Web-Only
219.80.	Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate) and number of status dropouts, by noninstitutionalized or institutionalized status, birth in or outside of the United States, and selected characteristics: Selected years, 2006 through 2016 . . . . .	214
219.81.	<i>Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate) and number of status dropouts, by noninstitutionalized or institutionalized status, birth in or outside of the United States, and selected characteristics: 2012 and 2013</i> . . . . .	Web-Only
219.83.	<i>Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate), by English speaking ability and race/ethnicity: 2003, 2005, and 2013</i> . . . . .	Web-Only
219.85a.	<i>Percentage of high school dropouts among noninstitutionalized and institutionalized persons 16 through 24 years old (status dropout rate), by race/ethnicity and state: 2016</i> . . . . .	Web-Only
219.90.	Number and percentage distribution of 14- through 21-year-old students served under Individuals with Disabilities Education Act (IDEA), Part B, who exited school, by exit reason, sex, race/ethnicity, age, and type of disability: 2013–14 and 2014–15 . . . . .	216

**Skills of Young Children**

220.10.	<i>Percentage of children demonstrating specific cognitive and motor skills at about 9 months of age, by child's age and selected characteristics: 2001–02</i> . . . . .	Web-Only
220.20.	<i>Percentage of children demonstrating specific cognitive skills, motor skills, and secure emotional attachment to parents at about 2 years of age, by selected characteristics: 2003–04</i> . . . . .	Web-Only
220.30.	Children's reading, language, mathematics, color knowledge, and fine motor skills at about 4 years of age, by child's age and selected characteristics: 2005–06 . . . . .	218
220.39.	Percentage distribution of fall 2010 first-time kindergartners, by two risk factors (low parental education and family poverty) and selected child, family, and school characteristics: 2010–11 . . . . .	219
220.40.	Fall 2010 first-time kindergartners' reading scale scores through spring of fourth grade, by selected child, family, and school characteristics during the kindergarten year: Fall 2010 and spring 2011 through spring 2015 . . . . .	220

220.41.	<i>Fall 2010 first-time kindergartners' mathematics scale scores through spring of fourth grade, by selected child, family, and school characteristics during the kindergarten year: Fall 2010 and spring 2011 through spring 2015</i> .....	Web-Only
220.42.	<i>Fall 2010 first-time kindergartners' science scale scores through spring of fourth grade, by selected child, family, and school characteristics during the kindergarten year: Spring 2011 through spring 2015</i> .....	Web-Only
220.50.	<i>Number and percentage distribution of kindergartners, by fall 2010 kindergarten entry status and selected child, family, and school characteristics: 2010–11</i> .....	Web-Only
220.55.	<i>Percentage of fall 2010 first-time kindergartners, by type of peer victimization reported by child in third grade, frequency with which child reported being victimized in third grade, and selected child, family, and school characteristics: Spring 2014</i> .....	Web-Only
220.56.	<i>Percentage of fall 2010 first-time kindergartners, by type of victimization their teacher reported that they perpetrated against peers in third grade, frequency with which the teacher reported that they victimized their peers, and selected child, family, and school characteristics: Spring 2014</i> .....	Web-Only
220.57.	<i>Fall 2010 first-time kindergartners' scores on various academic, social, and emotional scales in third grade, by frequency of being victimized by their peers, frequency of victimizing their peers, and type of victimization: Spring 2014</i> .....	Web-Only
220.60.	<i>Fall 2010 kindergartners' reading, mathematics, science, and approaches to learning scale scores, by kindergarten entry status and time of assessment: Fall 2010 and spring 2011 through spring 2015</i> .....	Web-Only
220.70.	<i>Mean reading scale scores and specific reading skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007</i> .....	Web-Only
220.80.	<i>Mean mathematics and science scale scores and specific mathematics skills of fall 1998 first-time kindergartners, by time of assessment and selected characteristics: Selected years, fall 1998 through spring 2007</i> .....	Web-Only

### **Reading Achievement**

221.10.	Average National Assessment of Educational Progress (NAEP) reading scale score, by sex, race/ethnicity, and grade: Selected years, 1992 through 2017 .....	221
221.12.	Average National Assessment of Educational Progress (NAEP) reading scale score and percentage of students attaining NAEP reading achievement levels, by selected school and student characteristics and grade: Selected years, 1992 through 2017 .....	222
221.20.	Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading achievement levels, by grade and selected student characteristics: Selected years, 2003 through 2017 .....	223
221.30.	<i>Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of students, by age, amount of reading for school and for fun, and time spent on homework and watching TV/video: Selected years, 1984 through 2012</i> ....	Web-Only
221.32.	Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and private schools, by selected characteristics: 2017 .....	224
221.32a.	<i>Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and Catholic schools, by selected characteristics: 2015</i> .....	Web-Only
221.35.	<i>Average National Assessment of Educational Progress (NAEP) reading scale score and percentage distribution of 4th- and 8th-graders, by computer use and internet access at home and other selected characteristics: 2015</i> .....	Web-Only
221.40.	Average National Assessment of Educational Progress (NAEP) reading scale score of 4th-grade public school students, by state: Selected years, 1992 through 2017 .....	225
221.50.	<i>Average National Assessment of Educational Progress (NAEP) reading scale score of 4th-grade public school students, by race/ethnicity, school's rate of free or reduced-price lunch eligibility, and state: 2017</i> .....	Web-Only

221.60.	Average National Assessment of Educational Progress (NAEP) reading scale score of 8th-grade public school students, by state: Selected years, 1998 through 2017 . . . . .	226
221.65.	<i>Average National Assessment of Educational Progress (NAEP) reading scale score of 8th-grade public school students, by race/ethnicity, parents' highest level of education, and state: 2017 . . . . .</i>	Web-Only
221.70.	Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-graders in public schools and percentage scoring at or above selected reading achievement levels, by English language learner (ELL) status and state: 2017 . . . . .	227
221.75.	<i>Average National Assessment of Educational Progress (NAEP) reading scale score and standard deviation, by selected student characteristics, percentile, and grade: Selected years, 1992 through 2017 . . . . .</i>	Web-Only
221.80.	Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-grade public school students and percentage attaining selected reading achievement levels, by race/ethnicity and jurisdiction or specific urban district: Selected years, 2009 through 2017 . . . . .	228
221.85.	Average National Assessment of Educational Progress (NAEP) reading scale score, by age and selected student characteristics: Selected years, 1971 through 2012 . . . . .	229
221.90.	<i>Percentage of students at or above selected National Assessment of Educational Progress (NAEP) reading score levels, by age, sex, and race/ethnicity: Selected years, 1971 through 2012 . . . . .</i>	Web-Only
<b>Mathematics Achievement</b>		
222.10.	Average National Assessment of Educational Progress (NAEP) mathematics scale score, by sex, race/ethnicity, and grade: Selected years, 1990 through 2017 . . . . .	230
222.12.	Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage of students attaining NAEP mathematics achievement levels, by selected school and student characteristics and grade: Selected years, 1990 through 2017 . . . . .	231
222.20.	Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics achievement levels, by grade and selected student characteristics: Selected years, 2003 through 2017 . . . . .	232
222.30.	<i>Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-graders with various attitudes toward mathematics and percentage reporting these attitudes, by selected student characteristics: 2015 . . . . .</i>	Web-Only
222.32.	Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and private schools, by selected characteristics: 2017 . . . . .	233
222.32a.	<i>Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 4th- and 8th-graders in traditional public, public charter, and Catholic schools, by selected characteristics: 2015 . . . . .</i>	Web-Only
222.35.	Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 12th-graders, by frequency of experiencing various attitudes in math class and selected student characteristics: 2015 . . . . .	234
222.40.	Average National Assessment of Educational Progress (NAEP) mathematics scale score of high school graduates at grade 12, by highest mathematics course taken in high school and selected student and school characteristics: 2009 . . . . .	235
222.45.	<i>Average National Assessment of Educational Progress (NAEP) mathematics scale score and percentage distribution of 4th- and 8th-graders, by computer use and internet access at home and other selected characteristics: 2015 . . . . .</i>	Web-Only
222.50.	Average National Assessment of Educational Progress (NAEP) mathematics scale score of 4th-grade public school students, by state: Selected years, 1992 through 2017 . . . . .	236
222.55.	<i>Average National Assessment of Educational Progress (NAEP) mathematics scale score of 4th-grade public school students, by race/ethnicity, school's rate of free or reduced-price lunch eligibility, and state: 2017 . . . . .</i>	Web-Only

222.60.	Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students, by state: Selected years, 1990 through 2017 . . . . .	237
222.70.	<i>Average National Assessment of Educational Progress (NAEP) mathematics scale score of 8th-grade public school students, by race/ethnicity, parents' highest level of education, and state: 2017 . . . . .</i>	Web-Only
222.80.	Average National Assessment of Educational Progress (NAEP) mathematics scale scores of 4th- and 8th-grade public school students and percentage attaining selected mathematics achievement levels, by race/ethnicity and jurisdiction or specific urban district: Selected years, 2009 through 2017 . . . . .	238
222.85.	Average National Assessment of Educational Progress (NAEP) mathematics scale score, by age and selected student characteristics: Selected years, 1973 through 2012 . . . . .	239
222.90.	<i>Percentage of students at or above selected National Assessment of Educational Progress (NAEP) mathematics score levels, by age, sex, and race/ethnicity: Selected years, 1978 through 2012 . . . . .</i>	Web-Only
222.95.	<i>National Assessment of Educational Progress (NAEP) mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: Selected years, 1978 through 2012 . . . . .</i>	Web-Only

### Science Achievement

223.10.	Average National Assessment of Educational Progress (NAEP) science scale score, standard deviation, and percentage of students attaining science achievement levels, by grade level, selected student and school characteristics, and percentile: 2009, 2011, and 2015 . . . . .	240
223.20.	<i>Average National Assessment of Educational Progress (NAEP) science scale scores of 4th- and 8th-grade public school students, by race/ethnicity and state: 2009, 2011, and 2015 . . . . .</i>	Web-Only
223.25.	<i>Average National Assessment of Educational Progress (NAEP) science scale scores of 8th-graders with various attitudes toward science and percentage reporting these attitudes, by selected student characteristics: 2015 . . . . .</i>	Web-Only
223.30.	<i>Average National Assessment of Educational Progress (NAEP) science scale scores of 12th-graders with various attitudes toward science and percentage reporting these attitudes, by selected student characteristics: 2015 . . . . .</i>	Web-Only
223.40.	<i>Average National Assessment of Educational Progress (NAEP) science scale score and percentage distribution of 4th- and 8th-graders, by computer use and internet access at home and other selected characteristics: 2015 . . . . .</i>	Web-Only

### Achievement in Other Subjects

224.10.	Average National Assessment of Educational Progress (NAEP) music and visual arts scale scores of 8th-graders, percentage distribution by frequency of instruction at their school, and percentage participating in selected musical activities in school, by selected characteristics: 2016 . . . . .	241
224.20.	<i>Average National Assessment of Educational Progress (NAEP) civics scale score, standard deviation, and percentage of students attaining civics achievement levels, by grade level, selected student characteristics, and percentile: 1998, 2006, 2010, and 2014 . . . . .</i>	Web-Only
224.30.	<i>Average National Assessment of Educational Progress (NAEP) economics scale score of 12th-graders, percentage attaining economics achievement levels, and percentage with different levels of economics coursework, by selected characteristics: 2006 and 2012 . . . . .</i>	Web-Only
224.40.	<i>Average National Assessment of Educational Progress (NAEP) geography scale score, standard deviation, and percentage of students attaining geography achievement levels, by grade level, selected student characteristics, and percentile: Selected years, 1994 through 2014 . . . . .</i>	Web-Only
224.50.	<i>Average National Assessment of Educational Progress (NAEP) U.S. history scale score, standard deviation, and percentage of students attaining achievement levels, by grade level, selected student characteristics, and percentile: Selected years, 1994 through 2014 . . . . .</i>	Web-Only

224.60.	<i>Average National Assessment of Educational Progress (NAEP) writing scale score of 8th- and 12th-graders, standard deviation, and percentage of students attaining writing achievement levels, by selected student and school characteristics and percentile: 2011 . . .</i>	Web-Only
224.70.	<i>Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score of 8th-graders, their scores on the three TEL content areas, and percentage attaining TEL achievement levels, by selected student and school characteristics: 2014 . . . . .</i>	242
224.73.	<i>Average scale score of 8th-graders on the information and communication technology (ICT) content area of the National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) assessment and percentage distribution of 8th-graders, by computer use and internet access at home and other selected characteristics: 2014 . . . . .</i>	Web-Only
224.74a.	<i>Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of learning about or discussing various technology- and society-related topics in school and selected student and school characteristics: 2014 . . . . .</i>	Web-Only
224.74b.	<i>Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of having done or of learning about various design- and systems-related activities or topics in school and selected student and school characteristics: 2014 . . . . .</i>	Web-Only
224.74c.	<i>Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of having done various design- and systems-related activities outside of school and selected student and school characteristics: 2014 . . . . .</i>	Web-Only
224.74d.	<i>Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of using a computer or other digital technology to perform various activities for schoolwork and selected student and school characteristics: 2014 . . . . .</i>	Web-Only
224.74e.	<i>Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by frequency of using a computer or other digital technology to perform various activities not related to schoolwork and selected student and school characteristics: 2014 . . . . .</i>	Web-Only
224.74f.	<i>Average National Assessment of Educational Progress (NAEP) technology and engineering literacy (TEL) scale score and percentage distribution of 8th-graders, by level of confidence in ability to perform various technology- and engineering-related tasks and selected student and school characteristics: 2014 . . . . .</i>	Web-Only

***Coursetaking, Grades, and Retention in Grade***

225.10.	<i>Average number of Carnegie units earned by public high school graduates in various subject fields, by sex and race/ethnicity: Selected years, 1982 through 2009 . . . . .</i>	243
225.20.	<i>Average number of Carnegie units earned by public high school graduates in career/ technical education courses in various occupational fields, by sex and race/ethnicity, and percentage distribution of students, by units earned: Selected years, 2000 through 2009 . . . . .</i>	245
225.30.	<i>Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: Selected years, 1982 through 2009 . . . . .</i>	247
225.40.	<i>Percentage of public and private high school graduates taking selected mathematics and science courses in high school, by selected student and school characteristics: Selected years, 1990 through 2009 . . . . .</i>	248
225.50.	<i>Percentage of public and private high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: Selected years, 1982 through 2009 . . . . .</i>	Web-Only
225.60.	<i>Number and percentage of public high school graduates taking dual credit, Advanced Placement (AP), and International Baccalaureate (IB) courses in high school and average credits earned, by selected student and school characteristics: 2000, 2005, and 2009 . . .</i>	Web-Only

225.70.	Number and percentage of high school graduates who took foreign language courses in high school and average number of credits earned, by language and number of credits: 2000, 2005, and 2009 .....	251
225.80.	Percentage distribution of elementary and secondary school children, by average grades and selected child and school characteristics: 2003, 2012, and 2016 .....	252
225.90.	Number and percentage of elementary and secondary school students retained in grade, by sex, race/ethnicity, and grade level: 1994 through 2016 .....	253

### **College Admission Tests**

226.10.	Number, percentage distribution, and SAT mean scores of high school seniors taking the SAT, by sex, race/ethnicity, first language learned, and highest level of parental education: 2017 .....	255
226.20.	SAT mean scores of college-bound seniors, by sex: 1966–67 through 2015–16 .....	256
226.30.	Number, percentage distribution, and SAT mean scores of high school seniors taking the SAT, by high school grade point average, intended college major, and degree-level goal: 2017 .....	257
226.40.	SAT mean scores, standard deviations, and score ranges for high school seniors, and percentage of the graduating class taking the SAT, by state: 2017 .....	258
226.50.	Number and percentage of graduates taking the ACT test; average scores and standard deviations, by sex and race/ethnicity; and percentage of test takers with selected composite scores and planned fields of postsecondary study: Selected years, 1995 through 2017 .....	259
226.60.	Average ACT scores and percentage of graduates taking the ACT, by state: 2013 and 2017 .....	260

### **Student Activities, Homework, and Attendance**

227.10.	Percentage of 9th-grade students participating in various school-sponsored and non-school-sponsored activities, by sex and race/ethnicity: 2009 .....	261
227.20.	<i>Percentage of high school seniors who say they engage in various activities, by selected student and school characteristics: 1992 and 2004 .....</i>	Web-Only
227.30.	<i>Percentage of high school seniors who participate in various school-sponsored extracurricular activities, by selected student characteristics: 1992 and 2004 .....</i>	Web-Only
227.40.	Percentage of elementary and secondary school students who do homework, average time spent doing homework, percentage whose parents check that homework is done, and percentage whose parents help with homework, by frequency and selected characteristics: 2007, 2012, and 2016 .....	262
227.50.	Average National Assessment of Educational Progress (NAEP) reading and mathematics scale scores of 4th-, 8th-, and 12th-graders and percentage absent from school, by selected characteristics and number of days absent in the last month: 2015 and 2017 ...	265

### **School Crime Victims**

228.10.	School-associated violent deaths of all persons, homicides and suicides of youth ages 5–18 at school, and total homicides and suicides of youth ages 5–18, by type of violent death: 1992–93 through 2014–15 .....	267
228.20.	Number of nonfatal victimizations against students ages 12–18 and rate of victimization per 1,000 students, by type of victimization and location: 1992 through 2016 .....	268
228.25.	Number of nonfatal victimizations against students ages 12–18 and rate of victimization per 1,000 students, by type of victimization, location, and selected student characteristics: 2016 .....	269
228.30.	Percentage of students ages 12–18 who reported criminal victimization at school during the previous 6 months, by type of victimization and selected student and school characteristics: Selected years, 1995 through 2015 .....	270
228.40.	Percentage of students in grades 9–12 who reported being threatened or injured with a weapon on school property during the previous 12 months, by selected student characteristics and number of times threatened or injured: Selected years, 1993 through 2015 .....	272

228.50.	Percentage of public school students in grades 9–12 who reported being threatened or injured with a weapon on school property at least one time during the previous 12 months, by state or jurisdiction: Selected years, 2003 through 2015 . . . . .	273
228.70.	Number and percentage of public school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by selected teacher characteristics: Selected years, 1993–94 through 2015–16 . . . . .	274
228.80.	Percentage of public school teachers who reported that they were threatened with injury or physically attacked by a student from school during the previous 12 months, by state: Selected years, 1993–94 through 2011–12 . . . . .	275
228.99.	Percentage distribution of students in grades 9–12 and percentage reporting selected types of victimization or risk behaviors, by sex and sexual orientation: 2015 . . . . .	276
<b>School Crime Incidents</b>		
229.10.	Percentage of public schools recording incidents of crime at school and reporting incidents to police, number of incidents, and rate per 1,000 students, by type of crime: Selected years, 1999–2000 through 2015–16 . . . . .	277
229.20.	Rate of crime incidents at school per 1,000 students recorded by public schools and reported to police by public schools, by school level, percentage of students eligible for free or reduced-price lunch, and type of crime: Selected years, 2005–06 through 2015–16 . . . . .	279
229.30.	Percentage of public schools recording incidents of crime at school, number of incidents, and rate per 1,000 students, by type of crime and selected school characteristics: 2015–16 . . . . .	281
229.40.	Percentage of public schools reporting incidents of crime at school to the police, number of incidents, and rate per 1,000 students, by type of crime and selected school characteristics: 2015–16 . . . . .	282
229.50.	Percentage distribution of public schools, by number of violent incidents of crime at school recorded and reported to the police and selected school characteristics: 2015–16 . . . . .	283
229.60.	Percentage distribution of public schools, by number of serious violent incidents of crime at school recorded and reported to the police and selected school characteristics: 2015–16 . . . . .	284
<b>School Environment</b>		
230.10.	Percentage of public schools reporting selected discipline problems that occurred at school, by frequency and selected school characteristics: Selected years, 1999–2000 through 2015–16 . . . . .	285
230.20.	Percentage of students ages 12–18 who reported that gangs were present at school during the school year, by selected student and school characteristics and urbanicity: Selected years, 2001 through 2015 . . . . .	287
230.30.	Percentage of students ages 12–18 who reported being the target of hate-related words and seeing hate-related graffiti at school during the school year, by selected student and school characteristics: Selected years, 1999 through 2015 . . . . .	288
230.35.	Percentage of students ages 12–18 who reported being the target of hate-related words at school, by type of hate-related word and selected student and school characteristics: 2015 . . . . .	289
230.40.	Percentage of students ages 12–18 who reported being bullied at school during the school year, by type of bullying and selected student and school characteristics: Selected years, 2005 through 2015 . . . . .	290
230.50.	Percentage of students ages 12–18 who reported being bullied at school during the school year and, among bullied students, percentage who reported being bullied in various locations, by selected student and school characteristics: 2015 . . . . .	293
230.52.	Among students ages 12–18 who reported being bullied at school during the school year, percentage reporting that bullying had varying degrees of negative effect on various aspects of their life, by aspect of life affected and selected student and school characteristics: 2015 . . . . .	294
230.53.	Among students ages 12–18 who reported being bullied at school during the school year, percentage reporting that bullying was related to specific characteristics, by type of characteristic related to bullying and other selected student and school characteristics: 2015 . . . . .	295

230.55.	Percentage of students ages 12–18 who reported being cyber-bullied anywhere during the school year, by type of cyber-bullying and selected student and school characteristics: 2013 . . . . .	296
230.60.	Among students ages 12–18 who reported being bullied at school or cyber-bullied anywhere during the school year, percentage reporting various frequencies of bullying and the notification of an adult at school, by selected student and school characteristics: 2013 and 2015 . . . . .	297
230.62.	Percentage of public school students in grades 9–12 who reported having been bullied on school property or electronically bullied during the previous 12 months, by state or jurisdiction: Selected years, 2009 through 2015 . . . . .	299
230.65.	Percentage of public schools reporting selected types of cyberbullying problems occurring at school or away from school at least once a week, by selected school characteristics: 2015–16 . . . . .	300
230.70.	Percentage of students ages 12–18 who reported being afraid of attack or harm, by location and selected student and school characteristics: Selected years, 1995 through 2015 . . . .	301
230.80.	Percentage of students ages 12–18 who reported avoiding one or more places in school or avoiding school activities or classes because of fear of attack or harm, by selected student and school characteristics: Selected years, 1995 through 2015 . . . . .	302
230.90.	Percentage of public school teachers who agreed that student misbehavior and student tardiness and class cutting interfered with their teaching, by selected teacher and school characteristics: Selected years, 1987–88 through 2015–16 . . . . .	303
230.92.	Percentage of public school teachers who agreed that other teachers and the principal enforced school rules, by selected teacher and school characteristics: Selected years, 1987–88 through 2015–16 . . . . .	304
230.95.	Percentage of public school teachers who agreed that student misbehavior and student tardiness and class cutting interfered with their teaching and that other teachers and the principal enforced school rules, by state: 2011–12 . . . . .	305

### ***Fights and Weapons***

231.10.	Percentage of students in grades 9–12 who reported having been in a physical fight at least one time during the previous 12 months, by location and selected student characteristics: Selected years, 1993 through 2015 . . . . .	306
231.20.	Percentage distribution of students in grades 9–12, by number of times they reported having been in a physical fight anywhere or on school property during the previous 12 months and selected student characteristics: 2015 . . . . .	307
231.30.	Percentage of public school students in grades 9–12 who reported having been in a physical fight at least one time during the previous 12 months, by location and state or jurisdiction: Selected years, 2005 through 2015 . . . . .	308
231.40.	Percentage of students in grades 9–12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2015 . . . . .	309
231.50.	Percentage distribution of students in grades 9–12, by number of days they reported carrying a weapon anywhere or on school property during the previous 30 days and selected student characteristics: 2015 . . . . .	310
231.60.	Percentage of public school students in grades 9–12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and state or jurisdiction: Selected years, 2005 through 2015 . . . . .	311
231.65.	Number of incidents of students bringing firearms to or possessing firearms at a public school and rate of incidents per 100,000 students, by state: 2009–10 through 2015–16 . .	312
231.70.	Percentage of students ages 12–18 who reported having access to a loaded gun, without adult permission, at school or away from school during the school year, by selected student and school characteristics: Selected years, 2007 through 2015 . . . . .	313

**Alcohol, Illicit Drugs, and Cigarettes**

232.10.	Percentage of students in grades 9–12 who reported using alcohol at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2015 . . . . .	314
232.20.	Percentage distribution of students in grades 9–12, by number of days they reported using alcohol anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2009 through 2015 . . . . .	315
232.30.	Percentage of public school students in grades 9–12 who reported using alcohol at least 1 day during the previous 30 days, by location and state or jurisdiction: Selected years, 2005 through 2015 . . . . .	316
232.40.	Percentage of students in grades 9–12 who reported using marijuana at least one time during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2015 . . . . .	317
232.50.	Percentage distribution of students in grades 9–12, by number of times they reported using marijuana anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2009 through 2015 . . . . .	318
232.60.	Percentage of public school students in grades 9–12 who reported using marijuana at least one time during the previous 30 days, by location and state or jurisdiction: Selected years, 2005 through 2015 . . . . .	320
232.70.	Percentage of students in grades 9–12 who reported that illegal drugs were made available to them on school property during the previous 12 months, by selected student characteristics: Selected years, 1993 through 2015 . . . . .	321
232.80.	Percentage of public school students in grades 9–12 who reported that illegal drugs were made available to them on school property during the previous 12 months, by state or jurisdiction: Selected years, 2003 through 2015 . . . . .	322
232.90.	<i>Percentage of high school seniors reporting use of alcohol and illicit drugs, by frequency of use and substance used: Selected years, 1975 through 2017 . . . . .</i>	Web-Only
232.95.	Percentage of 12- to 17-year-olds reporting use of illicit drugs, alcohol, and cigarettes during the past 30 days and the past year, by substance used, sex, and race/ethnicity: Selected years, 1985 through 2016 . . . . .	323

**Discipline, Safety and Security, and Juvenile Justice**

233.10.	Number and percentage of public schools that took a serious disciplinary action in response to specific offenses, number and percentage distribution of serious actions taken, and number of students involved in specific offenses, by type of offense and type of action: Selected years, 1999–2000 through 2015–16 . . . . .	324
233.12.	Percentage of public schools that took a serious disciplinary action in response to specific offenses, by type of offense and selected school characteristics: 2015–16 . . . . .	326
233.20.	<i>Percentage of public school students in grades 6 through 12 who had ever been suspended or expelled, by sex and race/ethnicity: Selected years, 1993 through 2012 . . . . .</i>	Web-Only
233.25.	Number and percentage of fall 2009 ninth-graders who were ever suspended or expelled through spring 2012, by when student was suspended or expelled and selected student characteristics: 2013 . . . . .	327
233.27.	Number of students receiving selected disciplinary actions in public elementary and secondary schools, by type of disciplinary action, disability status, sex, and race/ethnicity: 2013–14 . . . . .	328
233.28.	Percentage of students receiving selected disciplinary actions in public elementary and secondary schools, by type of disciplinary action, disability status, sex, and race/ethnicity: 2013–14 . . . . .	329
233.30.	Number of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2013–14 . . . . .	330
233.40.	Percentage of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2013–14 . . . . .	332

233.45.	Number of discipline incidents resulting in removal of a student from a regular education program for at least an entire school day and rate of incidents per 100,000 students, by discipline reason and state: 2014–15 . . . . .	334
233.50.	Percentage of public schools with various safety and security measures: Selected years, 1999–2000 through 2015–16 . . . . .	335
233.60.	Percentage of public schools with various safety and security measures, by selected school characteristics: 2015–16 . . . . .	336
233.65.	Percentage of public schools with a written plan for procedures to be performed in selected scenarios and percentage that have drilled students on the use of selected emergency procedures, by selected school characteristics: Selected years, 2003–04 through 2015–16 . . . . .	337
233.67a.	Percentage of public schools providing training for classroom teachers or aides in specific safety and discipline topics, by safety and discipline training topic: Selected years, 2003–04 through 2015–16 . . . . .	342
233.67b.	Percentage of public schools providing training for classroom teachers or aides in specific safety and discipline topics, by safety and discipline training topic and selected school characteristics: 2015–16 . . . . .	343
233.70.	Percentage of public schools with security staff present at least once a week, and percentage with security staff routinely carrying a firearm, by selected school characteristics: 2005–06 through 2015–16 . . . . .	344
233.70a.	Percentage of public schools with security staff present at least once a week, by full-time or part-time status and selected school characteristics: 2005–06 through 2015–16 . . . . .	345
233.70b.	Percentage of public schools with security staff present at school at least once a week, by type of security staff, school level, and selected school characteristics: 2005–06, 2009–10, and 2015–16 . . . . .	346
233.72.	Among public schools with any sworn law enforcement officers present at school at least once a week, percentage with officers present at specific times and percentage with any officers present for all instructional hours every day, by school level, times present, and selected school characteristics: 2015–16 . . . . .	349
233.74a.	Among public schools with any sworn law enforcement officers present at school at least once a week, percentage with any officers who routinely carry or wear specific items, by school level, type of item, and selected school characteristics: 2015–16 . . . . .	350
233.74b.	Among public schools with any sworn law enforcement officers present at school at least once a week, percentage with officers participating in selected activities, by type of activity, school level, and selected school characteristics: 2015–16 . . . . .	351
233.74c.	Among public schools with any sworn law enforcement officers present at school at least once a week, percentage with formalized policies or written documents defining the roles of officers at school, by school level, specific areas for which officers' role is defined, and selected school characteristics: 2015–16 . . . . .	353
233.80.	Percentage of students ages 12–18 who reported various security measures at school: Selected years, 1999 through 2015 . . . . .	354
<b>State Regulations</b>		
234.10.	Age range for compulsory school attendance and special education services, and policies on year-round schools and kindergarten programs, by state: Selected years, 2000 through 2018 . . . . .	355
234.20.	Minimum amount of instructional time per year and policies on textbooks, by state: Selected years, 2000 through 2018 . . . . .	356
234.30.	<i>Course credit requirements and exit exam requirements for a standard high school diploma and the use of other high school completion credentials, by state: 2013 . . . . .</i>	Web-Only
234.40.	<i>States that use criterion-referenced tests (CRTs) aligned to state standards, by subject area and level: 2006–07 . . . . .</i>	Web-Only
234.50.	<i>Required testing for initial certification of elementary and secondary school teachers, by type of assessment and state: 2015 and 2016 . . . . .</i>	Web-Only

**Revenues**

235.10.	Revenues for public elementary and secondary schools, by source of funds: Selected years, 1919–20 through 2014–15 . . . . .	358
235.20.	Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2014–15 . . . . .	360
235.30.	<i>Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2013–14 . . . . .</i>	Web-Only
235.40.	Public elementary and secondary revenues and expenditures, by locale, source of revenue, and purpose of expenditure: 2014–15 . . . . .	361

**Expenditures**

236.10.	Summary of expenditures for public elementary and secondary education and other related programs, by purpose: Selected years, 1919–20 through 2014–15 . . . . .	362
236.15.	Current expenditures and current expenditures per pupil in public elementary and secondary schools: 1989–90 through 2027–28 . . . . .	363
236.20.	Total expenditures for public elementary and secondary education and other related programs, by function and subfunction: Selected years, 1990–91 through 2014–15 . . . . .	364
236.25.	Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969–70 through 2014–15 . . . . .	366
236.30.	Total expenditures for public elementary and secondary education and other related programs, by function and state or jurisdiction: 2014–15 . . . . .	367
236.40.	<i>Total expenditures for public elementary and secondary education and other related programs, by function and state or jurisdiction: 2013–14 . . . . .</i>	Web-Only
236.50.	Expenditures for instruction in public elementary and secondary schools, by subfunction and state or jurisdiction: 2013–14 and 2014–15 . . . . .	369
236.55.	Total and current expenditures per pupil in public elementary and secondary schools: Selected years, 1919–20 through 2014–15 . . . . .	370
236.60.	Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and subfunction: Selected years, 1990–91 through 2014–15 . . . . .	371
236.65.	Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2014–15 . . . . .	373
236.70.	Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state or jurisdiction: Selected years, 1969–70 through 2014–15 . . . . .	375
236.75.	Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and state or jurisdiction: 2014–15 . . . . .	377
236.80.	<i>Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and state or jurisdiction: 2013–14 . . . . .</i>	Web-Only
236.90.	Students transported at public expense and current expenditures for transportation: Selected years, 1929–30 through 2014–15 . . . . .	378

**Chapter 3. Postsecondary Education****Overview and Historical**

301.10.	Enrollment, staff, and degrees/certificates conferred in degree-granting and non-degree-granting postsecondary institutions, by control and level of institution, sex of student, type of staff, and level of degree: Fall 2016 and 2015–16 . . . . .	391
301.20.	Historical summary of faculty, enrollment, degrees conferred, and finances in degree-granting postsecondary institutions: Selected years, 1869–70 through 2015–16 . . . . .	392

**Enrollment Rates**

302.10.	Recent high school completers and their enrollment in college, by sex and level of institution: 1960 through 2016 . . . . .	393
302.20.	Percentage of recent high school completers enrolled in college, by race/ethnicity: 1960 through 2016 . . . . .	394
302.30.	Percentage of recent high school completers enrolled in college, by income level: 1975 through 2016 . . . . .	395
302.40.	Number of high schools with 12th-graders and percentage of high school graduates attending 4-year colleges, by selected high school characteristics: Selected years, 1998–99 through 2011–12 . . . . .	396
302.43.	Percentage distribution of fall 2009 ninth-graders who had completed high school, by postsecondary enrollment status in fall 2013, and selected measures of their high school achievement and selected student characteristics: 2013 . . . . .	397
302.50.	Estimated rate of 2011–12 high school graduates attending degree-granting postsecondary institutions, by state: 2012 . . . . .	399
302.60.	Percentage of 18- to 24-year-olds enrolled in college, by level of institution and sex and race/ethnicity of student: 1970 through 2016 . . . . .	400
302.62.	Percentage of 18- to 24-year-olds enrolled in degree-granting postsecondary institutions and percentage distribution of those enrolled, by sex, race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2016 . . . . .	401
302.65.	<i>Percentage of 18- to 24-year-olds enrolled in degree-granting postsecondary institutions, by race/ethnicity and state: 2016</i> . . . . .	Web-Only
302.70.	<i>Percentage of 18- to 24-year-olds enrolled in degree-granting postsecondary institutions, by race/ethnicity and state: 2006</i> . . . . .	Web-Only

**Total Fall Enrollment—General**

303.10.	Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: Selected years, 1947 through 2027 . . . . .	403
303.20.	Total fall enrollment in all postsecondary institutions participating in Title IV programs and annual percentage change in enrollment, by degree-granting status and control of institution: 1995 through 2016 . . . . .	405
303.25.	Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1970 through 2016 . . . . .	406
303.30.	Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution, attendance status, and sex of student: Selected years, 1970 through 2027 . . . . .	407
303.40.	Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and age: Selected years, 1970 through 2027 . . . . .	409
303.45.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and age of student: 2011, 2013, and 2015 . . . . .	410
303.50.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, control and level of institution, attendance status, and age of student: 2015 . . . . .	411
303.55.	Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution, attendance status, and age of student: 2015 . . . . .	412
303.60.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, and other selected characteristics: 2016 . . . . .	413
303.65.	<i>Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, and other selected characteristics: 2015</i> . . . . .	Web-Only
303.66.	<i>Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex of student, and other selected characteristics: 2014</i> . . . . .	Web-Only
303.70.	Total undergraduate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control and level of institution: Selected years, 1970 through 2027 . . . . .	414

303.80.	Total postbaccalaureate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: 1970 through 2027 . . . . .	416
303.90.	Fall enrollment and number of degree-granting postsecondary institutions, by control and religious affiliation of institution: Selected years, 1980 through 2016 . . . . .	417
<b>Total Fall Enrollment—State-Level</b>		
304.10.	Total fall enrollment in degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2016 . . . . .	419
304.15.	Total fall enrollment in public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2016 . . . . .	420
304.20.	Total fall enrollment in private degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1970 through 2016 . . . . .	421
304.30.	Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2015 and 2016 . . . . .	422
304.35.	Total fall enrollment in public degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2015 and 2016 . . . . .	423
304.40.	<i>Total fall enrollment in private degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2015 and 2016 . . . . .</i>	Web-Only
304.45.	<i>Total fall enrollment in private nonprofit degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2015 and 2016 . . . . .</i>	Web-Only
304.50.	<i>Total fall enrollment in private for-profit degree-granting postsecondary institutions, by attendance status, sex, and state or jurisdiction: 2015 and 2016 . . . . .</i>	Web-Only
304.60.	Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2015 and 2016 . . . . .	424
304.70.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment and state or jurisdiction: Selected years, 2000 through 2016 . . . . .	425
304.80.	Total fall enrollment in degree-granting postsecondary institutions, by control, level of enrollment, level of institution, and state or jurisdiction: 2016 . . . . .	426
<b>First-Time Students and Admissions</b>		
305.10.	Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, and level and control of institution: 1955 through 2027 . . . . .	427
305.20.	Total fall enrollment of first-time degree/certificate-seeking students in degree-granting postsecondary institutions, by attendance status, sex of student, control of institution, and state or jurisdiction: Selected years, 2000 through 2016 . . . . .	428
305.30.	Number and percentage of degree-granting postsecondary institutions with first-year undergraduates using various selection criteria for admission, by control and level of institution: Selected years, 2000–01 through 2016–17 . . . . .	429
305.40.	Acceptance rates; number of applications, admissions, and enrollees; and enrollees' SAT and ACT scores for degree-granting postsecondary institutions with first-year undergraduates, by control and level of institution: 2016–17 . . . . .	430
<b>Enrollment of Racial/Ethnic Groups</b>		
306.10.	Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and race/ethnicity of student: Selected years, 1976 through 2016 . . . . .	431
306.20.	Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution and race/ethnicity of student: Selected years, 1976 through 2016 . . . . .	434
306.30.	Fall enrollment of U.S. residents in degree-granting postsecondary institutions, by race/ethnicity: Selected years, 1976 through 2027 . . . . .	436
306.40.	Fall enrollment of males and females and specific racial/ethnic groups in degree-granting postsecondary institutions, by control and classification of institution and percentage of U.S. resident enrollment in the same racial/ethnic group: 2016 . . . . .	437
306.50.	Total fall enrollment in degree-granting postsecondary institutions, by control and classification of institution, level of enrollment, and race/ethnicity of student: 2016 . . . . .	439

306.60.	Total fall enrollment in degree-granting postsecondary institutions, by race/ethnicity of student and state or jurisdiction: 2016 .....	441
306.65.	<i>Total fall enrollment in degree-granting postsecondary institutions, by race/ethnicity of student and state or jurisdiction: 2015 .....</i>	Web-Only
306.70.	<i>Total fall enrollment in degree-granting postsecondary institutions, by race/ethnicity of student and state or jurisdiction: 2014 .....</i>	Web-Only
<b>Full-Time-Equivalent Fall Enrollment</b>		
307.10.	Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1967 through 2027 .....	443
307.20.	Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2000, 2010, and 2016 .....	444
307.30.	Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: 2000, 2010, and 2016 .....	445
<b>Twelve-Month Enrollment</b>		
308.10.	Total 12-month enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2014–15 and 2015–16 .....	446
308.20.	Total 12-month enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: Selected years, 2004–05 through 2015–16 .....	447
<b>Student Residence and Migration</b>		
309.10.	Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions, by state or jurisdiction: Fall 2016 .....	448
309.20.	Residence and migration of all first-time degree/certificate-seeking undergraduates in degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2016 .....	449
309.30.	Residence and migration of all first-time degree/certificate-seeking undergraduates in 4-year degree-granting postsecondary institutions who graduated from high school in the previous 12 months, by state or jurisdiction: Fall 2016 .....	450
<b>Study Abroad and Foreign Students</b>		
310.10.	Number of U.S. students studying abroad and percentage distribution, by sex, race/ethnicity, and other selected characteristics: Selected years, 2000–01 through 2015–16 ..	451
310.20.	Foreign students enrolled in institutions of higher education in the United States, by continent, region, and selected countries of origin: Selected years, 1980–81 through 2016–17 .....	452
<b>Programs and Courses</b>		
311.10.	Number and percentage distribution of students enrolled in postsecondary institutions, by level, disability status, and selected student characteristics: 2015–16 .....	453
311.15.	Number and percentage of students enrolled in degree-granting postsecondary institutions, by distance education participation, location of student, level of enrollment, and control and level of institution: Fall 2015 and fall 2016 .....	454
311.20.	<i>Number and percentage of undergraduate students taking night, weekend, or online classes, by selected characteristics: 2011–12 .....</i>	Web-Only
311.22.	Number and percentage of undergraduate students enrolled in distance education or online classes and degree programs, by selected characteristics: Selected years, 2003–04 through 2015–16 .....	455
311.30.	<i>Number and percentage of graduate students taking night, weekend, or online classes, by selected characteristics: 2011–12 .....</i>	Web-Only
311.32.	Number and percentage of graduate students enrolled in distance education or online classes and degree programs, by selected characteristics: Selected years, 2003–04 through 2015–16 .....	456

311.33.	Selected statistics for degree-granting postsecondary institutions that primarily offer online programs, by control of institution and selected characteristics: 2016 . . . . .	457
311.40.	Percentage of first-year undergraduate students who reported taking remedial education courses, by selected student and institution characteristics: Selected years, 2003–04 through 2015–16 . . . . .	458
311.50.	Percentage of degree-granting postsecondary institutions with first-year undergraduates offering remedial services, by control and level of institution: 1989–90 through 2016–17 . . . . .	460
311.60.	Enrollment in postsecondary education, by level of enrollment, level of institution, student age, and major field of study: 2015–16 . . . . .	461
311.70.	<i>Course enrollments in languages other than English compared with total enrollment at degree-granting postsecondary institutions, by enrollment level, institution level, and language: Selected years, 1965 through 2013 . . . . .</i>	Web-Only
311.80.	<i>Number and percentage distribution of course enrollments in languages other than English at degree-granting postsecondary institutions, by language and enrollment level: Selected years, 2002 through 2013 . . . . .</i>	Web-Only
311.90.	Graduate enrollment in research-based programs in engineering, natural and social sciences, mathematics and computer sciences, and selected health fields in degree-granting postsecondary institutions, by discipline division: Selected years, fall 2007 through fall 2016 . . . . .	463
<b>Large Institutions and Institutions Serving Specific Groups</b>		
312.10.	Enrollment of the 120 largest degree-granting college and university campuses, by selected characteristics and institution: Fall 2016 . . . . .	464
312.20.	Enrollment, degrees conferred, and expenditures of degree-granting postsecondary institutions enrolling more than 15,000 students in 2016, by selected characteristics and institution: Selected years, 1990 through 2015–16 . . . . .	466
312.30.	Enrollment and degrees conferred in degree-granting women’s colleges, by selected characteristics and institution: Fall 2016 and 2015–16 . . . . .	476
312.40.	<i>Enrollment and degrees conferred in Hispanic-serving institutions, by institution level and control, percentage Hispanic, degree level, and other selected characteristics: Fall 2016 and 2015–16 . . . . .</i>	Web-Only
312.50.	Fall enrollment and degrees conferred in degree-granting tribally controlled postsecondary institutions, by state and institution: Selected years, fall 2000 through fall 2016, and 2014–15 and 2015–16 . . . . .	477
312.60.	<i>Enrollment and degrees conferred in Asian and Pacific Islander-serving institutions, by selected institution and student characteristics, degree level, and state or jurisdiction: Fall 2016 and 2015–16 . . . . .</i>	Web-Only
<b>Historically Black Colleges and Universities</b>		
313.10.	Fall enrollment, degrees conferred, and expenditures in degree-granting historically Black colleges and universities, by institution: 2015, 2016, and 2015–16 . . . . .	478
313.20.	Fall enrollment in degree-granting historically Black colleges and universities, by sex of student and level and control of institution: Selected years, 1976 through 2016 . . . . .	480
313.30.	Selected statistics on degree-granting historically Black colleges and universities, by control and level of institution: Selected years, 1990 through 2016 . . . . .	481
<b>Staff</b>		
314.10.	Total and full-time-equivalent (FTE) staff and FTE student/FTE staff ratios in postsecondary institutions participating in Title IV programs, by degree-granting status, control of institution, and primary occupation: Fall 1995, fall 2005, and fall 2016 . . . . .	482
314.20.	Employees in degree-granting postsecondary institutions, by sex, employment status, control and level of institution, and primary occupation: Selected years, fall 1991 through fall 2016 . . . . .	483
314.30.	Employees in degree-granting postsecondary institutions, by employment status, sex, control and level of institution, and primary occupation: Fall 2016 . . . . .	484

314.40.	Employees in degree-granting postsecondary institutions, by race/ethnicity, sex, employment status, control and level of institution, and primary occupation: Fall 2016 . . .	487
314.50.	Ratios of full-time-equivalent (FTE) students to FTE staff and FTE faculty in public degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2016 . . . . .	490
314.60.	Ratios of full-time-equivalent (FTE) students to FTE staff and FTE faculty in private degree-granting postsecondary institutions, by level of institution and state or jurisdiction: Fall 2016 . . . . .	491

### **Faculty and Instructional Staff**

315.10.	Number of faculty in degree-granting postsecondary institutions, by employment status, sex, control, and level of institution: Selected years, fall 1970 through fall 2016 . . . . .	492
315.20.	Full-time faculty in degree-granting postsecondary institutions, by race/ethnicity, sex, and academic rank: Fall 2013, fall 2015, and fall 2016 . . . . .	493
315.30.	<i>Percentage distribution of full-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 . . . . .</i>	Web-Only
315.40.	<i>Percentage distribution of part-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution, selected instruction activities, and number of classes taught for credit: Fall 2003 . . . . .</i>	Web-Only
315.50.	<i>Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by level and control of institution and selected characteristics: Fall 1992, fall 1998, and fall 2003 . . . . .</i>	Web-Only
315.60.	<i>Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by race/ethnicity, sex, and selected characteristics: Fall 2003 . . . . .</i>	Web-Only
315.70.	<i>Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by field and faculty characteristics: Fall 1992, fall 1998, and fall 2003 . . . . .</i>	Web-Only
315.80.	<i>Full-time and part-time faculty and instructional staff in degree-granting postsecondary institutions, by race/ethnicity, sex, and program area: Fall 1998 and fall 2003 . . . . .</i>	Web-Only

### **Faculty Salaries and Benefits**

316.10.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, control and level of institution, and sex: Selected years, 1970–71 through 2016–17 . . . . .	494
316.20.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, sex, and control and level of institution: Selected years, 1999–2000 through 2016–17 . . . . .	497
316.30.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2016–17 . . . . .	498
316.40.	<i>Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2015–16 . . . . .</i>	Web-Only
316.50.	Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2016–17 . . . . .	499
316.60.	<i>Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2015–16 . . . . .</i>	Web-Only
316.70.	<i>Average benefit expenditure for full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by type of benefit and control of institution: Selected years, 1977–78 through 2010–11 . . . . .</i>	Web-Only
316.80.	Percentage of degree-granting postsecondary institutions with a tenure system and of full-time faculty with tenure at these institutions, by control and level of institution and selected characteristics of faculty: Selected years, 1993–94 through 2016–17 . . . . .	500

316.81.	<i>Percentage of full-time faculty (instruction, research, and public service) with tenure at degree-granting postsecondary institutions with a tenure system, by control, level, and state: 2015–16</i> .....	Web-Only
<b>Institutions</b>		
317.10.	Degree-granting postsecondary institutions, by control and level of institution: Selected years, 1949–50 through 2016–17 .....	501
317.20.	Degree-granting postsecondary institutions, by control and classification of institution and state or jurisdiction: 2016–17 .....	502
317.30.	Number of non-degree-granting institutions offering postsecondary education, by control of institution and state or jurisdiction: Selected years, 2000–01 through 2016–17 .....	504
317.40.	Number of degree-granting postsecondary institutions and enrollment in these institutions, by enrollment size, control, and classification of institution: Fall 2016 .....	505
317.50.	Degree-granting postsecondary institutions that have closed their doors, by control and level of institution: 1969–70 through 2016–17 .....	508
<b>Summary of Degrees Conferred</b>		
318.10.	Degrees conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1869–70 through 2027–28 .....	509
318.20.	Bachelor's, master's, and doctor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2015–16 .....	510
318.30.	Bachelor's, master's, and doctor's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2015–16 .....	511
318.40.	Degrees/certificates conferred by postsecondary institutions, by control of institution and level of degree/certificate: 1970–71 through 2015–16 .....	528
318.45.	<i>Number and percentage distribution of science, technology, engineering, and mathematics (STEM) degrees/certificates conferred by postsecondary institutions, by race/ethnicity, level of degree/certificate, and sex of student: 2008–09 through 2015–16</i> .....	Web-Only
318.50.	Degrees conferred by postsecondary institutions, by control of institution, level of degree, and field of study: 2015–16 .....	529
318.60.	Number of postsecondary institutions conferring degrees, by control of institution, level of degree, and field of study: 2015–16 .....	530
<b>Degrees Conferred—State-Level</b>		
319.10.	Degrees conferred by postsecondary institutions, by control of institution, level of degree, and state or jurisdiction: 2015–16 .....	531
319.20.	Degrees conferred by postsecondary institutions, by level of degree and state or jurisdiction: 2013–14 through 2015–16 .....	532
319.30.	Bachelor's degrees conferred by postsecondary institutions, by field of study and state or jurisdiction: 2015–16 .....	533
319.40.	Master's degrees conferred by postsecondary institutions, by field of study and state or jurisdiction: 2015–16 .....	534
<b>Certificates Below the Associate's Degree Level</b>		
320.10.	Certificates below the associate's degree level conferred by postsecondary institutions, by length of curriculum, sex of student, institution level and control, and discipline division: 2015–16 .....	535
320.12.	<i>Certificates below the associate's degree level conferred by public less-than-2-year postsecondary institutions, by length of curriculum, sex of student, and discipline division: 2014–15</i> .....	Web-Only
320.20.	Certificates below the associate's degree level conferred by postsecondary institutions, by race/ethnicity and sex of student: 1998–99 through 2015–16 .....	537

**Associate's Degrees**

321.10.	Associate's degrees conferred by postsecondary institutions, by sex of student and discipline division: 2005–06 through 2015–16 .....	538
321.12.	<i>Certificates below the associate's degree level and associate's degrees conferred by public 2-year postsecondary institutions, by length of curriculum, sex of student, and discipline division: 2014–15 .....</i>	Web-Only
321.20.	Associate's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2015–16 .....	539
321.30.	Associate's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....	540
321.40.	<i>Associate's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....</i>	Web-Only
321.50.	<i>Associate's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....</i>	Web-Only

**Bachelor's Degrees**

322.10.	Bachelor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2015–16 .....	541
322.20.	Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2015–16 .....	542
322.30.	Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....	543
322.40.	Bachelor's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....	544
322.50.	Bachelor's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....	545

**Master's Degrees**

323.10.	Master's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2015–16 .....	546
323.20.	Master's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2015–16 .....	547
323.30.	Master's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....	548
323.40.	<i>Master's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....</i>	Web-Only
323.50.	<i>Master's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....</i>	Web-Only

**Doctor's Degrees**

324.10.	Doctor's degrees conferred by postsecondary institutions, by field of study: Selected years, 1970–71 through 2015–16 .....	549
324.20.	Doctor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2015–16 .....	550
324.25.	Doctor's degrees conferred by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....	551
324.30.	<i>Doctor's degrees conferred to males by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....</i>	Web-Only
324.35.	<i>Doctor's degrees conferred to females by postsecondary institutions, by race/ethnicity and field of study: 2014–15 and 2015–16 .....</i>	Web-Only
324.40.	Number of postsecondary institutions conferring doctor's degrees in dentistry, medicine, and law, and number of such degrees conferred, by sex of student: Selected years, 1949–50 through 2015–16 .....	552

324.50.	Degrees conferred by postsecondary institutions in selected professional fields, by sex of student, control of institution, and field of study: Selected years, 1985–86 through 2015–16 . . . . .	553
324.55.	Degrees conferred by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2014–15 and 2015–16 . . . . .	554
324.60.	<i>Degrees conferred to males by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2014–15 and 2015–16 . . . . .</i>	Web-Only
324.70.	<i>Degrees conferred to females by postsecondary institutions in selected professional fields, by race/ethnicity and field of study: 2014–15 and 2015–16 . . . . .</i>	Web-Only
324.80.	Statistical profile of persons receiving doctor's degrees, by field of study and selected characteristics: 2014–15 and 2015–16 . . . . .	555
324.90.	Doctor's degrees conferred by the 60 institutions conferring the most doctor's degrees, by rank order: 2006–07 through 2015–16 . . . . .	556

### **Trends in Degrees by Field**

325.10.	<i>Degrees in agriculture and natural resources conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2015–16 . . . . .</i>	Web-Only
325.15.	<i>Degrees in architecture and related services conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2015–16 . . . . .</i>	Web-Only
325.20.	<i>Degrees in the biological and biomedical sciences conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1951–52 through 2015–16 . . . . .</i>	Web-Only
325.22.	<i>Degrees in biology, microbiology, and zoology conferred by postsecondary institutions, by level of degree: 1970–71 through 2015–16 . . . . .</i>	Web-Only
325.25.	<i>Degrees in business conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1955–56 through 2015–16 . . . . .</i>	Web-Only
325.30.	<i>Degrees in communication, journalism, and related programs and in communications technologies conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2015–16 . . . . .</i>	Web-Only
325.35.	Degrees in computer and information sciences conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2015–16 . . . . .	557
325.40.	<i>Degrees in education conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2015–16 . . . . .</i>	Web-Only
325.45.	Degrees in engineering and engineering technologies conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2015–16 . . . . .	558
325.47.	<i>Degrees in chemical, civil, electrical, and mechanical engineering conferred by postsecondary institutions, by level of degree: 1970–71 through 2015–16 . . . . .</i>	Web-Only
325.50.	<i>Degrees in English language and literature/letters conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2015–16 . . . . .</i>	Web-Only
325.55.	<i>Degrees in foreign languages and literatures conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1959–60 through 2015–16 . . . . .</i>	Web-Only
325.57.	<i>Degrees in French, German, Italian, and Spanish language and literature conferred by postsecondary institutions, by level of degree: Selected years, 1949–50 through 2015–16 . . . . .</i>	Web-Only
325.59.	<i>Degrees in Arabic, Chinese, Korean, and Russian language and literature conferred by postsecondary institutions, by level of degree: 1969–70 through 2015–16 . . . . .</i>	Web-Only
325.60.	<i>Degrees in the health professions and related programs conferred by postsecondary institutions, by level of degree and sex of student: 1970–71 through 2015–16 . . . . .</i>	Web-Only
325.65.	<i>Degrees in mathematics and statistics conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949–50 through 2015–16 . . . . .</i>	Web-Only

325.70.	<i>Degrees in the physical sciences and science technologies conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1959-60 through 2015-16</i> .....	Web-Only
325.72.	<i>Degrees in chemistry, geology and earth science, and physics conferred by postsecondary institutions, by level of degree: 1970-71 through 2015-16</i> .....	Web-Only
325.80.	<i>Degrees in psychology conferred by postsecondary institutions, by level of degree and sex of student: Selected years, 1949-50 through 2015-16</i> .....	Web-Only
325.85.	<i>Degrees in public administration and social services conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2015-16</i> .....	Web-Only
325.90.	<i>Degrees in the social sciences and history conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2015-16</i> .....	Web-Only
325.92.	<i>Degrees in economics, history, political science and government, and sociology conferred by postsecondary institutions, by level of degree: Selected years, 1949-50 through 2015-16</i> .....	Web-Only
325.95.	<i>Degrees in visual and performing arts conferred by postsecondary institutions, by level of degree and sex of student: 1970-71 through 2015-16</i> .....	Web-Only

### **Completion Rates**

326.10.	Graduation rate from first institution attended for first-time, full-time bachelor's degree-seeking students at 4-year postsecondary institutions, by race/ethnicity, time to completion, sex, control of institution, and acceptance rate: Selected cohort entry years, 1996 through 2010 .....	559
326.20.	Graduation rate from first institution attended within 150 percent of normal time for first-time, full-time degree/certificate-seeking students at 2-year postsecondary institutions, by race/ethnicity, sex, and control of institution: Selected cohort entry years, 2000 through 2013 .....	565
326.30.	Retention of first-time degree-seeking undergraduates at degree-granting postsecondary institutions, by attendance status, level and control of institution, and percentage of applications accepted: Selected years, 2006 to 2016 .....	567
326.40.	Percentage distribution of first-time postsecondary students starting at 2- and 4-year institutions during the 2003-04 academic year, by highest degree attained, enrollment status, and selected characteristics: Spring 2009 .....	569
326.50.	Number and percentage distribution of first-time postsecondary students starting at 2- and 4-year institutions during the 2011-12 academic year, by attainment and enrollment status and selected characteristics: Spring 2014 .....	571

### **Achievement and Admissions Testing**

327.10.	<i>Average scores and standard deviations on Graduate Record Examination (GRE) general and subject tests: 1965 through 2016</i> .....	Web-Only
---------	---	----------

### **Security and Crime**

329.10.	On-campus crimes, arrests, and referrals for disciplinary action at degree-granting postsecondary institutions, by location of incident, control and level of institution, and type of incident: Selected years, 2001 through 2015 .....	573
329.20.	On-campus crimes, arrests, and referrals for disciplinary action per 10,000 full-time-equivalent (FTE) students at degree-granting postsecondary institutions, by whether institution has residence halls, control and level of institution, and type of incident: Selected years, 2001 through 2015 .....	575
329.30.	On-campus hate crimes at degree-granting postsecondary institutions, by level and control of institution, type of crime, and category of bias motivating the crime: 2009 through 2015 .....	578

**Student Charges**

330.10.	Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting postsecondary institutions, by level and control of institution: Selected years, 1963–64 through 2016–17 . . . . .	579
330.20.	Average undergraduate tuition and fees and room and board rates charged for full-time students in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2015–16 and 2016–17 . . . . .	583
330.30.	Average undergraduate tuition, fees, room, and board rates for full-time students in degree-granting postsecondary institutions, by percentile of charges and control and level of institution: Selected years, 2000–01 through 2016–17 . . . . .	584
330.40.	Average total cost of attendance for first-time, full-time undergraduate students in degree-granting postsecondary institutions, by control and level of institution, living arrangement, and component of student costs: Selected years, 2010–11 through 2016–17 . . . . .	585
330.41.	<i>Average total cost of attendance for first-time, full-time undergraduate students in public degree-granting postsecondary institutions, by level of institution, living arrangement, component of student costs, and state: 2014–15 . . . . .</i>	Web-Only
330.50.	Average graduate tuition and required fees in degree-granting postsecondary institutions, by control of institution and percentile of charges: 1989–90 through 2016–17 . . . . .	586

**Financial Aid for Undergraduates**

331.10.	Percentage of undergraduates receiving financial aid, by type and source of aid and selected student characteristics: 2015–16 . . . . .	587
331.20.	Full-time, first-time degree/certificate-seeking undergraduate students enrolled in degree-granting postsecondary institutions, by participation and average amount awarded in financial aid programs, and control and level of institution: 2000–01 through 2015–16 . . . . .	588
331.30.	Average amount of grant and scholarship aid and average net price for first-time, full-time degree/certificate-seeking students awarded Title IV aid, by control and level of institution and income level: Selected years, 2009–10 through 2015–16 . . . . .	590
331.35.	Percentage of full-time, full-year undergraduates receiving financial aid, and average annual amount received, by type and source of aid and selected student characteristics: Selected years, 1999–2000 through 2015–16 . . . . .	592
331.37.	<i>Percentage of part-time or part-year undergraduates receiving financial aid, and average annual amount received, by type and source of aid and selected student characteristics: Selected years, 1999–2000 through 2015–16 . . . . .</i>	Web-Only
331.40.	Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and selected student characteristics: 2015–16 . . . . .	595
331.45.	Average amount of financial aid awarded to part-time or part-year undergraduates, by type and source of aid and selected student characteristics: 2015–16 . . . . .	596
331.50.	Aid status and sources of aid for full-time and part-time undergraduates, by control and level of institution: 2011–12 and 2015–16 . . . . .	597
331.60.	Percentage of full-time, full-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2015–16 . . . . .	598
331.70.	Average amount of financial aid awarded to full-time, full-year undergraduates, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2015–16 . . . . .	600
331.80.	<i>Percentage of part-time or part-year undergraduates receiving financial aid, by type and source of aid and control and level of institution: Selected years, 1992–93 through 2015–16 . . . . .</i>	Web-Only
331.90.	Percentage of full-time and part-time undergraduates receiving federal aid, by aid program and control and level of institution: 2011–12 and 2015–16 . . . . .	602
331.95.	Percentage of undergraduate degree/certificate completers who ever received loans and average cumulative amount borrowed, by degree level, selected student characteristics, and institution control: Selected years, 1999–2000 through 2015–16 . . . . .	603

**Financial Aid for Postbaccalaureate Students**

332.10.	Amount borrowed, aid status, and sources of aid for full-time, full-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992–93 through 2015–16 . . . . .	607
332.20.	<i>Amount borrowed, aid status, and sources of aid for part-time or part-year postbaccalaureate students, by level of study and control and level of institution: Selected years, 1992–93 through 2015–16 . . . . .</i>	Web-Only
332.30.	<i>Percentage of full-time, full-year postbaccalaureate students receiving financial aid, by type of aid, level of study, and control and level of institution: Selected years, 1992–93 through 2015–16 . . . . .</i>	Web-Only
332.35.	<i>Average amount of financial aid awarded to full-time, full-year postbaccalaureate students, by type of aid, level of study, and control and level of institution: 2015–16 . . . . .</i>	Web-Only
332.40.	<i>Percentage of part-time or part-year postbaccalaureate students receiving financial aid, by type of aid, level of study, and control and level of institution: Selected years, 1992–93 through 2015–16 . . . . .</i>	Web-Only
332.45.	Percentage of graduate degree completers with student loan debt and average cumulative amount owed, by level of education funded and graduate degree type, institution control, and degree program: Selected years, 1999–2000 through 2015–16 . . . . .	609
332.50.	Number of postsecondary students who entered the student loan repayment phase, number of students who defaulted within a 3-year period, and 3-year student loan cohort default rate, by level and control of institution: Fiscal years 2010 through 2014 . . . . .	611

**Revenues**

333.10.	Revenues of public degree-granting postsecondary institutions, by source of revenue and level of institution: Selected years, 2007–08 through 2015–16 . . . . .	612
333.20.	Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2015–16 . . . . .	614
333.25.	<i>Revenues of public degree-granting postsecondary institutions, by source of revenue and state or jurisdiction: 2014–15 . . . . .</i>	Web-Only
333.30.	Appropriations from state and local governments for public degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1990–91 through 2015–16 . . . . .	615
333.40.	Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and level of institution: Selected years: 1999–2000 through 2015–16 . . . . .	616
333.50.	Total revenue of private nonprofit degree-granting postsecondary institutions, by source of funds and classification of institution: 2015–16 . . . . .	618
333.55.	Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and level of institution: Selected years, 1999–2000 through 2015–16 . . . . .	619
333.60.	<i>Total revenue of private for-profit degree-granting postsecondary institutions, by source of funds and classification of institution: 2015–16 . . . . .</i>	Web-Only
333.70.	<i>Revenue received from the federal government by the 120 degree-granting postsecondary institutions receiving the largest amounts, by control and rank order: 2015–16 . . . . .</i>	Web-Only
333.80.	<i>Voluntary support for degree-granting postsecondary institutions, by source and purpose of support: Selected years, 1949–50 through 2015–16 . . . . .</i>	Web-Only
333.90.	Endowment funds of the 120 degree-granting postsecondary institutions with the largest endowments, by rank order: Fiscal year 2016 . . . . .	620

**Expenditures**

334.10.	Total expenditures of public degree-granting postsecondary institutions, by purpose of expenditure and level of institution: 2009–10 through 2015–16 . . . . .	621
334.20.	Total expenditures of public degree-granting postsecondary institutions, by level of institution, purpose of expenditure, and state or jurisdiction: 2012–13 through 2015–16 . . . . .	623

334.30.	Total expenditures of private nonprofit degree-granting postsecondary institutions, by purpose and level of institution: Selected years, 1999–2000 through 2015–16 . . . . .	624
334.40.	Total expenditures of private nonprofit degree-granting postsecondary institutions, by purpose and classification of institution: 2015–16 . . . . .	626
334.50.	Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and level of institution: Selected years, 1999–2000 through 2015–16 . . . . .	627
334.60.	<i>Total expenditures of private for-profit degree-granting postsecondary institutions, by purpose and classification of institution: 2015–16 . . . . .</i>	Web-Only
334.70.	Total expenditures of private nonprofit and for-profit degree-granting postsecondary institutions, by state or jurisdiction: Selected years, 1999–2000 through 2015–16 . . . . .	629

**Chapter 4. Federal Funds for Education and Related Activities**

***On-Budget and Off-Budget Support***

401.10.	Federal support and estimated federal tax expenditures for education, by category: Selected fiscal years, 1965 through 2017 . . . . .	641
401.20.	Federal on-budget funds for education, by agency: Selected fiscal years, 1970 through 2016 . . . . .	643
401.30.	Federal on-budget funds for education, by level/educational purpose, agency, and program: Selected fiscal years, 1970 through 2017 . . . . .	645
401.60.	U.S. Department of Education appropriations for major programs, by state or jurisdiction: Fiscal year 2016 . . . . .	651
401.70.	Appropriations for Title I and selected other programs under the No Child Left Behind Act of 2001 and the Every Student Succeeds Act of 2015, by program and state or jurisdiction: Fiscal years 2016 and 2017 . . . . .	652

***Federal Obligations for Research and Development***

402.10.	Federal obligations for research, development, and R&D plant, by category of obligation, performer, and field of science and engineering: Fiscal years 2009 through 2017 . . . . .	653
---------	--	-----

**Chapter 5. Outcomes of Education**

***Labor Force Status by Educational Attainment***

501.10.	Labor force participation, employment, and unemployment of persons 25 to 64 years old, by sex, race/ethnicity, age group, and educational attainment: 2014, 2015, and 2016 . . . . .	660
501.20.	Labor force participation, employment, and unemployment of persons 16 to 24 years old who are not enrolled in school, by age group, sex, race/ethnicity, and educational attainment: 2014, 2015, and 2016 . . . . .	662
501.30.	Number and percentage of persons 16 to 24 years old who were neither enrolled in school nor working, by educational attainment, age group, sex, family poverty status, and race/ethnicity: 2000, 2010, and 2017 . . . . .	664
501.35.	<i>Labor force status of persons 25 to 64 years old, by disability status, highest level of educational attainment, age, sex, and race/ethnicity: 2015 . . . . .</i>	Web-Only
501.40.	Percentage distribution of 25- to 34-year-olds with various levels of educational attainment, by labor force status, sex, race/ethnicity, and U.S. nativity and citizenship status: 2016 . . . . .	667
501.50.	Employment to population ratios of persons 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2017 . . . . .	668
501.60.	Employment to population ratios of males 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2017 . . . . .	669
501.70.	Employment to population ratios of females 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2017 . . . . .	670
501.80.	Unemployment rates of persons 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2017 . . . . .	671

501.85.	Unemployment rates of males 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2017 . . . . .	672
501.90.	Unemployment rates of females 16 to 64 years old, by age group and highest level of educational attainment: Selected years, 1975 through 2016 . . . . .	673
<b>Occupation and Earnings by Educational Attainment</b>		
502.10.	Occupation of employed persons 25 years old and over, by highest level of educational attainment and sex: 2016 and 2017 . . . . .	674
502.20.	Median annual earnings, number, and percentage of full-time year-round workers 25 years old and over, by highest level of educational attainment and sex: 1990 through 2016 . . . .	675
502.30.	Median annual earnings of full-time year-round workers 25 to 34 years old and full-time year-round workers as a percentage of the labor force, by sex, race/ethnicity, and educational attainment: Selected years, 1995 through 2016 . . . . .	679
502.40.	Annual earnings of persons 25 years old and over, by highest level of educational attainment and sex: 2016 . . . . .	682
<b>Employment of Students</b>		
503.10.	Percentage of high school students age 16 and over who were employed, by age group, sex, race/ethnicity, family income, nativity, and hours worked per week: Selected years, 1970 through 2016 . . . . .	684
503.20.	Percentage of college students 16 to 24 years old who were employed, by attendance status, hours worked per week, and control and level of institution: Selected years, October 1970 through 2016 . . . . .	686
503.30.	Percentage of college students 16 to 24 years old who were employed, by attendance status, hours worked per week, and selected characteristics: October 2014 through 2016 . . . . .	687
503.40.	Percentage of 16- to 64-year-old undergraduate students who were employed, by attendance status, hours worked per week, and selected characteristics: 2005, 2010, and 2016 . . . . .	688
<b>Labor Force Status of Recent High School Completers and Dropouts</b>		
504.10.	Labor force status of 2014, 2015, and 2016 high school completers, by college enrollment status, sex, and race/ethnicity: October 2014, 2015, and 2016 . . . . .	691
504.20.	Labor force status of recent high school dropouts, by sex and race/ethnicity: Selected years, October 1980 through 2016 . . . . .	693
504.30.	<i>Among special education students out of high school up to 8 years, percentage attending and completing postsecondary education, living independently, and working competitively, by type of disability: 2007 and 2009 . . . . .</i>	Web-Only
<b>Labor Market Outcomes for Recent Bachelor's Degree Completers</b>		
505.10.	Number, percentage distribution, unemployment rates, and median earnings of 25- to 29-year-old bachelor's degree holders and percentage of degree holders among all 25- to 29- year-olds, by field of study and science, technology, engineering, or mathematics (STEM) status of field: 2010 and 2016 . . . . .	694
505.15.	Number, percentage distribution, and median annual earnings of 25- to 34-year-olds with a bachelor's or higher degree, by sex, race/ethnicity, and selected employment and occupational characteristics: 2015 . . . . .	696
505.20.	<i>Unemployment rate of 25- to 34-year-olds with a bachelor's or higher degree, by undergraduate field of study, sex, race/ethnicity, and U.S. nativity and citizenship status: 2016 . . . . .</i>	Web-Only
505.30.	<i>Among employed 25- to 34-year-olds with a bachelor's degree in a science, technology, engineering, or mathematics (STEM) field, percentage with STEM and non-STEM occupations, by sex, race/ethnicity, and U.S. nativity and citizenship status: 2016 . . . . .</i>	Web-Only
505.40.	Percentage distribution of recipients of bachelor's degrees in various fields of study 1 year after graduation, by time to completion, enrollment and employment status, and occupation: 2001 and 2009 . . . . .	698

505.50.	Percentage, selected employment characteristics, and annual salaries of bachelor’s degree recipients employed full time 1 year after graduation, by field of study: 1991, 2001, and 2009 .....	699
---------	--	-----

**Attitude of Young Adults**

506.10.	<i>Percentage of 1972 high school seniors, 1992 high school seniors, and 2004 high school seniors who felt that certain life values were “very important,” by sex: Selected years, 1972 through 2004 .....</i>	Web-Only
---------	--	----------

**Skills of Adults and Continuing Education**

507.10.	<i>Literacy skills of adults, by type of literacy, proficiency levels, and selected characteristics: 1992 and 2003 .....</i>	Web-Only
507.15.	Average literacy and numeracy scale scores and percentage distribution of 25- to 65-year-olds, by proficiency level and selected characteristics: 2012/2014 .....	700
507.16.	Percentage of 25- to 65-year-olds who were not assessed in the problem solving in technology-rich environments domain and average scale score and percentage distribution of those who were assessed, by proficiency level and selected characteristics: 2012/2014 .....	701
507.20.	Participants in state-administered adult basic education, secondary education, and English as a second language programs, by type of program and state or jurisdiction: Selected fiscal years, 2000 through 2016 .....	702
507.30.	Participation of employed persons, 17 years old and over, in career-related adult education during the previous 12 months, by selected characteristics of participants: 1995, 1999, and 2005 .....	703
507.40.	Participation rate of persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants: Selected years, 1991 through 2005 .....	706
507.50a.	Number, percentage, and percentage distribution of persons 16 to 65 years old who have work credentials or have completed a work experience program, by selected characteristics: 2016 .....	708
507.50b.	Percentage and percentage distribution of those 16- to 65-year-olds who have work credentials or have completed a work experience program, by college degree attainment status and selected characteristics: 2016 .....	710
507.50c.	Percentage distribution of persons 16 to 65 years old, by labor force and employment status and earnings, college degree attainment status, and work credential and work experience program status: 2016 .....	712

**Chapter 6. International Comparisons of Education**

**Population, Enrollment, and Teachers**

601.10.	Population, school enrollment, and number of teachers, by major areas of the world and level of education: Selected years, 1980 through 2015 .....	722
601.20.	<i>Selected population and enrollment statistics for countries with populations of at least 10 million in 2015, by continent and country: Selected years, 1990 through 2015 .....</i>	Web-Only
601.30.	<i>School-age populations as a percentage of total population, by age group and country: Selected years, 1985 through 2015 .....</i>	Web-Only
601.35.	Percentage of 3- and 4-year-olds and 5- to 14-year-olds enrolled in school, by country: 2000 through 2015 .....	723
601.40.	Percentage of 15- to 29-year-olds enrolled in school, by selected levels of education, age, and country: 2015 .....	724
601.50.	Pupil/teacher ratios in public and private elementary and secondary schools, by level of education and country: Selected years, 2000 through 2015 .....	725
601.60.	Teachers’ statutory teaching and total working time and average class size in public elementary and secondary schools, by level of education and country: 2015 .....	726

**Achievement, Instruction, and School Environment**

602.10.	Average reading literacy scale scores of fourth-graders and percentage distribution, by international benchmark level and country or other education system: Selected years, 2001 through 2016 . . . . .	727
602.15.	Average online reading literacy scale scores of fourth-graders and percentage distribution, by international benchmark level and country or other education system: 2016 . . . . .	729
602.20.	Average fourth-grade scores and annual instructional time in mathematics and science, by country or other education system: 2015 . . . . .	730
602.30.	Average eighth-grade scores and annual instructional time in mathematics and science, by country or other education system: 2015 . . . . .	731
602.32a.	<i>Average mathematics score and percentage of eighth-graders, by access to the Internet at home, access to a computer or tablet at home or other place outside of school, frequency of computer or tablet use for schoolwork outside of school, and country or other education system: 2015 . . . . .</i>	Web-Only
602.32b.	<i>Average mathematics score and percentage of eighth-graders, by mathematics teachers' reports of student access to computers and frequency of computer use during mathematics lessons and country or other education system: 2015 . . . . .</i>	Web-Only
602.33a.	<i>Average science score and percentage of eighth-graders, by access to the Internet at home, access to a computer or tablet at home or other place outside of school, frequency of computer or tablet use for schoolwork outside of school, and country or other education system: 2015 . . . . .</i>	Web-Only
602.33b.	<i>Average science score and percentage of eighth-graders, by science teachers' reports of student access to computers and frequency of computer use during science lessons and country or other education system: 2015 . . . . .</i>	Web-Only
602.35.	Average advanced mathematics and physics scores of high school seniors who had taken advanced courses in these subjects, seniors who had taken such courses as a percentage of their age cohort, and instructional time in such courses, by country: 2015 . . . . .	732
602.40.	Average reading literacy, mathematics literacy, and science literacy scores of 15-year-old students, by sex and country or other education system: 2009, 2012, and 2015 . . . . .	733
602.45.	<i>Average reading literacy, mathematics literacy, and science literacy scores of 15-year-old students, by computer and internet access at home and country or other education system: 2015 . . . . .</i>	Web-Only
602.50.	Average reading literacy scores of 15-year-old students and percentage attaining reading literacy proficiency levels, by country or other education system: 2015 . . . . .	735
602.60.	Average mathematics literacy scores of 15-year-old students and percentage attaining mathematics literacy proficiency levels, by country or other education system: 2015 . . . . .	737
602.70.	Average science literacy scores of 15-year-old students and percentage attaining science literacy proficiency levels, by country or other education system: 2015 . . . . .	739
602.84.	Percentage distribution of fourth- and eighth-graders, by frequency with which they reported being bullied during the school year and country or other education system: 2015 . . . . .	741
602.85.	Percentage distribution of fourth- and eighth-graders, by extent to which their teachers rated the school as safe and orderly and country or other education system: 2015 . . . . .	742
602.86.	Percentage distribution of fourth- and eighth-graders, by severity of school discipline problems reported by their principal and country or other education system: 2015 . . . . .	743
602.90a.	Percentage distribution of 15-year-old students, by extent to which their schools reported that student learning is hindered by student absenteeism or truancy and country: Selected years, 2000 through 2015 . . . . .	744
602.90b.	Percentage distribution of 15-year-old students, by extent to which their schools reported that student learning is hindered by students skipping classes and country: Selected years, 2000 through 2015 . . . . .	745

602.90c.	Percentage distribution of 15-year-old students, by extent to which their schools reported that student learning is hindered by student use of alcohol or illegal drugs and country: Selected years, 2000 through 2015 . . . . .	746
602.90d.	Percentage distribution of 15-year-old students, by extent to which their schools reported that student learning is hindered by students intimidating or bullying other students and country: Selected years, 2000 through 2015 . . . . .	747
602.90e.	Percentage distribution of 15-year-old students, by extent to which their schools reported that student learning is hindered by students lacking respect for teachers and country: Selected years, 2000 through 2015 . . . . .	748

**Attainment, Degrees, and Outcomes**

603.10.	Percentage of the population 25 to 64 years old who completed high school, by age group and country: Selected years, 2000 through 2016 . . . . .	749
603.20.	Percentage of the population 25 to 64 years old who attained any postsecondary degree, by age group and country: Selected years, 2000 through 2016 . . . . .	751
603.30.	Percentage of the population 25 to 64 years old who attained a postsecondary degree, by highest degree attained, age group, and country: 2016 . . . . .	753
603.60.	<i>Percentage of postsecondary degrees awarded to women, by field of study and country: 2015 . . . . .</i>	Web-Only
603.70.	<i>Percentage of degrees at the bachelor's level and above awarded in science and mathematics, information technologies, and engineering, by field of study, level of degree, and country: 2015 . . . . .</i>	Web-Only
603.90.	Employment to population ratios of 25- to 64-year-olds, by sex, highest level of educational attainment, and country: 2016 . . . . .	755

**Skills of Adults**

604.10.	Average literacy and numeracy scale scores of 25- to 65-year-olds, by sex, age group, highest level of educational attainment, and country or other education system: 2012 . . . . .	756
604.20.	Percentage distribution of 25- to 65-year-olds, by literacy proficiency level, numeracy proficiency level, selected levels of educational attainment, and country or other education system: 2012 . . . . .	757
604.30.	Employment rates and mean monthly earnings of 25- to 65-year-olds, by literacy proficiency level, numeracy proficiency level, and country or other education system: 2012 . . . . .	758
604.40.	Percentage distribution of 16- to 19-year-olds, by frequency of using computers or the Internet to perform selected activities in everyday life and country or subnational region: 2012, 2014, and 2015 . . . . .	759
604.50.	Percentage of 16- to 19-year-olds who were not assessed in the problem solving in technology-rich environments domain and percentage distribution of those who were assessed, by proficiency level, selected U.S. and international respondent characteristics, and country or subnational region: 2012, 2014, and 2015 . . . . .	761

**Finances**

605.10.	Gross domestic product per capita and expenditures by public and private education institutions per full-time-equivalent (FTE) student, by level of education and country: Selected years, 2005 through 2014 . . . . .	762
605.20.	Government and private expenditures on education institutions as a percentage of gross domestic product, by level of education and country: Selected years, 2005 through 2014 . . . . .	764

# READER'S GUIDE

## Data Sources

The data in this edition of the *Digest of Education Statistics* were obtained from many different sources—including students and teachers, state education agencies, local elementary and secondary schools, and colleges and universities—using surveys and compilations of administrative records. Users should be cautious when comparing data from different sources. Differences in aspects such as procedures, timing, question phrasing, and interviewer training can affect the comparability of results across data sources.

Most of the tables present data from surveys conducted by the National Center for Education Statistics (NCES) or conducted by other agencies and organizations with support from NCES. Some tables also include other data published by federal and state agencies, private research organizations, or professional organizations. Totals reported in the *Digest* are for the 50 states and the District of Columbia unless otherwise noted. Brief descriptions of the surveys and other data sources used in this volume can be found in Appendix A: Guide to Sources. For each NCES and non-NCES data source, the Guide to Sources also provides information on where to obtain further details about that source.

Data are obtained primarily from two types of surveys: universe surveys and sample surveys. In universe surveys, information is collected from every member of the population. For example, in a survey regarding certain expenditures of public elementary and secondary schools, data would be obtained from each school district in the United States. When data from an entire population are available, estimates of the total population or a subpopulation are made by simply summing the units in the population or subpopulation. As a result, there is no sampling error, and observed differences are reported as true.

Since universe surveys are often expensive and time consuming, many surveys collect data from a sample of the population of interest (sample surveys). For example, the National Assessment of Educational Progress (NAEP) assesses a representative sample of students rather than the entire population of students. When a sample survey is used, statistical uncertainty is introduced, because the data come from only a portion of the entire population. This statistical uncertainty must be considered when reporting estimates and making comparisons. For information about how NCES accounts for statistical uncertainty when reporting sample survey results, see “Data Analysis and Interpretation,” later in this Reader’s Guide.

## Common Measures and Indexes

Various types of statistics derived from universe and sample surveys are reported. Many tables report the size of a population or a subpopulation, and often the size of a subpopulation is expressed as a percentage of the total population.

In addition, the average (or *mean*) value of some characteristic of the population or subpopulation may be reported. The average is obtained by summing the values for all members of the population and dividing the sum by the size of the population. An example is the average annual salary of full-time instructional faculty at degree-granting postsecondary institutions. Another measure that is sometimes used is the *median*. The median is the midpoint value of a characteristic at or above which 50 percent of the population is estimated to fall, and at or below which 50 percent of the population is estimated to fall. An example is the median annual earnings of young adults who are full-time year-round workers. Some tables also present an *average per capita*, or per person, which represents an average computed for every person in a specified group or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population. An example is the per capita expenditure on education in each state.

Many tables report financial data in dollar amounts. Unless otherwise noted, all financial data are in *current dollars*, meaning not adjusted for changes in the purchasing power of the dollar over time due to inflation. For example, 1996–97 teacher salaries in current dollars are the amounts that the teachers earned in 1996–97, without any adjustments to account for inflation. *Constant dollar* adjustments attempt to remove the effects of price changes (inflation) from statistical series reported in dollars. For example, if teacher salaries over a 20-year period are adjusted to constant 2016–17 dollars, the salaries for all years are adjusted to the dollar values that presumably would exist if prices in each year were the same as in 2016–17 (in other words, as if the dollar had constant purchasing power over the entire period). Any changes in the constant dollar amounts would reflect only changes in real values. Constant dollar amounts are computed using *price indexes*. Price indexes for inflation adjustments can be found in table 106.70. Each table that presents constant dollars includes a note indicating which index was used for the inflation adjustments; in most cases, the Consumer Price Index was used.

When presenting data for a time series, some tables include both *actual* and *projected* data. Actual data are data that have already been collected. Projected data can be used when data for a recent or future year are not yet available. Projections are estimates that are based on recent trends in relevant statistics and patterns associated with correlated variables. Unless otherwise noted, all data in this volume are actual.

## Standard Errors

Using estimates calculated from data based on a sample of the population requires consideration of several factors before the estimates become meaningful. When using data from a sample, some margin of error will always be present in estimations of characteristics of the total population or subpopulation because the data are available from only a portion of the total population. Consequently, data from samples can provide only an approximation of the true or actual value. The margin of error of an estimate, or the range of potential true or actual values, depends on several factors such as the amount of variation in the responses, the size and representativeness of the sample, and the size of the subgroup for which the estimate is computed. The magnitude of this margin of error is measured by what statisticians call the *standard error* of an estimate.

When data from sample surveys are reported, the standard error is calculated for each estimate. In the tables, the standard error for each estimate generally appears in parentheses next to the estimate to which it applies. In order to caution the reader when interpreting findings, estimates from sample surveys are flagged with a “!” when the standard error is between 30 and 50 percent of the estimate, and suppressed with a “‡” when the standard error is 50 percent of the estimate or greater. The term *coefficient of variation* (CV) refers to the ratio of the standard error to the estimate; for example, if an estimate has a CV of 30 percent, this means that the standard error is equal to 30 percent of the value of the estimate.

## Nonsampling Errors

In addition to standard errors, which apply only to sample surveys, all surveys are subject to nonsampling errors. Nonsampling errors may arise when individual respondents or interviewers interpret questions differently; when respondents must estimate values, or when coders, keyers, and other processors handle answers differently; when people who should be included in the universe are not; or when people fail to respond, either totally or partially. Total nonresponse means that people do not respond to the survey at all, while partial nonresponse (or item nonresponse) means that people fail to respond to specific survey items. To compensate for nonresponse, adjustments are often made. For universe surveys, an adjustment made for either type of nonresponse, total or partial, is often referred to as an imputation, which is often a substitution of the “average”

questionnaire response for the nonresponse. For universe surveys, imputations are usually made separately within various groups of sample members that have similar survey characteristics. For sample surveys, total nonresponse is handled through nonresponse adjustments to the sample weights. For sample surveys, imputation for item nonresponse is usually made by substituting for a missing item the response to that item of a respondent having characteristics that are similar to those of the nonrespondent. For additional general information about imputations, see the *NCES Statistical Standards* (NCES 2014-097). Appendix A: Guide to Sources includes some information about specific surveys’ response rates, nonresponse adjustments, and other efforts to reduce nonsampling error. Although the magnitude of nonsampling error is frequently unknown, idiosyncrasies that have been identified are noted in the appropriate tables.

## Data Analysis and Interpretation

When estimates are from a sample, caution is warranted when drawing conclusions about one estimate in comparison to another or about whether a time series of estimates is increasing, decreasing, or staying the same. Although one estimate may appear to be larger than another, a statistical test may find that the apparent difference between them is not reliably measurable due to the uncertainty around the estimates. In this case, the estimates will be described as having “no measurable difference,” meaning that the difference between them is not statistically significant.

Whether differences in means or percentages are statistically significant can be determined using the standard errors of the estimates. In reports produced by NCES, when differences are statistically significant, the probability that the difference occurred by chance is less than 5 percent, according to NCES standards.

Data presented in the text do not investigate more complex hypotheses, account for interrelationships among variables, or support causal inferences. We encourage readers who are interested in more complex questions and in-depth analysis to explore other NCES resources, including publications, online data tools, and public- and restricted-use datasets at <https://nces.ed.gov>.

In text that reports estimates based on samples, differences between estimates (including increases and decreases) are stated only when they are statistically significant. To determine whether differences reported are statistically significant, two-tailed *t* tests at the .05 level are typically used. The *t* test formula for determining statistical significance is adjusted when the samples being compared are dependent. The *t* test formula is not adjusted for multiple comparisons, with the exception of statistical tests conducted using the NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). When the variables to be tested are postulated to form a trend, the relationship may be tested using linear regression, logistic regression, or ANOVA trend analysis instead of a series of *t* tests. These alternate methods of analysis test for specific relationships (e.g., linear, quadratic,

or cubic) among variables. For more information on data analysis, please see the NCES Statistical Standards, Standard 5-1, available at <https://nces.ed.gov/statprog/2012/pdf/Chapter5.pdf>.

A number of considerations influence the ultimate selection of the data years to include in the tables and to feature in the text. To make analyses as timely as possible, the latest year of available data is shown. The choice of comparison years is often also based on the need to show the earliest available survey year, as in the case of NAEP and the international assessment surveys. The text typically compares the most current year's data with those from the initial year and then with those from a more recent year. In the case of surveys with long time frames, such as surveys measuring enrollment, changes over the course of a decade may be noted in the text. Where applicable, the text may also note years in which the data begin to diverge from previous trends. In figures and tables, intervening years are selected in increments in order to show the general trend.

## Rounding and Other Considerations

All calculations are based on unrounded estimates. Therefore, the reader may find that a calculation, such as a difference or a percentage change, cited in the text or a figure may not be identical to the calculation obtained by using the rounded values shown in the accompanying tables. Although values reported in the tables are generally rounded to one decimal place (e.g., 76.5 percent), values reported in the text are generally rounded to whole numbers (with any value of 0.50 or above rounded to the next highest whole number). Due to rounding, cumulative percentages may sometimes equal 99 or 101 percent rather than 100 percent.

## Race and Ethnicity

The Office of Management and Budget (OMB) is responsible for the standards that govern the categories used to collect and present federal data on race and ethnicity. The OMB revised the guidelines on racial/ethnic categories used by the federal government in October 1997, with a January 2003 deadline for implementation. The revised standards require a minimum of these five categories for data on race: American Indian or Alaska Native, Asian, Black or African American, Native Hawaiian or Other Pacific Islander, and White. The standards also require the collection of data on the ethnicity categories Hispanic or Latino and Not Hispanic or Latino. It is important to note that Hispanic origin is an ethnicity rather than a race, and therefore persons of Hispanic origin may be of any race. Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. The race categories White, Black, Asian, Native Hawaiian or Other Pacific Islander, and American Indian or Alaska Native exclude persons of Hispanic origin unless otherwise noted.

For a description of each racial/ethnic category, please see the "Racial/ethnic group" entry in Appendix B: Definitions. Some of the category labels are shortened for more concise presentation in text, tables, and figures. American Indian or Alaska Native is denoted as American Indian/Alaska Native (except when separate estimates are available for American Indians alone or Alaska Natives alone); Black or African American is shortened to Black; and Hispanic or Latino is shortened to Hispanic. When discussed separately from Asian estimates, Native Hawaiian or Other Pacific Islander is shortened to Pacific Islander.

Many of the data sources used for this volume are federal surveys that collect data using the OMB standards for racial/ethnic classification described above; however, some sources have not fully adopted the standards, and some tables include historical data collected prior to the adoption of the OMB standards. Asians and Pacific Islanders are combined into a single category for years in which the data were not collected separately for the two groups. The combined category can sometimes mask significant differences between the two subgroups. For example, prior to 2011, NAEP collected data that did not allow for separate reporting of estimates for Asians and Pacific Islanders. The population counts presented in table 101.20, based on the U.S. Census Bureau's Current Population Reports, indicate that 96 percent of all Asian/Pacific Islander 5- to 17-year-olds were Asian in 2010. Thus, the combined category for Asians/Pacific Islanders is more representative of Asians than of Pacific Islanders.

Some surveys give respondents the option of selecting more than one race category, an "other" race category, or a "Two or more races" or "more than one race" category. Where possible, tables present data on the "Two or more races" category; however, in some cases this category may not be separately shown because the information was not collected or due to other data issues. Some tables include the "other" category. Any comparisons made between persons of one racial/ethnic group and persons of "all other racial/ethnic groups" include only the racial/ethnic groups shown in the reference table. In some surveys, respondents are not given the option to select more than one race category and also are not given an option such as "other" or "more than one race." In these surveys, respondents of Two or more races must select a single race category. Any comparisons between data from surveys that give the option to select more than one race and surveys that do not offer such an option should take into account the fact that there is a potential for bias if members of one racial group are more likely than members of the others to identify themselves as "Two or more races."<sup>1</sup> For postsecondary data, foreign students are counted separately and are therefore not included in any racial/ethnic category.

<sup>1</sup> For discussion of such bias in responses to the 2000 Census, see Parker, J. et al. (2004). Bridging Between Two Standards for Collecting Information on Race and Ethnicity: An Application to Census 2000 and Vital Rates. *Public Health Reports*, 119(2): 192–205. Available at <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1497618/>.

In addition to the major racial/ethnic categories, several tables include Hispanic ancestry subgroups (such as Mexican, Puerto Rican, Cuban, Dominican, Salvadoran, Other Central American, and South American) and Asian ancestry subgroups (such as Asian Indian, Chinese, Filipino, Japanese, Korean, and Vietnamese). In addition, selected tables include “Two or more races” subgroups (such as White and Black, White and Asian, and White and American Indian/Alaska Native).

## Limitations of the Data

Due to large standard errors, some differences that seem substantial are not statistically significant and, therefore, are not cited in the text. This situation often applies to estimates involving American Indians/Alaska Natives and Pacific Islanders. The relatively small sizes of these populations pose many measurement difficulties when conducting statistical analysis. Even in larger surveys, the numbers of American Indians/Alaska Natives and Pacific Islanders included in a sample are often small. Researchers studying data on these two populations often face small sample sizes that increase the size of standard errors and reduce the reliability of results. Readers should keep these limitations in mind when comparing estimates presented in the tables.

As mentioned, caution should be exercised when comparing data from different sources. Differences in sampling, data collection procedures, coverage of target population, timing, phrasing of questions, scope of nonresponse, interviewer training, and data processing and coding mean that results from different sources may not be strictly comparable. For example, the racial/ethnic categories presented to a respondent, and the way in which the question is asked, can influence the response, especially for individuals who consider themselves of more than one race or ethnicity. In addition, data on American Indians/Alaska Natives are often subject to inaccuracies that can result from respondents self-identifying their race/ethnicity. Research on the collection of race/ethnicity data suggests that the categorization of American Indian and Alaska Native is the least stable self-identification (for example, the same individual may identify as American Indian when responding to one survey, but may not do so on a subsequent survey).<sup>2</sup>

# INTRODUCTION

The Introduction provides a brief overview of current trends in American education, highlighting key data that are presented in more detail later in this volume. Topics outlined include the participation of students, teachers, and faculty in U.S. educational institutions; the performance of U.S. elementary/secondary students overall and in comparison to students in other countries; the numbers of high school graduates and postsecondary degrees; and the amounts of expenditures on education at the elementary/secondary and postsecondary levels.

In fall 2017, about 76.4 million people were enrolled in American schools and colleges (table 105.10). About 4.6 million people were employed as elementary and secondary school teachers or as college faculty, in full-time equivalents (FTE). Other professional, administrative, and support staff at educational institutions totaled 5.5 million FTE employees. All data for 2017 in this Introduction are projected, except for data on educational attainment. Some data for other years are projected or estimated as noted. In discussions of historical trends, different time periods and specific years are cited, depending on the timing of important changes as well as the availability of relevant data.

## Elementary/Secondary Education

### Enrollment

A pattern of annual increases in total public elementary and secondary school enrollment began in 1985, but enrollment remained at 49.3 million between 2006 and 2008, before beginning to increase again (table 105.30). Overall, public school enrollment rose 28 percent, from 39.4 million to 50.6 million, between 1985 and 2017. Private school enrollment fluctuated during this period, with the fall 2017 enrollment of 5.9 million being 6 percent higher than the fall 1985 enrollment of 5.6 million. About 10 percent of elementary and secondary school students were enrolled in private schools in 2017, reflecting a decrease from 12 percent in 1985.

In public schools between 1985 and 2017, there was a 32 percent increase in elementary enrollment (prekindergarten through grade 8), compared with a 22 percent increase in secondary enrollment (grades 9 through 12) (table 105.30). Part of the higher growth in public elementary school enrollment resulted from the expansion of prekindergarten enrollment (table 203.10). Between fall 1985 and fall 2017, enrollment in prekindergarten increased 822 percent, while

enrollment in other elementary grades (including kindergarten through grade 8 and ungraded elementary programs) increased 27 percent. The number of children enrolled in prekindergarten increased from 0.2 million in 1985 to 1.4 million in 2017, and the number enrolled in other elementary grades increased from 26.9 million to 34.2 million. Public secondary school enrollment declined 8 percent from 1985 to 1990, but then increased 33 percent from 1990 to 2007; however, secondary school enrollment in 2017 was less than 1 percent higher than in 2007 (table 105.30). Between 1990 and 2017, the public secondary school enrollment increased 33 percent, compared with a 19 percent increase in public elementary school enrollment. Over the most recent 10-year period (between 2007 and 2017), public school enrollment rose 3 percent. Elementary school enrollment increased 4 percent between 2007 and 2017, while secondary school enrollment was less than 1 percent higher in 2017 than in 2007.

Since the enrollment rates of 5- and 6-year-olds, 7- to 13-year-olds, and 14- to 17-year-olds changed by fewer than 5 percentage points from 1985 to 2016, overall increases in public school enrollment primarily reflect increases in the number of children in the population in these age groups (tables 101.10 and 103.20). For example, the enrollment rate of 7- to 13-year-olds decreased from 99 to 98 percent between 1985 and 2016, but the number of 7- to 13-year-olds increased 26 percent. Similarly, increases in public school enrollments are more reflective of the 13 percent increase in the 14- to 17-year-old population between 1985 and 2016 than the increase in their enrollment rate, which was about 95 percent in both years. The enrollment rate of 3- and 4-year-old children increased from 39 percent in 1985 to 54 percent in 2016, which contributed to the overall enrollment increase. Also, the number of children in this age group was higher in 2016 (8.0 million) than in 1985 (7.1 million).

The National Center for Education Statistics (NCES) projects record levels of total public elementary and secondary school enrollment from 2017 (50.6 million) through at least 2027 (52.1 million) (table 105.30). The total public school enrollment projected for fall 2017 is a record-high number, and new records are expected every year through 2027, the last year for which NCES enrollment projections have been developed. Public elementary school enrollment is projected to increase by 3 percent between 2017 and 2027, while public secondary school enrollment is expected to increase by 2 percent during this period. Overall, total public school enrollment is expected to increase 3 percent between 2017 and 2027.

## Teachers

About 3.6 million full-time-equivalent (FTE) elementary and secondary school teachers were engaged in classroom instruction in fall 2017 (table 105.40). This number was 1 percent lower than in fall 2007. The 2017 number of FTE teachers includes 3.2 million public school teachers and 0.5 million private school teachers.

Public school enrollment was 3 percent higher in 2017 than in 2007, while the number of public school teachers was 1 percent lower (table 208.20). In fall 2017, the number of public school pupils per teacher was 16.1, which was higher than the 2007 ratio of 15.4.

The average salary for public school teachers in 2016–17 was \$58,950 in current dollars (i.e., dollars that are not adjusted for inflation) (table 211.50). In constant (i.e., inflation-adjusted) dollars, the average teacher salary was 2 percent lower in 2016–17 than in 1990–91.

## Student Performance

### National Comparisons

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP, and long-term trend NAEP. The national main NAEP and state NAEP provide current information about student performance in subjects including reading, mathematics, science, and writing, while long-term trend NAEP provides information on performance since the early 1970s in reading and mathematics only. Results from long-term trend NAEP are included in the discussion in chapter 2 of the *Digest*, while the information in this Introduction includes only selected results from the national main and state NAEP. Readers should keep in mind that comparisons of NAEP scores in the text (like all comparisons of estimates in the *Digest*) are based on statistical testing of unrounded values.

The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. The state NAEP is identical in content to the national main NAEP, but the state NAEP reports information only for public school students. Chapter 2 presents more information on the NAEP designs and methodology, and additional details appear in Appendix A: Guide to Sources.

### NAEP Reading

The main NAEP reading assessment data are reported on a scale of 0 to 500. In 2017, the average reading score for 4th-grade students (222) was not measurably different from

the 2015 score but was higher than the 1992 score (217) (table 221.10). At grade 4, the 2017 scores for White (232), Black (206), Hispanic (209), and Asian/Pacific Islander (239) students were not measurably different from the scores in 2015, but the score for each group was higher than in 1992 (224, 192, 197, and 216, respectively). In 2017, the average score for American Indian/Alaska Native 4th-graders (202) was not measurably different from the scores in 2015 and 1994 (1994 was the first year data were available for 4th-grade American Indian/Alaska Native students). For 8th-grade students, the score in 2017 (267) was higher than in 2015 (265) or 1992 (260). At grade 8, the 2017 scores for White (275), Black (249), Hispanic (255), and Asian/Pacific Islander (282) students were not measurably different from the scores in 2015. Consistent with the findings at grade 4, the scores for White, Black, Hispanic, and Asian/Pacific Islander 8th-grade students were higher in 2017 than in 1992. In 2017, the score for 8th-grade American Indian/Alaska Native students (253) was not measurably different from the scores in 2015 and in 1994 (1994 was the first year data were available for 8th-grade American Indian/Alaska Native students). For 12th-grade students, the most recent scores available are from 2015. The score in 2015 (287) was not measurably different from the score in 2013, but it was lower than the score in 1992 (292). At grade 12, the 2015 scores for White (295), Hispanic (276), and Asian/Pacific Islander (297) students were not measurably different from the scores in 2013 and in 1992. For Black students, the 2015 score (266) was lower than the 1992 score (273), but it was not measurably different from the 2013 score.

From 1992 through 2017, the average reading scores for White 4th- and 8th-grade students were higher than those of their Black and Hispanic peers (table 221.10). Although the White-Black and White-Hispanic achievement gaps did not change measurably from 2015 to 2017 at either grade 4 or 8, some of the racial/ethnic achievement gaps have narrowed since 1992. At grade 4, the White-Black gap narrowed from 32 points in 1992 to 26 points in 2017; at grade 8, the White-Hispanic gap narrowed from 26 points in 1992 to 19 points in 2017.

### NAEP Mathematics

The main NAEP mathematics assessment data for 4th- and 8th-graders are reported on a scale of 0 to 500 (table 222.10). The average 4th-grade mathematics score in 2017 (240) was not measurably different from the score in 2015, but it was higher than the score in 1990 (213). At grade 4, the scores in 2017 for White (248), Black (223), Hispanic (229), and Asian/Pacific Islander (258) students were not measurably different from the 2015 scores, but the score for each group was higher than in 1990 (220, 188, 200, and 225, respectively). The 2017 score for 4th-grade American Indian/Alaska Native students (227) was not measurably different from the scores in 2015 and in 1996 (1996 was the first year data were available for 4th-grade American

Indian/Alaska Native students). The 8th-grade score in 2017 (283) was not measurably different from the score in 2015, but it was higher than the score in 1990 (263). At grade 8, the scores for White (293), Black (260), Hispanic (269), and Asian/Pacific Islander (310) students in 2017 were not measurably different from the scores in 2015, but the score for each group was higher than in 1990 (270, 237, 246, and 275, respectively). In 2017, the score for 8th-grade American Indian/Alaska Native students (267) was not measurably different from the scores in 2015 and in 2000 (2000 was the first year data were available for 8th-grade American Indian/Alaska Native students). Due to changes in the 12th-grade mathematics assessment framework, a new trend line started in 2005, with scores reported on a scale of 0 to 300. The 12th-grade score in 2015 (152) was lower than the score in 2013 (153) but not measurably different from the score in 2005, the first year the revised assessment was administered.

From 1990 through 2017, the average mathematics scores for White students in grades 4 and 8 were higher than those of their Black and Hispanic peers (table 222.10). Although the 4th-grade White-Black and White-Hispanic achievement gaps did not change measurably from 2015 to 2017, the White-Black achievement gap narrowed from 32 points in 1990 to 25 points in 2017. The 4th-grade White-Hispanic gap in 2017 (19 points) was not measurably different from the White-Hispanic gap in 1990. The 8th-grade White-Black gap (32 points) and White-Hispanic gap (24 points) in 2017 were not measurably different from the gaps in 2015 or in 1990.

### NAEP Science

NAEP has assessed the science abilities of students in grades 4, 8, and 12 in both public and private schools since 1996. As of 2009, however, NAEP science assessments are based on a new framework, so results from these assessments cannot be compared to results from earlier science assessments. Scores are based on a scale ranging from 0 to 300 (table 223.10). In 2015, the average 4th-grade science score (154) was higher than the score in 2009 (150). The 8th-grade score in 2015 (154) was higher than the scores in 2009 (150) and in 2011 (152). The 12th-grade score in 2015 (150) was not measurably different from the score in 2009. In addition, the 5-point gender gap between male and female 12th-graders in 2015 was not measurably different from the gap in 2009. While the scores for White 4th- and 8th-grade students remained higher than those of their Black and Hispanic peers in 2015, racial/ethnic achievement gaps in 2015 were smaller than in 2009. At grade 4, the White-Black achievement gap was 36 points in 2009 and 33 points in 2015, and the White-Hispanic achievement gap was 32 points in 2009 and 27 points in 2015. While the scores for White 12th-grade students remained higher than those of their Black and Hispanic peers in 2015, these racial/ethnic achievement gaps were not measurably different between 2009 and 2015.

## International Comparisons

### *Trends in International Mathematics and Science Study (TIMSS)*

The 2015 Trends in International Mathematics and Science Study (TIMSS) assessed students' mathematics and science performance at grades 4 and 8. Mathematics performance was assessed in 43 countries at grade 4 and in 34 countries at grade 8. Science performance was assessed in 42 countries at grade 4 and in 34 countries at grade 8. In addition, TIMSS Advanced data were collected by 9 countries from students in their final year of secondary school (grade 12 in the United States). At grades 4 and 8, several subnational entities also participated in TIMSS as separate education systems (e.g., Hong Kong and Chinese Taipei, the U.S. state of Florida, England and Northern Ireland within the United Kingdom). However, the following paragraphs include results only from countries, not from subnational entities. At all three grades, TIMSS scores are reported on a scale of 0 to 1,000, with a fixed scale centerpoint of 500.

In 2015, the average mathematics scores of U.S. 4th-graders (539) and 8th-graders (518) were higher than the TIMSS centerpoint of 500 (tables 602.20 and 602.30). At grade 4, the average U.S. mathematics score was higher than the average score in 30 of the 42 other countries participating at grade 4, lower than the average score in 6 countries, and not measurably different from the average score in the remaining 6 countries (table 602.20). The 6 countries that outperformed the United States in 4th-grade mathematics were Ireland, Japan, the Republic of Korea, Norway, the Russian Federation, and Singapore. At grade 8, the average U.S. mathematics score was higher than the average score in 21 of the 33 other participating countries, lower than the average score in 5 countries, and not measurably different from the average score in the remaining 7 countries (table 602.30). The 5 countries that outperformed the United States in eighth-grade mathematics were Canada, Japan, the Republic of Korea, the Russian Federation, and Singapore.

The average science scores of both U.S. 4th-graders (546) and U.S. 8th-graders (530) were higher than the TIMSS scale centerpoint of 500 in 2015 (tables 602.20 and 602.30). The average U.S. fourth-grade science score was higher than the average score in 30 of the 41 other countries participating in the science assessment at grade 4, lower than the average score in 5 countries, and not measurably different from the average score in the remaining 6 countries (table 602.20). The 5 countries that outperformed the United States in 4th-grade science were Finland, Japan, the Republic of Korea, the Russian Federation, and Singapore. At grade 8, the average U.S. science score was higher than the average score in 23 of the 33 other participating countries in 2015, lower than the average score in 5 countries, and not measurably different from the average score in the remaining 5 countries (table 602.30). The 5 countries that outperformed the United States in 8th-grade science were Japan, the Republic of Korea, the Russian Federation, Singapore, and Slovenia.

The TIMSS Advanced assessment measures the advanced mathematics and physics achievement of students in their final year of secondary school who are taking or have taken advanced courses (table 602.35). On TIMSS Advanced, the U.S. average advanced mathematics score (485) and physics score (437) in 2015 were lower than the TIMSS Advanced scale centerpoint of 500.

#### *Program for International Student Assessment (PISA)*

The Program for International Student Assessment (PISA), coordinated by the Organization for Economic Cooperation and Development (OECD), has measured the performance of 15-year-old students in reading, mathematics, and science literacy every 3 years since 2000. PISA assesses 15-year-old students' application of reading, mathematics, and science literacy to problems within a real-life context. In 2015, PISA assessed students in the 35 OECD countries as well as in a number of other education systems. Some subnational entities participated as separate education systems, including public school systems in the U.S. states of Massachusetts and North Carolina. Results for the participating U.S. states are included in the discussion in chapter 6, while this Introduction includes only results for the United States in comparison with other OECD countries. PISA scores are reported on a scale of 0 to 1,000. On the 2015 PISA assessment, U.S. 15-year-olds' average score in reading literacy was 497, which was not measurably different from the OECD average score of 493 (table 602.50). The average reading literacy score in the United States was lower than the average score in 11 of the 34 other OECD countries, higher than the average score in 13 OECD countries, and not measurably different from the average score in 10 OECD countries. In all countries, females outperformed males in reading literacy (table 602.40). The U.S. gender gap in reading (20 points) was not measurably different from the OECD average gap but was smaller than the gap in 12 other OECD countries.

In mathematics literacy, U.S. 15-year-olds' average score of 470 on the 2015 PISA assessment was lower than the OECD average score of 490 (table 602.60). The average mathematics literacy score in the United States was lower than the average score in 27 of the 34 other OECD countries, higher than the average score in 4 OECD countries, and not measurably different from the average score in 3 OECD countries. In 18 OECD countries, including the United States, males outperformed females in mathematics literacy (table 602.40). The U.S. gender gap in favor of males in mathematics (9 points) was not measurably different from the OECD average gap.

In science literacy, U.S. 15-year-olds' average score of 496 was not measurably different from the OECD average score of 493 (table 602.70). The average science literacy score in the United States was lower than the average score in 12 of the 34 other OECD countries, higher than the average score in 10 OECD countries, and not measurably different from the average score in 12 OECD countries. In 15 OECD

countries, including the United States, males outperformed females in science literacy. In 4 OECD countries, females outperformed males in science literacy. The U.S. gender gap in favor of males in science (7 points) was not measurably different from the OECD average gap.

#### *Progress in International Reading Literacy Study (PIRLS)*

The Progress in International Reading Literacy Study (PIRLS) measures the reading knowledge and skills of 4th-graders over time. PIRLS scores are reported on a scale from 0 to 1,000, with the scale centerpoint set at 500. On the 2016 PIRLS, U.S. 4th-graders had an average reading literacy score of 549 (table 602.10). The U.S. average score in 2016 was 7 points lower than in 2011 but 10 points higher than in 2006. In all 4 assessment years, the U.S. average score was higher than the PIRLS scale centerpoint. In 2016, PIRLS assessed 4th-grade reading literacy in 43 countries. The average reading literacy score of 4th-graders in the United States was higher than the average score in 24 of the 42 other participating countries, lower than the average score in 7 countries, and not measurably different from the average score in the remaining 11 countries.

#### **High School Graduates and Dropouts**

About 3,643,000 high school students are expected to graduate during the 2018–19 school year (table 219.10), including 3,285,000 public school graduates and 358,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2018–19 projection of high school graduates is slightly lower than the prior record high projection of 3,651,000 graduates for 2017–18, but it exceeds the baby boom era's high point in 1975–76, when 3,142,000 students earned diplomas. In 2015–16, about 84 percent of public high school students graduated with a regular diploma within 4 years of first starting 9th grade (table 219.46). This rate is known as the 4-year adjusted cohort graduation rate (ACGR).

The number of GED credentials issued by states to GED test passers rose from 330,000 in 1977 to 487,000 in 2000 (table 219.60). A record number of 648,000 GED credentials were issued in 2001. In 2002, there were revisions to the GED test and to the data reporting procedures. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002. Prior to 2002, reporting was based on summary data from the states on the number of GED credentials issued. As of 2002, reporting has been based on individual GED candidate- and test-level records collected by the GED Testing Service.<sup>1</sup> In 2013, some 541,000 people passed the GED tests, up from 387,000 in 2003.

<sup>1</sup> Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

The status dropout rate has decreased over the past two decades (table 219.70). The status dropout rate is the percentage of the civilian noninstitutionalized 16- to 24-year-old population who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 1990 and 2016, the status dropout rate declined from 12.1 to 6.1 percent. During this period, the status dropout rate for Black 16- to 24-year-olds declined from 13.2 percent to 6.2 percent and the rate for Hispanic 16- to 24-year-olds declined from 32.4 to 8.6 percent. In 2016, the status dropout rate for White 16- to 24-year-olds (5.2 percent) was lower than the rate for Hispanic 16- to 24-year-olds, but it was not measurably different from the rate for Black 16- to 24-year-olds.

## Postsecondary Education

### *Enrollment in Degree-Granting Institutions*

College enrollment was 19.8 million in fall 2016, reflecting a 6 percent decrease from the record enrollment of 21.0 million in fall 2010 (table 105.30). College enrollment is expected to remain below the record set in 2010 through fall 2027, the last year for which NCES enrollment projections have been developed. Between fall 2016 and fall 2027, enrollment is expected to increase 3 percent. Despite decreases in the size of the traditional college-age population (18 to 24 years old) during the late 1980s and early 1990s, total enrollment increased during this period (tables 101.10 and 105.30). The traditional college-age population rose 4 percent between 2006 and 2016, and total college enrollment was 12 percent higher in 2016 than in 2006. The number of full-time students was 11 percent higher in 2016 than in 2006, and the number of part-time students was 13 percent higher (table 303.10). During the same time period, the number of male students enrolled increased 14 percent. The number of female students was 10 percent higher in 2016 than in 2006.

### *Faculty*

In fall 2016, degree-granting institutions—defined as postsecondary institutions that grant an associate’s or higher degree and are eligible for Title IV federal financial aid programs—employed 1.5 million faculty members, including 0.8 million full-time and 0.7 million part-time faculty (table 314.30). In addition, degree-granting institutions employed 0.4 million graduate assistants.

### *Degrees*

During the 2017–18 academic year, postsecondary degrees conferred were projected to number 1,029,000 associate’s degrees, 1,875,000 bachelor’s degrees, 775,000

master’s degrees, and 181,000 doctor’s degrees (table 318.10). The doctor’s degree total includes most degrees formerly classified as first-professional, such as M.D.’s, D.D.S.’s, and law degrees. Between 2005–06 and 2015–16 (the last year of actual data), the number of degrees conferred increased at all levels. The number of associate’s degrees was 41 percent higher in 2015–16 than in 2005–06, the number of bachelor’s degrees was 29 percent higher, the number of master’s degrees was 31 percent higher, and the number of doctor’s degrees was 29 percent higher.

Between 2005–06 and 2015–16, the number of bachelor’s degrees awarded to male students increased 30 percent, while the number of bachelor’s degrees awarded to female students increased 29 percent (table 318.10). Female students earned 57 percent of all bachelor’s degrees in 2015–16, which was slightly lower than the percentage in 2005–06 (58 percent). Between 2005–06 and 2015–16, the number of bachelor’s degrees awarded to White students increased 11 percent, compared with larger increases of 37 percent for Black students, 118 percent for Hispanic students, and 35 percent for Asian/Pacific Islander students (table 322.20). The number of bachelor’s degrees awarded to American Indian/Alaska Native students was 11 percent lower in 2015–16 than in 2005–06. In 2015–16, White students earned 65 percent of all bachelor’s degrees (compared with 75 percent in 2005–06), Black students earned 11 percent (compared with 10 percent in 2005–06), Hispanic students earned 13 percent (compared with 7 percent in 2005–06), and Asian/Pacific Islander students earned about 8 percent (compared with 7 percent in 2005–06). American Indian/Alaska Native students earned less than 1 percent of the degrees in both years. In 2015–16, students of Two or more races earned 3 percent of all bachelor’s degrees.

### *Undergraduate Prices*

For the 2016–17 academic year, average annual prices for undergraduate tuition, fees, room, and board were estimated to be \$17,237 at public institutions, \$44,551 at private nonprofit institutions, and \$25,431 at private for-profit institutions in current dollars (table 330.10). Between 2006–07 and 2016–17, prices for undergraduate tuition, fees, room, and board at public institutions rose 31 percent, and prices at private nonprofit institutions rose 24 percent, after adjustment for inflation. Prices for total tuition, fees, room, and board at private for-profit institutions decreased 11 percent between 2006–07 and 2016–17.

## Educational Attainment

The U.S. Census Bureau collects annual statistics on the educational attainment of the population. Between 2007 and 2017, the percentage of the adult population 25 years of age and over who had completed at least high school rose from 86 percent to 90 percent, and the percentage of adults with a bachelor’s or higher degree increased from 29 percent to

34 percent (table 104.10). (High school completers include those people who graduated from high school with a diploma as well as those who completed high school through equivalency programs.) Among those age 25 and over who were employed, 40 percent had a bachelor's or higher degree in 2017 and about half (51 percent) had an associate's or higher degree (table 502.10). The percentage of young adults (25- to 29-year-olds) who had completed at least high school increased from 87 percent in 2007 to 92 percent in 2017 (table 104.20). The percentage of young adults who had completed a bachelor's or higher degree increased from 30 percent in 2007 to 36 percent in 2017. During this same period, the percentage of 25- to 29-year-olds who had completed a master's or higher degree increased from 6 to 9 percent.

## Adult Literacy and Numeracy Skills

The Program for the International Assessment of Adult Competencies (PIAAC) assesses the cognitive skills of adults in three areas—literacy, numeracy, and problem solving in technology-rich environments—that are considered key to facilitating the social and economic participation of adults in advanced economies. The discussion below focuses on the areas of literacy and numeracy. PIAAC 2012 results are available for adults in 24 education systems, including 22 OECD education systems. The education systems that participated in the 2012 assessment were primarily countries, but also included 3 subnational education systems: Northern Ireland and England within the United Kingdom, and the Flemish community in Belgium. PIAAC literacy and numeracy scores are reported on a scale of 0 to 500.

In 2012, average scores on the PIAAC literacy scale for adults ages 25 to 65 ranged from 249 in Italy and 250 in Spain to 296 in Japan (table 604.10). U.S. 25- to 65-year-olds had an average PIAAC literacy score of 269, which was not measurably different from the OECD average score of 271. Across education systems, adults' average literacy scores generally increased with higher levels of educational attainment. In the United States, for example, 25- to 65-year-olds whose highest level of attainment was high school completion had an average literacy score of 259,

compared with an average score of 302 for those who had a bachelor's or higher degree. The average literacy score for U.S. high school completers in the 25- to 65-year-old age group was lower than the OECD average score of 268 for high school completers in this age group, while the literacy score for U.S. 25- to 65-year-olds with a bachelor's or higher degree was not measurably different from the OECD average score of 302 for those with a bachelor's or higher degree.

On the PIAAC numeracy scale, 2012 average scores for adults ages 25 to 65 ranged from 245 in Spain and 246 in Italy to 289 in Japan. U.S. 25- to 65-year-olds had an average PIAAC numeracy score of 254, which was lower than the OECD average score of 268. Across education systems, adults' average numeracy scores generally increased with higher levels of educational attainment. In the United States, for example, 25- to 65-year-olds whose highest level of attainment was high school completion had an average numeracy score of 241, compared with an average score of 293 for those who had a bachelor's or higher degree. The average numeracy score for U.S. 25- to 65-year-olds who had completed only high school was lower than the OECD average score of 265 for those with the same level of educational attainment. Likewise, the average numeracy score for U.S. 25- to 65-year-olds with a bachelor's or higher degree was lower than the OECD average score of 303 for those with a bachelor's or higher degree.

## Education Expenditures

U.S. expenditures for public and private education, from prekindergarten through graduate school (excluding postsecondary schools not awarding associate's or higher degrees), were an estimated \$1.3 trillion for 2016–17 (table 106.10). Expenditures of elementary and secondary schools totaled an estimated \$759 billion, while those of degree-granting postsecondary institutions totaled an estimated \$583 billion. Total expenditures for education were an estimated 7.2 percent of the gross domestic product in 2016–17. Education spending as a percentage of GDP peaked at 7.6 percent in 2009–10 but declined between 2009–10 and 2015–16 (7.1 percent).

## CHAPTER 1

# All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and postsecondary education, as well as from the general population, to present a composite picture of the American education system. Tables feature data on the total number of people enrolled in school, the number of teachers, the number of schools, and the total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as educational attainment, family characteristics, and population. Economic indicators and price indexes have been added to facilitate analyses.

Many of the statistics in this chapter are derived from the statistical activities of the National Center for Education Statistics (NCES). In addition, substantial contributions have been drawn from the work of other groups, both governmental and nongovernmental, as shown in the source notes of the tables. Information on survey methodologies is contained in Appendix A: Guide to Sources and in the publications cited in the table source notes.

## The U.S. System of Education

The U.S. system of education can be described as having three levels of formal education: elementary, secondary, and postsecondary (figure 1). Students may spend 1 to 3 years in preprimary programs (prekindergarten [PK] and kindergarten [K]), which may be offered either in separate schools or in elementary schools that also offer higher grades. (In *Digest of Education Statistics* tables, prekindergarten and kindergarten are generally defined as a part of elementary education.) Following kindergarten, students ordinarily spend 6 to 8 years in elementary school. The elementary school program is followed by a 4- to 6-year program in secondary school. Students typically complete the entire program through grade 12 by age 18. Education at the elementary and secondary levels is provided in a range of institutional settings—including elementary schools (preprimary schools, middle schools, and schools offering broader ranges of elementary grades); secondary schools (junior high schools, high schools, and senior high schools); and combined elementary/secondary schools—that vary in structure from locality to locality.

High school graduates who decide to continue their education may enter a specialized career/technical institution, a 2-year community or junior college, or a 4-year college or

university. A 2-year college typically offers the first 2 years of a standard 4-year college curriculum and a selection of terminal career and technical education programs. Academic courses completed at a 2-year college are usually transferable for credit at a 4-year college or university. A career/technical institution offers postsecondary technical training programs of varying lengths leading to a specific career.

An associate's degree requires at least 2 years of postsecondary coursework, and a bachelor's degree typically requires 4 years of postsecondary coursework. At least 1 year of coursework beyond a bachelor's degree is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond a bachelor's degree.

Professional schools differ widely in admission requirements and program length. Medical students, for example, generally complete a bachelor's program of premedical studies at a college or university before they can enter the 4-year program at a medical school. Law programs typically involve 3 years of coursework beyond a bachelor's degree.

## Enrollment

Total enrollment in public and private elementary and secondary schools (prekindergarten through grade 12) grew rapidly during the 1950s and 1960s, reaching a peak year in 1971 (table A, table 105.30, and figure 2). This enrollment rise reflected what is known as the “baby boom,” a dramatic increase in births following World War II. Between 1971 and 1984, total elementary and secondary school enrollment decreased every year, reflecting the decline in the size of the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started increasing in fall 1985, began hitting new record levels in the mid-1990s, and continued to reach new record levels every year through 2006, after which enrollment declined slightly from its 2006 level. However, enrollments in fall 2013 (55.4 million) through fall 2015 (56.2 million) were higher than the fall 2006 record level of 55.3 million. A pattern of annual enrollment increases is projected to continue at least through fall 2027 (the last year for which NCES has projected school enrollment). Total elementary and secondary enrollment is projected to increase 3 percent between fall 2017 and fall 2027, when enrollment is expected to reach 58.2 million.

**Table A. Total elementary and secondary school enrollment, by overall trends: Selected years, 1949–50 through fall 2027**

Trend and year	Number of students (in millions)
<b>“Baby boom” increases</b>	
1949–50 school year .....	28.5
Fall 1959 .....	40.9
Fall 1969 .....	51.1
Fall 1971 (peak) .....	51.3
<b>13 years with annual declines</b>	
Fall 1972 (first year of decline) .....	50.7
Fall 1984 (final year of decline) .....	44.9
<b>Annual increases from 1985 to 2006</b>	
Fall 1985 .....	45.0
Fall 1996 (new record highs begin) .....	51.5
Fall 2006 (final year of record highs) .....	55.3
<b>Slight declines or stable enrollment</b>	
Fall 2007 .....	55.2
Fall 2010 .....	54.9
Fall 2012 .....	55.1

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States, 1949–50; Statistics of Public Elementary and Secondary School Systems, 1959 through 1972; Common Core of Data (CCD), 1984 through 2015; Private School Universe Survey (PSS), 1997–98 through 2015–16; and National Elementary and Secondary Enrollment Projection Model, 1972 through 2027.*

Between 1985 and 2016, the total public and private elementary and secondary school enrollment rate for 5- and 6-year-olds decreased from 96 to 93 percent, and the enrollment rate for 7- to 13-year-olds decreased from 99 to 98 percent (table 103.20). The enrollment rate for 14- to 17-year-olds for 2016 (95 percent) was not measurably different from the rate in 1985. Since these enrollment rates changed by less than 5 percentage points between 1985 and 2016, increases in elementary and secondary school enrollment primarily reflect the larger increases in the number of children in these age groups. Between 1985 and 2016, the number of 5- and 6-year-olds increased by 17 percent, the number of 7- to 13-year-olds increased by 26 percent, and the number of 14- to 17-year-olds increased by 13 percent (table 101.10). Increases in the enrollment rate of prekindergarten-age children (ages 3 and 4) from 39 percent in 1985 to 54 percent in 2016 (table 103.20) and in the number of 3- and 4-year-olds from 7.1 million to 8.0 million (table 101.10) also contributed to overall increases in prekindergarten through grade 12 enrollment.

Public school enrollment at the elementary level (prekindergarten through grade 8) rose from 29.9 million in fall 1990 to 34.2 million in fall 2003 (table 105.30). Public elementary enrollment was less than 1 percent lower in fall 2004 than in fall 2003 and then generally increased to a projected total of 35.6 million for fall 2017. Public elementary enrollment is projected to increase 3 percent between 2017 and 2027. Public school enrollment at the secondary level (grades 9 through 12) rose from 11.3 million in 1990 to 15.1 million in 2007 but then declined 2 percent to 14.7 million in 2011. Public secondary enrollment is projected to increase 2 percent between 2011

and 2017 and then show an additional increase of 2 percent between 2017 and 2027. Total public elementary and secondary enrollment is projected to increase every year from 2017 to 2027.

The percentage of students in private elementary and secondary schools declined from 11.0 percent in fall 2005 to 10.2 percent in fall 2015 (table 105.30). In fall 2017, an estimated 5.9 million students were enrolled in private schools at the elementary and secondary levels.

Total enrollment in public and private degree-granting postsecondary institutions reached 14.5 million in fall 1992 but decreased every year through fall 1995 (table 105.30). Total enrollment increased 47 percent between 1995 and 2010 (to 21.0 million) but declined 6 percent between 2010 and 2016 (to 19.8 million). Total enrollment is expected to increase 3 percent between fall 2016 and fall 2027, reaching 20.5 million. The percentage of students who attended private institutions in fall 2016 (27 percent) was higher than the percentage in 2006 (26 percent). In fall 2016, about 5.3 million students attended private institutions, with about 4.1 million in nonprofit institutions and 1.2 million in for-profit institutions (table 303.10). Enrollment changes in degree-granting postsecondary institutions have been driven by increases in enrollment rates, as well as by increases in the population of 20- to 24-year-olds. The percentage of 18- and 19-year-olds enrolled in degree-granting postsecondary institutions was higher in 2016 (50 percent) than in 2006 (46 percent). The number of 18- and 19-year-olds in 2016 was 1 percent lower than in 2006 (tables 101.10 and 103.20). The enrollment rate of 20- to 24-year-olds rose from 35 percent in 2006 to 39 percent in 2016, and the number of 20- to 24-year-olds rose by 6 percent during the same period.

## Educational Attainment

The percentages of people 25 years old and over completing high school and higher education have been rising. Between 2007 and 2017, the percentage of people 25 years old and over who had completed at least high school increased from 86 to 90 percent, and the percentage who had completed a bachelor’s or higher degree increased from 29 to 34 percent (table 104.10 and figure 3). In 2017, about 9 percent of people 25 years old and over held a master’s degree as their highest degree and 3 percent held a doctor’s or first-professional degree (table 104.30).

Among young adults (25- to 29-year-olds), the percentage who had completed at least high school increased from 87 percent in 2007 to 92 percent in 2017 (table 104.20 and figure 4). The percentage of young adults who had completed a bachelor’s or higher degree increased from 30 percent in 2007 to 36 percent in 2017. In 2017, about 7 percent of young adults held a master’s degree as their highest degree and 2 percent held a doctor’s or first-professional degree (table 104.30 and figure 5). Overall, the percentage of young adults who held a master’s or higher degree rose from 6 percent in 2007 to 9 percent in 2017.

Between 2007 and 2017, changes in the educational attainment of young adults also occurred by race/ethnicity. During this period, the percentages of Hispanic, White, and Black young adults who had completed at least high school increased, but there was no measurable change in the percentage of Asian young adults (table 104.20 and figure 6). The percentage of Hispanic young adults who had completed at least high school rose from 65 percent in 2007 to 83 percent in 2017, an increase of 18 percentage points. During the same period, the percentage of White young adults who had completed at least high school rose from 93 to 96 percent. Since the increase for White young adults was smaller than the increase for Hispanic young adults, the gap between the high school completion percentages for these two groups decreased from 28 percentage points in 2007 to 13 percentage points in 2017. Between 2007 and 2017, the percentage of Black young adults who had completed high school increased from 88 to 92 percent. The gap between the White and Black high school completion percentages in 2017 (3 percentage points) was not measurably different from the gap in 2007. In 2017, the percentage of young adults who had completed at least high school was higher for Whites and Asians (97 percent) than for Blacks, Hispanics, and American Indians/Alaska Natives (85 percent).

The percentage of bachelor's degree holders also varied among young adults of different racial/ethnic groups, with 63 percent of Asian young adults holding a bachelor's or higher degree in 2017, compared with young adults who were White (42 percent), Black (23 percent), Hispanic (19 percent), Pacific Islander (25 percent), American Indian/Alaska Native (16 percent), and of Two or more races (33 percent). Between 2007 and 2017, the percentages who had completed a bachelor's or higher degree increased for White and Hispanic young adults but showed no measurable change for Asian and Black young adults. During this 10-year period, the percentages who held a bachelor's or higher degree increased from 36 to 42 percent among White young adults, from 20 to 23 percent among Black young adults, and from 12 to 19 percent

among Hispanic young adults. With these increases for all three groups, the gap in bachelor's degree attainment percentages between White and Black young adults in 2017 (19 percentage points) was not measurably different from the gap in 2007. Also, the gap between White and Hispanic young adults in 2017 (24 percentage points) was not measurably different from the gap in 2007.

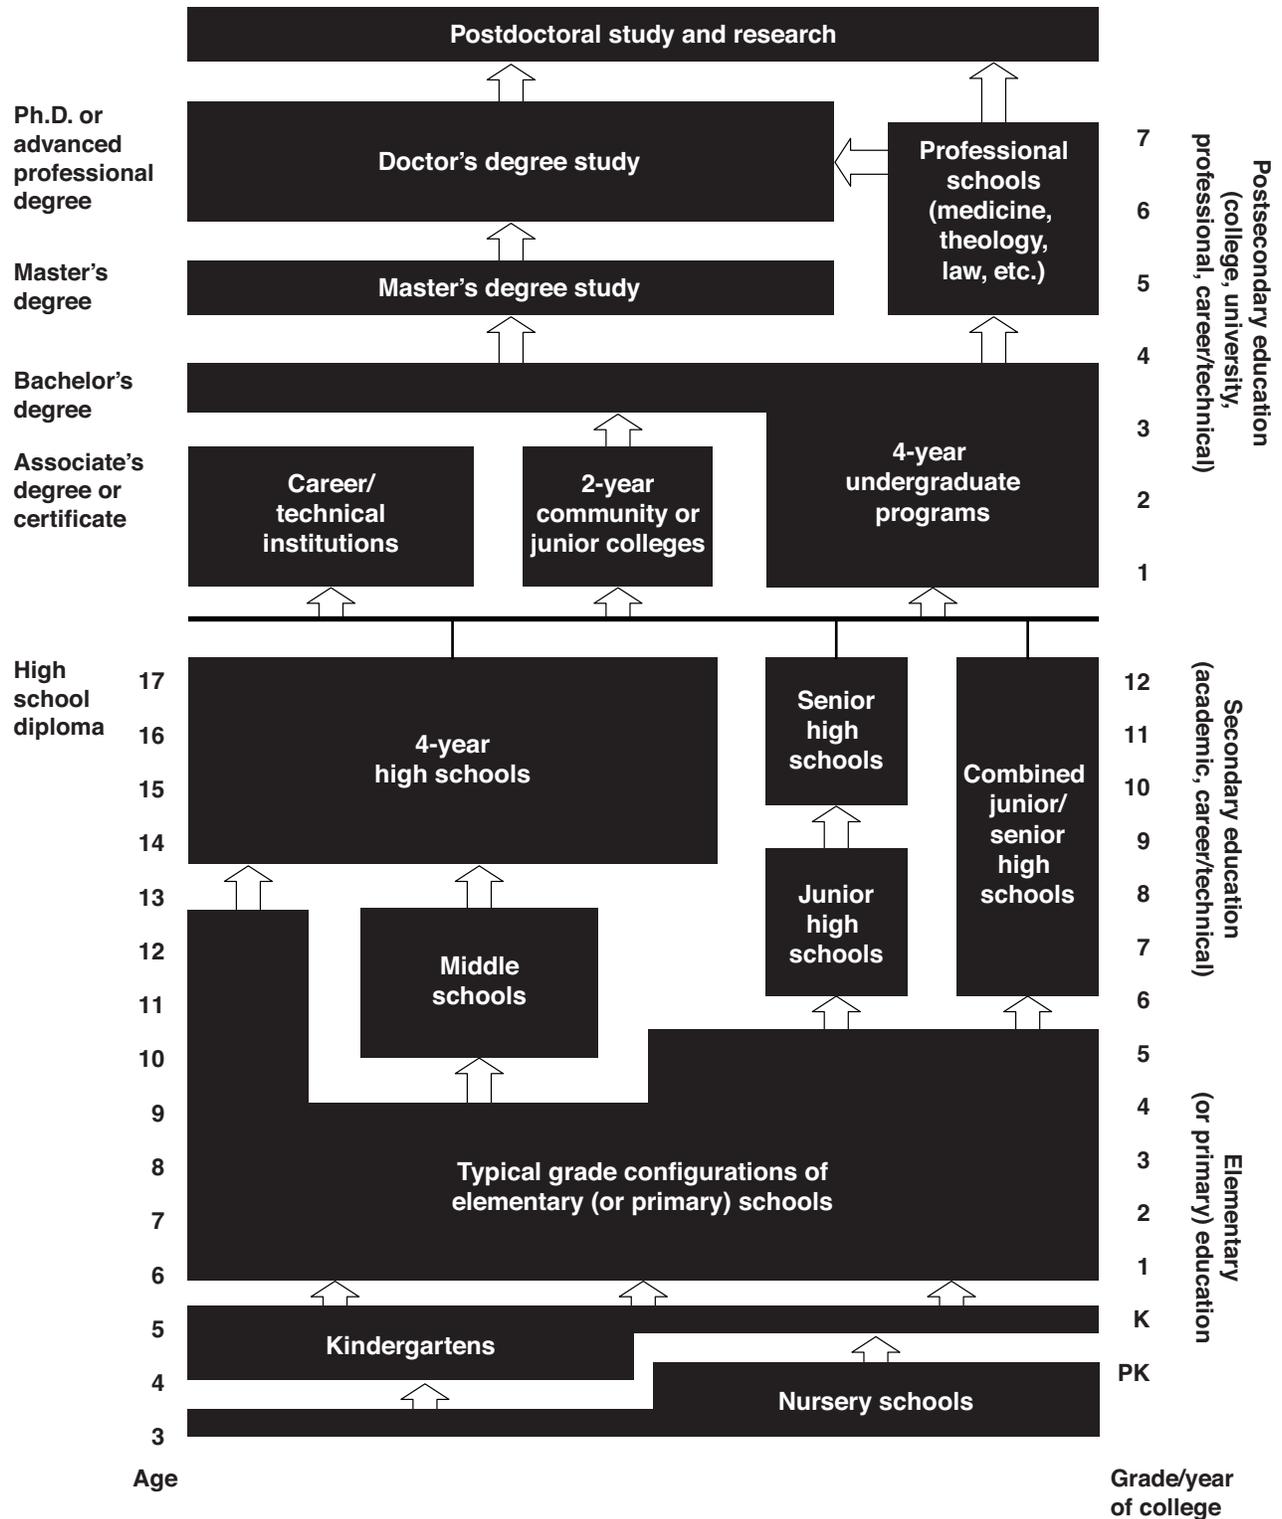

## Teachers and Faculty

A projected 3.6 million elementary and secondary school full-time-equivalent (FTE) teachers were engaged in classroom instruction in the fall of 2017 (table 105.40), which was less than 1 percent lower than in 2007. The number of FTE public elementary and secondary school teachers in 2017 was 3.2 million, and the number of FTE private elementary and secondary school teachers was 0.5 million. FTE faculty at degree-granting postsecondary institutions totaled a projected 1.1 million in 2017, including 0.7 million at public institutions and 0.4 million at private institutions (table 105.10).

## Expenditures

Expenditures of educational institutions were an estimated \$1.3 trillion for the 2016–17 school year (table 106.20 and figure 2). Elementary and secondary schools spent 57 percent of this total (\$759 billion), and degree-granting postsecondary institutions spent the remaining 43 percent (\$583 billion). After adjustment for inflation, total expenditures of all educational institutions rose by an estimated 15 percent between 2006–07 and 2016–17. Inflation-adjusted expenditures of degree-granting postsecondary institutions rose by an estimated 31 percent. Expenditures of public elementary and secondary schools were 5 percent higher in 2016–17 than in 2006–07. In 2016–17, expenditures of educational institutions were an estimated 7.2 percent of the gross domestic product (table 106.10).

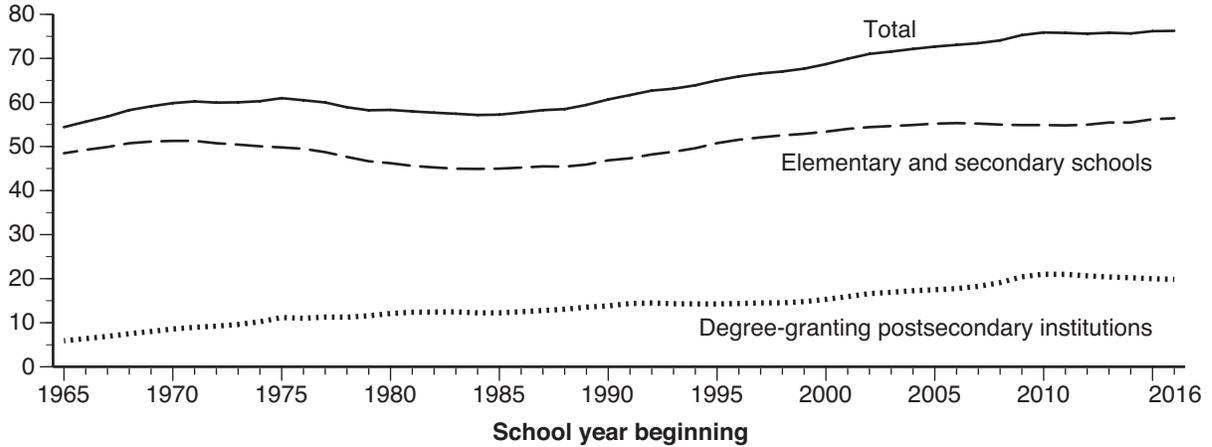

Figure 1. The structure of education in the United States

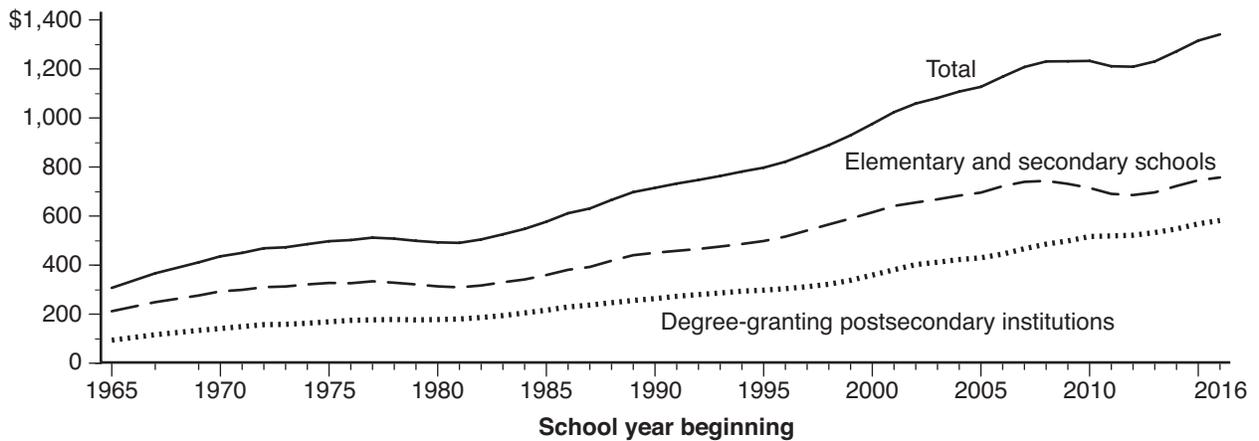

NOTE: Figure is not intended to show relative number of institutions nor relative size of enrollment for the different levels of education. Figure reflects typical patterns of progression rather than all possible variations. Adult education programs, while not separately delineated above, may provide instruction at the adult basic, adult secondary, or postsecondary education levels. †Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Includes those born in the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas, as well as those born abroad to U.S.-citizen parents.

<sup>2</sup>Respondents who wrote in some other race that was not included as an option on the questionnaire.

<sup>3</sup>Includes other Central American subgroups not shown separately.

<sup>4</sup>Includes Taiwanese.

<sup>5</sup>In addition to the subgroups shown, also includes Sri Lankan.

<sup>6</sup>Consists of Indonesian and Malaysian.

NOTE: Resident population includes civilian population and armed forces personnel residing within the United States; it excludes armed forces personnel residing overseas. Data are from the American Community Survey and may differ from data shown in other tables obtained from the Current Population Survey. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

<sup>1</sup>As of April 1.

<sup>2</sup>As of July 1.

NOTE: Resident population includes civilian population and armed forces personnel residing within the United States and within each state; it excludes armed forces personnel residing overseas. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.  
 ‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.  
 †Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.  
 NOTE: A family household consists of two or more people who are related by birth, marriage, or adoption and are residing together. Own children are never-married sons and daughters, including stepchildren and adopted children, of the householder or married couple. Detail may not sum to totals because of rounding.

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Includes all children who live either with their parent(s) or with a householder to whom they are related by birth, marriage, or adoption (except a child who is the spouse of the householder). Children are classified by their parents' marital status or, if no parents are present in the household, by the marital status of the householder who is related to the children. Living arrangements with only a "female householder" or "male householder" are those in which the parent or the householder who is related to the child does not have a spouse living in the household. The householder is the person (or one of the people) who owns or rents (maintains) the housing unit.

<sup>2</sup>Includes foster children, children in unrelated subfamilies, children living in group quarters, and children who were reported as the householder or spouse of the householder.

<sup>3</sup>Includes other Central American subgroups not shown separately.

<sup>4</sup>Includes Taiwanese.

<sup>5</sup>In addition to the subgroups shown, also includes Sri Lankan.

<sup>6</sup>Consists of Indonesian and Malaysian.

<sup>7</sup>Respondents who wrote in some other race that was not included as an option on the questionnaire.

NOTE: Data are based on sample surveys of the entire population residing within the United States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

<sup>1</sup>Data exclude institutionalized persons (e.g., those living in prisons or nursing homes) as well as persons living in most types of noninstitutional group quarters (e.g., college housing or military barracks). Data include noninstitutionalized persons living in households as well as those living in group homes and shelters.

<sup>2</sup>Related children in a family include all children in the household who are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). The householder is the person (or one of the people) who owns or rents (maintains) the housing unit. This table excludes unrelated children and householders who are themselves under the age of 18.

<sup>3</sup>Based on 1989 incomes and family sizes collected in the 1990 census.

<sup>4</sup>Based on 1999 incomes and family sizes collected in the 2000 census.

<sup>5</sup>Based on income and family size data from the American Community Survey (ACS). ACS respondents were interviewed throughout the given year and reported the income they received during the previous 12 months. Data are based on sample surveys of the entire population residing within the United States.

NOTE: Poverty status is determined by the Census Bureau using a set of money income thresholds that vary by family size and composition. For additional information about poverty status, see <https://www.census.gov/topics/income-poverty/poverty/guidance/poverty-measures.html>. Poverty estimates in this table may differ from table 102.50's official national poverty estimates, which are based on a different data source (the Current Population Survey). Detail may not sum to totals because of rounding.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Related children in a family include all children in the household who are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). The householder is the person (or one of the people) who owns or rents (maintains) the housing unit. This table includes only children related to the householder. It excludes unrelated children and householders who are themselves under the age of 18.

<sup>2</sup>To determine family structure, children are classified by their parents' marital status or, if no parents are present in the household, by the marital status of the householder who is related to the children.

<sup>3</sup>Includes other Central American subgroups not shown separately.

<sup>4</sup>Includes Taiwanese.

<sup>5</sup>In addition to the subgroups shown, also includes Sri Lankan.

<sup>6</sup>Consists of Indonesian and Malaysian.

<sup>7</sup>Includes persons reporting American Indian alone, persons reporting Alaska Native alone, and persons from American Indian and/or Alaska Native tribes specified or not specified.

<sup>8</sup>Respondents who wrote in some other race that was not included as an option on the questionnaire.

NOTE: Respondents were interviewed throughout the given year and reported the income they received during the previous 12 months. Data are based on sample surveys of the entire population residing within the United States. Poverty status is determined by the Census Bureau using a set of money income thresholds that vary by family size and composition. For additional information about poverty status, see <https://www.census.gov/topics/income-poverty/poverty/guidance/poverty-measures.html>. Poverty estimates in this table may differ from table 102.50's official national poverty estimates, which are based on a different data source (the Current Population Survey). Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2010 and 2016. (This table was prepared November 2017.)

**Table 102.62. Percentage of children under age 18 living in poverty, by parents' highest level of educational attainment, child's race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2016**

 †Not applicable.  
 !Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.  
 ‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.  
<sup>1</sup>Parents include adoptive and stepparents, but exclude parents not residing in the same household as their children.  
<sup>2</sup>Includes parents who completed high school through equivalency programs, such as a GED program.  
<sup>3</sup>Includes parents with professional degrees.  
<sup>4</sup>Includes other Central American subgroups not shown separately.  
<sup>5</sup>Includes Taiwanese.  
<sup>6</sup>In addition to the subgroups shown, also includes Sri Lankan.  
<sup>7</sup>Consists of Indonesian and Malaysian.

<sup>8</sup>Includes persons reporting American Indian alone, persons reporting Alaska Native alone, and persons from American Indian and/or Alaska Native tribes specified or not specified.  
<sup>9</sup>Respondents who wrote in some other race that was not included as an option on the questionnaire.  
 NOTE: Table includes only children under the age of 18 who resided with at least one of their parents (including an adoptive or stepparent). Respondents were interviewed throughout the given year and reported the income they received during the previous 12 months. Data are based on sample surveys of the entire population residing within the United States. Poverty status is determined by the Census Bureau using a set of money income thresholds that vary by family size and composition. For additional information about poverty status, see <https://www.census.gov/topics/income-poverty/poverty/guidance/poverty-measures.html>. Race categories exclude persons of Hispanic ethnicity.  
 SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2010 and 2016. (This table was prepared November 2017.)

<sup>†</sup>Not applicable.

<sup>#</sup>Rounds to zero.

<sup>!</sup>Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>‡</sup>Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.

<sup>2</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

<sup>3</sup>Rounds to 100.0.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, preschools, kindergartens, elementary and secondary schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Total includes persons from other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, selected years, 1980 through 2016. (This table was prepared January 2018.)

—Not available.

†Not applicable.

<sup>1</sup>Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.

<sup>2</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: Data for 1940 are for April. Data for all other years are as of October. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or

nursing facilities). Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary and secondary schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night.

—Not available.  
†Not applicable.

<sup>1</sup>Includes persons of Hispanic ethnicity for years prior to 1980.  
<sup>2</sup>Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers—i.e., those persons who graduated from high school with a diploma as well as those who completed high school through equivalency programs, such as a GED program.  
<sup>3</sup>Estimates based on Census Bureau reverse projection of 1940 census data on education by age.  
<sup>4</sup>Data for years prior to 1993 are for persons with 4 or more years of college.

NOTE: Beginning in 2005, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. For 1960 and prior years, data were collected in April. For later years, data were collected in March. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Includes persons of Hispanic ethnicity for years prior to 1980.

<sup>2</sup>Data for years prior to 1993 are for persons with 4 or more years of high school. Data for later years are for high school completers—i.e., those persons who graduated from high school with a diploma as well as those who completed high school through equivalency programs, such as a GED program.

<sup>3</sup>Estimates based on Census Bureau reverse projection of 1940 census data on education by age.

<sup>4</sup>Data for years prior to 1993 are for persons with 4 or more years of college.

NOTE: Beginning in 2005, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. For 1960 and prior years, data were collected in April. For later years, data were collected in March. Data are based on sample surveys of the noninstitutionalized population, which excludes persons living in institutions (e.g., prisons or nursing facilities); data include military personnel who live in households with civilians, but exclude those who live in military barracks. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Some data have been revised from previously published figures.

†Not applicable.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Includes completion of high school through equivalency programs, such as a GED program.

NOTE: Total includes other racial/ethnic groups not shown separately. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Standard errors were computed using replicate weights.  
SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), Annual Social and Economic Supplement, 2017. (This table was prepared March 2018.)

†Not applicable.

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met (too few cases for a reliable estimate).

NOTE: Data are based on sample surveys of the entire population age 25 and over residing within the United States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). The first

bachelor's degree major reported by respondents was used to classify their field of study, even though they were able to report a second bachelor's degree major and may possess advanced degrees in other fields. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Commerce, Census Bureau, American Community Survey (ACS), 2016. (This table was prepared July 2018.)

**Table 104.70. Number and percentage distribution of children under age 18, by parents' highest level of educational attainment, child's age group and race/ethnicity, and household type: 2010 and 2016**

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Parents include adoptive and stepparents, but exclude parents not residing in the same household as their children.

<sup>2</sup>Includes parents who completed high school through equivalency programs, such as a GED program.

<sup>3</sup>Includes parents with professional degrees.

<sup>4</sup>Respondents who wrote in some other race that was not included as an option on the questionnaire.

NOTE: Table includes only children under age 18 who resided with at least one of their parents (including an adoptive or step-parent). Children in single-parent households resided with only one parent, while those in two-parent households resided with two parents. Data are based on sample surveys of the entire population residing within the United States. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

#Rounds to zero.  
<sup>1</sup>High school completers include those graduating from high school with a diploma as well as those completing high school through equivalency programs, such as a GED program.  
 NOTE: Data are based on sample surveys of the entire population in the given age range residing within the United States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing located within the United States) and institutionalized

persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). Detail may not sum to totals because of rounding.

†Not applicable.

#Rounds to zero.

<sup>1</sup>Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>2</sup>Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>3</sup>Includes completion of high school through equivalency programs, such as a GED program.

<sup>4</sup>Total includes racial/ethnic groups not shown separately.

NOTE: Data are based on sample surveys of the entire population in the given age range residing within the United States, including both noninstitutionalized persons (e.g., those living in households, college housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other healthcare facilities). Race categories exclude persons of Hispanic ethnicity.

**Table 105.10. Projected number of participants in educational institutions, by level and control of institution: Fall 2017**  
 [In millions]

Participants	All levels (elementary, secondary, and degree-granting postsecondary)	Elementary and secondary schools			Degree-granting postsecondary institutions		
		Total	Public	Private	Total	Public	Private
1	2	3	4	5	6	7	8
<b>Total .....</b>	<b>86.4</b>	<b>63.6</b>	<b>57.0</b>	<b>6.6</b>	<b>22.8</b>	<b>16.7</b>	<b>6.1</b>
Enrollment .....	76.4	56.5	50.6	5.9	19.8	14.7	5.1
Teachers and faculty .....	4.6	3.6	3.2	0.4	1.1	0.7	0.4
Other professional, administrative, and support staff .....	5.5	3.5	3.2	0.3	1.9	1.3	0.6

NOTE: Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes federal Bureau of Indian Education schools and Department of Defense schools. Excludes private preprimary enrollment in schools that do not offer kindergarten or above. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for teachers and other staff in public and private elementary and secondary schools and colleges and universities are reported in terms of full-time equivalents. Detail may not sum to totals because of rounding.

<sup>1</sup>Includes imputations for public school prekindergarten enrollment in California and Oregon.  
<sup>2</sup>Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes homeschooled children who were not also enrolled in public and private schools. Private elementary enrollment includes preprimary students in schools offering kindergarten or higher grades.  
<sup>3</sup>Estimated.  
<sup>4</sup>Includes prorated proportion of students classified as ungraded. The total ungraded counts of students were prorated to the elementary level (prekindergarten to grade 8) and the secondary level (grades 9 to 12) based on prior reports.  
<sup>5</sup>In addition to students in grades 9 to 12 and ungraded secondary students, includes a small number of students reported as being enrolled in grade 13.  
<sup>6</sup>Data are actual.  
NOTE: Postsecondary data for 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher

degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.

<sup>1</sup>Beginning in fall 1985, data include estimates for an expanded universe of private schools. Therefore, direct comparisons with earlier years should be avoided.

<sup>2</sup>Data for 1869–70 through 1949–50 include resident degree-credit students enrolled at any time during the academic year. Beginning in 1959, data include all resident and extension students enrolled at the beginning of the fall term.

<sup>3</sup>Estimated.

<sup>4</sup>Includes imputations for public school prekindergarten enrollment in California and Oregon.

<sup>5</sup>Projected data. Fall 2016 data for degree-granting institutions are actual.

NOTE: Data for 1869–70 through 1949–50 reflect enrollment for the entire school year. Elementary and secondary enrollment includes students in local public school systems and in most private schools (religiously affiliated and nonsectarian), but generally excludes home-schooled children and students in subcollegiate departments of colleges and in federal schools. Excludes preprimary students in private schools that do not offer kindergarten or higher grades. Postsecondary data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it

includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Teachers are reported in terms of full-time equivalents.

<sup>2</sup>Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, and 2-year colleges. Excludes teaching assistants.

<sup>3</sup>Estimated.

<sup>4</sup>Inclusion of institutions is not consistent with surveys for 1987 and later years.

<sup>5</sup>Data for elementary and secondary schools are projected; data for degree-granting institutions are actual.

<sup>6</sup>Projected.

NOTE: Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. Headcounts are used to report data for degree-granting institutions faculty.

†Not applicable.  
<sup>1</sup>Includes special education, alternative, and other schools not classified by grade span. Because of changes in survey definitions, figures for “other” schools are not comparable from year to year.  
<sup>2</sup>Data for 1980–81 and 1990–91 include schools with first or higher grades. Data for later years include schools with kindergarten or higher grades.  
<sup>3</sup>Included in the elementary, secondary, and combined categories.  
NOTE: Postsecondary data for 1980–81 and 1990–91 are for institutions of higher education, while later data are for Title IV degree-granting and non-degree-granting institutions. Degree-granting institutions grant associate’s or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher

education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

—Not available.

<sup>1</sup>Estimated by the National Center for Education Statistics based on enrollment data for the given year and actual expenditures for prior years.

<sup>2</sup>Data for elementary and secondary education are estimated; data for degree-granting institutions are actual.

<sup>3</sup>Estimated by the National Center for Education Statistics based on teacher and enrollment data, and actual expenditures for prior years.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Expenditures for colleges and universities in 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949–50 through 1995–96 are for current-fund expenditures. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Data for public degree-granting institutions for 1996–97 through 2000–01 are for current expenditures; data for later years are for total expenditures. Post-

secondary data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding. —Not available.

<sup>1</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

<sup>2</sup>Estimated by the National Center for Education Statistics based on enrollment data for the given year and actual expenditures for prior years.

<sup>3</sup>Data for elementary and secondary education are estimated; data for degree-granting institutions are actual.

<sup>4</sup>Estimated by the National Center for Education Statistics based on teacher and enrollment data, and actual expenditures for prior years.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Expenditures for public and private colleges and universities in 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Public and private degree-granting institutions data for 1949–50 through 1995–96 are for current-fund expenditures. Data for private degree-granting institutions for 1996–97 and later years are for total expenditures. Data for public degree-granting institutions for 1996–97 through 2000–01 are for current expenditures; data for later years

are for total expenditures. Postsecondary data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.

#Rounds to zero.

<sup>1</sup>Includes state and local government expenditures for education and public libraries, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other direct general expenditures.

<sup>2</sup>Includes assistance and subsidies to individuals, private elementary and secondary schools, and private colleges and universities, as well as miscellaneous education expenditures. Does not include expenditures for public libraries.

NOTE: Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the Governmental Finances and Common Core of Data surveys. In 2011–12, a census of state and local governments was conducted; therefore, standard errors are not applicable. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

<sup>1</sup>Includes state and local government expenditures for education and public libraries, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other direct general expenditures.

<sup>2</sup>Includes assistance and subsidies to individuals, private elementary and secondary schools, and private colleges and universities, as well as miscellaneous education expenditures. Does not include expenditures for public libraries.

NOTE: Per capita amounts for 2014–15 are based on population estimates for July 2015. Per capita amounts for 2013–14 are based on the latest population estimates for July 2014 and have been revised from previously published figures. Detail may not sum to totals because of rounding.

## CHAPTER 2

# Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers and other school staff, schools, dropouts, achievement, school violence, and revenues and expenditures. These data are derived from surveys, censuses, and administrative data collections conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The information ranges from counts of students and schools to state graduation requirements.

## Enrollments

Public elementary and secondary school enrollment rose from 49.5 million in 2010 to 50.4 million in 2015, an increase of 2 percent (table 203.10 and figure 7). Public elementary enrollment (prekindergarten through grade 8) increased 2 percent between 2010 and 2015 (from 34.6 million to 35.4 million), while public secondary enrollment (grades 9 through 12) was 1 percent higher in 2015 (15.1 million) than in 2010 (14.9 million). Although public school enrollment increased overall between 2010 and 2015, there were enrollment decreases for some racial/ethnic groups and increases for others (table 203.50). Between 2010 and 2015, the enrollment of Hispanic students increased 14 percent and the enrollment of Asian/Pacific Islander students increased 9 percent. In contrast, the enrollment of American Indian/Alaska Native students decreased 10 percent, the enrollment of White students decreased 5 percent, and the enrollment of Black students decreased 2 percent. The reported number of students of Two or more races increased 48 percent between 2010 and 2015.

From 2010 to 2015, changes in public elementary and secondary school enrollment varied from state to state. Thirty-four states and the District of Columbia had higher enrollment in 2015 than in 2010, while 16 states had lower enrollment in 2015 than in 2010 (table 203.20 and figure 8). The largest public school enrollment increases occurred in the District of Columbia (18 percent), North Dakota (13 percent), and Utah (11 percent), and increases of more than 5 percent occurred in 10 other states (Texas, Nevada, Oregon, Colorado, South Dakota, Wyoming, Idaho, Nebraska, Florida, and South Carolina). The largest decrease in public school enrollment occurred in Vermont (9 percent), and decreases of more than 4 percent occurred in 3 other states (New Hampshire, Pennsylvania, and Connecticut).

Enrollment in private elementary and secondary schools in 2015 (5.8 million) was 5 percent lower than in 2005 (6.1 million) (table 205.10). In 2015, private school students made up 10.3 percent of all elementary and secondary school students.

Sixty-five percent of 3- to 5-year-olds were enrolled in preprimary education (nursery school and kindergarten) in 2016, which was not measurably different from the percentage enrolled in 2005 (table 202.10 and figure 9). However, the percentage of these children in full-day programs increased from 58 percent in 2005 to 65 percent in 2016.

In 2016, a higher percentage of 3- to 5-year-old children not yet enrolled in kindergarten (49 percent) were cared for primarily in center-based programs than had no regular nonparental care (27 percent) or were cared for primarily in home-based settings by relatives (14 percent) or by nonrelatives (8 percent) (table 202.30). An earlier survey in 2005–06 found that there were differences in the average quality of care 4-year-old children received in these settings. A higher percentage of children in Head Start and other center-based programs (35 percent) received high-quality care than those in home-based relative and nonrelative care (9 percent), according to the ratings of trained observers (*web-only table 202.60*).

The Individuals with Disabilities Education Act (IDEA), enacted in 1975, mandates that children and youth ages 3–21 with disabilities be provided a free and appropriate public school education. The percentage of total public school enrollment that represents children served by federally supported special education programs increased from 8.3 percent to 13.8 percent between 1976–77 and 2004–05 (table 204.30 and *Digest of Education Statistics 2016*, table 204.30). Much of this overall increase can be attributed to a rise in the percentage of students identified as having specific learning disabilities from 1976–77 (1.8 percent) to 2004–05 (5.7 percent). The overall percentage of students being served in programs for those with disabilities decreased between 2004–05 (13.8 percent) and 2015–16 (13.2 percent). However, there were different patterns of change in the percentages of students served with some specific conditions between 2004–05 and 2015–16. The percentage of children identified as having other health impairments (limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or

diabetes) rose from 1.1 to 1.8 percent of total public school enrollment; the percentage with autism rose from 0.4 to 1.2 percent; and the percentage with developmental delay rose from 0.7 to 0.9 percent. The percentage of children with specific learning disabilities declined from 5.7 percent to 4.6 percent of total public school enrollment during this period. In fall 2015, some 95 percent of 6- to 21-year-old students with disabilities were served in regular schools; 3 percent were served in a separate school for students with disabilities; 1 percent were placed in regular private schools by their parents; and less than 1 percent each were served in one of the following environments: in a separate residential facility, homebound or in a hospital, or in a correctional facility (table 204.60).

### Teachers and Other School Staff

During the 1970s and early 1980s, public school enrollment decreased while the number of teachers generally increased. For public schools, the number of pupils per teacher—that is, the pupil/teacher ratio<sup>1</sup>—declined from 22.3 in 1970 to 17.9 in 1985 (table 208.20 and figure 7). After enrollment started increasing in 1985, the public school pupil/teacher ratio continued to decline, reaching 17.2 in 1989. After a period of relative stability from the late 1980s through the mid-1990s, the ratio declined from 17.3 in 1995 to 15.3 in 2008. After 2008, the public school pupil/teacher ratio increased, reaching 16.0 in 2015. In comparison, the private school pupil/teacher ratio was 11.9 in 2015. The average class size in 2011–12 was 21.2 pupils for public elementary schools and 26.8 pupils for public secondary schools (table 209.30).

The percentage of public school teachers who were females increased from 75 percent in 1999–2000 to 77 percent in 2015–16 (tables 209.10 and 209.22). During the same time period, the percentage of teachers who were White declined from 84 percent to 80 percent and the number of teachers who were Black declined from 8 to 7 percent. The percentage of teachers who were Hispanic increased from 6 to 9 percent between 1999–2000 and 2015–16. Between 1999–2000 and 2015–16, the percentage of public school teachers who had completed a postbaccalaureate degree increased from 47 to 57 percent. The percentage of teachers with over 20 years of teaching experience declined from 32 percent in 1999–2000 to 22 percent in 2015–16; however, the percentage of teachers with 10 to 20 years of experience increased from 29 to 39 percent during this period.

Public school principals tend to be older and have more advanced credentials than public school teachers. In 2015–16, some 19 percent of public school principals

were under age 40, and 98 percent had a master’s or higher degree (table 212.08). In comparison, 43 percent of public school teachers were under age 40, and 57 percent had a master’s or higher degree. A lower percentage of public school principals than of teachers were female: 54 percent of principals were female, compared with 77 percent of teachers.

From 1969–70 to 1980, there was an 8 percent increase in the number of public school teachers, compared with a 48 percent increase in the number of all other public school staff<sup>2</sup> (table B and table 213.10). Consequently, the percentage of staff who were teachers declined from 60 percent in 1969–70 to 52 percent in 1980. From 1980 to 2015, the number of teachers and the number of all other staff grew at more similar rates (44 and 63 percent, respectively) than they did in the 1970s. As a result, the proportion of teachers among total staff was 3 percentage points lower in 2015 than in 1980, in contrast to the decrease of 8 percentage points during the 1970s. The numbers of staff in two categories increased more than 100 percent between 1980 and 2015: the number of instructional aides rose 135 percent, and the number of instruction coordinators rose 326 percent. Taken together, the percentage of staff with direct instructional responsibilities (teachers and instructional aides) was higher in 2015 (61 percent) than in 1980 (60 percent). In 2015, there were 8 pupils per staff member (total staff) at public schools, compared with 10 pupils per staff member in 1980 (table 213.10). At private schools in 2011–12, the number of pupils per staff member was 6 (*web-only table 205.60*).

In more recent years, the numbers of most types of staff have increased (table 213.10). Overall, the number of public school staff was 3 percent higher in fall 2015 than in fall 2010. The number of officials and administrators rose 5 percent during this period, and the number of principals and assistant principals rose 10 percent. Also, the number of instruction coordinators was 26 percent higher, the number of instructional aides was 4 percent higher, and the number of support staff was 4 percent higher. The number of teachers was 2 percent higher and the number of guidance counselors was 3 percent higher. In contrast, the number of librarians decreased by 14 percent.

**Table B. Number of public school staff, by selected categories: 1969–70, 1980, and 2015**

	[In thousands]		
Selected staff category	1969–70	1980	2015
<b>Total</b> .....	<b>3,361</b>	<b>4,168</b>	<b>6,383</b>
Teachers .....	2,016	2,184	3,151
Instructional aides .....	57	326	765
Instruction coordinators .....	32	21	87

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems, 1969–70; Statistics of Public Elementary and Secondary Schools, 1980*; and Common Core of Data (CCD), “State Nonfiscal Survey of Public Elementary/Secondary Education,” 2015–16.

<sup>1</sup> The pupil/teacher ratio is based on all teachers—including teachers of students with disabilities and other special teachers—and all students enrolled in the fall of the school year. Unlike the pupil/teacher ratio, the average class size excludes students and teachers in classes that are exclusively for special education students. Class size averages are based on surveys of teachers reporting on the counts of students in their classes.

<sup>2</sup> “All other public school staff” includes administrative staff, principals, librarians, guidance counselors, secretaries, custodial staff, food service workers, school bus drivers, and other professional and nonprofessional staff.

## Schools

During most of the last century, the trend of consolidating small schools brought declines in the total number of public schools in the United States. In 1929–30, there were approximately 248,000 public schools, compared with about 98,000 in 2015–16 (table 214.10). However, the number of public schools has increased in recent decades: Between 1988–89 and 2006–07, there was an increase of approximately 15,600 schools. Since 2006–07, the number of public schools has remained relatively stable, varying by fewer than 500 schools from year to year.

While the total number of public schools in the country has remained relatively stable in recent years, new schools have opened and some schools have closed. In 2015–16, there were 1,160 school closures (*web-only table 216.95*). The schools that closed had enrolled about 195,000 students in the prior school year (2014–15). Of the schools that closed, 893 were regular schools, 32 were special education schools, 14 were vocational schools, and 221 were alternative schools. Of these closed schools, 280 were classified as charter schools. The number of schools that closed in 2015–16 was lower than the number in 2000–01 (1,193); however, the number of annual school closures fluctuated during this period, ranging from 1,160 to 2,168. School closures do not necessarily reflect the number of school buildings that have been closed, since a school may share a building with another school, or one school may have multiple buildings.

Since the early 1970s, public school systems have been shifting away from junior high schools (schools consisting of either grades 7 and 8 or grades 7–9) and moving toward middle schools (a subset of elementary schools beginning with grade 4, 5, or 6 and ending with grade 6, 7, or 8) (table 216.10). Although the number of all elementary schools (schools beginning with grade 6 or below and ending with grade 8 or below) was similar in 1970–71 and 2000–01 (64,000 and 64,600, respectively), the number of middle schools increased by 462 percent (from 2,100 in 1970–71 to 11,700 in 2000–01). During the same period, the number of junior high schools declined by 57 percent (from 7,800 in 1970–71 to 3,300 in 2000–01). The number of all elementary schools was 1 percent higher in 2015–16 than in 2005–06, while the subset of middle schools rose by 4 percent to 13,000. During the same period, the number of junior high schools declined by 20 percent to 2,600. The total number of secondary schools in 2015–16 (24,000) was about the same as the number in 2005–06.

The average number of students in public elementary schools in 2015–16 (482) was higher than in 2005–06 (473) (table 216.45). The average enrollment size of public secondary schools decreased from 709 students in 2005–06 to 698 students in 2015–16. The average size of regular public secondary schools—which exclude alternative, special education, and vocational education schools—decreased from 819 students in 2005–06 to 797 students in 2015–16.

## School Choice

Over the past two decades, the range of options that parents have for the education of their children has expanded. Private schools have been a traditional alternative to public school education, but there are now more options for parents to choose public charter schools, and more parents are also homeschooling their children. Between fall 1999 and fall 2015, enrollment in elementary and secondary private schools decreased from 6.0 million to 5.8 million, a decline of 0.3 million or 4 percent (table 205.10). Although private school enrollment declined through much of this period, it was higher in fall 2015 (5.8 million) than in fall 2011 (5.3 million). From fall 1999 to fall 2015, the percentage of students who were enrolled in private schools declined from 11.4 percent to 10.3 percent. In contrast, enrollment in public charter schools increased between fall 1999 and fall 2015, rising from 0.3 million to 2.8 million, an increase of 2.5 million students (table 216.20). During this period, the percentage of public elementary and secondary school students who were in charter schools increased from 0.7 percent to 5.7 percent. In addition, there has been an increase in the number and percentage of 5- to 17-year-olds who are homeschooled (tables 206.10 and 206.20). About 1.7 million children were homeschooled in 2016, compared to 0.9 million in 1999.<sup>3</sup> Also, the percentage of 5- to 17-year-olds who were homeschooled in 2016 (3.3 percent) was higher than in 1999 (1.7 percent).

Charter schools are the typical form of school choice available to parents within the public education sector; however, there is also some opportunity for school choice among traditional public schools. In 2016, the parents of 41 percent of all students in grades 1–12 indicated that public school choice was available to them (table 206.40). Also in 2016, some 20 percent of the students in grades 1–12 were enrolled in public schools chosen by their families (table 206.30). Some 71 percent of students attended an assigned public school and 9 percent attended a private school. There were differences by some characteristics in the percentages of students who attended public schools chosen by their parents and the percentages of students who attended private schools in 2016. For example, the percentage of students attending chosen public schools was higher for Black students (32 percent) and Hispanic students (25 percent) than for White students (14 percent). In contrast, the percentage attending private schools was higher for White students (11 percent) than for Black students (8 percent) and Hispanic students (6 percent). There were also some differences in the percentage of students in chosen

<sup>3</sup> The number of homeschooled children in 1999 is from *Homeschooling in the United States: 1999* (NCES 2001-033), available at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2001033>. While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2016 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences in estimates between 1999 and 2016 could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail.

public schools by different levels of parental educational attainment. A lower percentage of students whose parents had completed only a bachelor's degree (18 percent) were enrolled in chosen schools, compared to students whose parents had not completed high school (23 percent) or who had only completed high school (21 percent). In contrast, the percentage of students attending private schools was higher for students whose parents had a bachelor's degree (13 percent) or graduate degree (18 percent) than for students whose parents had less than a high school diploma (5 percent), only a high school diploma (4 percent), or only some college or a vocational degree (6 percent). The percentage of students attending chosen public schools was higher for students living in cities (31 percent) than for students in suburban areas (17 percent), towns (14 percent), and rural areas (11 percent).

Compared with students in assigned public schools, a higher percentage of students in chosen public schools had parents who were very satisfied with some elements of their children's education in 2016 (table 206.50). Among students in grades 3 through 12, the percentage of students whose parents were very satisfied with their school was higher for students in chosen schools (60 percent) than for students in assigned schools (54 percent). Similarly, the percentage of students whose parents were very satisfied with their school's academic standards was higher for students in chosen schools (60 percent) than for students in assigned schools (53 percent). Also, higher percentages of students in chosen schools than in assigned schools had parents who were very satisfied with school order and discipline (57 vs. 53 percent) as well as with staff interaction with parents (51 vs. 47 percent). There was no measurable difference in the percentage of students who had parents who were highly satisfied with the teachers in their school, whether assigned or chosen.

## High School Graduates and Dropouts

About 3,643,000 high school students are expected to graduate during the 2018–19 school year (table 219.10), including 3,285,000 public school graduates and 358,000 private school graduates. High school graduates include only recipients of diplomas, not recipients of equivalency credentials. The 2018–19 projection of high school graduates is slightly lower than the prior record high projection of 3,651,000 graduates for 2017–18, but it exceeds the baby boom era's high point in 1975–76, when 3,142,000 students earned diplomas. In 2015–16, about 84 percent of public high school students graduated with a regular diploma within 4 years of first starting 9th grade (table 219.46). This rate is known as the 4-year adjusted cohort graduation rate (ACGR).

The number of GED credentials issued by states to GED test passers rose from 330,000 in 1977 to 487,000 in 2000 (table 219.60). A record number of 648,000 GED credentials were issued in 2001. In 2002, there were revisions to

the GED test and to the data reporting procedures. In 2001, test takers were required to successfully complete all five components of the GED or else begin the five-part series again with the new test that was introduced in 2002. Prior to 2002, reporting was based on summary data from the states on the number of GED credentials issued. As of 2002, reporting has been based on individual GED candidate- and test-level records collected by the GED Testing Service.<sup>4</sup> In 2013, some 541,000 people passed the GED tests, up from 387,000 in 2003.

The status dropout rate has decreased over the past two decades (table 219.70). The status dropout rate is the percentage of the civilian noninstitutionalized 16- to 24-year-old population who are not enrolled in school and who have not completed a high school program, regardless of when they left school. (People who left school but went on to receive a GED credential are not treated as dropouts.) Between 1990 and 2016, the status dropout rate declined from 12.1 to 6.1 percent. During this period, the status dropout rate for Black 16- to 24-year-olds declined from 13.2 percent to 6.2 percent and the rate for Hispanic 16- to 24-year-olds declined from 32.4 to 8.6 percent. In 2016, the status dropout rate for White 16- to 24-year-olds (5.2 percent) was lower than the rate for Hispanic 16- to 24-year-olds, but it was not measurably different from the rate for Black 16- to 24-year-olds.

## Achievement

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs: the national main NAEP, state NAEP (which includes the Trial Urban District Assessment), and national long-term trend NAEP. The main NAEP reports current information for the nation and specific geographic regions of the country. The assessment program includes students drawn from both public and private schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board and use the latest advances in assessment methodology. Because the assessment items reflect curricula associated with specific grade levels, the main NAEP uses samples of students at those grade levels.

Since 1990, NAEP assessments have also been conducted at the state level. Each participating state receives assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. From 1990 through 2001, the national sample was a subset of the combined sample of students assessed in each participating

<sup>4</sup> Information on changes in GED test series and reporting is based on the 2003 edition of *Who Passed the GED Tests?*, by the GED Testing Service of the American Council on Education, as well as communication with staff of the GED Testing Service.

state along with an additional sample from the states that did not participate in the state assessment. For mathematics, reading, science, and writing assessments since 2002, a combined sample of public schools has been selected for 4th- and 8th-grade national NAEP and state NAEP (including the Trial Urban District Assessment).

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement level of America's youth since the early 1970s. They are administered nationally and report student performance in reading and mathematics at ages 9, 13, and 17. Measuring long-term trends of student achievement requires the precise replication of past procedures. For example, students of specific ages are sampled in order to maintain consistency with the original sample design. Similarly, the long-term trend instrument does not evolve based on changes in curricula or in educational practices. The differences in procedures between the main NAEP and the long-term trend NAEP mean that their results cannot be compared directly.

The following paragraphs discuss results for the national main NAEP, state NAEP, and long-term trend NAEP. Readers should keep in mind that comparisons of NAEP scores in the text (like all comparisons of estimates in the *Digest*) are based on statistical testing of unrounded values.

## Reading

The main NAEP reading assessment data are reported on a scale of 0 to 500. In 2017, the average reading score for 4th-grade students (222) was not measurably different from the 2015 score but was higher than the 1992 score (217) (table 221.10). At grade 4, the 2017 scores for White (232), Black (206), Hispanic (209), and Asian/Pacific Islander (239) students were not measurably different from the scores in 2015, but the score for each group was higher than in 1992 (224, 192, 197, and 216, respectively). In 2017, the average score for American Indian/Alaska Native 4th-graders (202) was not measurably different from the scores in 2015 and 1994 (1994 was the first year data were available for 4th-grade American Indian/Alaska Native students). For 8th-grade students, the score in 2017 (267) was higher than in 2015 (265) or 1992 (260). At grade 8, the 2017 scores for White (275), Black (249), Hispanic (255), and Asian/Pacific Islander (282) students were not measurably different from the scores in 2015. Consistent with the findings at grade 4, the scores for White, Black, Hispanic, and Asian/Pacific Islander 8th-grade students were higher in 2017 than in 1992. In 2017, the score for 8th-grade American Indian/Alaska Native students (253) was not measurably different from the scores in 2015 and in 1994 (1994 was the first year data were available for 8th-grade American Indian/Alaska Native students). For 12th-grade students, the score in 2015 (287) was not measurably different from the score in 2013, but it was lower than the score in 1992 (292). At grade 12, the 2015 scores for White (295), Hispanic (276), and Asian/Pacific Islander

(297) students were not measurably different from the scores in 2013 and in 1992. For Black students, the 2015 score (266) was lower than the 1992 score (273), but it was not measurably different from the 2013 score.

From 1992 through 2017, the average reading scores for White 4th- and 8th-grade students were higher than those of their Black and Hispanic peers (table 221.10). Although the White-Black and White-Hispanic achievement gaps did not change measurably from 2015 to 2017 at either grade 4 or 8, some of the racial/ethnic achievement gaps have narrowed since 1992. At grade 4, the White-Black gap narrowed from 32 points in 1992 to 26 points in 2017; at grade 8, the White-Hispanic gap narrowed from 26 points in 1992 to 19 points in 2017.

While there was no measurable change from 2015 to 2017 in the average reading score for 4th-grade public school students nationally, scores were lower in 2017 than in 2015 in nine states (table 221.40). The 4th-grade scores in the District of Columbia and the remaining 41 states did not change measurably from 2015 to 2017. The scores for 8th-grade public school students were higher in 2017 than in 2015 nationally and in 9 states (table 221.60). However, 8th-grade students in Montana scored lower in 2017 than in 2015, and the scores in the remaining 40 states and the District of Columbia did not change measurably from 2015 to 2017.

Reported on a scale of 0 to 500, NAEP long-term trend results in reading are available for 13 assessment years going back to the first in 1971. The average reading score for 9-year-olds was higher in 2012 (221) than in assessment years prior to 2008, increasing 5 points since 2004 and 13 points since 1971 (table 221.85). The score for 13-year-olds in 2012 (263) was higher than in all previous assessment years except for 1992. The score for 17-year-olds was higher in 2012 (287) than in 2004 (283), but it was not measurably different from the score in 1971 (285).

White, Black, and Hispanic 9-, 13-, and 17-year-old students all had higher average reading scores in 2012 than they did in the first assessment year (which was 1975 for Hispanic students because separate data for Hispanics were not collected in 1971). The scores were higher in 2012 than in 2004 for White, Black, and Hispanic students at all three ages (table 221.85). Reading results for 2012 continued to show gaps in scores between White and Black students (ranging from 23 to 26 points, depending on age) and between White and Hispanic students (about 21 points at all three ages). The White-Black and White-Hispanic achievement gaps were smaller in 2012 than in the first assessment year at all three ages. For example, the White-Black reading gap for 17-year-olds was 53 points in 1971 compared with 26 points in 2012. Similarly, the White-Hispanic gap for 17-year-olds narrowed from 41 points in 1975 to 21 points in 2012.

In 2012, female 9-, 13-, and 17-year-old students continued to have higher average reading scores than male students at

all three ages (table 221.85). The gap between male and female 9-year-olds was 5 points in 2012; this was narrower than the gap in 1971 (13 points). The 8-point gender gap for 13-year-olds in 2012 was not measurably different from the gap in 1971. At age 17, the 8-point gap between males and females in 2012 was not measurably different from the gap in 1971.

## Mathematics

The main NAEP mathematics assessment data for 4th- and 8th-graders are reported on a scale of 0 to 500 (table 222.10). The average 4th-grade mathematics score in 2017 (240) was not measurably different from the score in 2015, but it was higher than the score in 1990 (213). At grade 4, the scores in 2017 for White (248), Black (223), Hispanic (229), and Asian/Pacific Islander (258) students were not measurably different from the 2015 scores, but the score for each group was higher than in 1990 (220, 188, 200, and 225, respectively). The 2017 score for 4th-grade American Indian/Alaska Native students (227) was not measurably different from the scores in 2015 and in 1996 (1996 was the first year data were available for 4th-grade American Indian/Alaska Native students). The 8th-grade score in 2017 (283) was not measurably different from the score in 2015, but it was higher than the score in 1990 (263). At grade 8, the scores for White (293), Black (260), Hispanic (269), and Asian/Pacific Islander (310) students in 2017 were not measurably different from the scores in 2015, but the score for each group was higher than in 1990 (270, 237, 246, and 275, respectively). In 2017, the score for 8th-grade American Indian/Alaska Native students (267) was not measurably different from the scores in 2015 and in 2000 (2000 was the first year data were available for 8th-grade American Indian/Alaska Native students). Due to changes in the 12th-grade mathematics assessment framework, a new trend line started in 2005, with scores reported on a scale of 0 to 300. The 12th-grade score in 2015 (152) was lower than the score in 2013 (153) but not measurably different from the score in 2005, the first year the revised assessment was administered.

From 1990 through 2017, the average mathematics scores for White students in grades 4 and 8 were higher than those of their Black and Hispanic peers (table 222.10). Although the 4th-grade White-Black and White-Hispanic achievement gaps did not change measurably from 2015 to 2017, the White-Black achievement gap narrowed from 32 points in 1990 to 25 points in 2017. The 4th-grade White-Hispanic gap in 2017 (19 points) was not measurably different from the White-Hispanic gap in 1990. The 8th-grade White-Black gap (32 points) and White-Hispanic gap (24 points) in 2017 were not measurably different from the gaps in 2015 or in 1990.

While there was no measurable change from 2015 to 2017 in the average mathematics score for 4th-grade public school students nationally, the score was higher in 2017 than in 2015 in one state (Florida) (table 222.50). The mathematics

scores for public school 4th-grade students were lower in 2017 than in 2015 in 10 states. For the remaining 39 states and the District of Columbia, scores in 2017 were not measurably different from the scores in 2015. At grade 8, the national average mathematics score for public school students in 2017 was not measurably different from the score in 2015 (table 222.60). In one state (Florida), the score for 8th-grade public school students was higher in 2017 than in 2015. In 3 states—Alaska, Rhode Island, and Vermont—the score for 8th-grade students in public schools was lower in 2017 than in 2015. The scores in the remaining 46 states and the District of Columbia showed no measurable difference between 2015 and 2017.

NAEP long-term trend mathematics results, reported on a scale of 0 to 500, are available for 12 assessment years, going back to the first in 1973. In 2012, the average mathematics score for 9-year-olds (244) was higher than in all previous assessment years prior to 2008 (table 222.85). The score for 9-year-olds in 2012 was 5 points higher than in 2004 and 25 points higher than in 1973. The score for 13-year-olds in 2012 (285) was higher than in all previous assessment years. For 13-year-olds, the score in 2012 was 6 points higher than in 2004 and 19 points higher than in 1973. In contrast, the score for 17-year-olds in 2012 (306) was not measurably different from the scores in 2004 and in 1973.

White, Black, and Hispanic 9-, 13-, and 17-year-olds all had higher average mathematics scores in 2012 than in 1973 (table 222.85). In comparison to 2004, scores were higher in 2012 for White 9- and 13-year-olds; Hispanic 13-year-olds; and Black 13-year-olds. Mathematics results for 2012 continued to show achievement gaps between White and Hispanic students (ranging from 17 to 21 points [based on unrounded scores], depending on age) and between White and Black students (ranging from 25 to 28 points). For 9-year-olds, the White-Black gap was lower in 2012 than in 1973. For 13- and 17-year-olds, both the White-Black and the White-Hispanic gaps were lower in 2012 than in 1973. For example, among 17-year-olds, the White-Black gap was 40 points in 1973 compared to 26 points in 2012, and the White-Hispanic gap was 33 points in 1973 compared to 19 points in 2012.

While there was no significant difference between the average mathematics scores of male and female 9- and 13-year-olds in 2012, male students did score higher than female students at age 17 (table 222.85). At age 17, the 4-point gender score gap in 2012 was smaller than the gap in 1973 (8 points).

## Science

NAEP has assessed the science abilities of students in grades 4, 8, and 12 in both public and private schools since 1996. As of 2009, however, NAEP science assessments are based on a new framework, so results from these assessments cannot be compared to results from earlier science assessments. Scores are based on a scale ranging from 0 to

300 (table 223.10). In 2015, the average 4th-grade science score (154) was higher than the score in 2009 (150). The 8th-grade score in 2015 (154) was higher than the scores in 2009 (150) and in 2011 (152). The 12th-grade score in 2015 (150) was not measurably different from the score in 2009. In addition, the 5-point gender gap between male and female 12th-graders in 2015 was not measurably different from the gap in 2009. While the scores for White 4th- and 8th-grade students remained higher than those of their Black and Hispanic peers in 2015, racial/ethnic achievement gaps in 2015 were smaller than in 2009. At grade 4, the White-Black achievement gap was 36 points in 2009 and 33 points in 2015, and the White-Hispanic achievement gap was 32 points in 2009 and 27 points in 2015. While the scores for White 12th-grade students remained higher than those of their Black and Hispanic peers in 2015, these racial/ethnic achievement gaps were not measurably different between 2009 and 2015.

### Skills of Young Children

In addition to student performance data available through NAEP, the *Digest* presents data from other surveys to provide additional perspectives on student achievement. Differences among demographic groups in the acquisition of cognitive skills have been demonstrated at relatively early ages in the Early Childhood Longitudinal Survey's Birth Cohort (ECLS-B) study as well as its Kindergarten Class (ECLS-K) studies.

In 2003–04, about 64 percent of 2-year-olds demonstrated proficiency in expressive vocabulary, which measured toddlers' ability to communicate using gestures, words, and sentences (*web-only table 220.20*). The percentage of 2-year-olds demonstrating expressive vocabulary was higher for females (69 percent) than for males (59 percent). Also, a higher percentage of White (71 percent) and Asian (62 percent) 2-year-olds demonstrated expressive vocabulary than of Black, Hispanic, or American Indian/Alaska Native 2-year-olds (56, 54, and 50 percent, respectively). The percentage of 2-year-olds from families with high socioeconomic status (SES) who demonstrated expressive vocabulary (75 percent) was higher than the percentage of children from low-SES families who did so (52 percent).

Patterns of differences were also observed by race/ethnicity and SES for children at about 4 years of age (48 to 57 months old). In 2005–06, average early reading scores were higher for White (27) and Asian (31) 48- to 57-month-old children than for Black (23), Hispanic (21), and American Indian/Alaska Native (20) children (table 220.30). High-SES children (33) had higher early reading scores than low-SES children (19) at this age. These same patterns were observed among 48- to 57-month-old children with respect to average mathematics scores. White (32) and Asian (35) 48- to 57-month-old children had higher mathematics scores than Black (27), Hispanic (26), and American Indian/

Alaska Native (23) children. High-SES children (36) had higher average mathematics scores than low-SES children (24) at this age.

Children who enrolled in kindergarten for the first time in 2010–11 showed similar patterns of score differences by race/ethnicity and SES (tables 220.40 and *web-only table 220.41*). In fall 2010, average mathematics scores were higher for first-time kindergartners from high-SES families (43) than for those from low-SES families (28). White (38) and Asian (39) first-time kindergartners had higher mathematics scores than their Black (32), Hispanic (31), and American Indian/Alaska Native (33) peers. Similarly, average early reading scores in fall 2010 were higher for White (55) and Asian (57) first-time kindergartners than for their Black (52), Hispanic (49), and American Indian/Alaska Native (50) peers. High-SES children (60) had higher early reading scores than low-SES children (47). Most of these same patterns were observed among these children during 4th grade in spring 2014. White (114) and Asian (117) 4th-graders had higher mathematics scores than their Black (100) and Hispanic (106) peers. Asian 4th-graders had higher mathematics scores than American Indian/Alaska Native (111) 4th-graders; however, there was no measurable difference between the mathematics scores for White and American Indian/Alaska Native students. Mathematics scores were higher for 4th-graders from high-SES families (118) than for those from low-SES families (102). Early reading scores were also higher for White (126) and Asian (127) 4th-graders than for their Black (118), Hispanic (120), and American Indian/Alaska Native (121) peers, and 4th-graders from high-SES families (130) had higher early reading scores than those from low-SES families (116).

### Coursetaking in High School

The average number of science and mathematics courses completed by public high school graduates increased between 1982 and 2009. The average number of mathematics courses (Carnegie units) completed in high school rose from 2.6 in 1982 to 3.9 in 2009, and the number of science courses rose from 2.2 to 3.5 (table 225.10). The average number of courses in career/technical areas completed by public high school graduates was lower in 2009 (2.5 units) than in 2000 (2.9 units). As a result of the increased academic course load, the percentage of public and private high school graduates completing the 1983 National Commission on Excellence recommendations (4 units of English, 3 units of social studies, 3 units of science, 3 units of mathematics, and 2 units of foreign language) rose from 10 percent in 1982 to 62 percent in 2009 (*web-only table 225.50*).

### School Violence

In 2015–16, some 69 percent of public schools reported one or more violent incidents, such as a serious violent incident, a physical attack, or a threat of a physical attack

(table 229.10). This 2015–16 percentage was not measurably different from the percentage of schools reporting violent incidents in 1999–2000. Serious violent incidents is a subcategory of violent incidents that includes the crimes of rape, sexual assault, robbery, and aggravated assault. The percentage of schools reporting a serious violent incident in 2015–16 (15 percent) was lower than the percentage reporting a serious violent incident in 1999–2000 (20 percent). The percentage of schools reporting a physical attack or fight without a weapon in 2015–16 (65 percent) was not measurably different from the percentage in 1999–2000; however, the percentage of schools reporting a physical attack or fight with a weapon in 2015–16 (3 percent) was lower than the percentage in 1999–2000 (5 percent). Also, the percentage of schools reporting a threat of a physical attack without a weapon in 2015–16 (39 percent) was lower than the percentage in 1999–2000 (52 percent). Overall, schools reported 18 violent incidents per 1,000 students in 2015–16, which was lower than the 31 violent incidents per 1,000 students reported in 1999–2000 (table 229.20).

On the National Crime Victimization Survey, students ages 12 to 18 reported a decrease in victimizations at school between 1992 and 2016 (table 228.20). The total victimization rates for students ages 12 to 18 declined 84 percent, from 181 victimizations per 1,000 students in 1992 to 29 victimizations per 1,000 students in 2016. This pattern of decline in total victimization rates between 1992 and 2016 also held for thefts, violent victimizations, and serious violent victimizations. Thefts at school declined from a rate of 114 thefts per 1,000 students to 12 thefts per 1,000 students. The rate of violent victimization at school declined overall from 68 victimizations per 1,000 students in 1992 to 18 victimizations per 1,000 in 2016. Serious violent victimizations at school declined from 8 victimizations per 1,000 students in 1992 to 3 victimizations per 1,000 in 2015.

## Revenues and Expenditures

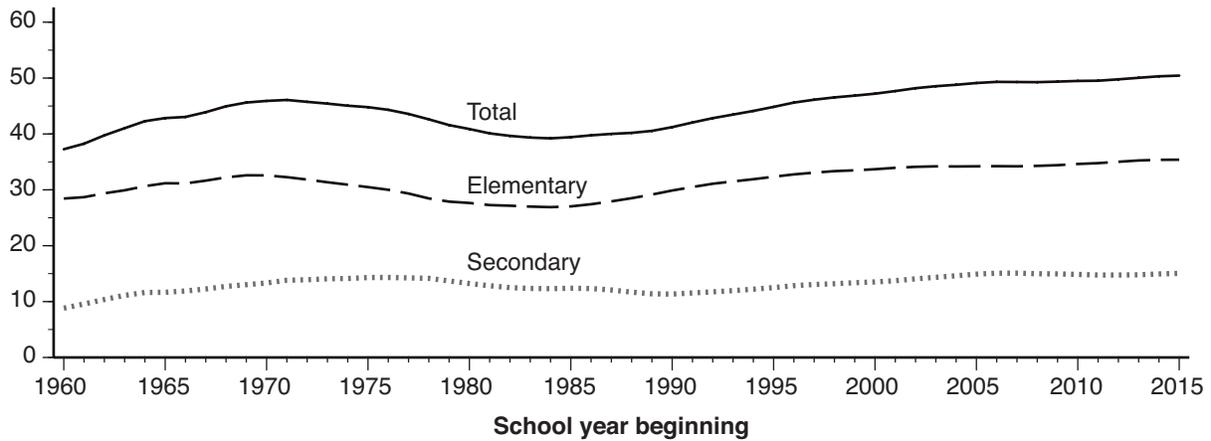

The state share of revenues for public elementary and secondary schools generally grew from the 1930s through the mid-1980s, while the local share declined during the same time period (table 235.10 and figure 10).<sup>5</sup> However, this pattern changed in the late 1980s, when the local share began to increase at the same time that the state share decreased. Between 1986–87 and 1993–94, the state share declined from 49.7 percent to 45.2 percent, while the local share rose from 43.9 percent to 47.8 percent. Between 1993–94 and 2000–01, the state share rose again to 49.7 percent—the highest share since 1986–87—but declined every school year thereafter until 2005–06, when the state share was 46.5 percent. In more recent years, the federal share in 2014–15 (8.5 percent) was lower than in 2004–05 (9.2 percent). Also, the state share in 2014–15 (46.6 percent) was lower than in 2004–05 (46.9 percent). In contrast, the local share in 2014–15 (45.0 percent) was higher than in 2004–05 (44.0 percent).

After adjustment for inflation, current expenditures per student at public schools (based on fall enrollment) rose during the 1980s but remained stable during the first part of the 1990s (table 236.55 and figure 11). There was an increase of 37 percent from 1980–81 to 1990–91, followed by minor fluctuations from 1990–91 to 1994–95. Current expenditures per student increased 34 percent from 1994–95 to 2008–09 but declined 5 percent from 2008–09 to 2012–13. Current expenditures per student increased in both 2013–14 and 2014–15, reaching \$11,445 in unadjusted dollars in 2014–15. The expenditure for public school student transportation was \$932 per student in 2014–15 (also in unadjusted dollars), and 55 percent of students were transported at public expense in 2007–08 (table 236.90).

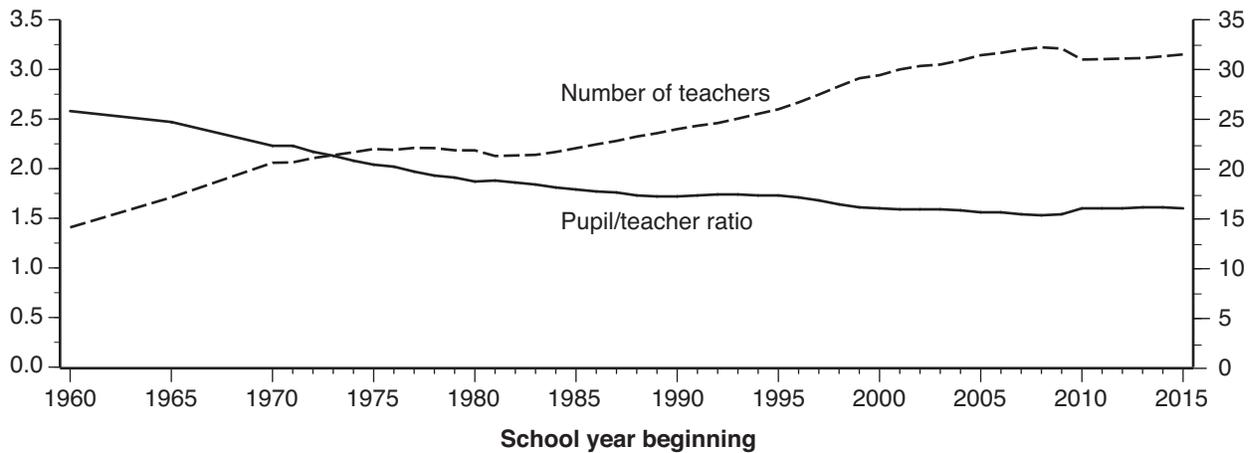

<sup>5</sup> For data on individual years from 1980–81 through 1988–89, see *Digest of Education Statistics 2011* (NCES 2012-001), table 180.

—Not available.

<sup>1</sup>Data on population and labor force are from the Census Bureau, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1900 are based on total population from the decennial census. From 1909–10 to 1959–60, population data are total population, including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas.

<sup>2</sup>Data for 1869–70 through 1959–60 are school year enrollment. Data for later years are fall enrollment. Total counts of ungraded students were prorated to prekindergarten through grade 8 and grades 9 through 12 based on prior reports.

<sup>3</sup>Data for 1870–71.

<sup>4</sup>Estimated by the National Center for Education Statistics.

<sup>5</sup>Prior to 1919–20, data are for the number of different persons employed rather than number of positions.

<sup>6</sup>Prior to 1919–20, includes interest on school debt.

<sup>7</sup>Because of the modification of the scope of “current expenditures for elementary and secondary schools,” data for 1959–60 and later years are not entirely comparable with prior years.

<sup>8</sup>Beginning in 1969–70, includes capital outlay by state and local school building authorities.

<sup>9</sup>Includes summer schools, community colleges, and adult education. Beginning in 1959–60, also includes community services, formerly classified with “current expenditures for elementary and secondary schools.”

<sup>10</sup>Excludes community colleges and adult education.

<sup>11</sup>Prior to 1959–60, average includes supervisors, principals, teachers, and other nonsupervisory instructional staff. Data for 1959–60 and later years are estimated by the National Education Association.

<sup>12</sup>Excludes current expenditures not allocable to pupil costs.

<sup>13</sup>“ADA” means average daily attendance in elementary and secondary schools.

<sup>14</sup>Expenditure figure is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.

<sup>15</sup>Per-day rates derived by dividing annual rates by average length of term.

<sup>16</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Some data have been revised from previously published figures. Beginning in 1959–60, data include Alaska and Hawaii. Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Includes students reported as being enrolled in grade 13.

<sup>2</sup>Data for 1890 through 1950 are from the decennial censuses of population. Later data are Census Bureau estimates as of July 1 preceding the opening of the school year.

<sup>3</sup>Gross enrollment ratio based on school enrollment of all ages in grades 9 to 12 divided by the 14- to 17-year-old population. Differs from enrollment rates in other tables, which are based on the enrollment of persons in the given age group only.

<sup>4</sup>Data are for 1927–28.

<sup>5</sup>Data are for 1940–41.

<sup>6</sup>Estimated.

<sup>7</sup>Projected.

NOTE: Includes enrollment in public schools that are a part of state and local school systems and also in most private schools, both religiously affiliated and nonsectarian. The enrollment for ungraded public school students was estimated based on the secondary proportion of ungraded students in prior years. The enrollment of ungraded private school students was estimated based on the secondary proportion of ungraded students in individual high schools. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Beginning in 1994, preprimary enrollment data were collected using new procedures. Data may not be comparable to figures for earlier years.

<sup>2</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

<sup>3</sup>Enrollment data for 5-year-olds include only those students in preprimary programs and do not include those enrolled in primary programs.

NOTE: Preprimary programs include kindergarten and preschool (or nursery school) programs. "Preschool," which was referred to as "nursery school" in previous versions of this table, is defined as a group or class that is organized to provide educational experiences for children during the year or years preceding kindergarten. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Detail may not sum to totals because of rounding.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Center-based arrangements include day care centers, Head Start programs, preschools, prekindergartens, and other early childhood programs.

<sup>2</sup>Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week.

<sup>3</sup>A child's primary arrangement is the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week.

<sup>4</sup>Children who spent an equal number of hours per week in multiple nonparental care arrangements.

<sup>5</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and

nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,257. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

<sup>6</sup>Excludes children living apart from their parents.

<sup>7</sup>Excludes children living in households with no mother or female guardian present.

NOTE: For the 2016 administration of the National Household Education Surveys Program (NHES), initial contact with all respondents was by mail, and the majority of respondents received paper-and-pencil questionnaires. However, as an experiment with web use, a small sample of NHES:2016 respondents received mailed invitations to complete the survey online. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Program Participation Survey of the National Household Education Surveys Program (ECP-P-NHES:2016). (This table was prepared December 2017.)

**Table 202.30a. Percentage distribution of children who were under 6 years old and not yet in kindergarten, by main reason household wanted a child care program, primary reason for difficulty finding child care, and selected child and family characteristics: 2016**

[Standard errors appear in parentheses]

Selected child or family characteristic	For children who had nonparental care in the past year, main reason household wanted a care program					For children whose parent/guardian reported any difficulty finding care, primary reason for the difficulty <sup>1</sup>						
	Provide care when a parent was at work or school	Prepare child for school	Provide cultural or language learning	Make time for running errands or relaxing	Some other reason	Cost	Location	Quality	Lack of open slots for new children	Needed a program for children with special needs	Some other reason

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Excludes children whose parent/guardian reported either "have not tried to find care" or "no difficulty" finding the type of child care or early childhood program wanted.

<sup>2</sup>Excludes children living apart from their parents.

<sup>3</sup>Excludes children living in households with no mother or female guardian present.

<sup>4</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold.

The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,257. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: For the 2016 administration of the National Household Education Surveys Program (NHES), initial contact with all respondents was by mail, and the majority of respondents received paper-and-pencil questionnaires. However, as an experiment with web use, a small sample of NHES:2016 respondents received mailed invitations to complete the survey online. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Program Participation Survey of the National Household Education Surveys Program (ECPN-NHES:2016). (This table was prepared November 2017.)

**Table 202.30b. Percentage distribution of children who were under 6 years old and not yet in kindergarten, by reported availability of good child care choices, amount of difficulty finding the type of child care wanted, and selected child and family characteristics: 2012 and 2016**

[Standard errors appear in parentheses]

Selected child or family characteristic	Whether parent/guardian feels there are good choices for child care or early childhood programs where they live						For children whose parent/guardian tried to find care, amount of difficulty finding the type of child care or early childhood program wanted

<sup>†</sup>Not applicable.

<sup>!</sup>Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>‡</sup>Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,257. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

<sup>2</sup>Excludes children living apart from their parents.

<sup>3</sup>Excludes children living in households with no mother or female guardian present.

NOTE: The 2012 administration of the National Household Education Surveys Program (NHES) used self-administered paper-and-pencil questionnaires that were mailed to respondents. For NHES:2016, initial contact with all respondents was by mail, and the majority of respondents received paper-and-pencil questionnaires. However, as an experiment with web use, a small sample of NHES:2016 respondents received mailed invitations to complete the survey online. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Estimates include only those children whose families paid at least part of the cost out of pocket for their child to receive nonparental care at least weekly. Children for whom no fee was charged, or for whom another source paid the entire fee, are excluded from the estimates.

<sup>2</sup>A child's primary arrangement is the regular nonparental care arrangement or early childhood education program in which the child spent the most time per week.

<sup>3</sup>Center-based arrangements include day care centers, Head Start programs, preschools, prekindergartens, and childhood programs.

<sup>4</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a

family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,257. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

<sup>5</sup>The 2001 questionnaire included a single item for "Asian or Pacific Islander," whereas questionnaires for later years included one item for Asian and a separate item for Pacific Islander.

<sup>6</sup>Excludes children living apart from their parents.

<sup>7</sup>Excludes children living in households with no mother or female guardian present.

NOTE: In 2001, National Household Education Surveys Program (NHES) surveys were administered via telephone with an interviewer. For NHES:2016, initial contact with all respondents was by mail, and the majority of respondents received paper-and-pencil questionnaires. However, as an experiment with web use, a small sample of NHES:2016 respondents received mailed invitations to complete the survey online. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. <sup>1</sup>Includes students reported as being enrolled in grade 13.

<sup>2</sup>For 2015, the prekindergarten, elementary total, and "all grades" counts include imputations for prekindergarten enrollment in California and Oregon.

NOTE: Due to changes in reporting and imputation practices, prekindergarten enrollment for years prior to 1992 represent an undercount compared to later years. The total ungraded counts of students were prorated to the elementary and secondary levels based on prior reports. Detail may not sum to totals because of rounding.

—Not available.  
#Rounds to zero.

<sup>1</sup>Includes imputations for prekindergarten enrollment in California and Oregon.

NOTE: DoD = Department of Defense. The total ungraded counts of students were prorated to the elementary level (prekindergarten through grade 8) and the secondary level (grades 9 through 12) based on prior reports. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1990–91 through 2015–16; and State Public Elementary and Secondary Enrollment Projection Model, 1980 through 2027. (This table was prepared January 2018.)

#Rounds to zero.

NOTE: DoD = Department of Defense. The total ungraded counts of students were prorated to the elementary level (prekindergarten through grade 8) and the secondary level (grades 9 through 12) based on prior reports. In addition to students in grades 9 through 12 and ungraded secondary students, this table includes a small number of students reported as

being enrolled in grade 13. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1990–91 through 2015–16; and State Public Elementary and Secondary Enrollment Projection Model, 1980 through 2027. (This table was prepared January 2018.)

—Not available.

<sup>1</sup>Estimated by the National Center for Education Statistics based on reports for prior years.

<sup>2</sup>Includes students reported as being enrolled in grade 13.

NOTE: DoD = Department of Defense. The total ungraded counts of students were prorated to the elementary and secondary levels based on prior state reports of the percentage of elementary and of secondary ungraded students.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2015–16. (This table was prepared July 2017.)

—Not available.

†Not applicable.

<sup>1</sup>For this year, data on students of Two or more races were reported by only a small number of states. Therefore, the data are not comparable to figures for 2010 and later years.

<sup>2</sup>Includes imputations for prekindergarten enrollment in California and Oregon.

<sup>3</sup>Projected.

NOTE: Race categories exclude persons of Hispanic ethnicity. Enrollment data for students not reported by race/ethnicity were prorated by state and grade to match state totals. Prior to 2008,

data on students of Two or more races were not collected. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.  
SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary and Secondary Education," 1995–96 through 2015–16; and National Elementary and Secondary Enrollment by Race/Ethnicity Projection Model, 1972 through 2027. (This table was prepared February 2018.)

—Not available.  
†Not applicable.

<sup>1</sup>For this year, data on students of Two or more races were reported by only a small number of states. Therefore, the data are not comparable to figures for 2010 and later years.

<sup>2</sup>Includes imputations for prekindergarten enrollment in California and Oregon.

<sup>3</sup>Projected.

NOTE: Race categories exclude persons of Hispanic ethnicity. Enrollment data for students not reported by race/ethnicity were prorated by state and grade to match state totals. Prior to 2008, data on students of Two or more races were not collected. Total counts of

ungraded students were prorated to prekindergarten through grade 8 and grades 9 through 12 based on prior reports. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

<sup>1</sup>A family is in poverty if its income falls below the Census Bureau's poverty threshold, which is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2013, for example, the poverty threshold for a family of four with two children was \$23,624. The family poverty rate of 5- to 17-year-olds is the percentage of children in this age group whose families are in poverty. Includes only children classified as "related" and "relevant" (see footnote 2).

<sup>2</sup>Includes only those children who live in households and meet both of the following conditions: (1) The children are related to the householder by birth, marriage, or adoption (except a child who is the spouse of the householder). The householder is the person (or one of the people) who owns or rents (maintains) the housing unit. (2) The children are relevant to the school district. Children are relevant if they reside within the geographical boundaries of the district and are at a grade level served by the district, even if they do not attend a school in the district.

NOTE: School enrollment data were obtained from the Common Core of Data and poverty rate data were obtained from the Census Bureau. To create the school district

categories, public school districts were ranked and divided into quarters based on the family poverty rate of their 5- to 17-year-old population; the cut points between the four quarters were chosen so that, at the national level, each quarter contains approximately the same number of students. For the approximately 3 percent of public school students who attended charter or other special districts, no data were available on their school district's family poverty rate. The rate for their district was imputed to be the same as the rate for the regular public school district within which their charter or other special district was geographically located. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

<sup>1</sup>Data for California for 1989–90 and earlier years are not strictly comparable with those for other states because California's attendance figures included excused absences.

<sup>2</sup>Excludes average daily attendance for regional occupational programs and summer school programs that were reported in prior years.

NOTE: Some data have been revised from previously published figures.

†Not applicable.

‡Reporting standards not met. Either the response rate is under 50 percent or there are too few cases for a reliable estimate.

NOTE: Averages reflect data reported by schools rather than state requirements. School-reported length of day may exceed state requirements, and there is a range of statistical error in reported estimates.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Schools and Staffing Survey (SASS), "Public School Data File," 2007–08 and 2011–12. (This table was prepared May 2013.)

<sup>1</sup>U.S. total includes imputation for nonreporting states.

<sup>2</sup>Imputation for survey nonresponse. State-level imputations for 2000–01 were based on the reported percentages for 2001–02 applied to the 2000–01 enrollments.

<sup>3</sup>Imputation for survey nonresponse. State-level imputations for 2015–16 were based on the reported percentages for 2014–15 applied to the 2015–16 enrollments.

NOTE: Table reflects counts of students enrolled in all schools for which both enrollment data and free/reduced-price lunch eligibility data were reported.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2000–01, 2010–11, 2014–15, and 2015–16. (This table was prepared June 2018.)

<sup>1</sup>U.S. total includes imputation for nonreporting states.

<sup>2</sup>Imputation for survey nonresponse. State-level imputations were based on the percentages reported by the state for other years applied to the enrollment for the given year.

<sup>3</sup>Data are from U.S. Department of Education, National Center for Education Statistics, EDData file 046, Data Group 123, extracted October 25, 2017, from the EDData Data Warehouse (internal U.S. Department of Education source).

NOTE: Data for 2014 and earlier years include only those ELL students who participated in ELL programs. Starting with 2015, data include all ELL students, regardless of program participation. Counts and percentages in this table are aggregated from data collected at the school district level and may differ from those in tables based on data collected at other levels. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 2000-01 through 2015-16. (This table was prepared October 2017.)

†Not applicable.

#Rounds to zero.

<sup>1</sup>Data do not include Vermont, for which 2007–08 and 2008–09 data were not available. In 2006–07, the total number of 3- to 21-year-olds served in Vermont was 14,010.

<sup>2</sup>Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

<sup>3</sup>For 1990–91, preschool children are not included in the counts by disability condition but are separately reported. For other years, preschool children are included in the counts by disability condition.

<sup>4</sup>Based on the total enrollment in public schools, prekindergarten through 12th grade. For total enrollment in public schools, see table 203.20.

NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act as well as under the Individuals with Disabilities Education Act (IDEA), Part B. Data reported in this table for years prior to 1994–95 include children ages 0–21 served under Chapter 1. Data are for the 50 states and the District of Columbia only. Increases since 1987–88 are due in part to new legislation enacted in fall 1986, which added a mandate for public school special education services for 3- to 5-year-old children with disabilities. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, Office of Special Education Programs, *Annual Report to Congress on the Implementation of the Individuals with Disabilities Education Act*, selected years, 1979 through 2006; and Individuals with Disabilities Education Act (IDEA) database, retrieved July 10, 2017, from <http://www2.ed.gov/programs/osepidea/618-data/state-level-data-files/index.html#bcc>. —Not available.

<sup>1</sup>For years prior to 2010–11, Asian data include Pacific Islanders.

<sup>2</sup>Data do not include Vermont, for which 2007–08 and 2008–09 data were not available.

<sup>3</sup>For 2008–09 and 2009–10, data on children of Two or more races were reported by only a small number of states. Therefore, these data are not comparable to figures for later years.

<sup>4</sup>For 2011–12 through 2015–16, the total column shows the overall counts of children as reported by the 50 states and the District of Columbia rather than the sum of counts reported for individual racial/ethnic groups. (Due to data limitations, summing the data for the racial/ethnic groups can result in overcounts. For 2015–16, summing these data would result in a total overcount of 45 children in the 3- to 5-year-old age group and 784 children in the 6- to 21-year-old age group.)

<sup>5</sup>Based on the total enrollment in public schools, prekindergarten through 12th grade, by race/ethnicity. For total enrollment in public schools by race/ethnicity, see table 203.60. NOTE: Data include only those children served for whom race/ethnicity was reported. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

#Rounds to zero.

<sup>1</sup>Totals are based on overall counts of children by type of disability; they are not based on summing the counts reported for the individual racial/ethnic groups or the counts reported by sex. (Due to data limitations, summing the counts by disability type within each racial/ethnic group would result in a total overcount of 829 children. Because of missing data on type of disability by sex, summing the counts by disability type for males and females would result in undercounts.)

<sup>2</sup>For 3- to 5-year-olds, no data are available on type of disability by sex. For 6- to 21-year-olds, data include only those children served for whom both sex and type of disability were reported. About 1 percent of all 6- to 21-year-olds served are excluded from this table because of missing data.

<sup>3</sup>Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

<sup>4</sup>Percentages for students 3 to 5 years old by sex are based on total public school enrollment in prekindergarten and kindergarten by sex. Percentages for students 6 to 21 years old by sex are based on total public school enrollment in grades 1 through 12 by sex. Percentages for students of all ages (3 to 21 years old) by race/ethnicity are based on total enrollment in public schools, prekindergarten through grade 12, by race/ethnicity. For total enrollment in public schools by race/ethnicity, see table 203.50.

NOTE: Although data are for the 50 states and the District of Columbia, data limitations result in inclusion of a small (but unknown) number of students from other jurisdictions. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

<sup>1</sup>Based on the total enrollment in public schools, prekindergarten through 12th grade. For total enrollment in public schools, see table 203.40.

NOTE: Prior to October 1994, children and youth with disabilities were served under Chapter 1 of the Elementary and Secondary Education Act as well as under the Individuals with Disabilities Education Act (IDEA), Part B. Data reported in this table for 1990–91 include children ages 0–21 served under Chapter 1.

SOURCE: U.S. Department of Education, Office of Special Education Programs, *Annual Report to Congress on the Implementation of the Individuals with Disabilities Education Act*, selected years, 1992 through 2006, and Individuals with Disabilities Education Act (IDEA) database, retrieved August 10, 2017, from <http://www2.ed.gov/programs/osep/idea/618-data/state-level-data-files/index.html#bcc>. National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 2015–16. (This table was prepared August 2017.)

—Not available.

<sup>1</sup>The decrease in homeless students in 2014–15 was caused in part by changes to California's data collection systems. For more information, see section 1.9.1.1 of California's 2014–15 Consolidated State Performance Report, available at <https://www2.ed.gov/admins/lead/account/consolidated/sy14-15part1/ca.pdf>.

<sup>2</sup>The sum of counts by grade.

<sup>3</sup>Homeless children 3 to 5 years old who are not in kindergarten.

<sup>4</sup>Includes students reported as being enrolled in grade 13.

<sup>5</sup>Does not sum to the total number of homeless students because of missing data on primary nighttime residence. (Counts by primary nighttime residence differ from those shown in the total row by less than 2 percent for 2012–13 and less than 1 percent for all other years.)

<sup>6</sup>Refers to temporarily sharing the housing of other persons due to loss of housing, economic hardship, or other reasons (such as domestic violence).

<sup>7</sup>Includes living in cars, parks, campgrounds, temporary trailers—including Federal Emergency Management Agency (FEMA) trailers—or abandoned buildings.

<sup>8</sup>Youth who are not in the physical custody of a parent or guardian. Includes youth living on their own and youth living with a caregiver who is not their legal guardian.

<sup>9</sup>Students who met the definition of limited English proficient students as outlined in the ED Facts workbook. For more information, see <https://www2.ed.gov/about/inits/ed/edfacts/eden-workbook.html>.

<sup>10</sup>Students who met the definition of eligible migrant children as outlined in the ED Facts workbook. Such students are either migratory workers or the children or spouses of migratory workers and have moved within the preceding 36 months in order to obtain, or to accompany parents or spouses who moved in order to obtain, temporary or seasonal employment in agricultural or fishing work. For more information, see <https://www2.ed.gov/about/inits/ed/edfacts/eden-workbook.html>. Connecticut, the District of Columbia, Rhode Island, and West Virginia did not operate a migrant education program during the 2012–13, 2013–14, 2014–15, and 2015–16 school years and therefore had no data to provide on migrant homeless students.

<sup>11</sup>Includes only students with disabilities who were served under the Individuals with Disabilities Education Act (IDEA).

NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see "C118 - Homeless Students Enrolled" at <https://www2.ed.gov/about/inits/ed/edfacts/sy-15-16-nonxml.html>. Data include all homeless students enrolled at any time during the school year. Data exclude Puerto Rico and the Bureau of Indian Education. This table is based on state-level data. SOURCE: U.S. Department of Education, National Center for Education Statistics, ED Facts file 118, Data Group 655, extracted June 21, 2018, from the ED Facts Data Warehouse (internal U.S. Department of Education Source); and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary and Secondary Education," 2009–10 through 2015–16. (This table was prepared June 2018.)

**Table 204.75b. Number and percentage of homeless students enrolled in public elementary and secondary schools, by school district locale, primary nighttime residence, and selected student characteristics: 2015–16**

Primary nighttime residence or selected student characteristic	Total, all districts	City	Suburban	Town	Rural

Students with disabilities <sup>8</sup> .....	18.2	18.4	17.6	18.2	19.5

<sup>1</sup>Represents the sum of counts by grade.

<sup>2</sup>Does not sum to the total number of homeless students because of missing data on primary nighttime residence. (These data are missing for less than 1 percent of homeless students.)

<sup>3</sup>Refers to temporarily sharing the housing of other persons due to loss of housing, economic hardship, or other reasons (such as domestic violence).

<sup>4</sup>Includes living in cars, parks, campgrounds, temporary trailers—including Federal Emergency Management Agency (FEMA) trailers—or abandoned buildings.

<sup>5</sup>Youth who are not in the physical custody of a parent or guardian. Includes youth living on their own and youth living with a caregiver who is not their legal guardian.

<sup>6</sup>Students who met the definition of limited English proficient students as outlined in the EDFacts workbook. For more information, see <https://www2.ed.gov/about/inits/ed/edfacts/eden-workbook.html>.

<sup>7</sup>Students who met the definition of eligible migrant children as outlined in the EDFacts workbook. Such students are either migratory workers or the children or spouses of migratory workers and have moved within the preceding 36 months in order to obtain, or to accompany parents or spouses who moved in order to obtain, temporary or seasonal employment in agricultural or fishing work. For more information, see <https://www2.ed.gov/about/inits/>

[ed/edfacts/eden-workbook.html](https://www2.ed.gov/about/inits/ed/edfacts/eden-workbook.html). Connecticut, the District of Columbia, Rhode Island, and West Virginia did not operate a migrant education program during the 2015–16 school year and therefore had no data to provide on migrant homeless students.

<sup>8</sup>Includes only students with disabilities who were served under the Individuals with Disabilities Education Act (IDEA).

NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see "C118 - Homeless Students Enrolled" at <https://www2.ed.gov/about/inits/ed/edfacts/sy-15-16-nonxml.html>. Data include all homeless students enrolled at any time during the school year. Data exclude Puerto Rico and the Bureau of Indian Education. Detail may not sum to totals because of rounding and missing data on primary nighttime residence. Because this table is based on data reported at the school district level, counts and percentages of homeless students may differ from those shown in tables based on state-level data.

<sup>1</sup>Represents the sum of counts by grade.

<sup>2</sup>Total percentages for the United States were computed based on total public school enrollment in the 50 states and the District of Columbia.

<sup>3</sup>California's 2014–15 homeless count decreased in part because of changes to the state's data collection systems. For more information, see section 1.9.1.1 of California's 2014–15 Consolidated State Performance Report, available at <https://www2.ed.gov/admins/lead/account/consolidated/sy14-15part1/ca.pdf>.

NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see "C118 - Homeless Students

Enrolled" at <https://www2.ed.gov/about/inits/ed/edfacts/sy-15-16-nonxml.html>. Data are reported at the state level and include all homeless students enrolled at any time during the school year.

SOURCE: U.S. Department of Education, National Center for Education Statistics, ED Facts file 118, Data Group 655, extracted June 21, 2018, from the ED Facts Data Warehouse (internal U.S. Department of Education Source); and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary and Secondary Education," 2009–10 through 2015–16. (This table was prepared June 2018.)

—Not available.

<sup>1</sup>The counts by primary nighttime residence do not sum to the total number of homeless students because of missing data on primary nighttime residence or grade.

<sup>2</sup>Represents the sum of counts by grade.

<sup>3</sup>Refers to temporarily sharing the housing of other persons due to loss of housing, economic hardship, or other reasons (such as domestic violence).

<sup>4</sup>Includes living in cars, parks, campgrounds, temporary trailers—including Federal Emergency Management Agency (FEMA) trailers—or abandoned buildings.

<sup>5</sup>Youth who are not in the physical custody of a parent or guardian. Includes youth living on their own and youth living with a caregiver who is not their legal guardian.

<sup>6</sup>Students who met the definition of limited English proficient students as outlined in the EDFacts workbook. For more information, see <https://www2.ed.gov/about/inits/ed/edfacts/eden-workbook.html>.

<sup>7</sup>Students who met the definition of eligible migrant children as outlined in the EDFacts workbook. Such students are either migratory workers or the children or spouses of migratory workers and have moved within the preceding 36 months in order to obtain, or to accompany parents or spouses who moved in order to obtain, temporary or seasonal employment in agricultural or fishing work. For more information, see <https://www2.ed.gov/about/inits/ed/edfacts/eden-workbook.html>.

<sup>8</sup>Includes only students with disabilities who were served under the Individuals with Disabilities Education Act (IDEA).

<sup>9</sup>California's 2015–16 homeless count decreased from years prior to 2014–15 in part because changes were made to the state's data collection systems as of 2014–15. For more information, see section 1.9.1.1 of California's 2014–15 *Consolidated State Performance Report*, available at <https://www2.ed.gov/admins/lead/account/consolidated/sy14-15part1/ca.pdf>.

<sup>10</sup>Did not operate a migrant education program during the 2015–16 school year and therefore had no data to provide on migrant homeless students.

NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see "C118 - Homeless Students Enrolled" at <https://www2.ed.gov/about/inits/ed/edfacts/sy-15-16-nonxml.html>. Data are reported at the state level and include all homeless students enrolled at any time during the school year.

—Not available.

#Rounds to zero.

±Reporting standards not met (see data file documentation at <https://www2.ed.gov/about/inits/ed/edfacts/data-files/school-status-data.html>).

<sup>1</sup>The counts by primary nighttime residence may not sum to the total number of homeless students because of missing or suppressed data on primary nighttime residence.

<sup>2</sup>Represents the sum of counts by grade.

<sup>3</sup>Refers to temporarily sharing the housing of other persons due to loss of housing, economic hardship, or other reasons (such as domestic violence).

<sup>4</sup>Includes living in cars, parks, campgrounds, temporary trailers—including Federal Emergency Management Agency (FEMA) trailers—or abandoned buildings.

<sup>5</sup>Youth who are not in the physical custody of a parent or guardian. Includes youth living on their own and youth living with a caregiver who is not their legal guardian.

<sup>6</sup>Students who met the definition of limited English proficient students as outlined in the ED Facts workbook. For more information, see <https://www2.ed.gov/about/inits/ed/edfacts/eden-workbook.html>.

<sup>7</sup>Students who met the definition of eligible migrant children as outlined in the ED Facts workbook. Such students are either migratory workers or the children or spouses of migratory workers and have moved within the preceding 36 months in order to obtain, or to accompany parents or spouses who moved in order to obtain, temporary or seasonal employment in agricultural or fishing work. For more information, see <https://www2.ed.gov/about/inits/ed/edfacts/eden-workbook.html>.

<sup>8</sup>Includes only students with disabilities who were served under the Individuals with Disabilities Education Act (IDEA).

<sup>9</sup>The District of Columbia did not operate a migrant education program during the 2015–16 school year and therefore had no data to provide on migrant homeless students.

NOTE: Homeless students are defined as children/youth who lack a fixed, regular, and adequate nighttime residence. For more information, see “C118 - Homeless Students Enrolled” at <https://www2.ed.gov/about/inits/ed/edfacts/sy-15-16-nonxml.html>. Data include all homeless students enrolled at any time during the school year. ISD = independent school district.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>Data are based on universe counts of schools and school districts; therefore, these figures do not have standard errors.

NOTE: Race categories exclude persons of Hispanic ethnicity. Percentages based on counts of between 1 and 3 gifted and talented students are displayed as ranges to protect student privacy.

<sup>1</sup>Affiliated schools belong to associations of schools with a specific religious orientation other than Catholic or conservative Christian. Unaffiliated schools have a religious orientation or purpose but are not classified as Catholic, conservative Christian, or affiliated.

NOTE: Includes enrollment in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Ungraded students are prorated into prekindergarten through grade 8 and grades 9 through 12. Detail may not sum to totals because of rounding.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>Affiliated schools belong to associations of schools with a specific religious orientation other than Catholic or conservative Christian. Unaffiliated schools have a religious orientation or purpose but are not classified as Catholic, conservative Christian, or affiliated.

<sup>2</sup>Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools include those that have grades lower than 7 and higher than 8, as well as those that do not classify students by grade level.

<sup>3</sup>Race/ethnicity was not collected for prekindergarten students (846,900 out of 5,750,520 students in 2015). Percentage distribution is based on the students for whom race/ethnicity was reported.

NOTE: Includes enrollment in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Prior to 2009, data on students of Two or more races and separate data for Pacific Islanders were not collected. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

<sup>1</sup>Includes students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade.

<sup>2</sup>Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools include those that have grades lower than 7 and higher than 8, as well as those that do not classify students by grade level.

<sup>3</sup>Race/ethnicity was not collected for prekindergarten students (846,900 in fall 2015). Percentage distribution is based on the students for whom race/ethnicity was reported.

<sup>4</sup>For 1999, Pacific Islander students are included under Asian. Prior to 2009, data were not collected on Pacific Islander students as a separate category.

<sup>5</sup>Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.

NOTE: Tabulation includes schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Private School Universe Survey (PSS), 1999–2000, 2009–10, and 2015–16. (This table was prepared June 2017.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>Reported in full-time equivalents (FTE). Excludes teachers who teach only prekindergarten students.

NOTE: Includes special education, vocational/technical education, and alternative schools. Tabulation includes schools that offer kindergarten or higher grade. Includes enrollment of students in prekindergarten through grade 12 in schools that offer kindergarten or higher grade. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Excludes students who were enrolled in school for more than 25 hours a week. Also excludes students who were homeschooled only due to a temporary illness in 1999 and 2003 as well as students who were homeschooled primarily due to a temporary illness in 2007, 2012, and 2016.

<sup>2</sup>The National Center for Education Statistics uses a statistical adjustment for estimates of homeschoolers in 2012. For more information about this adjustment, please see *Homeschooling in the United States: 2012* (NCES 2016-096REV).

<sup>3</sup>Includes Two or more races and race/ethnicity not reported.

<sup>4</sup>Students whose grade equivalent was “ungraded” were excluded from the grade analysis. The percentage of students with an “ungraded” grade equivalent was 0.02 percent in 2003 and 2007. There were no students with an “ungraded” grade equivalent in 2012.

<sup>5</sup>For 1999, estimates combine the “\$75,001 to \$100,000” and “Over \$100,000” categories.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 and NHES:2016 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences between estimates for years prior to 2012 and estimates for later years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>Excludes students who were enrolled in school for more than 25 hours a week. Also excludes students who were homeschooled only due to a temporary illness in 1999 and 2003 as well as students who were homeschooled primarily due to a temporary illness in 2007 and 2016.

<sup>2</sup>In 63 cases in 2016, questions about whether a student's school was assigned were not asked because parents reported the school as a private school, and it was only later identified as a public school based on administrative data. Due to the missing data on whether the school was assigned or chosen, these cases were excluded from the analysis of public chosen and assigned schools.

<sup>3</sup>Includes American Indian/Alaska Native, Two or more races, and race/ethnicity not reported.

<sup>4</sup>Students whose grade equivalent was "ungraded" were excluded from the grade analysis. The percentage of students with an "ungraded" grade equivalent was 0.03 percent in 1999 and 0.02 percent in 2003 and 2007.

<sup>5</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data

collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,036. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: Data are based on parent reports. While National Household Education Surveys Program (NHES) administrations in 1999, 2003, and 2007 were administered via telephone with an interviewer, NHES:2016 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences between estimates for 2016 and estimates for the earlier years in this table could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent Survey and Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (Parent-NHES:1999 and PFI-NHES:2003, 2007, and 2016). (This table was prepared February 2018.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>In 31 cases, questions about whether a student's school was assigned were not asked because parents reported the school as a private school, and it was only later identified as a public school based on administrative data. Due to the missing data on whether the school was assigned or chosen, these cases were included neither with assigned public schools nor with chosen public schools. These cases were included in the public school totals, however, and they could still be accurately classified as either traditional or charter schools based on administrative data.

<sup>2</sup>Includes all types of public noncharter schools.

<sup>3</sup>Includes American Indian/Alaska Native, Two or more races, and race/ethnicity not reported.

<sup>4</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,036. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

<sup>5</sup>Includes only students enrolled in public schools.

NOTE: Data exclude homeschooled children. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2016). (This table was prepared February 2018.)

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>In 68 cases in 2007 and 31 cases in 2016, questions about whether a student's school was assigned were not asked because parents reported the school as a private school, and it was only later identified as a public school based on administrative data. Due to the missing data on whether the school was assigned or chosen, these cases were included neither with assigned public schools nor with chosen public schools; however, they were included in the public school totals.

NOTE: Data exclude homeschooled children. While National Household Education Surveys Program (NHES) administrations in 2003 and 2007 were administered via telephone with an interviewer, NHES:2016 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences between estimates for 2016 and estimates for the earlier years in this table could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The respondent was the parent most knowledgeable about the child's care and education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household.

<sup>2</sup>The 2001 questionnaire included a single item for "Asian or Pacific Islander," whereas questionnaires for later years included one item for Asian and a separate item for Pacific Islander.

<sup>3</sup>Excludes children living in households with no mother or female guardian present.

<sup>4</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually

to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,257. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: Prior to 2012, National Household Education Surveys Program (NHES) surveys were administered via telephone with an interviewer. NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. For NHES:2016, initial contact with all respondents was by mail, and the majority of respondents received paper-and-pencil questionnaires. However, as an experiment with web use, a small sample of NHES:2016 respondents received mailed invitations to complete the survey online. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and suppression of estimates that did not meet reporting standards. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>In 2012 and 2016, a single item asked parents if they had attended an event sponsored by a community, ethnic, or religious group. In 2003, attendance at an event sponsored by a religious group was asked about separately from attendance at an event sponsored by a community or ethnic group.

<sup>2</sup>The 2003 questionnaire included a single item for "Asian or Pacific Islander," whereas questionnaires for later years included one item for Asian and a separate item for Pacific Islander.

<sup>3</sup>Excludes children who were not able to speak.

<sup>4</sup>In 2003, education level was not collected for the second parent in a same sex couple.

<sup>5</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually

to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,257. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: Prior to 2012, National Household Education Surveys Program (NHES) surveys were administered via telephone with an interviewer. NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. For NHES:2016, initial contact with all respondents was by mail, and the majority of respondents received paper-and-pencil questionnaires. However, as an experiment with web use, a small sample of NHES:2016 respondents received mailed invitations to complete the survey online. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. All information, including control of school, is based on parent reports. Excludes homeschooled children. The total number of children enrolled in kindergarten through fifth grade was about 24 million in 2003 and 25 million in 2012 and 2016. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The 2003 questionnaire included a single item for "Asian or Pacific Islander," whereas questionnaires for later years included one item for Asian and a separate item for Pacific Islander.

<sup>2</sup>Excludes children who were not able to speak.

<sup>3</sup>In 2003, education level was not collected for the second parent in a same sex couple.

<sup>4</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was

\$24,257. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: Prior to 2012, National Household Education Surveys Program (NHES) surveys were administered via telephone with an interviewer. NHES:2012 used self-administered paper-and-pencil questionnaires that were mailed to respondents. For NHES:2016, initial contact with all respondents was by mail, and the majority of respondents received paper-and-pencil questionnaires. However, as an experiment with web use, a small sample of NHES:2016 respondents received mailed invitations to complete the survey online. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. All information, including control of school, is based on parent reports. Excludes homeschooled children. The total number of children enrolled in kindergarten through fifth grade was about 24 million in 2003 and 25 million in 2012 and 2016. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003, 2012, and 2016). (This table was prepared October 2017.)

**Table 207.40. Percentage of elementary and secondary school children whose parents were involved in school activities, by selected child, parent, and school characteristics: 2003, 2012, and 2016**

†Not applicable.

<sup>1</sup>The 2003 questionnaire included a single item for “Asian or Pacific Islander,” whereas questionnaires for later years included one item for Asian and a separate item for Pacific Islander.

<sup>2</sup>In 2003, education level was not collected for the second parent in a same sex couple.

<sup>3</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold. The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,257. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 and NHES:2016 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences between estimates for years prior to 2012 and estimates for later years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Includes children enrolled in kindergarten through grade 12 and ungraded students. Excludes homeschooled children. The respondent was the parent most knowledgeable about the child's education. Responding parents reported on their own activities and the activities of their spouse/other adults in the household. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

—Not available.

<sup>1</sup>A teacher is considered to be a new hire for a public or private school if the teacher had not taught in that control of school in the previous year. A teacher who moves from a public to private or a private to public school is considered a new teacher hire, but a teacher who moves from one public school to another public school or one private school to another private school is not considered a new teacher hire.

<sup>2</sup>Estimated.

<sup>3</sup>Projected.

NOTE: Data for teachers are expressed in full-time equivalents (FTE). Counts of private school teachers and enrollment include prekindergarten through grade 12 in schools offering kindergarten or higher grades. Counts of public school teachers and enrollment include prekindergarten through grade 12. The pupil/teacher ratio includes teachers for students with disabilities and other special teachers, while these teachers are generally excluded from class size calculations. Ratios for public schools reflect totals reported

by states and differ from totals reported for schools or school districts. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Data for years 1987–88 through 1999–2000 are only roughly comparable to data for later years, because the new category of Two or more races was introduced in 2003–04.

<sup>2</sup>Includes Pacific Islander for years 1987–88 through 1999–2000.

<sup>3</sup>Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.

<sup>4</sup>Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 6 and those

teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.

NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.

<sup>2</sup>Data for 1999–2000 are only roughly comparable to data for later years, because the new category of Two or more races was introduced in 2003–04.

<sup>3</sup>Includes Pacific Islander.

<sup>4</sup>Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 6 and those

teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.

<sup>5</sup>Included under Other elementary.

<sup>6</sup>Included under Other secondary.

NOTE: Excludes prekindergarten teachers. Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.

<sup>2</sup>Refers to certification of teachers to teach in the state where they are currently teaching. A teaching certificate is probationary if all requirements have been satisfied except completion of a probationary period. It is provisional or temporary if additional coursework, student teaching, or passage of a test is required to obtain regular certification. It is a waiver or emergency certificate if a certification program must be completed to continue teaching.

<sup>3</sup>Interpret 2015–16 data on city teachers with caution. After nonresponse adjustments, the nonresponse bias for this category is greater than for other characteristics.

NOTE: Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 6 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Teacher and Principal Survey (NTPS), "Public School Teacher Data File," 2015–16. (This table was prepared June 2018.)

—Not available.

†Not applicable.

<sup>1</sup>Data for 1999–2000 are only roughly comparable to data for 2015–16, because the new category of Two or more races was introduced in 2003–04.

<sup>2</sup>Includes Pacific Islander for 1999–2000.

<sup>3</sup>Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.

<sup>4</sup>Refers to certification of teachers to teach in the state where they are currently teaching. A teaching certificate is probationary if all requirements have been satisfied except completion of a probationary period. It is provisional or temporary if additional coursework, student teaching, or passage of a test is required to obtain regular certification. It is a waiver or emergency certificate if a certification program must be completed to continue teaching.

<sup>5</sup>Interpret 2015–16 data on city teachers with caution. After nonresponse adjustments, the nonresponse bias for this category is greater than for other characteristics.

NOTE: Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 6 and those teaching multiple grades, with a preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.  
!Interpret data with caution. The coefficient of variation for this estimate is between 30 and 50 percent.  
‡Reporting standards not met. There are too few cases for a reliable estimate, the coefficient of variation (CV) is 50 percent or greater, or the response rate is below 50 percent.  
<sup>1</sup>Includes only those teachers whose first year of teaching was between 2011–12 and 2015–16.  
<sup>2</sup>Excludes the 7 percent of teachers for whom the percentage of minority enrollment in the school was not available. Minority enrollment is the combined enrollment of students who are Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, and of Two or more races.

NOTE: Teachers were asked whether they entered teaching through an alternative route to certification program, which is a program that was designed to expedite the transition of nonteachers to a teaching career (for example, a state, district, or university alternative route to certification program). Data are based on a head count of full-time and part-time teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Elementary teachers are those who taught self-contained classes at the elementary level, and secondary teachers are those who taught departmentalized classes (e.g., science, art, social science, or other course subjects) at the secondary level. Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than on the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 5 and those teaching multiple grades, with a

preponderance of grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.

<sup>2</sup>Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.

NOTE: Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers appearing in other tables. Excludes prekindergarten teachers. Detail may not sum to totals because of rounding and cell suppression.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificates of advanced graduate studies.

<sup>2</sup>Data may sum to more than 100 percent because (1) a teacher who reported more than one major is represented in more than one field of study and (2) a teacher with multiple degrees in different fields of study is represented in more than one field of study.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, National Teacher and Principal Survey (NTPS), "Public School Teacher Data File," 2015–16. (This table was prepared June 2018.)

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

NOTE: Elementary schools are those with any of grades kindergarten through grade 6 and none of grades 9 through 12. Secondary schools have any of grades 7 through 12, and none of grades kindergarten through grade 6. Combined schools have both elementary and secondary grades, or have all students in ungraded classrooms.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Data were not available for approximately 4 percent of teachers for 2011–12 to 2012–13.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

±Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Teachers were asked how many school years they had worked as a teacher. They were also asked how many of their teaching years were full time and how many were part time. Throughout this table, all school years are counted, regardless of whether teachers taught full time or part time.

NOTE: This table includes regular full-time teachers only; it excludes other staff even when they have full-time teaching duties (regular part-time teachers, itinerant teachers, long-term substitutes, administrators, library media specialists, other professional staff, and support staff).

—Not available.

<sup>1</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

<sup>2</sup>The average monetary remuneration earned by FTE employees across all industries in a given year, including wages, salaries, commissions, tips, bonuses, voluntary employee contributions to certain deferred compensation plans, and receipts in kind that represent income. Calendar-year data from the U.S. Department of Commerce, Bureau of Economic Analysis, have been converted to a school-year basis by averaging the two appropriate calendar years in each case.

<sup>3</sup>Teachers at schools that are classified as elementary by state and local practice and composed of any span of grades not above grade 8. Preschool or kindergarten schools are included only if they are an integral part of an elementary school or a regularly established school system.

<sup>4</sup>Teachers at schools comprising any span of grades beginning with the next grade following an elementary or middle school (usually 7, 8, or 9) and ending with or below grade 12. Includes both junior high schools and senior high schools.

NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.

<sup>1</sup>Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.

NOTE: Some data have been revised from previously published figures. Standard errors are not available for these estimates, which are based on state reports.  
SOURCE: National Education Association, *Estimates of School Statistics*, selected years, 1969–70 through 2016–17. (This table was prepared August 2017.)

**Table 212.08. Number and percentage distribution of principals in public and private elementary and secondary schools, by selected characteristics: Selected years, 1993–94 through 2015–16**

[Standard errors appear in parentheses]

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Data for 1993–94 and 1999–2000 are only roughly comparable to data for later years, because the new category of Two or more races was introduced in 2003–04.

<sup>2</sup>Includes Pacific Islander for 1993–94 and 1999–2000.

<sup>3</sup>Education specialist degrees or certificates are generally awarded for 1 year's work beyond the master's level. Includes certificate of advanced graduate studies.

<sup>4</sup>Excludes data for 4,930 public and 2,690 private school principals whose school level could not be determined.

NOTE: Data are based on a head count of full-time and part-time principals rather than on the number of full-time-equivalent principals reported in other tables. Detail may not sum to totals because of rounding and cell suppression. Race categories exclude persons of Hispanic ethnicity.

—Not available.

<sup>1</sup>Includes school district administrative support staff, school and library support staff, student support staff, and other support services staff.

<sup>2</sup>Because of classification revisions, categories other than teachers, principals, librarians, and guidance counselors are only roughly comparable to figures for years after 1980.

<sup>3</sup>Data included in column 8.

NOTE: Data for 1949–50 through 1969–70 are cumulative for the entire school year, rather than counts as of the fall of the year. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Statistics of State School Systems, various years; *Statistics of Public Elementary and Secondary Schools*, various years; and Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2015–16. (This table was prepared September 2017.)

—Not available.

<sup>1</sup>U.S. totals include imputations for underreporting and nonreporting states.

<sup>2</sup>Includes imputations to correct for underreporting.

<sup>3</sup>Total staff count excludes officials and administrators and administrative support staff, so computed percentage of teachers may be overstated.

NOTE: DoD = Department of Defense.

—Not available.

<sup>1</sup>Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools.

<sup>2</sup>Schools with both elementary and secondary grades are included under elementary schools and also under secondary schools.

<sup>3</sup>Data for most years prior to 1976–77 are partly estimated. Prior to 1995–96, excludes schools with highest grade of kindergarten.

<sup>4</sup>Includes schools not classified by grade span, which are not shown separately.

<sup>5</sup>Includes elementary, secondary, and combined elementary/secondary schools.

<sup>6</sup>These data cannot be compared directly with the data for years after 1980–81.

<sup>7</sup>Because of expanded survey coverage, data are not directly comparable with figures after 1983–84.

†Not applicable.

NOTE: Size not reported (column 11) includes school districts reporting enrollment of zero and school districts whose enrollment counts were suppressed because they failed data quality edits. Regular districts exclude regional education service agencies and supervisory union administrative centers, state-operated agencies, federally operated agencies, and other types of local education agencies, such as independent charter schools. Enrollment

totals differ from other tables because this table represents data reported by regular school districts rather than states or schools. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Local Education Agency Universe Survey," 1979–80 through 2015–16. (This table was prepared September 2017.)

<sup>1</sup>Regular school districts include both independent districts and those that are a dependent segment of a local government. Also includes components of supervisory unions that operate schools, but share superintendent services with other districts.

<sup>2</sup>New York City counted as one school district.

NOTE: DoD = Department of Defense.

†Not applicable.

#Rounds to zero.

<sup>1</sup>Located inside an urbanized area and inside a principal city with a population of 250,000 or more.

<sup>2</sup>Located inside an urbanized area and inside a principal city with a population of at least 100,000, but less than 250,000.

<sup>3</sup>Located inside an urbanized area and inside a principal city with a population less than 100,000.

<sup>4</sup>Located inside an urbanized area and outside a principal city with a population of 250,000 or more.

<sup>5</sup>Located inside an urbanized area and outside a principal city with a population of at least 100,000, but less than 250,000.

<sup>6</sup>Located inside an urbanized area and outside a principal city with a population less than 100,000.

<sup>7</sup>Located inside an urban cluster that is 10 miles or less from an urbanized area.

<sup>8</sup>Located inside an urban cluster that is more than 10 but less than or equal to 35 miles from an urbanized area.

<sup>9</sup>Located inside an urban cluster that is more than 35 miles from an urbanized area.

<sup>10</sup>Located outside any urbanized area or urban cluster, but 5 miles or less from an urbanized area or 2.5 miles or less from an urban cluster.

<sup>11</sup>Located outside any urbanized area or urban cluster and more than 5 miles but less than or equal to 25 miles from an urbanized area, or more than 2.5 miles but less than or equal to 10 miles from an urban cluster.

<sup>12</sup>Located outside any urbanized area or urban cluster, more than 25 miles from an urbanized area, and more than 10 miles from an urban cluster.

<sup>13</sup>Data are based on locales of school districts rather than locales of schools as in the rest of the table. Includes imputed data for Alabama in 2012 and for New York in 2012 and 2013. Data for 2014 and earlier years include only those ELL students who participated in ELL programs. Starting with 2015, data include all ELL students, regardless of program participation.

<sup>14</sup>Average for schools reporting enrollment. Enrollment data were available for 94,859 out of 98,454 schools in 2012–13, 94,876 out of 98,271 schools in 2013–14, 95,230 out of 98,176 schools in 2014–15, and 95,240 out of 98,277 schools in 2015–16.

<sup>15</sup>Ratio for schools reporting both full-time-equivalent teachers and fall enrollment data.

NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity. Enrollment and ratios are based on data reported by schools and may differ from data reported in other tables that reflect aggregate totals reported by states. Some data have been revised from previously published figures.

<sup>1</sup>Poverty is defined based on the number of persons and related children in the family and their income. For information on poverty thresholds, see <https://www.census.gov/data/tables/time-series/demo/income-poverty/historical-poverty-thresholds.html>.

<sup>2</sup>Fiscal year 2017 Department of Education funds available for spending by school districts in the 2017–18 school year.

<sup>3</sup>Federal revenue per student is based on fall enrollment collected through the “Local Education Agency (School District) Finance Survey (F33).”

NOTE: Detail may not sum to totals because of rounding. ISD = independent school district.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), “Local Education Agency Universe Survey,” 2015–16; “Local Education Agency (School District) Finance Survey (F33),” 2014–15; and unpublished Department of Education budget data. U.S. Department of Commerce, Census Bureau, Small Area Income and Poverty Estimates (SAIPE) Program, 2015 Poverty Estimates for School Districts. (This table was prepared July 2018.)

—Not available.

<sup>1</sup>Includes special education, alternative, and other schools not reported by grade span.

<sup>2</sup>Includes schools beginning with grade 6 or below and ending with grade 9 or above.

<sup>3</sup>Includes schools beginning with grade 6 or below and with no grade higher than 8.

<sup>4</sup>Includes schools with grade spans beginning with 4, 5, or 6 and ending with 6, 7, or 8.

<sup>5</sup>Includes schools with no grade lower than 7.

<sup>6</sup>Includes schools with grades 7 and 8 or grades 7 through 9.

<sup>7</sup>Because of revision in data collection procedures, figures not comparable to data for other years.

<sup>1</sup>The National School Lunch Program is a federally assisted meal program. To be eligible for free lunch under the program, a student must be from a household with an income at or below 130 percent of the poverty threshold; to be eligible for reduced-price lunch, a student must be from a household with an income between 130 percent and 185 percent of the poverty threshold.

<sup>2</sup>Pupil/teacher ratio based on schools that reported both enrollment and teacher data.

<sup>3</sup>Includes schools beginning with grade 6 or below and with no grade higher than 8.

<sup>4</sup>Includes schools with no grade lower than 7.

<sup>5</sup>Includes schools beginning with grade 6 or below and ending with grade 9 or above.

NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.

<sup>1</sup>Because the data reflect reports by schools, totals differ from those in tables based on reports by states or school districts. Percentage distribution and average enrollment calculations exclude data for schools not reporting enrollment.

<sup>2</sup>Includes elementary, secondary, combined elementary/secondary, and other schools.

<sup>3</sup>Includes schools beginning with grade 6 or below and with no grade higher than 8.

<sup>4</sup>Includes schools with no grade lower than 7.

<sup>5</sup>Includes schools beginning with grade 6 or below and ending with grade 9 or above.

<sup>6</sup>Includes special education, alternative, and other schools not reported by grade span.

<sup>7</sup>Excludes special education schools, vocational schools, and alternative schools.

<sup>8</sup>Data are for schools reporting enrollments greater than zero. Enrollments greater than zero were reported for 94,876 out of 98,271 schools in 2013–14, 95,230 out of 98,176 in 2014–15, and 95,240 out of 98,277 in 2015–16.

NOTE: Detail may not sum to totals because of rounding.

<sup>1</sup>Includes students enrolled in schools that did not report free or reduced-price lunch eligibility.

<sup>2</sup>Combined elementary/secondary schools and schools not reported by grade span are not shown separately.

<sup>3</sup>Includes schools beginning with grade 6 or below and with no grade higher than 8.

<sup>4</sup>Includes schools with no grade lower than 7.

<sup>5</sup>Excludes 2,737 students enrolled in schools for which locale data are not available.

NOTE: Students with household incomes under 185 percent of the poverty threshold are eligible for free or reduced-price lunch under the National School Lunch Program (NSLP). In addition, some groups of children—such as foster children, children participating in the Head Start and Migrant Education programs, and children receiving services under the Runaway

and Homeless Youth Act—are assumed to be categorically eligible to participate in the NSLP. Also, under the Community Eligibility option, some nonpoor children who attend school in a low-income area may participate if the district decides that it would be more efficient to provide free lunch to all children in the school. For more information, see <http://www.fns.usda.gov/nslp/national-school-lunch-program-nslp>. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

<sup>1</sup>Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>2</sup>Data for combined schools are included in the totals and in analyses by other school characteristics, but are not shown separately.

<sup>3</sup>Due to definitional changes for community type, estimates for years prior to 2005 may not be directly comparable with estimates for later years.

<sup>4</sup>Free or reduced-price lunch information was obtained on the questionnaire and supplemented, if necessary, with data from the Common Core of Data (CCD).

<sup>5</sup>Includes computers used for instructional or administrative purposes.

<sup>6</sup>In 2008, instructional rooms included classrooms only and excluded computer labs and library/media centers. Prior to 2008, instructional rooms included classrooms, computer labs and other labs, library/media centers, and other rooms used for instructional purposes.

<sup>7</sup>Some data differ slightly (e.g., by 1 percent) from previously published figures.

NOTE: Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Includes graduates of public and private schools.

<sup>2</sup>Includes estimates for jurisdictions not reporting counts of graduates by sex. Data for 1929–30 and preceding years are from Statistics of Public High Schools and exclude graduates from high schools that failed to report to the Office of Education.

<sup>3</sup>The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Averaged freshman graduation rates in this table are based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity.

<sup>4</sup>Derived from Current Population Reports, Series P-25. For years 1869–70 through 1989–90, 17-year-old population is an estimate of the October 17-year-old population based on July data. Data for 1990–91 and later years are October resident population estimates prepared by the Census Bureau.

<sup>5</sup>Estimated.

<sup>6</sup>Includes imputations for nonreporting states.

<sup>7</sup>Projected by private schools responding to the Private School Universe Survey.

<sup>8</sup>Includes estimates for public schools in New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.

<sup>9</sup>Includes estimate for Connecticut, which did not report graduates by sex.

<sup>10</sup>Projected by NCES.

<sup>11</sup>Public school data are projected by NCES; private school data are actual.

NOTE: Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding and adjustments to protect student privacy.

<sup>1</sup>U.S. total includes estimates for nonreporting states.

<sup>2</sup>Estimated high school graduates from NCES 2011–312, *Public School Graduates and Dropouts from the Common Core of Data: School Year 2008–09*.

<sup>3</sup>Beginning in 1989–90, graduates from adult programs are excluded.

<sup>4</sup>Includes 1,161 graduates in 2007–08 and 1,169 graduates in 2008–09 from private high schools that received a majority of their funding from public sources.

<sup>5</sup>Projected data from NCES 91–490, *Projections of Education Statistics to 2002*.

NOTE: Data include regular diploma recipients, but exclude students receiving a certificate of attendance and persons receiving high school equivalency certificates.

DoD = Department of Defense. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

<sup>1</sup>Data on students of Two or more races were not reported by all states; therefore, the data are not comparable to figures for 2010–11 and later years.

<sup>2</sup>Projected.

NOTE: Race categories exclude persons of Hispanic ethnicity. Prior to 2007–08, data on students of Two or more races were not collected separately. Some data have been revised

from previously published figures. Detail may not sum to totals because of rounding and statistical methods used to prevent the identification of individual students.

—Not available.  
 1Distribution of Asian and Pacific Islander students is estimated by the National Center for Education Statistics.  
 NOTE: Race categories exclude persons of Hispanic ethnicity. DoD = Department of Defense. To protect the confidentiality of individual students, small cell sizes have been bottom coded to less than or equal to three. Detail may not sum to totals because of statistical methods used to prevent the identification of individual students.

—Not available.

<sup>1</sup>Includes estimates for New York and Wisconsin. Without estimates for these two states, the averaged freshman graduation rate for the remaining 48 states and the District of Columbia is 75.0 percent.

<sup>2</sup>U.S. total includes estimates for nonreporting states.

<sup>3</sup>Estimated high school graduates from NCES 2011–312, *Public School Graduates and Dropouts from the Common Core of Data: School Year 2008–09*.

<sup>4</sup>Projected high school graduates from NCES 2009–062, *Projections of Education Statistics to 2018*.

<sup>5</sup>Includes 1,161 graduates in 2007–08 and 1,169 graduates in 2008–09 from private high schools that received a majority of their funding from public sources.

<sup>6</sup>Includes 1,419 fall 2006 9th-graders who attended publicly funded private schools that were not reported in the 2006–07 Common Core of Data, but were reported in data for later years.

<sup>7</sup>Estimated high school graduates from NCES 2006–606rev, *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*.

NOTE: The averaged freshman graduation rate provides an estimate of the percentage of students who receive a regular diploma within 4 years of entering ninth grade. The rate uses aggregate student enrollment data to estimate the size of an incoming freshman class and aggregate counts of the number of diplomas awarded 4 years later. Averaged freshman graduation rates in this table are based on reported totals of enrollment by grade and high school graduates, rather than on details reported by race/ethnicity. SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Nonfiscal Survey of Public Elementary/Secondary Education," 1986–87 through 2010–11; "State Dropout and Completion Data File," 2005–06 through 2012–13; *The Averaged Freshman Graduation Rate for Public High Schools From the Common Core of Data: School Years 2002–03 and 2003–04*; *Public School Graduates and Dropouts From the Common Core of Data, 2007–08 and 2008–09*; and *Projections of Education Statistics to 2018*. (This table was prepared January 2016.)

—Not available.

‡Reporting standards not met (too few cases).

<sup>1</sup>The time when students are identified as having certain characteristics varies by state. Depending on the state, a student may be included in a category if the relevant characteristic is reported in 9th-grade data, if the characteristic is reported in 12th-grade data, or if it is reported at any point during the student's high school years.

<sup>2</sup>Students identified as children with disabilities under the Individuals with Disabilities Education Act (IDEA).

<sup>3</sup>Students who met the definition of limited English proficient students as outlined in the ED Facts workbook. For more information, see <http://www2.ed.gov/about/initiatives/ed/facts/eden-workbook.html>.

<sup>4</sup>Students who met the state criteria for classification as economically disadvantaged.

<sup>5</sup>States either report data for a combined "Asian/Pacific Islander" group or report the "Asian" and "Pacific Islander" groups separately. Total represents either a single value reported by the state for "Asian/Pacific Islander" or an aggregation of separate values reported for "Asian" and "Pacific Islander." "Pacific Islander" includes the "Filipino" group, which only California and Utah report separately.

<sup>6</sup>For 2010–11 through 2012–13, includes imputed data for a small number of states for which ACGR data were not available. (In these years, one or more of the following states

had not yet started reporting ACGR data: Idaho, Kentucky, and Oklahoma.) For American Indian/Alaska Native students (column 14), includes imputed data for Virginia, since the state does not report ACGR data for that race category. This table does not include the Bureau of Indian Education and Puerto Rico.

<sup>7</sup>Use data with caution. The Alabama State Department of Education has indicated that their ACGR data was misstated. For more information, please see the following press release issued by the state: <https://www.alsde.edu/sec/comm/News%20Releases/12-08-2016%20Graduation%20Rate%20Review.pdf>.

NOTE: The adjusted cohort graduation rate (ACGR) is the percentage of public high school freshmen who graduate with a regular diploma within 4 years of starting 9th grade. Students who are entering 9th grade for the first time form a cohort for the graduating class. This cohort is "adjusted" by adding any students who subsequently transfer into the cohort and subtracting any students who subsequently transfer out, emigrate to another country, or die. Values preceded by the "<" or "≥" symbol have been "blurred" to protect student privacy. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, Office of Elementary and Secondary Education, Consolidated State Performance Report, 2010–11 through 2015–16. (This table was prepared December 2017.)

**Table 219.50. Number and percentage of 9th- to 12th-graders who dropped out of public schools (event dropout rate), by race/ethnicity, grade, and state or jurisdiction: 2009–10**

#Rounds to zero.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Data were imputed based on prior year rates.

NOTE: Race categories exclude persons of Hispanic ethnicity. Event dropout rates measure the percentage of public school students in grades 9 through 12 who dropped out of school

between one October and the next. Enrollment and dropout data for ungraded students were prorated into grades 9 through 12 based on the counts for graded students. DoD stands for Department of Defense.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Dropout and Completion Data File," 2009–10. (This table was prepared November 2012.)

**Table 219.55. Among 15- to 24-year-olds enrolled in grades 10 through 12, percentage who dropped out (event dropout rate), by sex and race/ethnicity: 1972 through 2016**

[Standard errors appear in parentheses]

Year	Event dropout rate <sup>1</sup>					
	Total <sup>2</sup>	Sex		Race/ethnicity		
		Male	Female	White	Black	Hispanic
1	2	3	4	5	6	7
1972	6.1 (0.34)	5.9 (0.47)	6.3 (0.49)	5.3 (0.35)	9.6 (1.36)	11.2! (3.70)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>The event dropout rate is the percentage of 15- to 24-year-olds in grades 10 through 12 who dropped out between one October and the next (e.g., the 2016 data refer to 10th- through 12th-graders who were enrolled in October 2015 but had dropped out by October 2016). Dropping out is defined as leaving school without a high school diploma or alternative credential such as a GED certificate.

<sup>2</sup>Includes other racial/ethnic groups not separately shown.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Because of changes in data collection procedures, data for 1992 and later years may not be comparable with figures for prior years. Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The event dropout rate is the percentage of 15- to 24-year-olds in grades 10 through 12 who dropped out between one October and the next (e.g., the 2016 data refer to 10th- through 12th-graders who were enrolled in October 2015 but had dropped out by October 2016). Dropping out is defined as leaving school without a high school diploma or alternative credential such as a GED certificate.

<sup>2</sup>Includes all 15- to 24-year-olds who were enrolled in grades 10 through 12 in October 2015.

<sup>3</sup>Includes only those 15- to 24-year-olds who dropped out of grades 10 through 12 between October 2015 and October 2016. Dropping out is defined as leaving school without a high school diploma or alternative credential such as a GED certificate.

<sup>4</sup>Lowest quarter refers to the bottom 25 percent of all family incomes; middle low quarter refers to the 26th through the 50th percentile of all family incomes; middle high quarter refers to the 51st through the 75th percentile of all family incomes; and highest quarter refers to the top 25 percent of all family incomes.

<sup>5</sup>Age at the time of data collection. A person's age at the time of dropping out may be 1 year younger, because the dropout event could occur at any time over the previous 12-month period.

<sup>6</sup>United States refers to the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas. Children born abroad to U.S.-citizen parents are counted as born in the United States. Individuals defined as "first generation" were born in the United States, but one or both of their parents were born outside the United States. Individuals defined as "second generation or higher" were born in the United States, as were both of their parents.

<sup>7</sup>Individuals identified as having a disability reported difficulty with at least one of the following: hearing, seeing even when wearing glasses, walking or climbing stairs, dressing or bathing, doing errands alone, concentrating, remembering, or making decisions.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

—Not available.

<sup>1</sup>Test takers are people who took any portion of the specified equivalency test (i.e., one or more content-area subtests) in the given year.

<sup>2</sup>Test completers are those test takers who had tested in all five content areas of the specified equivalency test by the end of the given year and who took their final content-area subtest in the given year. People completing their final subtest in the given year may have begun testing in an earlier year.

<sup>3</sup>Test passers are those test completers who met the minimum passing standard for the specified equivalency test. In order to receive a high school equivalency credential in some jurisdictions, test takers must meet additional requirements beyond passing an equivalency test.

<sup>4</sup>In New Jersey, New York, and West Virginia, TASC test takers who had already taken a GED subtest in a given content area were not required to take the same content area of the TASC test. In New Jersey, TASC test takers who had taken a HiSET

subtest also were not required to take the same content area of the TASC test. TASC completers and passers in this table include only people who took TASC subtests for all content areas; those who took a combination of subtests from TASC and GED (or HiSET in New Jersey) are not included in the calculation of TASC completion and passing rates.

NOTE: The states and other jurisdictions decide which equivalency test(s) to offer. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

<sup>1</sup>The status completion rate is the number of 18- to 24-year-olds who are high school completers as a percentage of the total number of 18- to 24-year-olds who are not enrolled in high school or a lower level of education. High school completers include those with a high school diploma, as well as those with an alternative credential, such as a GED.

<sup>2</sup>Prior to 2003, Asian data include Pacific Islanders.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons

or nursing facilities). Because of changes in data collection procedures, data for 1992 and later years may not be comparable with figures for prior years. Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown.

—Not available.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>The status completion rate is the number of 18- to 24-year-olds who are high school completers as a percentage of the total number of 18- to 24-year-olds who are not enrolled in high school or a lower level of education. High school completers include those with a high school diploma, as well as those with an alternative credential, such as a GED.

<sup>2</sup>Includes all 18- to 24-year-olds who are not enrolled in high school or a lower level of education.

<sup>3</sup>Status completers are 18- to 24-year-olds who are not enrolled in high school or a lower level of education and who also are high school completers—that is, have either a high school diploma or an alternative credential, such as a GED.

<sup>4</sup>United States refers to the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas. Children born abroad

to U.S.-citizen parents are counted as born in the United States. Individuals defined as "first generation" were born in the United States, but one or both of their parents were born outside the United States. Individuals defined as "second generation or higher" were born in the United States, as were both of their parents.

<sup>5</sup>Individuals identified as having a disability reported difficulty in at least one of the following: hearing, seeing even when wearing glasses, walking or climbing stairs, dressing or bathing, doing errands alone, concentrating, remembering, or making decisions.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and the suppression of cells that do not meet National Center for Education Statistics reporting standards.

—Not available.

†Not applicable.

<sup>1</sup>Includes other racial/ethnic groups not separately shown.

<sup>2</sup>Based on the April 1960 decennial census.

<sup>3</sup>For 1967 through 1971, White and Black include persons of Hispanic ethnicity.

<sup>4</sup>Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.

<sup>5</sup>White and Black exclude persons of Two or more races.

<sup>6</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data except for 1960 are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1967 through 2016. (This table was prepared September 2017.)

**Table 219.71. Population 16 to 24 years old and number of 16- to 24-year-old high school dropouts (status dropouts), by sex and race/ethnicity: Selected years, 1970 through 2016**

[Standard errors appear in parentheses]

#Rounds to zero.

<sup>1</sup>Includes other racial/ethnic groups not separately shown.

<sup>2</sup>For 1970, White and Black include persons of Hispanic ethnicity.

<sup>3</sup>Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.

<sup>4</sup>White and Black exclude persons of Two or more races.

<sup>5</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. All data are based on October counts. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is 30 percent or greater.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The status dropout rate is the percentage of 16- to 24-year-olds who are not enrolled in high school and who lack a high school credential. High school credentials include high school diplomas and alternative credentials, such as a GED certificate.

<sup>2</sup>Includes all 16- to 24-year-olds.

<sup>3</sup>Status dropouts are 16- to 24-year-olds who are not enrolled in high school and who lack a high school credential. High school credentials include high school diplomas and alternative credentials, such as a GED certificate.

<sup>4</sup>Lowest quarter refers to the bottom 25 percent of all family incomes; middle low quarter refers to the 26th through the 50th percentile of all family incomes; middle high quarter refers to the 51st through the 75th percentile of all family incomes; and highest quarter refers to the top 25 percent of all family incomes.

<sup>5</sup>United States refers to the 50 states, the District of Columbia, Puerto Rico, American

Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas. Children born abroad to U.S.-citizen parents are counted as born in the United States. Individuals defined as "first generation" were born in the United States, but one or both of their parents were born outside the United States. Individuals defined as "second generation or higher" were born in the United States, as were both of their parents.

<sup>6</sup>Individuals identified as having a disability reported difficulty in at least one of the following: hearing, seeing even when wearing glasses, walking or climbing stairs, dressing or bathing, doing errands alone, concentrating, remembering, or making decisions.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and the suppression of cells that do not meet National Center for Education Statistics reporting standards. Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

—Not available.

†Not applicable.

<sup>1</sup>Lowest quarter refers to the bottom 25 percent of all family incomes; middle low quarter refers to the 26th through the 50th percentile of all family incomes; middle high quarter refers to the 51st through the 75th percentile of all family incomes; and highest quarter refers to the top 25 percent of all family incomes.

<sup>2</sup>Data are not comparable to employment and unemployment rate data produced by the Bureau of Labor Statistics, because the percentage distributions presented here include persons who are not in the labor force. The labor force consists of those who are employed and those who are unemployed (i.e., seeking employment); persons who are neither employed nor seeking employment are not in the labor force.

<sup>3</sup>Includes persons who were employed but not at work during the survey week.

<sup>4</sup>Because of changes in data collection procedures, data may not be comparable with figures for years prior to 1992.

<sup>5</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school. People who have received GED credentials are counted as high school completers. Data are based on sample surveys of the civilian noninstitutionalized population, which excludes persons in the military and persons living in institutions (e.g., prisons or nursing facilities). Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2016. (This table was prepared September 2017.)

**Table 219.80. Percentage of high school dropouts among persons 16 to 24 years old (status dropout rate) and number of status dropouts, by noninstitutionalized or institutionalized status, birth in or outside of the United States, and selected characteristics: Selected years, 2006 through 2016**

[Standard errors appear in parentheses]

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

±Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Persons living in households as well as persons living in noninstitutionalized group quarters. Noninstitutionalized group quarters include college and university housing, military quarters, facilities for workers and religious groups, and temporary shelters for the homeless.

<sup>2</sup>Persons living in institutionalized group quarters, including adult and juvenile correctional facilities, nursing facilities, and other health care facilities.

<sup>3</sup>United States refers to the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the Northern Marianas.

<sup>4</sup>Includes other Central American subgroups not shown separately.

<sup>5</sup>Includes Taiwanese.

<sup>6</sup>In addition to the subgroups shown, also includes Sri Lankan.

<sup>7</sup>Consists of Indonesian and Malaysian.

<sup>8</sup>Includes persons reporting American Indian alone, persons reporting Alaska Native alone, and persons from American Indian and/or Alaska Native tribes specified or not specified.

<sup>9</sup>Respondents who wrote in some other race that was not included as an option on the questionnaire.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program, regardless of when they left school and whether they ever attended school in the United States. People who have received GED credentials are counted as high school completers. Data are based on sample surveys of the entire population of 16- to 24-year-olds residing within the United States. Estimates may differ from those in tables based on the Current Population Survey (CPS) because of differences in survey design and target populations. Detail may not sum to totals because of rounding and the suppression of data that do not meet reporting standards. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

<sup>1</sup>Received a certificate of completion, modified diploma, or some similar document, but did not meet the same standards for graduation as those for students without disabilities.

<sup>2</sup>Students may exit special education services due to maximum age beginning at age 18, depending on state law or practice or order of any court.

<sup>3</sup>"Dropped out" is defined as the total who were enrolled at some point in the reporting year, were not enrolled at the end of the reporting year, and did not exit for any of the other reasons described. Includes students previously categorized as "moved, not known to continue."

<sup>4</sup>"Transferred to regular education" was previously labeled "no longer receives special education."

<sup>5</sup>"Moved, known to be continuing" is the total number of students who moved out of the administrative area or transferred to another district and are known to be continuing in an educational program.

<sup>6</sup>Age data are as of fall of the school year, so some students may have been 1 year older at the time they exited school.

<sup>7</sup>Other health impairments include having limited strength, vitality, or alertness due to chronic or acute health problems such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes.

<sup>8</sup>Data for 2014–15 include imputations for missing or unavailable data from Ohio and Illinois. NOTE: Data are for the 50 states, the District of Columbia, the Bureau of Indian Education, American Samoa, the Federated States of Micronesia, Guam, the Northern Marianas, Puerto Rico, the Republic of Palau, the Republic of the Marshall Islands, and the U.S. Virgin Islands. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

Female	177 (10.5)	49.7 (2.21)	30.4 (0.76)	2.7 (0.06)	34.8 (0.51)	75.9 (2.49)	4.4 (0.10)
Socioeconomic status <sup>6</sup>							
Lowest 20 percent	91 (8.0)	25.5 (2.26)	22.3 (0.91)	2.1 (0.11)	28.4 (0.97)	47.4 (5.25)	3.6 (0.14)
Middle 60 percent	215 (14.7)	60.5 (2.47)	30.0 (0.75)	2.7 (0.05)	34.9 (0.54)	76.0 (2.63)	4.1 (0.10)
Highest 20 percent	50 (6.9)	14.0 (1.84)	40.3 (2.31)	2.9 (0.10)	42.8 (1.15)	88.5 (2.89)	4.7 (0.18)

†Not applicable.

<sup>1</sup>Reflects performance on language and literacy items (e.g., conventions of print, letter recognition, understanding of letter-sound relationships, phonological awareness, sight word recognition, and understanding words in the context of simple sentences). Potential score ranges from 0 to 85.

<sup>2</sup>Verbal expressiveness using gestures, words, and sentences. Potential score ranges from 0 to 5.

<sup>3</sup>Includes number sense, geometry, counting, operations, and patterns. Potential score ranges from 0 to 71.

<sup>4</sup>Percentage of children who scored 10 on a test with a potential score range of 0 to 10. These children were able to name the colors of five pictured objects (2 points per correct answer).

<sup>5</sup>Measures the ability to use fine motor skills in drawing basic forms and shapes. Potential score ranges from 0 to 7.

<sup>6</sup>Socioeconomic status (SES) was measured by a composite score based on parental education and occupations, and family income.

<sup>7</sup>The type of nonparental care in which the child spent the most hours.

<sup>8</sup>Care provided in the child's home or in another private home by a relative (excluding parents).

<sup>9</sup>Care provided in the child's home or in another private home by a person unrelated to the child.

<sup>10</sup>Care provided in places such as early learning centers, nursery schools, and preschools, excluding Head Start.

<sup>11</sup>Children who spent an equal amount of time in each of two or more types of arrangements. <sup>12</sup>Poverty status based on Census Bureau guidelines from 2005, which identify a dollar amount determined to meet a household's needs, given its size and composition. In 2005, a family of four was considered to live below the poverty threshold if its income was less than or equal to \$19,971.

NOTE: Estimates weighted by W3R0. Estimates pertain to a sample of children who were born in 2001. This table was designed to present data collected when the children were about 4 years of age (i.e., 48 to 57 months old). As shown in the table, some children were younger or older than this at the time data were collected, although 75 percent were within the target age range. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Includes only children for whom information about both risk factors is available. Excludes children with missing information about parental education or family poverty.

<sup>2</sup>High school not completed by any parent or guardian living with the child.

<sup>3</sup>Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its income was less than \$17,552 in 2010.

<sup>4</sup>Derived from child's approaches to learning scale score in fall of the kindergarten year. This score is based on teachers' reports on how often students exhibit positive learning behaviors in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores range from 1 to 4, with higher scores indicating that a child exhibits positive learning behaviors more often. Fall 2010 scores were categorized into the four anchor points on the original scale—1 (never), 2 (sometimes), 3 (often), and 4 (very often)—by rounding the mean score to the nearest whole number.

<sup>5</sup>The type of nonparental care in which the child spent the most hours. "Multiple arrangements" refers to children who spent an equal amount of time in each of two or more arrangements.

<sup>6</sup>A two-parent household may have two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. A mother-only or father-only household has one biological or adoptive parent only, without another parent/partner. In other household types, which do not include biological or adoptive parents, the guardian or guardians may be related or unrelated to the child.

<sup>7</sup>Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.

<sup>8</sup>Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income during the child's kindergarten year. NOTE: Estimates weighted by W7C17P\_7T170. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010–11 school year. Estimates represent characteristics as of 2010–11, when the first wave of data collection occurred, and include the entire sample of 2010–11 first-time kindergartners. However, estimates in this table may differ from estimates in tables based on earlier data files, because weights have been adjusted to account for survey nonresponse at each data collection wave. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Reflects performance on questions measuring basic skills (e.g., word recognition); vocabulary knowledge; and reading comprehension, including identifying information specifically stated in text (e.g., definitions, facts, and supporting details), making complex inferences from texts, and considering the text objectively and judging its appropriateness and quality. Possible scores for the reading assessment range from 0 to 155.

<sup>2</sup>Derived from child's approaches to learning scale score in fall of the kindergarten year. This score is based on teachers' reports on how often students exhibit positive learning behaviors in seven areas: attentiveness, task persistence, eagerness to learn, learning independence, ability to adapt easily to changes in routine, organization, and ability to follow classroom rules. Possible scores range from 1 to 4, with higher scores indicating that a child exhibits positive learning behaviors more often. Fall 2010 scores were categorized into the four anchor points on the original scale—1 (never), 2 (sometimes), 3 (often), and 4 (very often)—by rounding the mean score to the nearest whole number.

<sup>3</sup>The type of nonparental care in which the child spent the most hours. "Multiple arrangements" refers to children who spent an equal amount of time in each of two or more arrangements.

<sup>4</sup>A two-parent household may have two biological parents, two adoptive parents, or one biological/adoptive parent and one other parent/partner. A mother-only or father-only household has one biological or adoptive parent only, without another parent/partner. In other household types, which do not include biological or adoptive parents, the guardian or guardians may be related or unrelated to the child.

<sup>5</sup>Two or more languages (which could include English) were spoken in the child's home, and the parent respondent was unable to specify which language was the primary one (the one spoken most of the time).

<sup>6</sup>Parents' highest level of education is the highest level of education achieved by either of the parents or guardians in a two-parent household, by the only parent in a single-parent household, or by any guardian in a household with no parents.

<sup>7</sup>Poverty status is based on preliminary U.S. Census income thresholds for 2010, which identify incomes determined to meet household needs, given family size and composition. For example, a family of three with one child was below the poverty threshold if its income was less than \$17,552 in 2010.

<sup>8</sup>Includes only children for whom information about both risk factors is available. Excludes children with missing information about parental education or poverty status.

<sup>9</sup>High school not completed by any parent or guardian living with the child.

<sup>10</sup>Socioeconomic status (SES) was measured by a composite score based on parental education and occupations and household income during the child's kindergarten year. NOTE: Estimates weighted by W8C8P\_20. Estimates pertain to a sample of children who were enrolled in kindergarten for the first time in the 2010–11 school year. The same children were assessed in spring 2012 (when the majority were in first grade), spring 2013 (when the majority were in second grade), spring 2014 (when the majority were in third grade), and spring 2015 (when the majority were in fourth grade). Estimates differ from previously published figures because reading scale scores were recalculated to represent the kindergarten through fourth-grade assessment item pools and because weights were adjusted to account for survey nonresponse at each data collection wave, including the latest round of data collection (spring 2015). Race categories exclude persons of Hispanic ethnicity.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Prior to 2011, separate data for Asian students, Pacific Islander students, and students of Two or more races were not collected.

<sup>2</sup>Accommodations were not permitted for this assessment.

NOTE: Scale ranges from 0 to 500. Includes public and private schools. For 1998 and later years, includes students tested with accommodations (1 to 13 percent of all students,

depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 6 percent of all students). Data on race/ethnicity are based on school reports. Race categories exclude persons of Hispanic ethnicity.

—Not available.

†Not applicable.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).

<sup>2</sup>Scale ranges from 0 to 500.

<sup>3</sup>Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

<sup>4</sup>Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

<sup>5</sup>Advanced signifies superior performance.

<sup>6</sup>Accommodations were not permitted for this assessment.

NOTE: Includes public and private schools. For 1998 and later years, includes students tested with accommodations (1 to 13 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 6 percent of all students).

‡ Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

<sup>2</sup>Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: Includes public and private schools. Includes students tested with accommodations (1 to 13 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were

unable to be tested even with accommodations (2 to 6 percent of all students). Race categories exclude persons of Hispanic ethnicity. Prior to 2011, separate data for Asian students, Pacific Islander students, and students of Two or more races were not collected.

†Not applicable.

#Rounds to zero.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Results are for private schools overall, including Catholic and other (non-Catholic) private schools. In the 2017 NAEP Nations Report Card, results for private schools overall and for non-Catholic private schools were suppressed because these schools did not meet NAEP statistical and reporting standards requiring a school response rate of at least 70 percent. Response rates for private schools overall were 61 percent at grade 4 and 60 percent at grade 8. (Within the private school sector, response rates for Catholic schools were 89 percent at grade 4 and 86 percent at grade 8, while response rates for non-Catholic private schools were 41 percent at grade 4 and 39 percent at grade 8.) Please interpret these data with caution.

<sup>2</sup>Scale ranges from 0 to 500.

<sup>3</sup>The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).

NOTE: Includes students tested with accommodations (12 percent of all 4th-graders and 11 percent of all 8th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all students at both grades). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Accommodations were not permitted for this assessment.

<sup>2</sup>Did not meet one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.

<sup>3</sup>Did not meet one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.

<sup>4</sup>Did not meet one or more of the guidelines for school participation in 1992. Data are subject to appreciable nonresponse bias.

<sup>5</sup>Did not meet one or more of the guidelines for school participation in 1994. Data are subject to appreciable nonresponse bias.

<sup>6</sup>Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas

schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

NOTE: Scale ranges from 0 to 500. State-level data for 2000 are not available. For 1998 and later years, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1992, 1994, 1998, 2002, 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017 Reading Assessments, retrieved March 13, 2018, from the Main NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). (This table was prepared March 2018.)

—Not available.  
†Not applicable.  
‡Reporting standards not met. Participation rates fell below the required standards for reporting.  
<sup>1</sup>Did not meet one or more of the guidelines for school participation in 1998. Data are subject to appreciable nonresponse bias.  
<sup>2</sup>Did not meet one or more of the guidelines for school participation in 2002. Data are subject to appreciable nonresponse bias.  
<sup>3</sup>Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.

NOTE: Scale ranges from 0 to 500. State-level data for 1992 and 1994 are not available. Includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state.  
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1998, 2002, 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017 Reading Assessments, retrieved March 13, 2018, from the Main NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). (This table was prepared March 2018.)

**Table 221.70. Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-graders in public schools and percentage scoring at or above selected reading achievement levels, by English language learner (ELL) status and state: 2017**

[Standard errors appear in parentheses]

†Not applicable.

#Rounds to zero.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Scale ranges from 0 to 500.

<sup>2</sup>Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

<sup>3</sup>Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: The results for English language learners are based on students who were assessed

and cannot be generalized to the total population of such students. Although testing accommodations were permitted, some English language learners did not have a sufficient level of English proficiency to participate in the 2017 Reading Assessment.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 2017 Reading Assessment, retrieved May 9, 2018, from the Main NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). (This table was prepared May 2018.)

**Table 221.80. Average National Assessment of Educational Progress (NAEP) reading scale scores of 4th- and 8th-grade public school students and percentage attaining selected reading achievement levels, by race/ethnicity and jurisdiction or specific urban district: Selected years, 2009 through 2017**

[Standard errors appear in parentheses]

†Not applicable.

<sup>1</sup>In 2004, two assessments were conducted—one using the same format that was used in previous assessments, and one using a revised assessment format that provides accommodations for students with disabilities and for English language learners. The 2004 data in column 12 are for the format that was used in previous assessment years, while the 2004 data in column 13 are for the revised format. In subsequent years, only the revised format was used.

<sup>2</sup>Data for 1971 include persons of Hispanic ethnicity.

<sup>3</sup>Test scores of Hispanics were not tabulated separately.

NOTE: Scale ranges from 0 to 500. Students scoring 150 (or higher) are able to follow brief written directions and carry out simple, discrete reading tasks. Students scoring 200 are able to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. Students scoring 250 are able to search

for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. Students scoring 300 are able to find, understand, summarize, and explain relatively complicated literary and informational material. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 (revised format) and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 to 5 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity, except where noted. Totals include other racial/ethnic groups not shown separately.

—Not available.  
†Not applicable.  
#Rounds to zero.  
‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.  
<sup>1</sup>Prior to 2011, separate data for Asian students, Pacific Islander students, and students of Two or more races were not collected.  
<sup>2</sup>Accommodations were not permitted for this assessment.  
<sup>3</sup>Because of major changes to the framework and content of the grade 12 assessment, scores from 2005 and later assessment years cannot be compared with scores from earlier assessment years. Therefore, this table does not include scores from the earlier grade 12 assessment years (1990, 1992, 1996, and 2000). For data pertaining to scale score comparisons between earlier years, see the *Digest of Education Statistics 2009*, table 138 ([http://nces.ed.gov/programs/digest/d09/tables/dt09\\_138.asp](http://nces.ed.gov/programs/digest/d09/tables/dt09_138.asp)).

NOTE: For the grade 4 and grade 8 assessments, the scale ranges from 0 to 500. For the grade 12 assessment, the scale ranges from 0 to 300. Includes public and private schools. For 1996 and later years, includes students tested with accommodations (1 to 14 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students). Race categories exclude persons of Hispanic ethnicity.

—Not available.

†Not applicable.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).

<sup>2</sup>For the grade 4 and grade 8 assessments, the scale ranges from 0 to 500. For the grade 12 assessment, the scale ranges from 0 to 300.

<sup>3</sup>Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

<sup>4</sup>Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

<sup>5</sup>Advanced signifies superior performance.

<sup>6</sup>Accommodations were not permitted for this assessment.

<sup>7</sup>Because of major changes to the framework and content of the grade 12 assessment, results from 2005 and later assessment years cannot be compared with results from earlier assessment years. Therefore, this table does not include results from the earlier grade 12 assessment years (1990, 1992, 1996, and 2000). For data pertaining to comparisons between earlier years, see the *Digest of Education Statistics 2009*, table 138 ([http://nces.ed.gov/programs/digest/d09/tables/dt09\\_138.asp](http://nces.ed.gov/programs/digest/d09/tables/dt09_138.asp)). NOTE: Includes public and private schools. For 1996 and later years, includes students tested with accommodations (1 to 14 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students).

†Not applicable.

±Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Basic denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

<sup>2</sup>Proficient represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

NOTE: Includes public and private schools. Includes students tested with accommodations (1 to 14 percent of all students,

depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students). Race categories exclude persons of Hispanic ethnicity. Prior to 2011, separate data for Asian students, Pacific Islander students, and students of Two or more races were not collected.

†Not applicable.

#Rounds to zero.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Results are for private schools overall, including Catholic and other (non-Catholic) private schools. In the 2017 NAEP Nations Report Card, results for private schools overall and for non-Catholic private schools were suppressed because these schools did not meet NAEP statistical and reporting standards requiring a school response rate of at least 70 percent. Response rates for private schools overall were 61 percent at grade 4 and 60 percent at grade 8. (Within the private school sector, response rates for Catholic schools were 89 percent at grade 4 and 86 percent at grade 8, while response rates for non-Catholic private schools were 41 percent at grade 4 and 39 percent at grade 8.) Please interpret these data with caution.

<sup>2</sup>Scale ranges from 0 to 500.

<sup>3</sup>The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).

NOTE: Includes students tested with accommodations (12 percent of all 4th-graders and 12 percent of all 8th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all students at both grades). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Scale ranges from 0 to 300.

<sup>2</sup>Based on student reports. The category of students whose parents have an unknown level of education is not shown, although data for these students is included in table totals.

NOTE: Includes public and private schools. Includes students tested with accommodations (9 percent of all 12th-grade students); excludes only those students with disabilities and English language learners who were unable to be tested even

with accommodations (2 percent of all 12th-grade students). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Includes basic math, general math, applied math, prealgebra, and algebra I.

<sup>2</sup>Includes courses such as actuarial sciences, pure mathematics, discrete math, and advanced functions and modeling.

<sup>3</sup>Includes other racial/ethnic groups not shown separately, as well as students for whom information on race/ethnicity or sex was missing.

<sup>4</sup>SD estimates include both students with an Individualized Education Plan (IEP) and students with a plan under Section 504 of the Rehabilitation Act (a “504 plan”). IEPs are only for students who require specialized instruction, whereas 504 plans apply to students who require accommodations but may not require specialized instruction.

NOTE: Scale ranges from 0 to 300. Includes students tested with accommodations (6 percent of all 12th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (3 percent of all 12th-graders). For a transcript to be included in the analyses, it had to meet three requirements: (1) the graduate received either a standard or honors diploma, (2) the graduate’s transcript contained 16 or more Carnegie credits, and (3) the graduate’s transcript contained more than 0 Carnegie credits in English courses. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.  
‡Reporting standards not met. Participation rates fell below the required standards for reporting.  
<sup>1</sup>Accommodations were not permitted for this assessment.  
<sup>2</sup>The 1996 data in this table do not include students who were tested with accommodations. Data for students tested with accommodations are not available at the state level for 1996.  
<sup>3</sup>Did not meet one or more of the guidelines for school participation in 1996. Data are subject to appreciable nonresponse bias.  
<sup>4</sup>Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.  
<sup>5</sup>Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic

and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.  
NOTE: Scale ranges from 0 to 500. State-level data for 1990 are not available. For 2000 and later years, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state.

—Not available.  
†Not applicable.  
‡Reporting standards not met. Participation rates fell below the required standards for reporting.  
<sup>1</sup>Accommodations were not permitted for this assessment.  
<sup>2</sup>The 1996 data in this table do not include students who were tested with accommodations. Data for students tested with accommodations are not available at the state level for 1996.  
<sup>3</sup>Did not meet one or more of the guidelines for school participation in 1996. Data are subject to appreciable nonresponse bias.  
<sup>4</sup>Did not meet one or more of the guidelines for school participation in 2000. Data are subject to appreciable nonresponse bias.  
<sup>5</sup>Prior to 2005, NAEP divided the Department of Defense (DoD) schools into two jurisdictions, domestic and overseas. In 2005, NAEP began combining the DoD domestic

and overseas schools into a single jurisdiction. Data shown in this table for years prior to 2005 were recalculated for comparability.  
NOTE: Scale ranges from 0 to 500. For 2000 and later years, includes public school students who were tested with accommodations; excludes only those students with disabilities (SD) and English language learners (ELL) who were unable to be tested even with accommodations. SD and ELL populations, accommodation rates, and exclusion rates vary from state to state.  
SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress (NAEP), 1990, 1992, 1996, 2000, 2003, 2005, 2007, 2009, 2011, 2013, 2015, and 2017 Mathematics Assessments, retrieved March 13, 2018, from the Main NAEP Data Explorer (<http://nces.ed.gov/nationsreportcard/naepdata/>). (This table was prepared March 2018.)

**Table 222.80. Average National Assessment of Educational Progress (NAEP) mathematics scale scores of 4th- and 8th-grade public school students and percentage attaining selected mathematics achievement levels, by race/ethnicity and jurisdiction or specific urban district: Selected years, 2009 through 2017**

#Rounds to zero.

<sup>1</sup>In 2004, two assessments were conducted—one using the same format that was used in previous assessments, and one using a revised assessment format that provides accommodations for students with disabilities and for English language learners. The 2004 data in column 11 are for the format that was used in previous assessment years, while the 2004 data in column 12 are for the revised format. In subsequent years, only the revised format was used.

NOTE: Scale ranges from 0 to 500. Students scoring 150 (or higher) know some basic addition and subtraction facts. Students scoring 200 have a considerable understanding of two-digit numbers and know some basic multiplication and division facts. Students scoring 250 have an initial understanding of the four basic operations and are developing an ability to analyze simple logical relations. Students scoring 300 can perform reasoning

and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra. Students scoring 350 can perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability. Includes public and private schools. For assessment years prior to 2004, accommodations were not permitted. For 2004 (revised format) and later years, includes students tested with accommodations; excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 4 percent of all students, depending on age and assessment year). Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not shown separately.

—Not available.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Scale ranges from 0 to 300 for all three grades, but scores cannot be compared across grades. For example, the average score of 166 for White 4th-graders in 2015 does not denote higher performance than the score of 160 for White 12th-graders.

<sup>2</sup>Prior to 2011, students in the “Two or more races” category were categorized as “Unclassified.”

<sup>3</sup>The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).

<sup>4</sup>The percentile represents a specific point on the percentage distribution of all students ranked by their science score from low to high. For example, 10 percent of students scored at or below the 10th percentile score, while 90 percent of students scored above it.

<sup>5</sup>The standard deviation provides an indication of how much the test scores varied. The lower the standard deviation, the closer the scores were clustered around the average score. About two-thirds of the student scores can be expected to fall within the range of one standard deviation above and one standard deviation below the average score. In 2015, for example, the average score for all 4th-graders was 154, and the standard

deviation was 35. This means that one would expect about two-thirds of the students to have scores between 119 (one standard deviation above the average) and 119 (one standard deviation below). Standard errors also must be taken into account when making comparisons of these ranges.

<sup>6</sup>*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work.

<sup>7</sup>*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

<sup>8</sup>*Advanced* signifies superior performance.

NOTE: In 2011, only 8th-grade students were assessed in science. Includes students tested with accommodations (7 to 14 percent of all students, depending on grade level and year); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 to 3 percent of all students). Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Scale ranges from 0 to 300 for both music and visual arts.

<sup>2</sup>Based on principals' responses to the following question: "How often does a typical eighth-grade student in your school receive instruction in each of the following subjects?"

<sup>3</sup>Students were asked to analyze, interpret, or critique a piece of music that they listened to or to describe the social, historical, or cultural context of a piece of music.

<sup>4</sup>Students were asked to analyze, describe, or judge works of art and design to show understanding of form, aesthetics, and cultural or historical context.

<sup>5</sup>For columns 2, 14, 15, and 16, refers to music instruction. For column 3, refers to visual arts instruction.

NOTE: Includes students tested with accommodations (10 percent of all 8th-graders for visual arts and 11 percent for music); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all 8th-graders both for visual arts and for music). Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.

<sup>1</sup>Scale ranges from 0 to 300.

<sup>2</sup>TEL achievement levels are for performance on the TEL assessment overall, rather than performance on any specific content area.

<sup>3</sup>*Basic* denotes partial mastery of the knowledge and skills that are fundamental for proficient work at a given grade.

<sup>4</sup>*Proficient* represents solid academic performance. Students reaching this level have demonstrated competency over challenging subject matter.

<sup>5</sup>*Advanced* signifies superior performance.

<sup>6</sup>The student with disability (SD) variable used in this table includes students who have a 504 plan, even if they do not have an Individualized Education Plan (IEP).

<sup>7</sup>"Access to the Internet" was one item on a list preceded by the question "Do you have the following in your home?" For each item, students could either select "Yes" or leave

the item blank. Students who left "Access to the Internet" blank are counted as having no internet access at home.

<sup>8</sup>These data are based on students' responses to questions about their parents' education level. Data for students whose parents have an unknown level of education are included in table totals, but not shown separately.

NOTE: Includes students tested with accommodations (10 percent of all 8th-graders); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (1 percent of all 8th-graders). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

<sup>1</sup>Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>2</sup>Includes occupational education in agriculture; business and marketing; communications and design; computer and information sciences; construction and architecture; engineering technologies; health sciences; manufacturing; repair and transportation; and personal, public, and legal services. Does not include general labor market preparation courses and family and consumer sciences education courses.

<sup>3</sup>Includes general labor market preparation courses and family and consumer sciences education courses.

<sup>4</sup>Includes general skills, personal health and physical education, religion, military sciences, special education, and other courses not included in other academic subject fields. Some personal-use courses are also included in the Career/technical (occupational) education column and the Labor market, family, and consumer education column.

<sup>4</sup>Includes all science credits earned outside of biology, chemistry, and physics.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data differ slightly from figures appearing in other NCEES reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>Includes Carnegie units earned in all occupational education courses. This table does not include general labor market preparation courses and family and consumer sciences education courses.

<sup>2</sup>Total includes other racial/ethnic groups not separately shown.

NOTE: The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. Data may differ from figures appearing in other NCES reports because of differences in course taxonomies and/or inclusion

criteria. The analysis was restricted to graduates who attained either a standard or honors diploma and whose transcripts reflected a total of 16 or more Carnegie credits, with credits in English making up some part of the total. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Detail may not sum to totals because of rounding.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>For each course category, percentages include only students who earned at least the number of credits shown in parentheses.

<sup>2</sup>Excludes prealgebra.

<sup>3</sup>Includes courses where trigonometry or geometry has been combined with algebra II.

<sup>4</sup>For 2000 and later years, includes International Baccalaureate (IB) courses in addition to Advanced Placement (AP) and honors courses.

<sup>5</sup>Percentages include only students who earned at least one credit in each of the indicated courses.

NOTE: For a transcript to be included in the analyses, it had to meet three requirements: (1) the student graduated with either a standard or honors diploma, (2) the student's transcript contained 16 or more Carnegie units, and (3) the student's transcript contained more than 0 Carnegie units in English courses. The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course (0.5 = one semester; 1.0 = one academic year). Data differ slightly from figures appearing in other National Center for Education Statistics reports because of differences in taxonomies and case exclusion criteria. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Percentages are for students who earned at least one Carnegie credit.

<sup>2</sup>Excludes prealgebra.

<sup>3</sup>Percentages are for students who earned at least one-half of a Carnegie credit in a course that includes a focus on at least one of the listed content areas.

<sup>4</sup>Percentages are for students who earned at least one Carnegie credit each in biology and chemistry.

<sup>5</sup>Percentages are for students who earned at least one Carnegie credit each in biology, chemistry, and physics.

<sup>6</sup>Includes other racial/ethnic groups not shown separately, as well as students for whom information on race/ethnicity or sex was missing.

<sup>7</sup>SD data include both students with an Individualized Education Plan (IEP) and students with a plan under Section 504 of the Rehabilitation Act (a “504 plan”). IEPs are only for students who require specialized instruction, whereas 504 plans apply to students who require accommodations but may not require specialized instruction.

NOTE: For a transcript to be included in the analyses, it had to meet three requirements: (1) the graduate received either a standard or honors diploma, (2) the graduate’s transcript contained 16 or more Carnegie credits, and (3) the graduate’s transcript contained more than 0 Carnegie credits in English courses. Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Education, National Center for Education Statistics, 1990, 2000, 2005, and 2009 High School Transcript Study (HSTS). (This table was prepared September 2012.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Average credits earned are shown only for those graduates who earned any credit in the specified language while in high school. For these students, however, credits earned include both courses taken in high school and courses taken prior to entering high school.

Credits are shown in Carnegie units. The Carnegie unit is a standard unit of measurement that represents one credit for the completion of a 1-year course.

NOTE: For a transcript to be included in the analyses, it had to meet three requirements: (1) the graduate received either a standard or honors diploma, (2) the graduate's transcript contained 16 or more Carnegie credits, and (3) the graduate's transcript contained more than 0 Carnegie credits in English courses.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The 2003 questionnaire included a single item for "Asian or Pacific Islander," whereas questionnaires for later years included one item for Asian and a separate item for Pacific Islander.

<sup>2</sup>For 2003, the "Two or more races" row also includes children whose race was reported as "Other." The "Other" race category was not included on the 2012 and 2016 questionnaires.

<sup>3</sup>In 2003, education level was not collected for the second parent in a same sex couple.

<sup>4</sup>Poor children are those whose family incomes were below the Census Bureau's poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold.

The poverty threshold is a dollar amount that varies depending on a family's size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,257. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 and NHES:2016 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences between estimates for years prior to 2012 and estimates for later years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Excludes children whose programs have no classes with lettered grades. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2003, 2012, and 2016). (This table was prepared June 2018.)

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: Data are as of October of each year. Excludes students who were reported as being in a higher grade the previous year than the given year. Race categories exclude persons of Hispanic ethnicity. Totals include other racial/ethnic groups not separately shown. Detail may not sum to totals because of rounding.

<sup>1</sup>Possible scores in each SAT section range from 200 to 800, for a total possible score of 400 to 1600.

NOTE: The SAT was completely redesigned in 2016. The new SAT was first administered in March of 2016. This table reflects 2017 high school graduates who took the new SAT during high school. The data in this table include only test-takers from the 2017 graduating class who took the new SAT (93 percent of the cohort). These data do not factor in performance on the old SAT, and they set a new baseline for future year-to-year comparisons. If a student

took the new SAT more than once, the most recent score on each section is used, along with the student's most recent responses to the SAT questionnaire. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

<sup>1</sup>Data for 1966–67 to 1985–86 were converted to the recentered scale by using a formula applied to the original mean and standard deviation. For 1986–87 to 1994–95, individual student scores were converted to the recentered scale and then the mean was recomputed. For 1995–96 to 1998–99, nearly all students received scores on the recentered scale; any score on the original scale was converted to the recentered scale prior to recomputing the mean. From 1999–2000 on, all scores have been reported on the recentered scale.

<sup>2</sup>The SAT writing section was introduced in March 2005.

<sup>3</sup>Data for 2015–16 seniors cannot be compared to data for previous graduating cohorts because the 2015–16 data include testing only through January of the senior year and graduating cohort membership was also calculated differently.

NOTE: Data for 1966–67 through 1970–71 are estimates derived from the test scores of all participants. Data for 1971–72 through 2009–10 are for seniors who took the SAT at any time during their high school years through March of their senior year. Data for 2010–11

through 2014–15 are for seniors who took the SAT at any time during their high school years through June of their senior year. Data for 2015–16 are for seniors who took the SAT at any time during their high school years through the January 2016 administration, which was the final administration prior to a major test redesign; because of the smaller number of test administrations and other differences, the 2015–16 data are not comparable to data for earlier years. For all data years, if a student took the SAT more than once, the most recent score on each section was used. Possible scores on each section of the SAT range from 200 to 800. Prior to 2006, the critical reading section was known as the verbal section. The SAT was formerly known as the Scholastic Assessment Test and the Scholastic Aptitude Test.

#Rounds to zero.

<sup>1</sup>Members of the graduating class of 2017 who had taken the SAT as a percentage of all 2016–17 high school graduates. Percentages include only students who took the new SAT, which was first administered in March 2016. State percentages were calculated by the College Entrance Examination Board based on the number of high school graduates in each state as projected by the Western Interstate Commission for Higher Education (WICHE). The total percentage for the United States was calculated by the National Center for Education Statistics (NCES) based on NCES projections of the total number of U.S. high school graduates.

NOTE: The SAT was completely redesigned in 2016. The new SAT was first administered in March of 2016. This table reflects 2017 high school graduates who took the new SAT during

high school. The data in this table include only test-takers from the 2017 graduating class who took the new SAT (93 percent of the cohort). These data do not factor in performance on the old SAT, and they set a new baseline for future year-to-year comparisons. If a student took the new SAT more than once, the most recent score on each section is used. SOURCE: College Entrance Examination Board, The 2017 SAT Suite of Assessments Annual Report, retrieved December 6, 2017, from <https://research.collegeboard.org/programs/sat/data/2017-sat-suite-annual-report>. (This table was prepared December 2017.)

**Table 226.50. Number and percentage of graduates taking the ACT test; average scores and standard deviations, by sex and race/ethnicity; and percentage of test takers with selected composite scores and planned fields of postsecondary study: Selected years, 1995 through 2017**

—Not available.

<sup>1</sup>Those members of the graduating class who had taken the ACT test as a percentage of all students who graduated in that school year. For example, the 2017 column shows test-taking members of the class of 2017 as a percentage of all 2016–17 high school graduates. Percentages were calculated by the National Center for Education Statistics (NCES) using NCES data on the total number of high school graduates.

<sup>2</sup>Number of high school graduates is projected.

<sup>3</sup>Minimum score is 1 and maximum score is 36.

<sup>4</sup>The science, technology, engineering, and mathematics (STEM) score is derived from students' scores on the ACT mathematics and science tests. The STEM score was developed to gauge students' overall proficiency in mathematics and science.

<sup>5</sup>Standard deviations not available for racial/ethnic groups.

<sup>6</sup>For years prior to 2011, includes business and management, business and office, and marketing and distribution.

<sup>7</sup>For years prior to 2011, includes education and teacher education.

<sup>8</sup>Includes engineering as well as engineering technology and drafting.

<sup>9</sup>Includes social sciences and philosophy, religion, and theology. For 2011 and later years, also includes law.

NOTE: Data are for high school graduates who took the ACT test during their sophomore, junior, or senior year. If a student took the ACT test more than once, the composite and subject-area scores from the most recent test were used. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

<sup>1</sup>Members of the graduating class who had taken the ACT test as a percentage of the total number of high school graduates. For example, the 2017 column shows test-taking members of the class of 2017 as a percentage of all 2016–17 high school graduates. State percentages were calculated by ACT based on the number of high school graduates in each state as projected by the Western Interstate Commission for Higher Education (WICHE). Total percentages for the United States were calculated by the National Center for Education Statistics (NCES) based on the total number of U.S. high school graduates as reported by NCES (for 2017, the number of graduates is projected; for 2013, the number is actual).

NOTE: The minimum score on the ACT is 1 and the maximum score is 36. Data are for high school graduates who took the ACT test during their sophomore, junior, or senior year. If a student took the ACT test more than once, the composite and subject-area scores from the most recent test were used.  
SOURCE: ACT, *The Condition of College and Career Readiness*, 2013 and 2017. U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "State Dropout and Completion Data File," 2012–13; Private School Universe Survey (PSS), 2013; and National High School Graduates Projection Model, 1972–73 through 2027–28. (This table was prepared November 2017.)

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Students could indicate that they participated in clubs, competitions, camps, study groups, or tutoring programs.

<sup>2</sup>Academic instruction outside of school such as from a Saturday academy, learning center, personal tutor, or summer school program.

NOTE: Data on school-sponsored activities are based on student responses and are weighted by W1STUDENT. Student reports about school-sponsored activities refer to the period "since the beginning of the last school year," which for most of these students was 8th grade, or the fall of 2008. Data on non-school-sponsored activities are based on parent responses and are weighted by W1PARENT. Parent reports about non-school-sponsored activities refer to the last 12 months. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Refers to one or more parent or other household adult.

<sup>2</sup>The 2007 and 2016 questionnaire items differed. In 2007, parents responded “yes” or “no” to an item asking whether they check that homework is done. In 2016, parents responded to a multiple-choice question asking how often they check that homework is done, and the 2016 estimates include all parents who “rarely,” “sometimes,” or “always” check. Therefore, the 2007 and 2016 estimates are not comparable.

<sup>3</sup>Includes children of Two or more races as well as those for whom “Other race” was reported. “Other race” was not included on the 2012 and 2016 questionnaires.

<sup>4</sup>Poor children are those whose family incomes were below the Census Bureau’s poverty threshold in the year prior to data collection; near-poor children are those whose family incomes ranged from the poverty threshold to 199 percent of the poverty threshold; and nonpoor children are those whose family incomes were at or above 200 percent of the poverty threshold.

The poverty threshold is a dollar amount that varies depending on a family’s size and composition and is updated annually to account for inflation. In 2015, for example, the poverty threshold for a family of four with two children was \$24,257. Survey respondents are asked to select the range within which their income falls, rather than giving the exact amount of their income; therefore, the measure of poverty status is an approximation.

NOTE: While National Household Education Surveys Program (NHES) administrations prior to 2012 were administered via telephone with an interviewer, NHES:2012 and NHES:2016 used self-administered paper-and-pencil questionnaires that were mailed to respondents. Measurable differences between estimates for years prior to 2012 and estimates for later years could reflect actual changes in the population, or the changes could be due to the mode change from telephone to mail. Includes children enrolled in kindergarten through grade 12 and ungraded students. Excludes homeschooled students. Data based on responses of the parent most knowledgeable about the student’s education. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Parent and Family Involvement in Education Survey of the National Household Education Surveys Program (PFI-NHES:2007, 2012, and 2016). (This table was prepared May 2018.)

†Not applicable.

#Rounds to zero.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>For grades 4 and 8, the mathematics scale ranges from 0 to 500. For grade 12, the mathematics scale ranges from 0 to 300.

<sup>2</sup>Reading scale ranges from 0 to 500.

<sup>3</sup>Absenteeism percentages based on the 2017 Reading Assessment for 4th- and 8th-graders and the 2015 Reading Assessment for 12th-graders (not assessed in 2017).

NOTE: Includes public and private schools except where otherwise noted. Includes students tested with accommodations (9 to 12 percent of all students, depending on assessment and grade level); excludes only those students with disabilities and English language learners who were unable to be tested even with accommodations (2 percent of all students). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

<sup>1</sup>A school-associated violent death is defined as “a homicide, suicide, or legal intervention (involving a law enforcement officer), in which the fatal injury occurred on the campus of a functioning elementary or secondary school in the United States,” while the victim was on the way to or from regular sessions at school, or while the victim was attending or traveling to or from an official school-sponsored event.

<sup>2</sup>Violent deaths for which the manner was undetermined; that is, the information pointing to one manner of death was no more compelling than the information pointing to one or more other competing manners of death when all available information was considered.

<sup>3</sup>“At school” includes on the property of a functioning primary or secondary school, on the way to or from regular sessions at school, and while attending or traveling to or from a school-sponsored event.

<sup>4</sup>Total youth suicides are reported for calendar years 1992 through 2014 (instead of school years 1992–93 through 2014–15).

<sup>5</sup>Data from 1999–2000 onward are subject to change until law enforcement reports have been obtained and interviews with school and law enforcement officials have

been completed. The details learned during the interviews can occasionally change the classification of a case.

NOTE: Unless otherwise noted, data are reported for the school year, defined as July 1 through June 30.

SOURCE: Centers for Disease Control and Prevention (CDC), 1992–2015 School-Associated Violent Death Surveillance System (SAVD-SS) (partially funded by the U.S. Department of Education, Office of Safe and Healthy Students), previously unpublished tabulation (June 2017); CDC, National Center for Injury Prevention and Control, Web-based Injury Statistics Query and Reporting System Fatal (WISQARS™ Fatal), 1992–2014, retrieved June 2017 from <http://www.cdc.gov/injury/wisqars/index.html>; and Federal Bureau of Investigation and Bureau of Justice Statistics, Supplementary Homicide Reports (SHR), preliminary data (September 2017). (This table was prepared September 2017.)

<sup>1</sup>"Serious violent" victimization is also included in "all violent" victimization.

<sup>2</sup>"At school" includes inside the school building, on school property, on a school bus, and going to or from school.

<sup>3</sup>Every 10 years, the survey sample is redesigned to reflect changes in the population. Due to the sample redesign and other methodological changes implemented in 2006, use caution when comparing 2006 estimates to other years.

<sup>4</sup>Every 10 years, the survey sample is redesigned to reflect changes in the population. The sample redesign impacted the comparability of 2016 estimates to estimates for earlier years. Caution should be used when making comparisons to earlier years. For more information, see *Criminal Victimization, 2016* (available at <https://www.bjs.gov/index.cfm?ty=pbse&sid=6>).

NOTE: "Serious violent" victimization includes the crimes of rape, sexual assault, robbery, and aggravated assault. "All

"victimization" includes serious violent crimes as well as simple assault. "Theft" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime. "Total victimization" includes theft and violent crimes. Data in this table are from the National Crime Victimization Survey (NCVS); due to differences in time coverage and administration between the NCVS and the School Crime Supplement (SCS) to the NCVS, data in this table cannot be compared with data in tables that are based on the SCS. Detail may not sum to totals because of rounding.

†Not applicable.

!Interpret data with caution. Estimate based on 10 or fewer sample cases, or the coefficient of variation is greater than 50 percent.

<sup>1</sup>Serious violent<sup>1</sup> victimization is also included in "all violent" victimization.

<sup>2</sup>At school<sup>2</sup> includes inside the school building, on school property, on a school bus, and going to or from school.

<sup>3</sup>Race categories exclude persons of Hispanic ethnicity. "Other" includes Asian, Pacific Islander, American Indian/Alaska Native, and Two or more races.

<sup>4</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

<sup>5</sup>Income data for 2016 were imputed. For more information, see *Criminal Victimization, 2016* (available at <https://www.bjs.gov/index.cfm?ty=pbse&sid=6>).

NOTE: "Serious violent" victimization includes the crimes of rape, sexual assault, robbery, and aggravated assault. "All violent" victimization includes serious violent crimes as well as simple assault. "Theft" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime. "Total victimization" includes theft and violent crimes. Data in this table are from the National Crime Victimization Survey (NCVS) and are reported in accordance with Bureau of Justice Statistics standards. Detail may not sum to totals because of rounding and missing data on student characteristics. The population size for students ages 12–18 was 25,546,100 in 2016. Every 10 years, the survey sample is redesigned to reflect changes in the population. The sample redesign impacted the comparability of 2016 estimates to estimates for earlier years. Caution should be used when making comparisons to earlier years. For more information, see *Criminal Victimization, 2016* (available at <https://www.bjs.gov/index.cfm?ty=pbse&sid=6>). SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, National Crime Victimization Survey (NCVS), 2016. (This table was prepared August 2017.)

**Table 228.30. Percentage of students ages 12–18 who reported criminal victimization at school during the previous 6 months, by type of victimization and selected student and school characteristics: Selected years, 1995 through 2015**

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

<sup>2</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

<sup>3</sup>Serious violent victimization is also included in violent victimization.

NOTE: "Total victimization" includes theft and violent victimization. A single student could report more than one type of victimization. In the total victimization section, students who reported both theft and violent victimization are counted only once. "Theft" includes attempted and completed purse-snatching, completed pickpocketing, and all attempted and completed thefts, with the exception of motor vehicle thefts. Theft does not include robbery, which involves the threat or use of force and is classified as a violent crime.

"Serious violent victimization" includes the crimes of rape, sexual assault, robbery, and aggravated assault. "Violent victimization" includes the serious violent crimes as well as simple assault. "At school" includes the school building, on school property, on a school bus, and, from 2001 onward, going to and from school.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Race categories exclude persons of Hispanic ethnicity.

<sup>2</sup>Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

NOTE: Survey respondents were asked about being threatened or injured “with a weapon such as a gun, knife, or club on school property.” “On school property” was not defined for respondents. Detail may not sum to totals because of rounding. SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 1993 through 2015. (This table was prepared June 2016.)

—Not available.

†Not applicable.

<sup>1</sup>For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country. The U.S. total includes only the 50 states and the District of Columbia.

<sup>2</sup>Ohio data for 2003 through 2013 include both public and private schools.

<sup>3</sup>South Dakota data for all years include both public and private schools.

<sup>4</sup>Vermont data for 2013 include both public and private schools.

NOTE: Survey respondents were asked about being threatened or injured “with a weapon such as a gun, knife, or club on school property.” “On school property” was not defined for respondents. For the U.S. total, data for all years include both public and private

schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2003 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year’s data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>Teachers were classified as elementary or secondary on the basis of the grades they taught, rather than the level of the school in which they taught. In general, elementary teachers include those teaching prekindergarten through grade 6 and those teaching multiple grades, with a preponderance of the grades taught being kindergarten through grade 6. In general, secondary teachers include those teaching any of grades 7 through 12 and those teaching multiple grades, with a preponderance of the grades taught being grades 7 through 12 and usually with no grade taught being lower than grade 5.

<sup>2</sup>Includes American Indian/Alaska Native, Asian, and Pacific Islander; for 2003–04 and later years, also includes Two or more races.

NOTE: Teachers who taught only prekindergarten students are excluded. Includes teachers in both traditional public schools and public charter schools. Instructional level divides teachers into elementary or secondary based on a combination of the grades taught, main teaching assignment, and the structure of the teachers' class(es). Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

NOTE: Teachers who taught only prekindergarten students are excluded. Includes traditional public and public charter schools. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.  
<sup>1</sup>Bullying was defined for respondents as “when one or more students tease, threaten, spread rumors about, hit, shove, or hurt another student over and over again.”  
<sup>2</sup>“On school property” was not defined for survey respondents.  
<sup>3</sup>Being electronically bullied includes “being bullied through e-mail, chat rooms, instant messaging, websites, or texting.”  
<sup>4</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times or how many days they engaged in the specified behavior.

<sup>5</sup>Survey respondents were asked about being threatened or injured “with a weapon such as a gun, knife, or club.”  
<sup>6</sup>Respondents were asked about carrying “a weapon such as a gun, knife, or club.”  
 NOTE: Students were asked which sexual orientation—“heterosexual (straight),” “gay or lesbian,” “bisexual,” or “not sure”—best described them.

†Not applicable.

#Rounds to zero.

<sup>1</sup>Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>2</sup>Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>3</sup>Data for 2013–14 were collected using the Fast Response Survey System (FRSS), while data for all other years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 FRSS survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and difference in survey administration may have impacted the 2013–14 results.

<sup>4</sup>Prior to 2015–16, the wording of the survey item was “sexual battery other than rape.”

<sup>5</sup>Theft/larceny (taking things worth over \$10 without personal confrontation) was defined for respondents as “the unlawful taking of another person’s property without personal confrontation, threat, violence, or bodily harm.” This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.

<sup>6</sup>Caution should be used when making direct comparisons of “Other incidents” between years because the survey questions about alcohol and drugs changed, as outlined in footnotes 5, 6, and 7.

<sup>5</sup>The survey items “Distribution of illegal drugs” and “Possession or use of alcohol or illegal drugs” appear only on the 1999–2000 and 2003–04 questionnaires. Different alcohol- and drug-related survey items were used on the SSOCS questionnaires for later years.

<sup>6</sup>The survey items “Distribution, possession, or use of illegal drugs” and “Distribution, possession, or use of alcohol” appear only on the SSOCS questionnaires for 2005–06 and later years.

<sup>7</sup>The survey item “Inappropriate distribution, possession, or use of prescription drugs” appears only on the 2009–10 and 2015–16 questionnaires.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, and after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding and because schools that recorded or reported more than one type of crime incident were counted only once in the total percentage of schools recording or reporting incidents.
