!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The number of incidents of crime at school per 1,000 students enrolled.

<sup>2</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools—which are included in the totals but not shown separately—include all other combinations of grades, including K–12 schools.

<sup>3</sup>Prior to 2015–16, the wording of the survey item was “sexual battery other than rape.”

<sup>4</sup>Theft/larceny (taking things worth over \$10 without personal confrontation) was defined for respondents as “the unlawful

taking of another person’s property without personal confrontation, threat, violence, or bodily harm.” This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.

<sup>5</sup>The survey item “Inappropriate distribution, possession, or use of prescription drugs” appears only on the 2009–10 and 2015–16 questionnaires.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, and after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding and because schools that recorded or reported more than one type of crime incident were counted only once in the total percentage of schools recording or reporting incidents.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2005–06, 2007–08, 2009–10, and 2015–16 School Survey on Crime and Safety (SSOCS), 2006, 2008, 2010, and 2016. (This table was prepared June 2018.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>"All violent" incidents include "serious violent" incidents (see footnote 2) as well as physical attack or fight without a weapon and threat of physical attack without a weapon.

<sup>2</sup>"Serious violent" incidents include rape, sexual assault other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.

<sup>3</sup>Theft/larceny (taking things worth over \$10 without personal confrontation) was defined for respondents as "the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm." This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.

<sup>4</sup>"Other incidents" include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, possession, or use of illegal drugs or alcohol; inappropriate distribution, possession, or use of prescription drugs; and vandalism.

<sup>5</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the

highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

<sup>6</sup>Student/teacher ratio was calculated by dividing the total number of students enrolled in the school, as reported on the School Survey on Crime and Safety (SSOCS), by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>"All violent" incidents include "serious violent" incidents (see footnote 2) as well as physical attack or fight without a weapon and threat of physical attack without a weapon.

<sup>2</sup>"Serious violent" incidents include rape, sexual assault other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon.

<sup>3</sup>Theft/larceny (taking things worth over \$10 without personal confrontation) was defined for respondents as "the unlawful taking of another person's property without personal confrontation, threat, violence, or bodily harm." This includes pocket picking, stealing a purse or backpack (if left unattended or no force was used to take it from owner), theft from a building, theft from a motor vehicle or motor vehicle parts or accessories, theft of a bicycle, theft from a vending machine, and all other types of thefts.

<sup>4</sup>"Other incidents" include possession of a firearm or explosive device; possession of a knife or sharp object; distribution, possession, or use of illegal drugs or alcohol; inappropriate distribution, possession, or use of prescription drugs; and vandalism.

<sup>5</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the

highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

<sup>6</sup>Student/teacher ratio was calculated by dividing the total number of students enrolled in the school, as reported on the School Survey on Crime and Safety (SSOCS), by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

<sup>2</sup>Student/teacher ratio was calculated by dividing the total number of students enrolled in the school, as reported on the School Survey on Crime and Safety (SSOCS), by the total number of full-time-equivalent (FTE) teachers. Information regarding

the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

NOTE: "Violent incidents" include rape, sexual assault other than rape, physical attack or fight with or without a weapon, threat of physical attack with or without a weapon, and robbery with or without a weapon. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

<sup>†</sup>Not applicable.

<sup>!</sup>Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>‡</sup>Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

<sup>2</sup>Student/teacher ratio was calculated by dividing the total number of students enrolled in the school, as reported on the School Survey on Crime and Safety (SSOCS), by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

NOTE: “Serious violent” incidents include rape, sexual assault other than rape, physical attack or fight with a weapon, threat of physical attack with a weapon, and robbery with or without a weapon. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include incidents that occurred before, during, or after normal school hours or when school activities or events were in session. Detail may not sum to totals because of rounding.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Includes schools that reported the activity happens either at least once a week or daily.

<sup>2</sup>Includes schools that reported the activity happens at all at their school during the school year. In the 1999–2000 survey administration, the questionnaire specified “undesirable” gang activities and “undesirable” cult or extremist group activities. The 2013–14 and 2015–16 questionnaires did not ask about cult or extremist group activities.

<sup>3</sup>Prior to the 2007–08 survey administration, the questionnaire wording was “student racial tensions.”

<sup>4</sup>The 2015–16 questionnaire defined bullying as “any unwanted aggressive behavior(s) by another youth or group of youths who are not siblings or current dating partners that involves an observed or perceived power imbalance and is repeated multiple times or is highly likely to be repeated.” The term was not defined for respondents in previous survey administrations.

<sup>5</sup>Prior to 2015–16, the questionnaire asked about “student harassment of other students based on sexual orientation or gender identity (i.e., lesbian, gay, bisexual, transgender, questioning)” in one single item. The 2015–16 questionnaire had one item asking about “student harassment of other students based on sexual orientation,” followed by a separate item on “student harassment of other students based on gender identity.” For 2015–16, schools are included in this column if they responded “daily” or “at least once a week” to either or both of these items; each school is counted only once, even if it indicated daily/weekly frequency for both items. The 2015–16 questionnaire provided definitions for sexual orientation—“one’s emotional or physical attraction to the same and/or opposite sex”—and gender identity—“one’s inner sense of one’s own gender, which may or may not match the sex assigned at birth. Different people choose to express their gender identity differently...” These terms were not defined for respondents in previous survey administrations.

<sup>6</sup>Data for 2013–14 were collected using the Fast Response Survey System (FRSS), while data for all other years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 FRSS survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail

it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and difference in survey administration may have impacted the 2013–14 results.

<sup>7</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

<sup>8</sup>Student/teacher ratio was calculated by dividing the total number of students enrolled in the school, as reported on SSOCS, by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

<sup>9</sup>“Violent incidents” include rape or attempted rape, sexual assault other than rape, physical attack or fight with or without a weapon, threat of physical attack or fight with or without a weapon, and robbery with or without a weapon. Respondents were instructed to include violent incidents that occurred before, during, or after normal school hours or when school activities or events were in session.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined for respondents to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to respond only for those times that were during normal school hours or when school activities or events were in session, unless the survey specified otherwise.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

<sup>2</sup>In 2005 and prior years, the period covered by the survey question was "during the last 6 months," whereas the period was "during this school year" beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.

NOTE: "Urbanicity" refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)." All gangs, whether or not they are involved in violent or illegal activity, are included. "At school" includes in the school building, on school property, on a school bus, and going to and from school.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>In 2005 and prior years, the period covered by the survey question was “during the last 6 months,” whereas the period was “during this school year” beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.

<sup>2</sup>Race categories exclude persons of Hispanic ethnicity. “Other” includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

<sup>3</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

NOTE: “At school” includes in the school building, on school property, on a school bus, and, from 2001 onward, going to and from school. “Hate-related” refers to derogatory terms used by others in reference to students’ personal characteristics. SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, School Crime Supplement (SCS) to the National Crime Victimization Survey, 1999 through 2015. (This table was prepared August 2016.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Students who reported being called hate-related words were asked which specific characteristics these words were related to. If a student reported being called more than one type of hate-related word—e.g., a derogatory term related to race as well as a derogatory term related to sexual orientation—the student was counted only once in the total percentage of students who were the target of any hate-related words.

<sup>2</sup>Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Pacific Islanders, and persons of Two or more races.

<sup>3</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

NOTE: "At school" includes in the school building, on school property, on a school bus, and going to and from school. "Hate-related" refers to derogatory terms used by others in reference to students' personal characteristics.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Students who reported experiencing more than one type of bullying at school were counted only once in the total for students bullied at school.

<sup>2</sup>In 2005 and prior years, the period covered by the survey question was “during the last 6 months,” whereas the period was “during this school year” beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.

<sup>3</sup>Race categories exclude persons of Hispanic ethnicity. “Other” includes American Indians/Alaska Natives, Pacific Islanders, and persons of Two or more races.

<sup>4</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined by the U.S. Census Bureau. Categories include “central city of an

MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).” These data by metropolitan status were based on the location of households and differ from those published in *Student Reports of Bullying and Cyber-Bullying: Results From the 2013 School Crime Supplement to the National Crime Victimization Survey*, which were based on the urban-centric measure of the location of the school that the child attended.

<sup>5</sup>Control of school as reported by the respondent. These data differ from those based on a matching of the respondent-reported school name to the Common Core of Data’s Public Elementary/Secondary School Universe Survey or the Private School Survey, as reported in *Student Reports of Bullying and Cyber-Bullying: Results From the 2013 School Crime Supplement to the National Crime Victimization Survey*.

NOTE: “At school” includes the school building, on school property, on a school bus, and going to and from school.

SOURCE: U.S. Department of Justice, Bureau of Justice Statistics, School Crime Supplement (SCS) to the National Crime Victimization Survey, selected years, 2005 through 2015. (This table was prepared August 2016.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Students who reported being cyber-bullied are those who responded that another student had done one or more of the following: posted hurtful information about them on the Internet; purposely shared private information about them on the Internet; threatened or insulted them through instant messaging; threatened or insulted them through text messaging; threatened or insulted them through e-mail; threatened or insulted them while gaming; or excluded them online.

<sup>2</sup>Teacher or other adult at school notified.

<sup>3</sup>Race categories exclude persons of Hispanic ethnicity. "Other" includes American Indians/Alaska Natives, Pacific Islanders, and persons of Two or more races.

<sup>4</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

<sup>5</sup>Control of school as reported by the respondent. These data differ from those based on a matching of the respondent-reported school name to the Common Core of Data's Public Elementary/Secondary School Universe Survey or the Private School Survey, as reported in *Student Reports of Bullying and Cyber-Bullying: Results From the 2013 School Crime Supplement to the National Crime Victimization Survey*.

<sup>6</sup>Data on cyber-bullying anywhere were not collected in 2015. However, students who reported being bullied at school in 2015 were asked whether any of the bullying occurred "online or by text."

NOTE: "At school" includes the school building, on school property, on a school bus, and going to and from school. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

<sup>1</sup>Bullying was defined for respondents as “when one or more students tease, threaten, spread rumors about, hit, shove, or hurt another student over and over again.” “On school property” was not defined for survey respondents.

<sup>2</sup>Includes “being bullied through e-mail, chat rooms, instant messaging, websites, or texting.” Data on electronic bullying were not collected in 2009.

<sup>3</sup>For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country. The U.S. total includes only the 50 states and the District of Columbia.

<sup>4</sup>Ohio data for all years include both public and private schools.

<sup>5</sup>South Dakota data for all years include both public and private schools.

<sup>6</sup>Vermont data for 2013 include both public and private schools.

NOTE: For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (all years), South Dakota (all years), and Vermont (2013 only). For specific states, a given year’s data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

<sup>2</sup>Student/teacher ratio was calculated by dividing the total number of students enrolled in the school, as reported on the School Survey on Crime and Safety (SSOCS), by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

<sup>3</sup>“Violent incidents” include rape or attempted rape, sexual assault other than rape, physical attack or fight with or without a weapon, threat of physical attack or fight with

or without a weapon, and robbery with or without a weapon. “At school” was defined for respondents to include activities that happen in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities. Respondents were instructed to include violent incidents that occurred before, during, or after normal school hours or when school activities or events were in session.

NOTE: Includes schools reporting that cyberbullying happens either “daily” or “at least once a week.” “Cyberbullying” was defined for respondents as occurring “when willful and repeated harm is inflicted through the use of computers, cell phones, or other electronic devices.” Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. Respondents were instructed to include cyberbullying “problems that can occur anywhere (both at your school and away from school).”

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>In 2005 and prior years, the period covered by the survey question was “during the last 6 months,” whereas the period was “during this school year” beginning in 2007. Cognitive testing showed that estimates for earlier years are comparable to those for 2007 and later years.

<sup>2</sup>Race categories exclude persons of Hispanic ethnicity. “Other” includes American Indians/Alaska Natives, Asians (prior to 2005), Pacific Islanders, and, from 2003 onward, persons of Two or more races. Due to changes in racial/ethnic categories, comparisons of race/ethnicity across years should be made with caution.

<sup>3</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

NOTE: “At school” includes the school building, on school property, on a school bus, and, from 2001 onward, going to and from school. Students were asked if they were “never,” “almost never,” “sometimes,” or “most of the time” afraid that someone would attack or harm them at school or away from school. Students responding “sometimes” or “most of the time” were considered afraid. For the 2001 survey only, the wording was changed from “attack or harm” to “attack or threaten to attack.”

†Not applicable.

<sup>1</sup>The questionnaire provided the following examples of student misbehavior: noise, horseplay, or fighting in the halls, cafeteria, or student lounge.

<sup>2</sup>Elementary schools are those with any of grades kindergarten through grade 6 and none of grades 9 through 12. Secondary schools have any of grades 7 through 12 and none of grades kindergarten through grade 6. Combined elementary/secondary schools are included in totals but are not shown separately.

<sup>3</sup>Locale data prior to 2003–04 are not comparable to data based on current definitions. Interpret 2015–16 data on city teachers with caution. After nonresponse adjustments, the nonresponse bias for this category is greater than for other characteristics.

NOTE: Teachers who taught only prekindergarten students are excluded. Includes both teachers who “strongly” agreed and those who “somewhat” agreed that student misbehavior or student tardiness and class cutting interfered with their teaching. Includes teachers in both traditional public schools and public charter schools. Some data have been revised from previously published figures.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup> Respondents were asked whether “rules for student behavior are consistently enforced by teachers in this school, even for students not in their classes.”

<sup>2</sup> Respondents were asked whether their “principal enforces school rules for student conduct and backs me up when I need it.”

NOTE: Teachers who taught only prekindergarten students are excluded. Includes traditional public and public charter school teachers. Includes both teachers who “strongly” agreed and those who “somewhat” agreed.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times in the past 12 months they had been in a physical fight.

<sup>2</sup>Race categories exclude persons of Hispanic ethnicity.

<sup>3</sup>Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

<sup>4</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

<sup>5</sup>In the question asking students about physical fights at school, “on school property” was not defined for survey respondents.

—Not available.

†Not applicable.

<sup>1</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times in the past 12 months they had been in a physical fight.

<sup>2</sup>In the question asking students about physical fights at school, “on school property” was not defined for survey respondents.

<sup>3</sup>For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country. The U.S. total includes only the 50 states and the District of Columbia.

<sup>4</sup>Ohio data for 2005 through 2013 include both public and private schools.

<sup>5</sup>South Dakota data for all years include both public and private schools.

<sup>6</sup>Vermont data for 2013 include both public and private schools.

NOTE: For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year’s data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2005 through 2015. (This table was prepared October 2017.)

**Table 231.40. Percentage of students in grades 9–12 who reported carrying a weapon at least 1 day during the previous 30 days, by location and selected student characteristics: Selected years, 1993 through 2015**

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days they carried a weapon during the past 30 days.

<sup>2</sup>Race categories exclude persons of Hispanic ethnicity.

<sup>3</sup>Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

<sup>4</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

<sup>5</sup>In the question asking students about carrying a weapon at school, “on school property” was not defined for survey respondents.

NOTE: Respondents were asked about carrying “a weapon such as a gun, knife, or club.”

†Not applicable.

<sup>1</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days they carried a weapon during the past 30 days.

<sup>2</sup>In the question asking students about carrying a weapon at school, “on school property” was not defined for survey respondents.

<sup>3</sup>For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country. The U.S. total includes only the 50 states and the District of Columbia.

<sup>4</sup>Ohio data for 2005 through 2013 include both public and private schools.

<sup>5</sup>South Dakota data for all years include both public and private schools.

<sup>6</sup>Vermont data for 2013 include both public and private schools.

NOTE: Respondents were asked about carrying “a weapon such as a gun, knife, or club.” For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year’s data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

<sup>1</sup>Data for New York City Public Schools were not reported.

<sup>2</sup>The state reported a total state-level firearm incident count that was less than the sum of its reported district-level counts. The sum of the district-level firearm incident counts is displayed instead of the reported state-level count.

NOTE: Separate counts were collected for incidents involving handguns, rifles/shotguns, other firearms, and multiple types of firearms. The counts reported here exclude the "other firearms" category.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days during the previous 30 days they had at least one drink of alcohol.

<sup>2</sup>Race categories exclude persons of Hispanic ethnicity.

<sup>3</sup>Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

<sup>4</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

<sup>5</sup>In the question about drinking alcohol at school, “on school property” was not defined for survey respondents. Data on alcohol use at school were not collected in 2013 and 2015.

SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 1993 through 2015. (This table was prepared July 2016.)

**Table 232.20. Percentage distribution of students in grades 9–12, by number of days they reported using alcohol anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2009 through 2015**

[Standard errors appear in parentheses]

Year and student characteristic	Anywhere (including on school property) <sup>1</sup>					On school property <sup>2</sup>				
	0 days	1 or 2 days	3 to 29 days	All 30 days		0 days	1 or 2 days	3 to 29 days	All 30 days	
1	2	3	4	5		6	7	8	9

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days during the previous 30 days they had at least one drink of alcohol.

<sup>2</sup>In the question about drinking alcohol at school, “on school property” was not defined for survey respondents.

<sup>3</sup>Race categories exclude persons of Hispanic ethnicity.

<sup>4</sup>Data on alcohol use at school were not collected in 2013 and 2015.

NOTE: Detail may not sum to totals because of rounding.

SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2009 through 2015. (This table was prepared July 2016.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many days during the previous 30 days they had at least one drink of alcohol.

<sup>2</sup>In the question about drinking alcohol at school, “on school property” was not defined for survey respondents. Data on alcohol use at school were not collected in 2013 and 2015.

<sup>3</sup>For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country. The U.S. total includes only the 50 states and the District of Columbia.

<sup>4</sup>Ohio data for 2005 through 2013 include both public and private schools.

<sup>5</sup>South Dakota data for all years include both public and private schools.

<sup>6</sup>Vermont data for 2013 include both public and private schools.

NOTE: For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year’s data may be unavailable (†) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times during the previous 30 days they had used marijuana.

<sup>2</sup>Race categories exclude persons of Hispanic ethnicity.

<sup>3</sup>Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

<sup>4</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent’s household as defined by the U.S. Census Bureau. Categories include “central city of an MSA (Urban),” “in MSA but not in central city (Suburban),” and “not MSA (Rural).”

<sup>5</sup>In the question about using marijuana at school, “on school property” was not defined for survey respondents. Data on marijuana use at school were not collected in 2013 and 2015.

SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 1993 through 2015. (This table was prepared July 2016.)

**Table 232.50. Percentage distribution of students in grades 9–12, by number of times they reported using marijuana anywhere or on school property during the previous 30 days and selected student characteristics: Selected years, 2009 through 2015**

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times during the previous 30 days they had used marijuana.

<sup>2</sup>In the question about using marijuana at school, “on school property” was not defined for survey respondents.

<sup>3</sup>Race categories exclude persons of Hispanic ethnicity.

<sup>4</sup>Data on marijuana use at school were not collected in 2013 and 2015.

NOTE: Detail may not sum to totals because of rounding.

SOURCE: Centers for Disease Control and Prevention, Division of Adolescent and School Health, Youth Risk Behavior Surveillance System (YRBSS), 2009 through 2015. (This table was prepared July 2016.)

**Table 232.60. Percentage of public school students in grades 9–12 who reported using marijuana at least one time during the previous 30 days, by location and state or jurisdiction: Selected years, 2005 through 2015**

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>The term “anywhere” is not used in the Youth Risk Behavior Survey (YRBS) questionnaire; students were simply asked how many times during the previous 30 days they had used marijuana.

<sup>2</sup>In the question about using marijuana at school, “on school property” was not defined for survey respondents. Data on marijuana use at school were not collected in 2013 and 2015.

<sup>3</sup>For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country. The U.S. total includes only the 50 states and the District of Columbia.

<sup>4</sup>Ohio data for 2005 through 2013 include both public and private schools.

<sup>5</sup>South Dakota data for all years include both public and private schools.

<sup>6</sup>Vermont data for 2013 include both public and private schools.

NOTE: For the U.S. total, data for all years include both public and private schools. State-level data include public schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2005 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>Race categories exclude persons of Hispanic ethnicity.

<sup>2</sup>Before 1999, Asian students and Pacific Islander students were not categorized separately, and students could not be classified as Two or more races. Because the response categories changed in 1999, caution should be used in comparing data on race from 1993, 1995, and 1997 with data from later years.

<sup>3</sup>Refers to the Standard Metropolitan Statistical Area (MSA) status of the respondent's household as defined by the U.S. Census Bureau. Categories include "central city of an MSA (Urban)," "in MSA but not in central city (Suburban)," and "not MSA (Rural)."

NOTE: "On school property" was not defined for survey respondents.

†Not applicable.

<sup>1</sup>For the U.S. total, data for all years include both public and private schools and were collected through a national survey representing the entire country. The U.S. total includes only the 50 states and the District of Columbia.

<sup>2</sup>Ohio data for 2003 through 2013 include both public and private schools.

<sup>3</sup>South Dakota data for all years include both public and private schools.

<sup>4</sup>Vermont data for 2013 include both public and private schools.

NOTE: "On school property" was not defined for survey respondents. For the U.S. total, data for all years include both public and private schools. State-level data include public

schools only, except where otherwise noted. For three states, data for one or more years include both public and private schools: Ohio (2003 through 2013), South Dakota (all years), and Vermont (2013 only). For specific states, a given year's data may be unavailable (1) because the state did not participate in the survey that year; (2) because the state omitted this particular survey item from the state-level questionnaire; or (3) because the state had an overall response rate of less than 60 percent (the overall response rate is the school response rate multiplied by the student response rate).

 #Rounds to zero.  
 !Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.  
 ‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.  
<sup>1</sup>Includes other illegal drug use not shown separately—specifically, the use of heroin, hallucinogens, and inhalants, as well as the nonmedical use of prescription-type pain relievers, tranquilizers, stimulants, and sedatives.

NOTE: Marijuana includes hashish usage. Data for 1999 and later years were gathered using Computer Assisted Interviewing (CAI) and may not be directly comparable to previous years. Because of survey improvements in 2002, the 2002 data constitute a new baseline for tracking trends. Valid trend comparisons can be made for 1985 through 1995, 1999 through 2001, and 2002 through 2016. Race categories exclude persons of Hispanic ethnicity.  
 SOURCE: U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration, National Household Survey on Drug Abuse: Main Findings, selected years, 1985 through 2001, and National Survey on Drug Use and Health, 2002 through 2016. Retrieved October 30, 2017, from <http://www.samhsa.gov/data/population-data-nsduh/reports?tab=38>. (This table was prepared October 2017.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>In the 1999–2000 questionnaire, only two items are the same as in questionnaires for later years: the item on physical attacks or fights and the item on insubordination. There are no comparable 1999–2000 data for serious disciplinary actions taken in response to the other specific offenses listed in this table, nor for total actions taken in response to all the listed offenses.

<sup>2</sup>Totals for 2009–10 and 2015–16 are not comparable to totals for other years, because the 2009–10 and 2015–16 questionnaires did not include an item on insubordination.

<sup>3</sup>Schools that took serious disciplinary actions in response to more than one type of offense were counted only once in the total.

<sup>4</sup>Prior to 2005–06, the questionnaire wording was simply “a weapon other than a firearm” (instead of “a weapon other than a firearm or explosive device”).

<sup>5</sup>Includes all students involved in committing the listed offenses regardless of the disciplinary action taken. If more than one student was involved in a single incident, each student was counted separately. If one student was involved in multiple incidents, that student was counted more than once; for example, a student involved in two separate incidents would be counted twice.

NOTE: Serious disciplinary actions include out-of-school suspensions lasting 5 or more days, but less than the remainder of the school year; removals with no continuing services for at least the remainder of the school year; and transfers to specialized schools for disciplinary reasons. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. Detail may not sum to totals because of rounding and because schools that reported serious disciplinary actions in response to more than one type of offense were counted only once in the total number or percentage of schools.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1999–2000, 2003–04, 2005–06, 2007–08, 2009–10, and 2015–16 School Survey on Crime and Safety (SSOCS), 2000, 2004, 2006, 2008, 2010, and 2016. (This table was prepared September 2017.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Schools that took serious disciplinary actions in response to more than one type of offense were counted only once in the total.

<sup>2</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

<sup>3</sup>Student/teacher ratio was calculated by dividing the total number of students enrolled in the school, as reported on the School Survey on Crime and Safety (SSOCS), by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS.

NOTE: Serious disciplinary actions include out-of-school suspensions lasting 5 or more days, but less than the remainder of the school year; removals with no continuing services for at least the remainder of the school year; and transfers to specialized schools for disciplinary reasons. Percentages of schools taking such actions are based on all public schools, rather than only those at which offenses occurred. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. SOURCE: U.S. Department of Education, National Center for Education Statistics, 2015–16 School Survey on Crime and Safety (SSOCS), 2016. (This table was prepared September 2017.)

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The total includes all students whose parents provided a response about their child's suspension and expulsion status both on the base-year (2009) questionnaire and on the first follow-up (2012) questionnaire.

<sup>2</sup>Socioeconomic status (SES) was measured by a composite score on parental education and occupations, and family income.

<sup>3</sup>A school engagement scale was constructed based on students' responses to questions about how frequently they went to class without homework done, without pencil or paper, without books, or late. Students' school engagement is considered low if they were in the

bottom quarter of the scale distribution, middle if they were in the middle two quarters, and high if they were in the highest quarter.

<sup>4</sup>A school belonging scale was constructed based on the extent to which students agreed or disagreed that they felt safe at school, that they felt proud of being part of the school, that there were always teachers or other adults at school they could talk to if they had a problem, that school was often a waste of time, and that getting good grades was important to them. Students' sense of school belonging is considered low if they were in the bottom quarter of the scale distribution, middle if they were in the middle two quarters, and high if they were in the highest quarter.

NOTE: Estimates weighted by W2W1PAR. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding and survey item nonresponse.

<sup>1</sup>Corporal punishment is paddling, spanking, or other forms of physical punishment imposed on a student.

<sup>2</sup>An in-school suspension is an instance in which a student is temporarily removed from his or her regular classroom(s) for at least half a day but remains under the direct supervision of school personnel.

<sup>3</sup>An out-of-school suspension is an instance in which a student is temporarily removed from his or her regular school for disciplinary purposes for at least half a day (but less than the remainder of the school year) to another setting (e.g., home or behavior center). Data on out-of-school suspensions by race/ethnicity exclude Connecticut Pacific Islander students pending further data quality review.

<sup>4</sup>Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.

<sup>5</sup>Referral to law enforcement is an action by which a student is reported to any law enforcement agency or official, including a school police unit, for an incident that occurs on school grounds, during school-related events, or while taking school transportation, regardless of whether official action is taken. Excludes Hawaii data pending further data quality review.

<sup>6</sup>A school-related arrest is an arrest of a student for any activity conducted on school grounds, during off-campus school activities (including while taking school transportation), or due to a referral by any school official.

<sup>7</sup>Totals include expulsions with and without educational services.

<sup>8</sup>Includes all expulsions under zero-tolerance policies, including expulsions with and without educational services. A zero-tolerance policy results in mandatory expulsion of any student who commits one or more specified offenses (for example, offenses involving guns, other weapons, violence, or similar factors, or combinations of these factors). A policy is considered "zero tolerance" even if there are some exceptions to the mandatory aspect of the expulsion, such as allowing the chief administering officer of a local education agency to modify the expulsion on a case-by-case basis.

<sup>9</sup>Data by race/ethnicity exclude data for students with disabilities served only under Section 504 (not receiving services under IDEA).

NOTE: Student counts between 1 and 3 are displayed as 1-3 to protect student privacy. Detail may not sum to totals because of privacy protection routines applied to the data. Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.  
<sup>1</sup>Corporal punishment is paddling, spanking, or other forms of physical punishment imposed on a student.  
<sup>2</sup>An in-school suspension is an instance in which a student is temporarily removed from his or her regular classroom(s) for at least half a day but remains under the direct supervision of school personnel.  
<sup>3</sup>An out-of-school suspension is an instance in which a student is temporarily removed from his or her regular school for disciplinary purposes for at least half a day (but less than the remainder of the school year) to another setting (e.g., home or behavior center). Data on out-of-school suspensions by race/ethnicity exclude Connecticut Pacific Islander students pending further data quality review.  
<sup>4</sup>Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.  
<sup>5</sup>Referral to law enforcement is an action by which a student is reported to any law enforcement agency or official, including a school police unit, for an incident that occurs on school grounds, during school-related events, or while taking school transportation, regardless of whether official action is taken. Excludes Hawaii data pending further data quality review.  
<sup>6</sup>A school-related arrest is an arrest of a student for any activity conducted on school grounds, during off-campus school activities (including while taking school transportation), or due to a referral by any school official.

<sup>7</sup>Totals include expulsions with and without educational services.  
<sup>8</sup>Includes all expulsions under zero-tolerance policies, including expulsions with and without educational services. A zero-tolerance policy results in mandatory expulsion of any student who commits one or more specified offenses (for example, offenses involving guns, other weapons, violence, or similar factors, or combinations of these factors). A policy is considered “zero tolerance” even if there are some exceptions to the mandatory aspect of the expulsion, such as allowing the chief administering officer of a local education agency to modify the expulsion on a case-by-case basis.  
<sup>9</sup>Data by race/ethnicity exclude data for students with disabilities served only under Section 504 (not receiving services under IDEA).  
 NOTE: The percentage of students receiving a disciplinary action is calculated by dividing the cumulative number of students receiving that type of disciplinary action for the entire 2013–14 school year by the student enrollment based on a count of students taken on a single day between September 27 and December 31. Percentages based on disciplinary action counts of between 1 and 3 students are displayed as ranges to protect student privacy. Race categories exclude persons of Hispanic ethnicity.

<sup>1</sup>An out-of-school suspension is an instance in which a student is temporarily removed from his or her regular school for disciplinary purposes for at least half a day (but less than the remainder of the school year) to another setting (e.g., home or behavior center).

<sup>2</sup>Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes, with or without the continuation of educational services, for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.

<sup>3</sup>Data by race/ethnicity exclude students with disabilities served only under Section 504 (not receiving services under IDEA).

<sup>4</sup>Connecticut Pacific Islander data are suppressed and excluded from the Pacific Islander U.S. total pending further data quality review.

NOTE: Student counts between 1 and 3 are displayed as 1–3 to protect student privacy. Detail may not sum to totals because of privacy protection routines applied to the data. Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Education, Office for Civil Rights, Civil Rights Data Collection, “2013–14 Discipline Estimations by Discipline Type.” (This table was prepared January 2018.)

**Table 233.40. Percentage of students suspended and expelled from public elementary and secondary schools, by sex, race/ethnicity, and state: 2013–14**

State	Percent receiving out-of-school suspensions <sup>1</sup>										Percent expelled <sup>2</sup>

#Rounds to zero.

<sup>1</sup>An out-of-school suspension is an instance in which a student is temporarily removed from his or her regular school for disciplinary purposes for at least half a day (but less than the remainder of the school year) to another setting (e.g., home or behavior center).

<sup>2</sup>Expulsions are actions taken by a local education agency that result in the removal of a student from his or her regular school for disciplinary purposes, with or without the continuation of educational services, for the remainder of the school year or longer in accordance with local education agency policy. Expulsions also include removals resulting from violations of the Gun Free Schools Act that are modified to less than 365 days.

<sup>3</sup>Data by race/ethnicity exclude students with disabilities served only under Section 504 (not receiving services under IDEA).

<sup>4</sup>Connecticut Pacific Islander data are suppressed and excluded from the Pacific Islander U.S. total pending further data quality review.

NOTE: The percentage of students receiving a disciplinary action is calculated by dividing the cumulative number of students receiving that type of disciplinary action for the entire 2013–14 school year by the student enrollment based on a count of students taken on a single day between September 27 and December 31. Percentages based on suspension or expulsion counts of between 1 and 3 students are displayed as ranges to protect student privacy. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, Office for Civil Rights, Civil Rights Data Collection, “2013–14 Discipline Estimations by Discipline Type” and “2013–14 Estimations for Enrollment.” (This table was prepared January 2018.)

—Not available.

<sup>1</sup>Includes violent incidents with and without physical injury.

<sup>2</sup>U.S. totals exclude Vermont data, which were not reported.

<sup>3</sup>This state did not report state-level counts of discipline incidents, but did report school-level counts. The sums of the school-level counts are displayed in place of the unreported state-level counts.

<sup>4</sup>California reported alcohol incidents in the illicit drug category.

†Not applicable.

<sup>1</sup>Data for 2013–14 were collected using the Fast Response Survey System (FRSS), while data for all other years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 FRSS survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and difference in survey administration may have impacted the 2013–14 results.

<sup>2</sup>Does not include random dog sniffs.

<sup>3</sup>For example, a system for reporting threats through online submission, telephone hotline, or written submission via drop box.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school.

†Not applicable.  
 !Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.  
 ‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.  
<sup>1</sup>Access to buildings is controlled during school hours (e.g., by locked or monitored doors).  
<sup>2</sup>Access to grounds is controlled during school hours (e.g., by locked or monitored gates).  
<sup>3</sup>All students must pass through a metal detector each day.  
<sup>4</sup>Examples of contraband include drugs and weapons. The “sweeps” category does not include dog sniffs.

<sup>5</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.  
 NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

<sup>1</sup>In 2015–16, this question was significantly revised. Comparisons with earlier years are not possible. Readers should refer to previous versions of the report for time series data on schools drilling students on the use of a plan in selected crises.

<sup>2</sup>On the 2015–16 questionnaire, the wording was changed from “Shootings” to “Active shooter.”

<sup>3</sup>For example, earthquakes or tornadoes.

<sup>4</sup>For example, release of mustard gas, anthrax, smallpox, or radioactive materials.

<sup>5</sup>In 2007–08 and 2009–10, schools were asked whether they had a plan for procedures to be performed if the U.S. national threat level were changed to Red (Severe Risk of Terrorist Attack) by the Department of Homeland Security. In 2013–14, schools were asked whether they had a plan for procedures to be performed if an “imminent threat alert” were issued by the Department of Homeland Security’s National Terrorism Advisory System. Data on severe risk of terrorist attack were not collected in 2015–16.

<sup>6</sup>Defined for respondents as “a procedure that requires all students and staff to leave the building. While evacuating to the school’s field makes sense for a fire drill that only lasts a few minutes, it may not be an appropriate location for a longer period of time. The evacuation plan should encompass relocation procedures and include backup buildings to serve as emergency shelters, such as nearby community centers, religious institutions, businesses, or other schools. Evacuation also includes “reverse evacuation,” a procedure for schools to return students to the building quickly if an incident occurs while students are outside.”

<sup>7</sup>Defined for respondents as “a procedure that involves occupants of a school building being directed to remain confined to a room or area within a building with specific procedures to follow. A lockdown may be used when a crisis occurs outside of the school and an evacuation would be dangerous. A lockdown may also be called for when there is a crisis inside and movement within the school will put students in jeopardy. All exterior doors are locked and students and staff stay in their classrooms.”

<sup>8</sup>Defined for respondents as “a procedure similar to a lockdown in that the occupants are to remain on the premises; however, shelter-in-place is designed to use a facility and its indoor atmosphere to temporarily separate people from a hazardous outdoor environment. Everyone would be brought indoors and building personnel would close all windows and doors and

shut down the heating, ventilation, and air conditioning system (HVAC). This would create a neutral pressure in the building, meaning the contaminated air would not be drawn into the building.”

<sup>9</sup>Data on suicide threat or incident, severe risk of terrorist attack, and pandemic flu were not collected in 2003–04 and 2005–06.

<sup>10</sup>Data on postcrisis reunification of students with their families were not collected in years prior to 2015–16.

<sup>11</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools. Separate data on high schools and combined schools are not available for 2013–14.

<sup>12</sup>Data for 2013–14 were collected using the Fast Response Survey System (FRSS), while data for all other years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 FRSS survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and difference in survey administration may have impacted the 2013–14 results.

<sup>13</sup>Because the 2013–14 survey did not collect data on the percentage of students eligible for free or reduced-price lunch, the classification of schools by the percentage of students eligible for free or reduced-price lunch was computed based on data obtained from the Common Core of Data.

<sup>14</sup>Separate data for students of Two or more races were reported only for 2015–16.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school.

<sup>1</sup>Data for 2013–14 were collected using the Fast Response Survey System (FRSS), while data for all other years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 FRSS survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and difference in survey administration may have impacted the 2013–14 results.

<sup>2</sup>In 2013–14, a single item on the questionnaire asked about training in policies and practices “related to bullying” and did not specifically include “cyberbullying.”

<sup>3</sup>In survey years prior to 2015–16, bullying was not defined for respondents. The 2015–16 questionnaire defined bullying as “any unwanted aggressive behavior(s) by another youth or group of youths who are not siblings or current dating partners that involves an observed or perceived power imbalance and is repeated multiple times or is highly likely to be repeated.”

<sup>4</sup>The 2015–16 questionnaire included one item on cyberbullying and a separate item on “bullying other than cyberbullying.” The questionnaire defined cyberbullying as occurring “when willful and repeated harm is inflicted through the use of computers, cell phones, or other electronic devices.”

<sup>5</sup>In all survey years included in this table, the questionnaire defined violence as “actual, attempted, or threatened fight or assault.”

<sup>6</sup>In 2007–08 and earlier survey years, a single item on the questionnaire asked about “violence, alcohol, and/or drug use.”

<sup>7</sup>In 2009–10 and later years, the questionnaire included one item that asked about violence and a separate item that asked about alcohol and/or drug use.

<sup>8</sup>This item, which was included only on the 2015–16 questionnaire, provided the following examples of mental health disorders: depression, mood disorders, and ADHD. The questionnaire defined mental health disorders as “collectively, all diagnosable mental health disorders or health conditions that are characterized by alterations in thinking, mood, or behavior (or some combination thereof) associated with distress and/or impaired functioning.”

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school.

<sup>1</sup>The questionnaire defined cyberbullying as occurring "when willful and repeated harm is inflicted through the use of computers, cell phones, or other electronic devices."

<sup>2</sup>The questionnaire defined bullying as "any unwanted aggressive behavior(s) by another youth or group of youths who are not siblings or current dating partners that involves an observed or perceived power imbalance and is repeated multiple times or is highly likely to be repeated."

<sup>3</sup>The questionnaire defined violence as "actual, attempted, or threatened fight or assault."

<sup>4</sup>This item on the questionnaire provided the following examples of mental health disorders: depression, mood disorders, and ADHD. The questionnaire defined mental health disorders as "collectively, all diagnosable mental health disorders or health conditions that are characterized by alterations in thinking, mood, or behavior (or some combination thereof) associated with distress and/or impaired functioning."

<sup>5</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the

highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools.

<sup>6</sup>Student/teacher ratio was calculated by dividing the total number of students enrolled in the school, as reported on the School Survey on Crime and Safety (SSOCS), by the total number of full-time-equivalent (FTE) teachers. Information regarding the total number of FTE teachers was obtained from the Common Core of Data (CCD), the sampling frame for SSOCS. NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school.

—Not available.

†Not applicable.

<sup>1</sup>Security staff include security guards, security personnel, School Resource Officers (SROs), and sworn law enforcement officers who are not SROs. “Security guards” and “security personnel” do not include law enforcement. SROs include all career law enforcement officers with arrest authority who have specialized training and are assigned to work in collaboration with school organizations.

<sup>2</sup>Prior to 2015–16, the School Survey on Crime and Safety (SSOCS) questionnaire asked respondents whether any of the security guards, security personnel, or sworn law enforcement officers at their school routinely carried a firearm. The 2015–16 SSOCS questionnaire asked respondents only whether any of the sworn law enforcement officers (including SROs) at their school routinely carried a firearm; therefore, direct comparisons with earlier years should be avoided. Data on security staff routinely carrying a firearm were not collected in the 2013–14 Fast Response Survey System (FRSS).

<sup>3</sup>Data for 2013–14 were collected using FRSS, while data for all other years were collected using SSOCS. The 2013–14 FRSS survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and difference in survey administration may have impacted the 2013–14 results.

<sup>4</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include all other combinations of grades, including K–12 schools. Separate data on high schools and combined schools are not available for 2013–14.

<sup>5</sup>Because the 2013–14 survey did not collect data on the percentage of students eligible for free or reduced-price lunch, the classification of schools by the percentage of eligible students was computed based on data obtained from the Common Core of Data.

NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school.

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>Data for 2013–14 were collected using the Fast Response Survey System (FRSS), while data for all other years were collected using the School Survey on Crime and Safety (SSOCS). The 2013–14 FRSS survey was designed to allow comparisons with SSOCS data. However, respondents to the 2013–14 survey could choose either to complete the survey on paper (and mail it back) or to complete the survey online, whereas respondents to SSOCS did not have the option of completing the survey online. The 2013–14 survey also relied on a smaller sample. The smaller sample size and difference in survey administration may have impacted the 2013–14 results.

<sup>2</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools include

all other combinations of grades, including K–12 schools. Separate data on high schools and combined schools are not available for 2013–14.

<sup>3</sup>Because the 2013–14 survey did not collect data on the percentage of students eligible for free or reduced-price lunch, the classification of schools by the percentage of eligible students was computed based on data obtained from the Common Core of Data.

NOTE: Security staff include security guards, security personnel, School Resource Officers (SROs), and sworn law enforcement officers who are not SROs. “Security guards” and “security personnel” do not include law enforcement. SROs include all career law enforcement officers with arrest authority who have specialized training and are assigned to work in collaboration with school organizations. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school.

†Not applicable.

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

§Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Under "Any security staff," schools that reported having more than one type of security staff were counted only once.

<sup>2</sup>School Resource Officers (SROs) include all career sworn law enforcement officers with arrest authority who have specialized training and are assigned to work in collaboration with school organizations. Under "Any sworn law enforcement officers," schools that reported having both SROs and other sworn law enforcement officers were counted only once.

<sup>3</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8.

<sup>4</sup>Secondary schools include both middle and high schools as well as combined schools. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools have any combination of grades (including K–12) that is not defined specifically as primary, middle, or high school. NOTE: Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. "At school" was defined to include activities happening in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8.

<sup>2</sup>Secondary schools include both middle and high schools as well as combined schools. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools have any combination of grades (including K–12) that is not defined specifically as primary, middle, or high school.

<sup>3</sup>Schools could answer “yes” to more than one question about the presence of officers at various times. Schools indicating the presence of officers at multiple times are included in each applicable column. For example, a school that indicated officers were present at

any time during school hours at least once a week and also indicated officers were present for all instructional hours every day would be shown in both of these columns.

<sup>4</sup>The questionnaire provided the following examples of selected school activities: athletic and social events, open houses, and science fairs.

NOTE: Sworn law enforcement officers include School Resource Officers as well as other sworn law enforcement officers who are not School Resource Officers. School Resource Officers are sworn law enforcement officers with arrest authority who have specialized training and are assigned to work in collaboration with school organizations. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities happening in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities.

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

§Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The questionnaire provided the following examples of courses or training: drug-related education, criminal law, or crime prevention courses.

<sup>2</sup>The questionnaire provided the following example of providing information about legal definitions for recording or reporting purposes: defining assault for school authorities.

<sup>3</sup>Primary schools are defined as schools in which the lowest grade is not higher than grade 3 and the highest grade is not higher than grade 8.

<sup>4</sup>Secondary schools include both middle and high schools as well as combined schools. Middle schools are defined as schools in which the lowest grade is not lower than grade 4 and the highest grade is not higher than grade 9. High schools are defined

as schools in which the lowest grade is not lower than grade 9 and the highest grade is not higher than grade 12. Combined schools have any combination of grades (including K–12) that is not defined specifically as primary, middle, or high school. NOTE: Sworn law enforcement officers include School Resource Officers as well as other sworn law enforcement officers who are not School Resource Officers. School Resource Officers are sworn law enforcement officers with arrest authority who have specialized training and are assigned to work in collaboration with school organizations. Responses were provided by the principal or the person most knowledgeable about crime and safety issues at the school. “At school” was defined to include activities happening in school buildings, on school grounds, on school buses, and at places that hold school-sponsored events or activities.

—Not available.  
X Denotes that the state has a policy. A blank denotes that the state does not have a policy.  
<sup>1</sup>Most states have a provision whereby education is provided up to a certain age or completion of secondary school, whichever comes first.  
<sup>2</sup>Child may be exempted from compulsory attendance if he/she meets state requirements for early withdrawal with or without meeting conditions for a diploma or equivalency.  
<sup>3</sup>Parent/guardian may delay child's entry until a later age per state law/regulation.  
<sup>4</sup>Student may continue in the program if 22nd birthday falls before the end of the school year.  
<sup>5</sup>Attendance is compulsory until age 18 for Manatee County students, unless they earn a high school diploma prior to reaching their 18th birthday.  
<sup>6</sup>Through age 21 or until child graduates with a high school or special education diploma or equivalent.  
<sup>7</sup>Some schools operate on a multitrack system; the schools are open year round, but different cohorts start and end at different times.  
<sup>8</sup>District must offer either a half-day or full-day program.  
<sup>9</sup>Children enrolled in preschool programs (who must be 4 years old on or before September 15) are considered to be of compulsory school attendance age.  
<sup>10</sup>Not specified in statute, rules, or regulations.  
<sup>11</sup>To be determined by rules and regulations adopted by the state board.  
<sup>12</sup>All districts adopted a policy to raise the upper compulsory school age from 16 to 18. The policy took effect for most districts in the 2015-16 school year.  
<sup>13</sup>Children from birth through age 2 are eligible for additional services.  
<sup>14</sup>Attendance is required unless the student otherwise satisfactorily passes an academic readiness screening upon enrollment in grade 1.  
<sup>15</sup>Must be age 5 before October 15 and not age 20 before start of school year.  
<sup>16</sup>Each school committee is permitted to establish its own minimum age for school attendance, provided that it is not older than the mandatory minimum age established by the state.  
<sup>17</sup>Policies about year-round schools are decided locally.  
<sup>18</sup>State did not participate in 2008 online survey. Data are from 2006.

<sup>19</sup>Abbott Districts are required to offer full-day kindergarten and students are required to attend.  
<sup>20</sup>Local boards of education can require school attendance until age 17 unless employed. In Syracuse, New York City, Rochester, Utica, Buffalo, Cohoes, Watervliet, and Yonkers, districts are required to offer full-day kindergarten and children are required to attend full-day kindergarten.  
<sup>21</sup>Student may complete school year if 21st birthday occurs while attending school.  
<sup>22</sup>All children must attend kindergarten before age 7.  
<sup>23</sup>Children with severe disabilities may begin receiving services at age 3.  
<sup>24</sup>Children must attend in districts that offer kindergarten.  
<sup>25</sup>School districts must establish and maintain relationships with a district that offers full-day kindergarten.  
NOTE: The Education of the Handicapped Act (EHA) Amendments of 1986 make it mandatory for all states receiving EHA funds to serve all 3- to 18-year-old disabled children. —Not available.

†Not applicable.

X Denotes that the state has a policy. A blank denotes that the state does not have a policy.

<sup>1</sup>Or an equivalent number of hours or minutes of instruction per year.

<sup>2</sup>Does not include time for in-service or staff development or parent-teacher conferences.

<sup>3</sup>Includes time for in-service or staff development or parent-teacher conferences.

<sup>4</sup>Students must enroll in at least four subjects in addition to meeting the hour requirement.

<sup>5</sup>Fees permitted at the high school level for nonrequired or supplementary textbooks.

<sup>6</sup>State Department of Education prepares a list of suggestions, but the districts choose.

<sup>7</sup>Through 2014–15, districts were allowed to shorten the 180-day instructional year to 175 days without fiscal penalty.

<sup>8</sup>Charter schools and select districts are required to have 175 days.

<sup>9</sup>Statewide textbook adoption is only at the elementary level. Adoption practices have been suspended until the 2015–16 school year.

<sup>10</sup>No statewide policy; varies by district.

<sup>11</sup>1996 data.

<sup>12</sup>Does not apply to charter and multitrack schools.

<sup>13</sup>Fees for lost or damaged books permitted.

<sup>14</sup>1998 data.

<sup>15</sup>Fees permitted, but if 5 percent or more of the voters in a district petition the school board, a majority of the district's voters may decide to furnish free textbooks to students.

<sup>16</sup>Fees permitted for students in grades 9–12, but students who qualify for free or reduced-price lunch are exempted.

<sup>17</sup>Instructional time for graduating seniors may be reduced.

<sup>18</sup>Refundable or security deposits permitted.

<sup>19</sup>174 days required for a 5-day week; 142 days required for a 4-day week.

<sup>20</sup>Local districts may select textbooks not on the state recommended list provided the textbooks meet specific criteria and the selection is based on recommendations by the district's curriculum materials review committee.

<sup>21</sup>A district may provide free textbooks to students when, in its judgment, the best interests of the district will be served.

NOTE: Minimum number of instructional days refers to the actual number of days that pupils have contact with a teacher. Some states allow for different types of school calendars by setting instructional time in both days and hours, while others use only days or only hours. For states in which the number of days or hours varies by grade, the relevant grade(s) appear in parentheses. For states that specify minimum hours both for part-day kindergarten and for full-day kindergarten, a slash separates the part-day hours from the full-day hours.

—Not available.

#Rounds to zero.

<sup>1</sup>Includes revenues from gifts, and tuition and fees from patrons.

<sup>2</sup>Data have been revised from previously published figures.

<sup>3</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Beginning in 1989–90, revenues for state education agencies were excluded and new survey collection procedures were initiated; data may not be entirely comparable with figures for earlier years. Detail may not sum to totals because of rounding. SOURCE: U.S. Department of Education, National Center for Education Statistics, *Biennial Survey of Education in the United States*, 1919–20 through 1949–50; *Statistics of State School Systems*, 1959–60 and 1969–70; *Revenues and Expenditures for Public Elementary and Secondary Education*, 1979–80; and Common Core of Data (CCD), “National Public Education Financial Survey,” 1989–90 through 2014–15. (This table was prepared October 2017.)

**Table 235.20. Revenues for public elementary and secondary schools, by source of funds and state or jurisdiction: 2014–15**

—Not available.

<sup>1</sup>Includes expenditures for summer schools, adult education, community colleges, and community services.

<sup>2</sup>Prior to 1969–70, excludes capital outlay by state and local school housing authorities.

<sup>3</sup>Prior to 1959–60, items included under "other school services" were listed under "auxiliary services," a more comprehensive classification that also included community services.

<sup>4</sup>Plant operation also includes plant maintenance.

<sup>5</sup>Data not comparable to figures prior to 1989–90.

<sup>6</sup>Data have been revised from previously published figures.

#Rounds to zero.

<sup>1</sup>Unadjusted (or “current”) dollars have not been adjusted to compensate for inflation.

<sup>2</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

<sup>3</sup>Projected.

NOTE: Current expenditures include instruction, support services, food services, and enterprise operations. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), “National Public Education Financial Survey,” 1989–90 through 2014–15; National Elementary and Secondary Enrollment Projection Model, 1972 through 2027; and Public Elementary and Secondary Education Current Expenditure Projection Model, 1973–74 through 2027–28. (This table was prepared May 2018.)

**Table 236.20. Total expenditures for public elementary and secondary education and other related programs, by function and subfunction: Selected years, 1990–91 through 2014–15**

Function and subfunction	Expenditures (in thousands of current dollars)								Percentage distribution of current expenditures for public schools

—Not available.  
†Not applicable.

<sup>1</sup>Data have been revised from previously published figures.

<sup>2</sup>Includes estimated data for subfunctions of food services and enterprise operations.

<sup>3</sup>Includes expenditures for guidance, health, attendance, and speech pathology services.

<sup>4</sup>Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

<sup>5</sup>Includes business support services concerned with paying, transporting, exchanging, and maintaining goods and services for local education agencies; central support services, including planning, research, evaluation, information, staff, and data processing services; and other support services.

<sup>6</sup>Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

Includes very small amounts for direct program support made by state education agencies for local school districts.

<sup>7</sup>Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 1990–91 through 2014–15. (This table was prepared October 2017.)

**Table 236.25. Current expenditures for public elementary and secondary education, by state or jurisdiction: Selected years, 1969–70 through 2014–15**

[In thousands of current dollars]

<sup>1</sup>Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

<sup>2</sup>Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

<sup>3</sup>Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also includes small amounts for direct program support made by state education agencies for local school districts.

<sup>4</sup>Includes expenditures for guidance, health, attendance, and speech pathology services.

<sup>5</sup>Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey," 2014–15. (This table was prepared October 2017.)

<sup>1</sup>Data have been revised from previously published figures.

<sup>2</sup>Includes purchased professional services of teachers or others who provide instruction for students.

NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Data for 1919–20 to 1953–54 are based on school-year enrollment.

<sup>2</sup>Unadjusted (or “current”) dollars have not been adjusted to compensate for inflation.

<sup>3</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

<sup>4</sup>Excludes “Other current expenditures,” such as community services, private school programs, adult education, and other programs not allocable to expenditures per student at public schools.

<sup>5</sup>Estimated.

<sup>6</sup>Revised from previously published figures.

NOTE: Beginning in 1980–81, state administration expenditures are excluded from both “total” and “current” expenditures. Current expenditures include instruction, support services, food services, and enterprise operations. Total expenditures include current expenditures, capital outlay, and interest on debt. Beginning in 1988–89, extensive changes were made in the data collection procedures.

—Not available.

<sup>1</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

<sup>2</sup>Data have been revised from previously published figures.

<sup>3</sup>Includes estimated data for subfunctions of food services and enterprise operations.

<sup>4</sup>Includes expenditures for guidance, health, attendance, and speech pathology services.

<sup>5</sup>Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

<sup>6</sup>Includes business support services concerned with paying, transporting, exchanging, and maintaining goods and services

for local education agencies; central support services, including planning, research, evaluation, information, staff, and data processing services; and other support services.

<sup>7</sup>Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

<sup>8</sup>Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Unadjusted (or "current") dollars have not been adjusted to compensate for inflation.

<sup>2</sup>Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.

NOTE: Current expenditures include instruction, support services, food services, and enterprise operations. Expenditures for state administration are excluded in all years except 1969–70 and 1979–80. Beginning in 1989–90, extensive changes were made in the data collection procedures. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems, 1969–70; Revenues and Expenditures for Public Elementary and Secondary Schools, 1979–80; and Common Core of Data (CCD), "National Public Education Financial Survey," 1989–90 through 2014–15.* (This table was prepared October 2017.)

—Not available.

<sup>1</sup>Unadjusted (or “current”) dollars have not been adjusted to compensate for inflation.

<sup>2</sup>Constant dollars based on the Consumer Price Index (CPI), prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. The CPI does not account for differences in inflation rates from state to state.

NOTE: Current expenditures include instruction, support services, food services, and enterprise operations. Expenditures for state administration are excluded in all years except 1969–70 and 1979–80. Beginning in 1989–90, extensive changes

were made in the data collection procedures. There are discrepancies in average daily attendance reporting practices from state to state. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems, 1969–70; Revenues and Expenditures for Public Elementary and Secondary Education, 1979–80; and Common Core of Data (CCD), “National Public Education Financial Survey,” 1989–90 through 2014–15.* (This table was prepared October 2017.)

**Table 236.75. Total and current expenditures per pupil in fall enrollment in public elementary and secondary schools, by function and state or jurisdiction: 2014–15**

State or jurisdiction	Current expenditures, capital expenditures, and interest on school debt per pupil															
	Total <sup>1</sup>	Current expenditures												Capital outlay <sup>2</sup>	Interest on school debt	
		Total	Instruction	Support services									Food services			Enterprise operations <sup>3</sup>
				Total	Student support <sup>4</sup>	Instructional staff <sup>5</sup>	General administration	School administration	Operation and maintenance	Student transportation	Other support services

<sup>1</sup>Excludes "Other current expenditures," such as community services, private school programs, adult education, and other programs not allocable to expenditures per pupil in public schools.

<sup>2</sup>Includes expenditures for property and for buildings and alterations completed by school district staff or contractors.

<sup>3</sup>Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time).

<sup>4</sup>Includes expenditures for guidance, health, attendance, and speech pathology services.

<sup>5</sup>Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. "0" indicates none or less than \$0.50. Detail may not sum to totals because of rounding.

## CHAPTER 3

# Postsecondary Education

Postsecondary education includes academic, career and technical, and continuing professional education programs after high school. American colleges and universities and career/technical institutions offer a diverse array of postsecondary educational experiences. For example, a community college normally offers the first 2 years of a standard college curriculum as well as a selection of terminal career and technical education programs. A university typically offers a full undergraduate course of study leading to a bachelor's degree, as well as programs leading to advanced degrees. A specialized career/technical institution offers training programs of varying lengths that are designed to prepare students for specific careers.

This chapter provides an overview of the latest statistics on postsecondary education, including data on various types of postsecondary institutions and programs. However, to maintain comparability over time, most of the data in the *Digest* are for degree-granting institutions, which are defined as postsecondary institutions that grant an associate's or higher degree and whose students are eligible to participate in Title IV federal financial aid programs.<sup>1</sup> Degree-granting institutions include almost all 2- and 4-year colleges and universities; they exclude institutions offering only career and technical programs of less than 2 years' duration and continuing education programs. The degree-granting institution classification currently used by the National Center for Education Statistics (NCES) includes approximately the same set of institutions as the higher education institution classification that was used by NCES prior to 1996–97.<sup>2</sup> This chapter highlights historical data that enable the reader to observe long-range trends in college education in America.

Other chapters provide related information on postsecondary education. Data on price indexes and on the

number of degrees held by the general population are shown in chapter 1. Chapter 4 contains tabulations on federal funding for postsecondary education. Information on employment outcomes for college graduates is shown in chapter 5. Chapter 7 contains data on college libraries. Further information on survey methodologies is presented in Appendix A: Guide to Sources and in the publications cited in the table source notes. See chapter 5 for information on adults' participation in nonpostsecondary education, such as adult secondary education classes (e.g., to prepare for the GED test) or English as a Second Language (ESL) classes.

## Enrollment

Fall enrollment in degree-granting postsecondary institutions increased 24 percent between 1996 and 2006 (table 303.10 and figure 12). Fall enrollment in degree-granting postsecondary institutions was 12 percent higher in 2016 (19.8 million) than in 2006 (17.8 million). The overall increase between 2006 and 2016 reflects an increase of 18 percent between 2006 and 2010, followed by a decrease of 6 percent between 2010 and 2016. Similarly, the number of full-time students rose 19 percent from 2006 to 2010, and then fell 7 percent from 2010 to 2016. The number of part-time students rose 18 percent from 2006 to 2011, and then fell 4 percent from 2011 to 2016, for an overall increase of 13 percent between 2006 and 2016. The number of female students was 10 percent higher in 2016 than in 2006, while the number of male students was 14 percent higher. Although male enrollment increased by a larger percentage than female enrollment between 2006 and 2016, the majority (56 percent) of students in 2016 were female. Male and female enrollments were both higher in 2016 than in 2006, but there were increases during the first part of this period followed by smaller decreases during the most recent part of the period (a decrease of 5 percent for males from 2010 to 2016 and a decrease of 6 percent for females). In addition to enrollment in degree-granting institutions, about 383,000 students attended non-degree-granting, Title IV eligible, postsecondary institutions in fall 2016 (table 303.20). These institutions are postsecondary institutions that do not award associate's or higher degrees; they include, for example, institutions that offer only career and technical programs of less than 2 years' duration.

Enrollment trends can be affected both by changes in population and by changing rates of enrollment. Between 2006 and 2016, the number of 18- to 24-year-olds in the

<sup>1</sup> Title IV programs, which are administered by the U.S. Department of Education, provide financial aid to postsecondary students.

<sup>2</sup> Included in the current degree-granting classification are some institutions (primarily 2-year colleges) that were not previously designated as higher education institutions. Excluded from the current degree-granting classification are a few institutions that were previously designated as higher education institutions even though they did not award an associate's or higher degree. The former higher education classification was defined as including institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The former higher education institutions offered courses that led to an associate's or higher degree, or were accepted for credit towards a degree.

population rose from 29.6 million to 30.8 million, an increase of 4 percent (table 101.10). The percentage of 18- to 24-year-olds enrolled in degree-granting postsecondary institutions was 41 percent in 2016, which was higher than the percentage in 2006 (37 percent) (table 302.60). For male 18- to 24-year-olds, the enrollment rate was higher in 2016 (39 percent) than in 2006 (34 percent). The comparable enrollment rate for females (44 percent) was also higher than in 2006 (41 percent). The enrollment rate for Hispanic 18- to 24-year-olds rose from 24 percent in 2006 to 39 percent in 2016. In 2016, the enrollment rate for Whites in the same age group was 42 percent, and the enrollment rate for Blacks was 36 percent; neither of these rates was measurably different from the corresponding rate in 2006.

Like enrollment in degree-granting institutions for the United States as a whole, the number of students enrolled in degree-granting institutions located within individual states generally has been lower in recent years (table 304.10 and figure 13). Overall, fall enrollment in degree-granting institutions declined 6 percent between 2011 and 2016. Similarly, fall 2016 enrollment was lower than fall 2011 enrollment in the majority of states (44). The largest declines were in Iowa (-28 percent) and Arizona (-24 percent). In contrast, enrollment was higher in 2016 than in 2011 in six states and the District of Columbia. The largest increases were in New Hampshire (72 percent), followed by Idaho (37 percent), Utah (18 percent), and Delaware (8 percent). The enrollment declines in Iowa and Arizona between 2011 and 2016 resulted primarily from declines among private for-profit institutions, while the enrollment increases in New Hampshire, Idaho, Utah, and Delaware during the same period resulted primarily from increases among private nonprofit institutions.<sup>3</sup>

Between fall 2006 and fall 2016, the percentage increase in the number of students enrolled in degree-granting institutions was higher for students under age 25 than for older students; and this pattern is expected to continue in the coming years (table 303.40 and figure 14). The enrollment of students under age 25 increased by 13 percent from 2006 to 2016, while the enrollment of those age 25 and over was 11 percent higher in 2016 than in 2006. From 2016 to 2027, NCES projects the increase for students under age 25 to be 5 percent, compared with 1 percent for students age 25 and over.

Enrollment trends have differed at the undergraduate and postbaccalaureate levels. Undergraduate enrollment increased 47 percent between fall 1970 and fall 1983, when it reached 10.8 million (table 303.70). Undergraduate enrollment dipped to 10.6 million in 1984 and 1985, but then increased each year from 1985 to 1992, rising 18 percent before stabilizing between 1992 and 1998.

Undergraduate enrollment was 11 percent higher in 2016 (16.9 million) than in 2006 (15.2 million). This overall change reflects a 19 percent increase in undergraduate enrollment between 2006 and 2010 (when undergraduate enrollment reached 18.1 million), followed by a 7 percent decrease between 2010 and 2016. Postbaccalaureate enrollment increased 34 percent between 1970 and 1984, with most of this increase occurring in the early and mid-1970s (table 303.80). Postbaccalaureate enrollment increased from 1985 to 2016, rising a total of 80 percent. During the last decade of this period, between 2006 and 2016, postbaccalaureate enrollment rose 15 percent, from 2.6 million to 3.0 million. Unlike undergraduate enrollment, which was lower in 2016 than in 2010, postbaccalaureate enrollment was higher in 2016 than in 2010.

Since fall 1988, the number of female students in postbaccalaureate programs has exceeded the number of male students (table 303.80). Between 2006 and 2016, the number of full-time male postbaccalaureate students increased by 22 percent, compared with a 23 percent increase in the number of full-time female postbaccalaureate students. Among part-time postbaccalaureate students, the number of males enrolled in 2016 was 6 percent higher than in 2006, while the number of females was 8 percent higher.

Nineteen percent of undergraduates in 2015–16 reported having a disability (table 311.10). In 2015–16, the percentage of undergraduates who reported having a disability was 19 percent for male students and 20 percent for female students. There were some differences in the percentages of undergraduates with disabilities by characteristics such as veteran status, age, dependency status, and race/ethnicity. For example, 26 percent of undergraduates who were veterans reported having a disability, compared with 19 percent of undergraduates who were not veterans. The percentage of undergraduates having a disability was higher among those age 30 and over (23 percent) than among 15- to 23-year-olds (18 percent). Among dependent undergraduates, 17 percent reported having a disability, which was lower than the percentages for independent undergraduates who were married (21 percent) or unmarried (24 percent). A lower percentage of Asian undergraduates (15 percent) had a disability compared to White, Hispanic, and Black students (21, 18, and 17 percent, respectively). The percentage of postbaccalaureate students who reported having a disability in 2015–16 (12 percent) was lower than the percentage for undergraduates (19 percent).

The percentage of American college students who are Hispanic, Asian/Pacific Islander, and Black has been increasing (table 306.10). From fall 1976 to fall 2016, the percentage of Hispanic students rose from 4 percent to 18 percent of all U.S. residents enrolled in degree-granting postsecondary institutions, and the percentage of Asian/Pacific Islander students rose from 2 percent to 7 percent. The percentage of Black students increased from 10 percent in 1976 to 14 percent in 2016, but the 2016 percentage reflects a decrease since 2011, when Black students made

<sup>3</sup> For 2011 state-level data on enrollment in private nonprofit and for-profit institutions, see *Digest of Education Statistics 2013* tables 304.45 and 304.50, available at [https://nces.ed.gov/programs/digest/d13/tables/dt13\\_304.45.asp](https://nces.ed.gov/programs/digest/d13/tables/dt13_304.45.asp) and [https://nces.ed.gov/programs/digest/d13/tables/dt13\\_304.50.asp](https://nces.ed.gov/programs/digest/d13/tables/dt13_304.50.asp), respectively.

up 15 percent of all enrolled U.S. residents. The percentage of American Indian/Alaska Native students was higher in 2016 (0.8 percent) than in 1976 (0.7 percent). During the same period, the percentage of White students fell from 84 percent to 57 percent. About 4 percent of students in 2016 were of Two or more races. Race/ethnicity is not reported for nonresident aliens, who made up 5 percent of total enrollment in 2016.

Of the 19.8 million students enrolled in degree-granting postsecondary institutions in fall 2016, some 17 percent took at least one distance education course as part of their program that included a mix of in-person and distance education courses (table 311.15). In addition, 15 percent of students took their college program exclusively through distance education courses. The remaining 68 percent of students took no distance education courses. About 11 percent of students at public institutions took their coursework exclusively through distance education courses, compared with 18 percent of students at private nonprofit institutions and 59 percent of students at private for-profit institutions. About 13 percent of undergraduates took their coursework exclusively through distance education courses, compared to 28 percent of postbaccalaureate students.

Despite the sizable numbers of small degree-granting colleges, most students attend larger colleges and universities. In fall 2016, some 42 percent of institutions had fewer than 1,000 students; however, these campuses enrolled 3 percent of all college students (table 317.40). While 13 percent of campuses enrolled 10,000 or more students, they accounted for 60 percent of total college enrollment.

In fall 2016, the five institutions with the highest enrollment (including distance education as well as in-person enrollment) were University of Phoenix, with 131,600 students; Western Governors University, with 84,300 students; Ivy Tech Community College, with 78,900 students; Grand Canyon University, with 75,800 students; and Liberty University, with 75,800 students (table 312.10).

## Faculty, Staff, and Salaries

Approximately 3.9 million people were employed in degree-granting postsecondary institutions in fall 2016, including 1.5 million faculty, 0.4 million graduate assistants, and 2.0 million other staff (table 314.20). Out of the 1.5 million faculty in 2016, 0.8 million were full-time and 0.7 million were part-time faculty. From 2005 to 2016, the proportion of staff who were faculty rose from 38 percent to 39 percent. During the same period, the proportion of other staff not engaged in teaching decreased from 52 percent to 51 percent. The proportion of graduate assistants in 2016 (10 percent) was higher than the percentage in 2005 (9 percent). The full-time-equivalent (FTE) student/FTE staff ratio at degree-granting institutions was lower in 2016 (5.0) than in 2005 (5.1) (table 314.10 and figure 15). Also, the FTE student/FTE faculty ratio was lower in 2016 (14.1) than in 2005 (15.0).

Degree-granting postsecondary institutions differ in their practices of employing part-time and full-time staff. In fall 2016, some 48 percent of the employees at public 2-year institutions were employed full time, compared with 68 percent at public 4-year institutions, 69 percent at private nonprofit 4-year institutions, and 71 percent at private nonprofit 2-year institutions (table 314.30). The percentage of faculty employed full time was higher at public 4-year institutions (66 percent) than at private nonprofit 4-year institutions (55 percent), private for-profit 4-year institutions (16 percent), private nonprofit 2-year institutions (46 percent), private for-profit 2-year institutions (36 percent), and public 2-year institutions (32 percent). In general, the number of full-time staff has been growing at a slower rate than the number of part-time staff (table 314.20). Between 2005 and 2016, the number of full-time staff increased by 16 percent, compared to an increase of 17 percent in the number of part-time staff. Most of the increase in part-time staff was due to increases in the number of part-time faculty (19 percent) and graduate assistants (19 percent) during this time period.

In fall 2016, some 7 percent of faculty at degree-granting institutions were Black (based on a faculty count that excludes nonresident aliens and other persons whose race/ethnicity was unknown), 8 percent were Asian, 5 percent were Hispanic, 0.5 percent were American Indian/Alaska Native, 1 percent were of Two or more races, and 0.3 percent were Pacific Islander (table 314.40). About 78 percent of all faculty were White; 40 percent were White males and 38 percent were White females. Staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, or of Two or more races made up 28 percent of graduate assistants and 31 percent of other staff in nonfaculty positions in 2016. The proportion of total staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, and of Two or more races was similar at public 4-year institutions (28 percent), public 2-year institutions (27 percent), and private nonprofit 4-year institutions (25 percent), but the proportion was higher at private for-profit 4-year institutions (33 percent), private nonprofit 2-year institutions (35 percent), and private for-profit 2-year institutions (41 percent).

On average, full-time faculty and instructional staff spent 58 percent of their time teaching in 2003 (*web-only table 315.30*). Research and scholarship accounted for 20 percent of their time, and 22 percent was spent on other activities (administration, professional growth, etc.).

Faculty salaries generally lost purchasing power during the 1970s. In constant 2015–16 dollars, average salaries for faculty on 9-month contracts declined by 16 percent during the period from 1970–71 (\$77,600) to 1980–81 (\$65,300) (table 316.10). During the 1980s, average salaries rose and recouped most of the losses. Between 1990–91 and 2016–17, there was a further increase in average faculty salaries, resulting in an average salary in 2016–17 (\$84,600) that was 9 percent higher than the average salary in 1970–71. The average salary for male faculty was higher than the average salary for female faculty in all years for which data are available. The

average salary for male faculty in 2016–17 (\$91,900) was 4 percent higher than in 2006–07 (\$88,200 in constant 2016–17 dollars). For female faculty, the average salary in 2016–17 (\$76,100) was 5 percent higher than the salary in 2006–07 (\$72,500). In 2016–17, average salaries for male faculty were 21 percent higher than for female faculty, compared with 22 percent higher in 2006–07.

The percentage of faculty with tenure has declined since 1993–94. Of those faculty at institutions with tenure systems, 46 percent of full-time faculty had tenure in 2016–17, compared with 56 percent in 1993–94 (table 316.80). Also, the percentage of institutions with tenure systems decreased between 1993–94 (63 percent) and 2016–17 (54 percent). Part of this change was due to the expansion in the number of for-profit institutions (table 317.10), relatively few of which have tenure systems (1.5 percent in 2016–17) (table 316.80). At institutions with tenure systems, there were differences between males and females in the percentage of full-time instructional faculty having tenure. Fifty-five percent of males had tenure in 2016–17, compared with 42 percent of females. In 2016–17, about 51 percent of full-time instructional faculty had tenure at public institutions with tenure systems, compared with 45 percent at private nonprofit institutions with tenure systems and 17 percent at private for-profit institutions with tenure systems.

## Degrees

During the 2016–17 academic year, 4,360 accredited institutions offered degrees at the associate’s level or above (table 317.10). These included 1,623 public institutions, 1,682 private nonprofit institutions, and 1,055 private for-profit institutions. Of the 4,360 degree-granting institutions, 2,832 were 4-year institutions that awarded degrees at the bachelor’s or higher level, and 1,528 were 2-year institutions that offered associate’s degrees as their highest award. In 2015–16, associate’s degrees were awarded by 2,759 institutions, bachelor’s degrees by 2,447 institutions, master’s degrees by 1,920 institutions, and doctor’s degrees by 981 institutions (table 318.60). In addition to degree-granting institutions, 2,246 non-degree-granting institutions offered postsecondary education in 2016–17 but did not grant degrees at the associate’s or higher level (table 317.30).

Growing numbers of people are completing postsecondary degrees. Between 2005–06 and 2015–16, the number of associate’s, bachelor’s, master’s, and doctor’s degrees that were conferred rose (table 318.10). During this period, the number of associate’s degrees increased by 41 percent from 713,000 to 1,008,000, the number of bachelor’s degrees increased by 29 percent from 1,485,000 to 1,921,000, the number of master’s degrees increased by 31 percent from 600,000 to 786,000, and the number of doctor’s degrees increased by 29 percent from 138,000 to 178,000. The doctor’s degree total includes most degrees formerly classified as first-professional, such as M.D. (medical), D.D.S. (dental), and J.D. (law) degrees. In addition to degrees awarded at the associate’s and higher levels, 939,000 certificates were awarded by postsecondary institutions

participating in federal Title IV financial aid programs in 2015–16 (table 320.20).

Since the mid-1980s, more females than males have earned associate’s, bachelor’s, and master’s degrees (table 318.10). Beginning in 2005–06, the number of females earning doctor’s degrees has also exceeded the number of males. Between 2005–06 and 2015–16, the number of associate’s, bachelor’s, and master’s degrees awarded to males increased at a higher rate than the number awarded to females. The number of associate’s degrees awarded to males increased by 45 percent during this period, while the number awarded to females increased by 39 percent. The number of bachelor’s degrees awarded to males increased by 30 percent (from 630,600 to 821,779, an increase of 191,179 degrees), while the number of bachelor’s degrees awarded to females increased by 29 percent (from 854,642 to 1,098,939, an increase of 244, 297 degrees). The number of master’s degrees awarded to males increased by 33 percent, while the number awarded to females increased by 30 percent. In contrast, the number of doctor’s degrees increased at a higher rate for females than males between 2005–06 and 2015–16. The number of females earning doctor’s degrees increased 36 percent, while the number of males earning doctor’s degrees increased 22 percent.

Of the 1,921,000 bachelor’s degrees conferred in 2015–16, the greatest numbers of degrees were conferred in the fields of business (372,000), health professions and related programs (229,000), social sciences and history (161,000), psychology (117,000), biological and biomedical sciences (114,000), engineering (107,000), visual and performing arts (93,000), and communication, journalism, and related programs (93,000) (table 322.10). At the master’s degree level, the greatest numbers of degrees were conferred in the fields of business (187,000), education (146,000), and health professions and related programs (110,000) (table 323.10). At the doctor’s degree level, the greatest numbers of degrees were conferred in the fields of health professions and related programs (73,700), legal professions and studies (37,000), education (11,800), engineering (10,200), biological and biomedical sciences (7,900), psychology (6,500), and physical sciences and science technologies (6,000) (table 324.10).

In recent years, the numbers of bachelor’s degrees conferred have followed patterns that differed significantly by field of study. While the number of bachelor’s degrees conferred increased by 29 percent overall between 2005–06 and 2015–16, there was substantial variation among the different fields of study, as well as shifts in the patterns of change during this time period (table 322.10 and figure 16). For example, the number of degrees conferred in computer and information sciences was 9 percent lower in 2010–11 than in 2005–06, but then increased 50 percent between 2010–11 and 2015–16. In contrast, the number of bachelor’s degrees conferred in the combined fields of engineering and engineering technologies increased 14 percent between 2005–06 and 2010–11, and then increased a further 33 percent between 2010–11 and 2015–16. In a number of other major fields, the number of bachelor’s degrees also increased by

higher percentages in the second half of the 10-year period than in the first half. For example, the number of degrees conferred in agriculture and natural resources increased by 24 percent between 2005–06 and 2010–11 and then by 29 percent between 2010–11 and 2015–16. The number of degrees conferred in health professions and related programs increased by 56 percent between 2005–06 and 2010–11 and then by 60 percent between 2010–11 and 2015–16. Also, the number of degrees conferred in public administration and social services increased by 22 percent between 2005–06 and 2010–11 and then by 28 percent between 2010–11 and 2015–16. Other fields with large numbers of degrees (over 10,000 in 2015–16) that showed increases of 30 percent or more between 2010–11 and 2015–16 included parks, recreation, leisure, and fitness studies (42 percent) and mathematics and statistics (33 percent). Some fields with sizable numbers of degrees did not have increases during the 2010–11 to 2015–16 period. The number of degrees in philosophy and religious studies decreased 21 percent between 2010–11 and 2015–16. Also during this period, the number of degrees in English language and literature/letters decreased 19 percent; the number of degrees in education decreased 16 percent; the number of degrees in foreign languages, literatures, and linguistics decreased 15 percent; the number of degrees in social sciences and history decreased 9 percent; and the number of degrees in liberal arts and sciences, general studies, and humanities decreased 7 percent. The number of degrees in visual and performing arts was 1 percent lower in 2015–16 than in 2010–11.

Among first-time students who were seeking a bachelor's degree or its equivalent and attending a 4-year institution full time in 2010, about 41 percent completed a bachelor's degree or its equivalent at that institution within 4 years, while 56 percent did so within 5 years, and 60 percent did so within 6 years (table 326.10). These graduation rates were calculated as the total number of completers within the specified time to degree attainment divided by the cohort of students who first enrolled at that institution in 2010. Graduation rates were higher at private nonprofit institutions than at public or private for-profit institutions. For example, the 6-year graduation rate for the 2010 cohort at private nonprofit institutions was 66 percent, compared with 59 percent at public institutions and 26 percent at private for-profit institutions. Graduation rates also varied by race/ethnicity. At 4-year institutions overall, the 6-year graduation rate for Asian students in the 2010 cohort was 74 percent, compared with 64 percent for Whites, 60 percent for students of Two or more races, 54 percent for Hispanics, 51 percent for Pacific Islanders, 40 percent for Blacks, and 39 percent for American Indians/Alaska Natives.

## Finances and Financial Aid

For the 2016–17 academic year, annual current dollar prices for undergraduate tuition, fees, room, and board were estimated to be \$17,237 at public institutions, \$44,551 at private nonprofit institutions, and \$25,431 at private for-profit institutions (table 330.10). Between 2006–07 and

2016–17, prices for undergraduate tuition, fees, room, and board at public institutions rose 31 percent, and prices at private nonprofit institutions rose 24 percent, after adjustment for inflation. The price for undergraduate tuition, fees, room, and board at private for-profit institutions decreased 11 percent between 2006–07 and 2016–17, after adjustment for inflation.

In 2015–16, about 86 percent of full-time undergraduate students received financial aid (grants, loans, work-study, or aid of multiple types) (table 331.10). About 70 percent of full-time undergraduates received federal financial aid in 2015–16, and 67 percent received aid from nonfederal sources. (Many students receive aid from both federal and nonfederal sources.) Section 484(r) of the Higher Education Act of 1965, as amended, suspends a student's eligibility for Title IV federal financial aid if the student is convicted of certain drug-related offenses that were committed while the student was receiving Title IV aid. For 2016–17, less than 0.01 percent of postsecondary students had their eligibility to receive aid suspended due to a conviction (table C).

**Table C. Suspension of eligibility for Title IV federal student financial aid due to a drug-related conviction or failure to report conviction status on aid application form: 2007–08 through 2016–17**

#Rounds to zero.

NOTE: It is not possible to determine whether a student who lost eligibility due to a drug conviction otherwise would have received Title IV aid, since there are other reasons why an applicant may not receive aid. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, Federal Student Aid, Free Application for Federal Student Aid (FAFSA), unpublished data.

In 2015–16, total revenue was \$364 billion at public institutions, \$183 billion at private nonprofit institutions, and \$17 billion at private for-profit institutions (tables 333.10, 333.40, and 333.55 and figures 17, 18, and 19). The category of student tuition and fees typically accounts for a significant percentage of total revenue and was the largest single revenue source at both private nonprofit and for-profit institutions in 2015–16 (39 and 90 percent, respectively). Tuition and fees accounted for 21 percent of revenue at public institutions in 2015–16. Public institutions typically report Pell grants as revenue from federal grants, while private institutions report Pell grants as revenue from tuition and fees; this difference in reporting contributes to the smaller percentage of revenue reported as tuition and fees at public institutions compared to private institutions. At public institutions, the share of revenue from tuition and fees in 2015–16 (21 percent) was higher than the share from state appropriations (18 percent), while the share from state appropriations in 2007–08 (25 percent) was higher than that from tuition and fees (18 percent) (table 333.10). In 2015–16, tuition and fees constituted the largest revenue category at private nonprofit 2- and 4-year institutions, private for-profit 2- and 4-year institutions, and public 4-year institutions (tables 333.10, 333.40, and 333.55). At public 2-year institutions, tuition and fees constituted the third-largest revenue category.

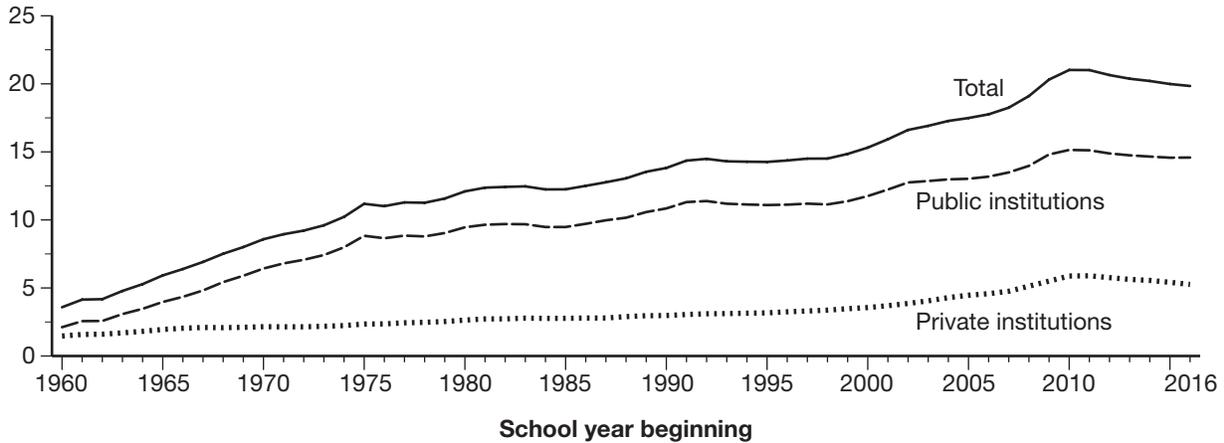

Average total expenditures per full-time-equivalent (FTE) student in 2015–16—shown in constant 2016–17 dollars throughout this paragraph—varied by institution control and level, as did changes in average total expenditures per FTE student between 2009–10 and 2015–16 (after adjustment for inflation). In 2015–16, average total expenditures per full-time-equivalent (FTE) student at public

degree-granting institutions were \$34,200 (table 334.10). These 2015–16 total expenditures per FTE student were 17 percent higher than in 2009–10. In 2015–16, public 4-year institutions had average total expenditures per FTE student of \$44,000, compared with \$15,100 at public 2-year institutions. At private nonprofit institutions, total expenditures per FTE student in 2015–16 were 9 percent higher than in 2009–10 (table 334.30). In 2015–16, total expenditures per FTE student at private nonprofit institutions averaged \$56,400 at 4-year institutions and \$21,300 at 2-year institutions. The expenditures per FTE student at private for-profit institutions in 2015–16 (\$16,500) were 10 percent higher than in 2009–10 (table 334.50). In 2015–16, total expenditures per FTE student at private for-profit institutions averaged \$16,200 at 4-year institutions and \$17,600 at 2-year institutions. This difference in expenditures per FTE student between 4-year and 2-year private for-profit institutions was relatively small compared to the differences between 4-year and 2-year institutions in the public and private nonprofit sectors.

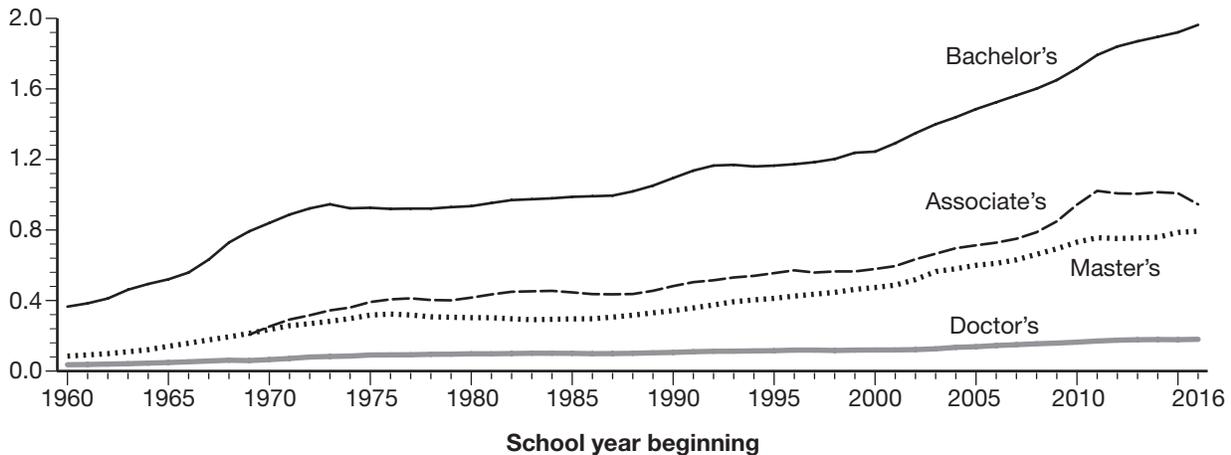

At the end of fiscal year 2016, the market value of the endowment funds of colleges and universities was \$542 billion, reflecting a decrease of 2 percent compared to the beginning of the fiscal year, when the total was \$554 billion (table 333.90). At the end of fiscal year 2016, the 120 institutions with the largest endowments accounted for \$401 billion, or about three-fourths of the national total. The five institutions with the largest endowments in 2016 were Harvard University (\$36 billion), Yale University (\$25 billion), the University of Texas System (\$24 billion), Stanford University (\$22 billion), and Princeton University (\$22 billion).

**Figure 17. Percentage distribution of total revenues of public degree-granting postsecondary institutions, by source of funds: 2015–16**

<sup>1</sup>In addition to the categories listed, includes capital grants and gifts, additions to permanent endowments, and operating and nonoperating revenues not included elsewhere.

<sup>2</sup>Revenues from local governments include operating grants and contracts (including private grants and contracts), nonoperating appropriations, and nonoperating grants.

<sup>3</sup>Revenues from state governments include operating grants and contracts, nonoperating revenue appropriations, nonoperating grants, and capital appropriations.

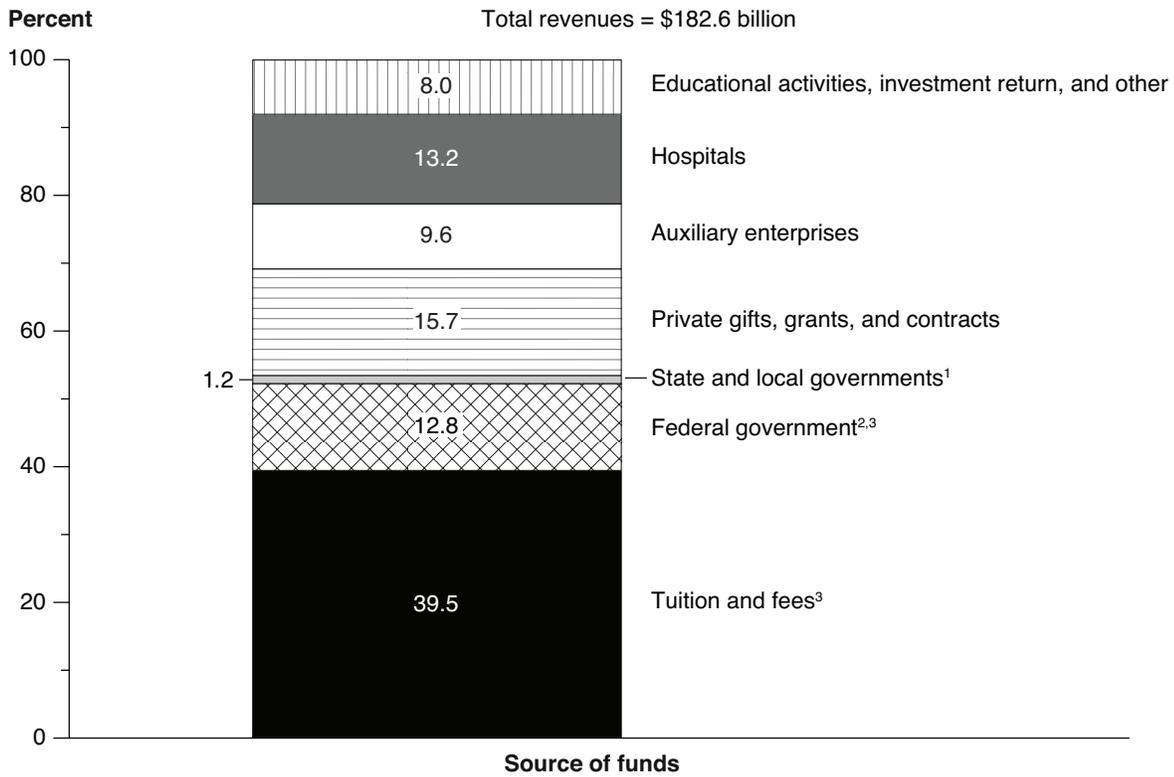

<sup>4</sup>Revenues from the federal government include operating grants and contracts, funds for independent operations, nonoperating appropriations, and nonoperating grants.

<sup>5</sup>Public institutions typically report Pell grants as revenues from federal grants and as allowances that reduce tuition revenues.

NOTE: Graphic display was generated using unrounded data. Detail may not sum to totals because of rounding.

†Not applicable.

<sup>1</sup>Includes both degree-granting and non-degree-granting institutions.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Degree-granting institutions grant degrees at the associate's or higher level, while non-degree-granting institutions grant only awards below that level. The non-degree-granting classification includes some institutions transitioning to higher level program offer-

ings, though still classified at a lower level; therefore, a small number of associate's degrees are shown as awarded by non-degree-granting institutions.

—Not available.

<sup>1</sup>Prior to 1979–80, excludes branch campuses.

<sup>2</sup>Total number of different individuals (not reduced to full-time equivalent). Beginning in 1959–60, data are for the first term of the academic year.

<sup>3</sup>Estimated.

<sup>4</sup>Estimated number of senior instructional staff based on actual enrollment data for the designated year and enrollment/staff ratios for the prior staff survey. Excludes graduate assistants.

<sup>5</sup>Because of revised survey procedures, data may not be directly comparable with figures prior to 1989–90. Excludes graduate assistants.

<sup>6</sup>Data for 1869–70 to 1939–40 are for resident degree-credit students who enrolled at any time during the academic year.

<sup>7</sup>From 1869–70 to 1959–60, bachelor's degrees include degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees.

<sup>8</sup>Figures for years prior to 1969–70 are not precisely comparable with later data.

<sup>9</sup>Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees.

<sup>10</sup>Data for 1929–30 and 1939–40 include current-fund expenditures and additions to plant value. Data for 1949–50 through 1989–90 are current-fund expenditures only. Data for 1999–2000 include total expenditures for private institutions and current-fund expenditures for public institutions. Data for later years are for total expenditures.

<sup>11</sup>Data for 1929–30 through 1989–90 are current-fund revenues only. Data for 1999–2000 include total revenues for private institutions and current-fund revenues for public institutions. Data for later years are for total revenues.

<sup>12</sup>Includes unexpended plant funds.

<sup>13</sup>Book value. Includes other nonexpendable funds.

<sup>14</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

NOTE: Data through 1989–90 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

<sup>1</sup>Individuals ages 16 to 24 who graduated from high school or completed a GED or other high school equivalency credential.

<sup>2</sup>Enrollment in college as of October of each year for individuals ages 16 to 24 who had completed high school earlier in the calendar year.

<sup>3</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. High school completion data in this table differ from figures appearing in other tables because of varying survey procedures and coverage. High school completers include GED recipients. Detail may not sum to totals because of rounding.

SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2016. (This table was prepared July 2017.)

**Table 302.20. Percentage of recent high school completers enrolled in college, by race/ethnicity: 1960 through 2016**  
[Standard errors appear in parentheses]

Year	Percent of recent high school completers <sup>1</sup> enrolled in college <sup>2</sup> (annual data)					3-year moving averages <sup>3</sup>								
	Total	White	Black	Hispanic	Asian <sup>4</sup>	Percent of recent high school completers <sup>1</sup> enrolled in college <sup>2</sup>					Difference between percent enrolled

†Not applicable.  
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.  
‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.  
<sup>1</sup>Individuals ages 16 to 24 who graduated from high school or completed a GED or other high school equivalency credential.  
<sup>2</sup>Enrollment in college as of October of each year for individuals ages 16 to 24 who had completed high school earlier in the calendar year.  
<sup>3</sup>A 3-year moving average is a weighted average of the year indicated, the year immediately preceding, and the year immediately following. For the first and final years of available data, a 2-year moving average is used: The moving average for 1960 reflects an average of 1960 and 1961; for Black and Hispanic data, the moving average for 1972 reflects an average of 1972 and 1973; for Asian data, the moving average for 2003 reflects an average of 2003 and

2004; and the moving average for 2016 reflects an average of 2015 and 2016. Moving averages are used to produce more stable estimates.  
<sup>4</sup>Prior to 2003, Asian data include Pacific Islanders.  
<sup>5</sup>Prior to 1972, White data include persons of Hispanic ethnicity.  
<sup>6</sup>After 2002, White, Black, and Asian data exclude persons of Two or more races.  
<sup>7</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.  
NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. Includes enrollment in 2-year colleges and in 4-year colleges and universities. Race categories exclude persons of Hispanic ethnicity except where otherwise noted. Total includes persons of other racial/ethnic groups not separately shown. Some data have been revised from previously published figures.  
SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the Census Bureau, 1960 through 1969. U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), October, 1970 through 2016. (This table was prepared July 2017.)

**Table 302.30. Percentage of recent high school completers enrolled in college, by income level: 1975 through 2016**

<sup>1</sup>Individuals ages 16 to 24 who graduated from high school or completed a GED or other high school equivalency credential.

<sup>2</sup>Enrollment in college as of October of each year for individuals ages 16 to 24 who had completed high school earlier in the calendar year.

<sup>3</sup>A 3-year moving average is a weighted average of the year indicated, the year immediately preceding, and the year immediately following. For 1975 and 2016, a 2-year moving average is used. The moving average for income groups in 1975 reflects an average of 1975 and 1976, and the moving average for 2016 reflects an average of 2015 and 2016. Moving averages are used to produce more stable estimates.

<sup>4</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. Includes enrollment in 2-year colleges and in 4-year colleges and universities. Low income refers to the bottom 20 percent of all family incomes, high income refers to the top 20 percent of all family incomes, and middle income refers to the 60 percent in between. Some data have been revised from previously published figures.

—Not available.

†Not applicable.

‡Reporting standards not met. Data may be suppressed because the response rate is under 50 percent, there are too few cases for a reliable estimate, or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>The 12th-grade graduation rate is the number of students who graduated from grade 12 with a diploma during the 2010–11 school year divided by 12th-grade enrollment in October 2010.

NOTE: Data are based on a sample survey and may not be strictly comparable with data reported elsewhere. Includes all schools, including combined schools, with students enrolled in the 12th grade. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

Concerns about credit score .....	100.0 (†)	64.6 (7.70)	35.4 (7.70)	21.1 (5.01)	‡ (†)	17.2 (4.90)	‡ (†)	14.3 ! (6.15)		
Family income too high .....	100.0 (†)	16.4 (2.42)	83.6 (2.42)	69.9 (2.79)	1.6 ! (0.64)	24.5 (2.66)	43.8 (2.85)	13.6 (2.09)		
Grades or test scores too low .....	100.0 (†)	60.7 (5.31)	39.3 (5.31)	22.7 (4.18)	‡ (†)	15.1 (3.96)	5.0 ! (2.04)	16.5 (3.55)		
Part-time postsecondary enrollment .....	100.0 (†)	70.2 (5.94)	29.8 (5.94)	13.2 ! (4.69)	‡ (†)	10.6 ! (4.62)	‡ (†)	16.6 (4.91)		
Did not have enough information about how to complete a FAFSA ..	100.0 (†)	56.2 (3.42)	43.8 (3.42)	29.3 (2.90)	4.5 (1.30)	18.2 (2.58)	6.7 (1.28)	14.5 (2.55)		
Thought FAFSA forms too much work or too time-consuming .....	100.0 (†)	43.2 (4.83)	56.8 (4.83)	42.2 (4.67)	‡ (†)	18.6 (4.42)	19.5 (2.79)	14.7 (3.23)		
Did not know you could complete a FAFSA .....	100.0 (†)	59.5 (4.12)	40.5 (4.12)	24.1 (3.29)	4.9 ! (1.86)	14.0 (2.44)	5.2 (1.45)	16.3 (3.32)		
Not planning to continue education after high school .....	100.0 (†)	93.4 (1.89)	6.6 (1.89)	3.2 ! (0.97)	‡ (†)	1.8 ! (0.81)	‡ (†)	3.4 ! (1.61)		
Selected measures of high school achievement										
Total number of credits earned in high school <sup>5</sup> .....	25.8 (0.12)	23.9 (0.21)	26.4 (0.13)	26.6 (0.14)	24.2 (0.54)	26.1 (0.18)	27.3 (0.20)	25.6 (0.28)		
Overall GPA earned in high school <sup>6</sup> .....	2.8 (0.01)	2.3 (0.02)	3.0 (0.01)	3.0 (0.01)	2.4 (0.06)	2.8 (0.02)	3.3 (0.01)	2.6 (0.03)		
Average SAT/ACT score (standardized to SAT) <sup>7</sup> .....	988 (6.5)	854 (10.4)	1008 (6.4)	1023 (5.9)	811 (29.7)	936 (7.3)	1083 (6.4)	922 (14.1)		

†Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>A certificate or diploma program at a school that provides occupational training. Such a program usually takes 2 years or less to complete and often leads to a license, such as cosmetology.

<sup>2</sup>SES was measured by a composite score based on parental education and occupations, family income, and school urbanicity in the student's 11th-grade year. The weighted SES distribution (weighted by W2STUDENT) was divided into five equal groups. Low SES corresponds to the lowest one-fifth of the population, and high SES corresponds to the highest one-fifth of the population. The three fifths in the middle were combined to form the middle SES category.

<sup>3</sup>Includes integrated math, algebra III, probability and statistics, and noncalculus Advanced Placement (AP) or International Baccalaureate (IB) courses.

<sup>4</sup>Includes AP/IB calculus.

<sup>5</sup>Ranges from 0 to 59.

<sup>6</sup>Includes all courses and ranges from 0 to 4.

<sup>7</sup>The average applies to all students who took the SAT or ACT. For those who took the SAT, the combined critical reading and mathematics score was used. For those who took the ACT, scores were converted to the equivalent of the SAT combined score. Scale ranges from 400 to 1600.

NOTE: Includes students who completed high school by September 2013. Estimates weighted by W3W1W2STUTR. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

<sup>1</sup>Total includes public high school graduates for 2011–12 and private high school graduates for 2012–13. Data on private high school graduates are not available for 2011–12.  
<sup>2</sup>All U.S. resident students living in a particular state when admitted to an institution in any state. Students may be enrolled in any state.  
<sup>3</sup>Students who attend institutions in their home state. Total includes 183 students attending U.S. Service Academies in their home state, not shown separately.  
<sup>4</sup>U.S. total includes some U.S. residents whose home state is unknown.  
<sup>5</sup>A percentage of the private high school graduates are not residents of the District of Columbia.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

‡Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>Prior to 2003, Asian data include Pacific Islanders.

<sup>2</sup>Prior to 1972, White and Black data include persons of Hispanic ethnicity.

<sup>3</sup>After 2002, data for individual race categories exclude persons of Two or more races.

<sup>4</sup>Beginning in 2010, standard errors were computed using replicate weights, which produced more precise values than the generalized variance function methodology used in prior years.

NOTE: Data are based on sample surveys of the civilian noninstitutionalized population. Totals include other racial/ethnic groups not separately shown. Race categories exclude persons of Hispanic ethnicity except where otherwise noted.

**Table 302.62. Percentage of 18- to 24-year-olds enrolled in degree-granting postsecondary institutions and percentage distribution of those enrolled, by sex, race/ethnicity, and selected racial/ethnic subgroups: 2010 and 2016**  
[Standard errors appear in parentheses]

—Not available.

†Not applicable.

‡Reporting standards not met (too few cases for a reliable estimate).

<sup>1</sup>Total includes other racial/ethnic groups not shown separately.

<sup>2</sup>Includes other Central American subgroups not shown separately.

<sup>3</sup>Includes Taiwanese.

<sup>4</sup>In addition to the subgroups shown, also includes Sri Lankan.

<sup>5</sup>Consists of Indonesian and Malaysian.

NOTE: Data are based on sample surveys of the entire population in the given age range residing within the United States, including both noninstitutionalized persons (e.g., those

living in households, college housing, or military housing located within the United States) and institutionalized persons (e.g., those living in prisons, nursing facilities, or other health-care facilities). Enrollment data in this table may differ from data in tables based on the Current Population Survey (CPS) because of differences in survey design and target populations. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

—Not available.

<sup>1</sup>Degree-credit enrollment only.

<sup>2</sup>Includes part-time resident students and all extension students (students attending courses at sites separate from the primary reporting campus). In later years, part-time student enrollment was collected as a distinct category.

<sup>3</sup>Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

<sup>4</sup>Because of imputation techniques, data are not consistent with figures for other years.

<sup>5</sup>Projected.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and partici-

pate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

#Rounds to zero.

<sup>1</sup>Includes degree-granting and non-degree-granting institutions.

<sup>2</sup>Data for 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

<sup>3</sup>Data are for institutions that did not offer accredited 4-year or 2-year programs, but were participating in Title IV federal financial aid programs. Includes some institutions transitioning to higher level program offerings, though still classified at a lower level.

NOTE: Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:95-99); and IPEDS Spring 2001 through Spring 2017, Fall Enrollment component. (This table was prepared November 2017.)

**Table 303.25. Total fall enrollment in degree-granting postsecondary institutions, by control and level of institution: 1970 through 2016**

—Not available.

<sup>1</sup>Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

<sup>2</sup>Because of imputation techniques, data are not consistent with figures for other years.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and

excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Institutions of Higher Education" surveys, 1970 through 1985; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF-86-99); and IPEDS Spring 2001 through Spring 2017, Fall Enrollment component. (This table was prepared November 2017.)

**Table 303.30. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution, attendance status, and sex of student: Selected years, 1970 through 2027**

—Not available.

\*Large increase in private 2-year institutions in 1980 is due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 through 1985; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90-99); IPEDS Spring 2001 through Spring 2017, Fall Enrollment component; and Enrollment in Degree-Granting Institutions Projection Model, 2000 through 2027. (This table was prepared April 2018.)

**Table 303.40. Total fall enrollment in degree-granting postsecondary institutions, by attendance status, sex, and age: Selected years, 1970 through 2027**

—Not available.

<sup>1</sup>Projected.

<sup>2</sup>Beginning in 1980, 2-year institutions include schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-

year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 through 1985; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:86-99); IPEDS Spring 2001 through Spring 2017, Fall Enrollment component; and Enrollment in Degree-Granting Institutions Projection Model, 2000 through 2027. (This table was prepared March 2018.)

**Table 303.80. Total postbaccalaureate fall enrollment in degree-granting postsecondary institutions, by attendance status, sex of student, and control of institution: 1970 through 2027**

—Not available.

<sup>1</sup>Projected.

NOTE: Data include unclassified graduate students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 through 1985; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:86–99); IPEDS Spring 2001 through Spring 2017, Fall Enrollment component; and Enrollment in Degree-Granting Institutions Projection Model, 2000 through 2027. (This table was prepared March 2018.)

—Not available.

<sup>1</sup>Counts of institutions in this table may be lower than reported in other tables, because counts in this table include only institutions reporting separate enrollment data.

<sup>2</sup>Included under "Other public."

<sup>3</sup>Religious affiliation as reported by institution.

NOTE: Data for 1980 and 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

<sup>1</sup>Data for 2000 and later years reflect a substantial reduction in the number of Department of Defense institutions included in the IPEDS survey.  
NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.  
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF-90); and IPEDS Spring 2001 through Spring 2017, Fall Enrollment component. (This table was prepared January 2018.)

<sup>1</sup>Data for 2000 and later years reflect a substantial reduction in the number of Department of Defense institutions included in the IPEDS survey.  
NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.  
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90); and IPEDS Spring 2001 through Spring 2017, Fall Enrollment component. (This table was prepared January 2018.)

†Not applicable.

#Rounds to zero.

NOTE: Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges

and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1970 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF-90); and IPEDS Spring 2001 through Spring 2017, Fall Enrollment component. (This table was prepared January 2018.)

<sup>1</sup>Many institutions have more than one admission requirement.

<sup>2</sup>Formal demonstration of competencies (e.g., portfolios, certificates of mastery, assessment instruments).

<sup>3</sup>Includes SAT, ACT, or other admission tests.

<sup>4</sup>Test of English as a Foreign Language.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Excludes institutions not enrolling any first-time

degree/certificate-seeking undergraduates. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

#Rounds to zero.

<sup>1</sup>The total on this table differs slightly from other counts of institutions with first-year undergraduates because approximately 1.0 percent of these institutions did not report application information.

<sup>2</sup>Data are only for institutions that require test scores for admission. Relatively few 2-year institutions require test scores for admission. The SAT critical reading and mathematics scales range from 200 to 800. The ACT composite, English, and mathematics scales range from 1 to 36.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Excludes institutions not enrolling any first-time degree/certificate-seeking undergraduates. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Winter 2016–17, Admissions component. (This table was prepared November 2017.)

**Table 306.10. Total fall enrollment in degree-granting postsecondary institutions, by level of enrollment, sex, attendance status, and race/ethnicity of student: Selected years, 1976 through 2016**

—Not available.

†Not applicable.

<sup>1</sup>Race/ethnicity not collected.

NOTE: Race categories exclude persons of Hispanic ethnicity. Because of underreporting and nonreporting of racial/ethnic data, some figures are slightly lower than corresponding data in other tables. Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher educa-

tion classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1976 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90); and IPEDS Spring 2001 through Spring 2017, Fall Enrollment component. (This table was prepared December 2017.)

**Table 306.20. Total fall enrollment in degree-granting postsecondary institutions, by level and control of institution and race/ethnicity of student: Selected years, 1976 through 2016**

—Not available.

†Not applicable.

<sup>1</sup>Race/ethnicity not collected.

NOTE: Race categories exclude persons of Hispanic ethnicity. Because of underreporting and nonreporting of racial/ethnic data, some figures are slightly lower than corresponding data in other tables. Data through 1990 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher educa-

tion classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1976 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF-90); and IPEDS Spring 2001 through Spring 2017, Fall Enrollment component. (This table was prepared December 2017.)

**Table 306.30. Fall enrollment of U.S. residents in degree-granting postsecondary institutions, by race/ethnicity: Selected years, 1976 through 2027**

—Not available.

<sup>1</sup>Projected.

NOTE: Race categories exclude persons of Hispanic ethnicity. Prior to 2010, institutions were not required to report separate data on Asians, Pacific Islanders, and students of Two or more races. Projections for Asian and Pacific Islander enrollment are not available due to the limited amount of historical data available upon which to base a projection model. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to

the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys, 1976 and 1980; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:90-99); IPEDS Spring 2001 through Spring 2017, Fall Enrollment component; and Enrollment in Degree-Granting Institutions by Race/Ethnicity Projection Model, 1980 through 2027. (This table was prepared May 2018.)

<sup>1</sup>Research universities with a very high level of research activity.  
<sup>2</sup>Research universities with a high level of research activity.  
<sup>3</sup>Institutions that award at least 20 research/scholarship doctor's degrees per year, but did not have a high level of research activity.  
<sup>4</sup>Institutions that award at least 50 master's degrees and fewer than 20 doctor's degrees per year.  
<sup>5</sup>Institutions that primarily emphasize undergraduate education. In addition to institutions that primarily award bachelor's degrees, also includes institutions classified as 4-year in the IPEDS system, but classified as 2-year baccalaureate/associate's colleges in the Carnegie system because they primarily award associate's degrees.  
<sup>6</sup>Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering.

<sup>7</sup>Nonresident alien enrollment percentages based on total enrollment in the institution, rather than on the U.S. resident enrollment.  
 NOTE: Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from <http://carnegieclassifications.iu.edu/>. Includes imputed Carnegie system classifications for institutions with missing data. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity.  
 SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2017, Fall Enrollment component. (This table was prepared June 2018.)

<sup>1</sup>Research universities with a very high level of research activity.

<sup>2</sup>Research universities with a high level of research activity.

<sup>3</sup>Institutions that award at least 20 research/scholarship doctor's degrees per year, but did not have a high level of research activity.

<sup>4</sup>Institutions that award at least 50 master's degrees per year and fewer than 20 doctor's degrees per year.

<sup>5</sup>Institutions that primarily emphasize undergraduate education. In addition to institutions that primarily award bachelor's degrees, also includes institutions classified as 4-year in the IPEDS system, but classified as 2-year baccalaureate/associate's colleges in the Carnegie Classification system because they primarily award associate's degrees.

<sup>6</sup>Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering.

NOTE: Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from <http://carnegieclassifications.iu.edu/>. Includes imputed Carnegie classifications for institutions with missing data. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity.

—Not available.

<sup>1</sup>Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

<sup>2</sup>Because of imputation techniques, data are not consistent with figures for other years.

<sup>3</sup>Projected.

NOTE: Full-time-equivalent enrollment is the number of full-time students enrolled, plus the full-time equivalent of the part-time students. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification,

but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.

NOTE: Full-time-equivalent enrollment is the number of full-time students enrolled, plus the full-time equivalent of the part-time students. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2001, Spring 2011, and Spring 2017, Fall Enrollment component. (This table was prepared January 2018.)

**Table 307.30. Full-time-equivalent fall enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: 2000, 2010, and 2016**

†Not applicable.

NOTE: Full-time-equivalent enrollment is the number of full-time students enrolled, plus the full-time equivalent of the part-time students. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2001, 2011, and 2017, Fall Enrollment component. (This table was prepared January 2018.)

**Table 308.10. Total 12-month enrollment in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2014–15 and 2015–16**

†Not applicable.  
NOTE: Includes students who enrolled at any point during a 12-month period ending during the summer of the academic year indicated. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2015 and Fall 2016, 12-Month Enrollment component. (This table was prepared January 2018.)

**Table 308.20. Total 12-month enrollment in degree-granting postsecondary institutions, by control of institution and state or jurisdiction: Selected years, 2004–05 through 2015–16**

<sup>1</sup>Students residing in a particular state when admitted to an institution anywhere—either in their home state or another state.

<sup>2</sup>Includes students coming to U.S. institutions from foreign countries and other jurisdictions.

<sup>3</sup>Students whose residence is in the same state as the service academy.

<sup>4</sup>Institution unable to determine student's home state.

NOTE: Includes all first-time postsecondary students enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2017, Fall Enrollment component. (This table was prepared March 2018.)

<sup>1</sup>Students residing in a particular state when admitted to an institution anywhere—either in their home state or another state.

<sup>2</sup>Includes students coming to U.S. institutions from foreign countries and other jurisdictions.

<sup>3</sup>Students whose residence is in the same state as the service academy.

<sup>4</sup>Institution unable to determine student's home state.

NOTE: Includes all first-time postsecondary students who graduated from high school in the previous 12 months and were enrolled at reporting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2017, Fall Enrollment component. (This table was prepared March 2018.)

#Rounds to zero.

<sup>1</sup>North Africa was combined with the Middle East to create the "Middle East and North Africa" category as of 2011–12, and the former "Africa" category was replaced by "Sub-Saharan Africa" (which excludes North Africa). Data for years prior to 2011–12 have been revised for comparability.

<sup>2</sup>Asia excludes the Middle Eastern countries (Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, the Palestinian Territories, Qatar, Saudi Arabia, Syria, the United Arab Emirates, and Yemen).

<sup>3</sup>Cyprus and Turkey were classified as being in the Middle East prior to 2004–05, but in Europe for 2004–05 and later years. Data for 2000–01 have been revised for comparability.

<sup>4</sup>Mexico and Central America are included in Latin America, not in North America.

<sup>5</sup>Includes Antarctica from 2002–03 onward.

NOTE: Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

#Rounds to zero.

<sup>1</sup>North Africa was combined with the Middle East to create the "Middle East and North Africa" category as of 2012–13, and the former "Africa" category was replaced by "Sub-Saharan Africa" (which excludes North Africa). Data for years prior to 2012–13 have been revised for comparability.

<sup>2</sup>Cyprus and Turkey were classified as being in the Middle East prior to 2004–05, but in Europe for 2004–05 and later years. Data for years prior to 2004–05 have been revised for comparability.

<sup>3</sup>Data for 1980–81 and 1985–86 are for West Germany (Federal Republic of Germany before unification).

<sup>4</sup>Data for 1980–81, 1985–86, and 1990–91 are the former U.S.S.R.

<sup>5</sup>Excludes Mexico and Central America, which are included in Latin America.

<sup>6</sup>Place of origin unknown or undeclared.

NOTE: Includes foreign students enrolled in American Samoa, Guam, Puerto Rico, and the U.S. Virgin Islands. Totals and sub-totals include other countries not shown separately. Region totals may not sum to continent totals, because some continent totals include students who are not classified by country or region. Data are for "nonimmigrants" (i.e., students who have not migrated to the United States). Detail may not sum to totals because of rounding.

—Not available.

†Not applicable.

Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>1</sup>Students with disabilities are those who reported having deafness or serious difficulty hearing; blindness or serious difficulty seeing; serious difficulty concentrating, remembering, or making decisions because of a physical, mental, or emotional condition; or serious difficulty walking or climbing stairs. For 2015–16, the question about difficulty concentrating, remembering, or making decisions was expanded to include examples of relevant conditions. Specifically, students were instructed to “consider conditions including, but not limited to, a serious learning disability, depression, ADD, or ADHD.” The percentage of students reporting difficulty concentrating, remembering, or making decisions was 17 percent in 2015–16 (after the examples were added) and 8 percent in 2011–12 (before the examples were added). Due

to addition of the examples, estimates of the percentage of students with this type of disability in 2015–16 and of the overall percentage of students with disabilities in 2015–16 cannot be compared to estimates of the percentages in earlier years.

<sup>2</sup>Full-time, full-year includes students enrolled full time for 9 or more months. Part-time or part-year includes students enrolled part time for 9 or more months and students enrolled less than 9 months either part time or full time.

NOTE: Data are based on a sample survey of students who enrolled at any time during the school year. Data exclude students attending institutions in Puerto Rico. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Excludes students not in a degree or certificate program.

<sup>2</sup>Includes only students enrolled full time for a full academic year (defined as 9 or more months).

<sup>3</sup>Includes students enrolled part time for a full academic year as well as students enrolled full time, but for only part of an academic year.

<sup>4</sup>Includes students who are not in a degree program or have not declared a major. For 2003–04 and 2007–08, includes physical sciences.

<sup>5</sup>Excludes work study/assistantships.

<sup>6</sup>Includes separated.

NOTE: In 2011–12 and 2015–16, students were asked whether they took classes that were taught entirely online and, if so, whether their entire degree program was online. In 2003–04 and 2007–08, students were asked about distance education, which was defined in 2007–08 as “primarily delivered using live, interactive audio or videoconferencing, prerecorded instructional videos, webcasts, CD-ROM, or DVD, or computer-based systems delivered over the Internet.” The 2003–04 definition was very similar, with only minor differences in wording. In both years, distance education did not include correspondence courses. Data exclude students attending institutions in Puerto Rico. Detail may not sum to totals because of rounding. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.  
‡Reporting standards not met (too few cases for a reliable estimate).  
<sup>1</sup>Primarily online institutions have more than 90 percent of their students attending classes exclusively online. Other institutions may have some online offerings, but they are not primarily online.  
<sup>2</sup>Includes only institutions reporting enrollment data in fall 2016.  
<sup>3</sup>Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2017, Fall Enrollment component; IPEDS, Fall 2016, Completions component; and IPEDS, Winter 2016–17, Graduation Rates component. (This table was prepared June 2018.)

‡Not applicable.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.

<sup>1</sup>First-year student status was determined by accumulation of credits. Students attending postsecondary education part time, or not completing the credit accumulation requirements for second-year status, could be considered first-year students for more than one year.

<sup>2</sup>Numbers may not equal those reported in other tables, since these data are based on a sample survey of students who enrolled at any time during the academic year.

<sup>3</sup>Includes only students enrolled full time for a full academic year (defined as 9 or more months).

<sup>4</sup>Includes students enrolled part time for a full academic year as well as students enrolled full time, but for only part of an academic year.

<sup>5</sup>Excludes students not in a degree or certificate program.

NOTE: Percentages of students who took remedial courses are based on student reports. Data exclude students attending institutions in Puerto Rico. Detail may not sum to totals because of survey item nonresponse and rounding. Race categories exclude persons of Hispanic ethnicity.

NOTE: Remedial services are instructional activities designed for students deficient in the general competencies necessary for a regular postsecondary curriculum and educational setting. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Excludes institutions not enrolling any first-time degree/certificate-seeking undergraduates.

†Not applicable.  
 !Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.  
 ‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.  
<sup>1</sup>For undergraduate students, the field of study categories include students who had already declared a major as well as students who had decided on, but not yet declared, an intended major. The “Undecided” category consists of undergraduate students who had neither declared nor decided on a major.

<sup>2</sup>Also includes students attending more than one institution.  
 NOTE: Because of different survey editing and processing procedures, enrollment data in this table may differ from those appearing in other tables. Includes students who enrolled at any time during the 2015–16 academic year. Data exclude Puerto Rico. Data have been revised from previously published figures. Detail may not sum to totals because of rounding.

<sup>1</sup>In 2014, the survey frame was updated following a comprehensive frame evaluation study. The study identified potentially eligible but not previously surveyed academic institutions in the United States with master's- or doctorate-granting programs in science, engineering, or health. A total of 151 newly eligible institutions were added, and 2 institutions offering mostly practitioner-based graduate degrees were determined to be ineligible.

<sup>2</sup>Excludes Psy.D. (Doctor of Psychology) programs, which focus on training for clinical practice. Enrollment declines after 2007 may be due to more rigorous follow-up with institutions to exclude such programs.

<sup>3</sup>Excludes enrollments in practitioner-oriented programs, which have the primary purpose of providing the knowledge and skills required for credentials or licensure to practice in a medical or other health field. Examples of excluded clinical medicine programs are those leading to M.D. (Doctor of Medicine) and D.D.S. (Doctor of Dental Surgery) degrees.

Examples of excluded programs in other health fields are those leading to D.N.P. (Doctor of Nursing Practice) and D.P.T. (Doctor of Physical Therapy) degrees.

<sup>4</sup>For years after 2007, enrollment declines in other health fields such as nursing may be due to more rigorous follow-up with institutions to exclude enrollments in practitioner-oriented graduate degree programs.

NOTE: The survey on which this table is based includes all institutions in the United States and its territories (Guam and Puerto Rico) that grant research-based master's degrees or doctorates in science, engineering, and selected health fields.

SOURCE: National Science Foundation, National Center for Science and Engineering Statistics, NSF-NIH Survey of Graduate Students and Postdoctorates in Science and Engineering, 2007 through 2016. (This table was prepared March 2018.)

<sup>1</sup>College and university campuses ranked by fall 2016 enrollment data.

<sup>2</sup>"PrivNp" stands for private nonprofit. "PrivFp" stands for private for-profit.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes online and distance education courses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2017, Fall Enrollment component. (This table was prepared June 2018.)

**Table 312.20. Enrollment, degrees conferred, and expenditures of degree-granting postsecondary institutions enrolling more than 15,000 students in 2016, by selected characteristics and institution: Selected years, 1990 through 2015–16**

Line number	Institution	State	Control <sup>1</sup>	Level	Total fall enrollment					Fall enrollment, 2016

†Not applicable.

<sup>1</sup>"PrivNp" stands for private nonprofit. "PrivFp" stands for private for-profit.

<sup>2</sup>Includes private and some public institutions reporting total expenses and deductions under Financial Accounting Standards Board (FASB) reporting standards and public institutions reporting total expenses and deductions under Governmental Accounting Standards Board (GASB) 34/35 reporting standards.

<sup>3</sup>Combined enrollment of Black, Hispanic, Asian/Pacific Islander, American Indian/Alaska Native, and Two or more races students who are U.S. citizens or resident aliens as a percentage of total enrollment, excluding nonresident aliens.

<sup>4</sup>Includes less-than-1-year awards and 1- to less-than-4-year awards (excluding associate's degrees) conferred by degree-granting institutions.

**Table 312.20. Enrollment, degrees conferred, and expenditures of degree-granting postsecondary institutions enrolling more than 15,000 students in 2016, by selected characteristics and institution: Selected years, 1990 through 2015–16—Continued**

<sup>5</sup>Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees.

<sup>6</sup>Data for total enrollment in 1990 are for institutions of higher education, rather than degree-granting institutions.

<sup>7</sup>For years prior to 2013, fall enrollment data for Arizona State University, Tempe, include data for the following four branch campuses, which are now reported separately: Downtown Phoenix, Skysong, West, and Polytechnic.

<sup>8</sup>Data for University of Phoenix, Arizona, include branch campuses previously reported separately.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes online and distance education courses. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall Enrollment Survey (IPEDS-EF:90); Spring 2001 through Spring 2017, Fall Enrollment component; Spring 2017, Finance component; and Fall 2016, Completions component. (This table was prepared August 2018.)

<sup>1</sup>Data are for colleges and universities identified by the Women's College Coalition as women's colleges in 2017. Excludes women's colleges whose IPEDS data are reported together with a coed institution or coordinate men's college. The following institutions were excluded for this reason: Douglass Residential College of Rutgers University and Russell Sage College of the Sage Colleges.

NOTE: The institutions in this table are all 4-year private nonprofit institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2017, Fall Enrollment component; and Fall 2016, Completions component. (This table was prepared November 2017.)

—Not available.  
†Not applicable.  
1 = 4-year public; 2 = 2-year public; 3 = 4-year private nonprofit; and 4 = 2-year private nonprofit.  
2Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees.  
3Includes private and some public institutions reporting total expenses and deductions under Financial Accounting Standards Board (FASB) reporting standards and public institutions reporting total expenses and deductions under Governmental Accounting Standards Board (GASB) 34/35 reporting standards.  
4Land-grant institution.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Excludes historically Black colleges and universities that are not participating in Title IV programs. Historically Black colleges and universities are degree-granting institutions established prior to 1964 with the principal mission of educating Black Americans. Federal regulations, 20 U.S. Code, Section 1061 (2), allow for certain exceptions to the founding date. Totals include persons of other racial/ethnic groups not separately identified. Detail may not sum to totals because of rounding.  
SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2016, Completions component; Spring 2016 and Spring 2017, Fall Enrollment component; and Spring 2017, Finance component. (This table was prepared November 2017.)

NOTE: Historically Black colleges and universities are degree-granting institutions established prior to 1964 with the principal mission of educating Black Americans. Federal regulations, 20 U.S. Code, Section 1061 (2), allow for certain exceptions to the founding date. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year col-

leges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.  
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HIGIS), "Fall Enrollment in Colleges and Universities," 1976 through 1985 surveys; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:86-99); and IPEDS Spring 2001 through Spring 2017, Fall Enrollment component. (This table was prepared November 2017.)

†Not applicable.

<sup>1</sup>Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees.

<sup>2</sup>Totals (column 2) of public and private institutions together are approximate because public and private nonprofit institutions fill out different survey forms with different accounting concepts.

<sup>3</sup>Includes independent operations.

<sup>4</sup>Includes contributions from affiliated entities.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Historically Black colleges and universities are degree-granting institutions established prior to 1964 with the principal mission of educating Black Americans.

Federal regulations, 20 U.S. Code, Section 1061 (2), allow for certain exceptions to the founding date. Federal, state, and local governments revenue includes appropriations, grants, and contracts. Totals include persons of other racial/ethnic groups not separately identified. Detail may not sum to totals because of rounding.

#Rounds to zero.

<sup>1</sup>Data for 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

<sup>2</sup>Data are for institutions that did not offer accredited 4-year or 2-year degree programs, but were participating in Title IV federal financial aid programs. Includes some institutions transitioning to higher level program offerings, though still classified at a lower level.

NOTE: Full-time-equivalent staff is the full-time staff, plus the full-time equivalent of the part-time staff. Data for 2016 include institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part time. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment Survey" (IPEDS-EF:95) and "Fall Staff Survey" (IPEDS-S:95); IPEDS Spring 2006 and Spring 2017, Fall Enrollment component; and IPEDS Spring 2006 and Spring 2017, Human Resources component, Fall Staff section. (This table was prepared December 2017.)

†Not applicable.

<sup>1</sup>Included in other. Primary occupations were reclassified as of fall 2013; only the faculty and graduate assistant categories are comparable with data from earlier years.

NOTE: Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Beginning in

2007, includes institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. By definition, all graduate assistants are part time. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Staff Survey" (IPEDS-S.91-99); IPEDS Winter 2001-02 through Winter 2011-12, Human Resources component, Fall Staff section; and IPEDS Spring 2014 through Spring 2017, Human Resources component, Fall Staff section. (This table was prepared December 2017.)

†Not applicable.  
#Rounds to zero.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. By definition, all graduate assistants are part time. Detail may not sum to totals because of rounding.

†Not applicable.

<sup>1</sup>Combined total of staff who were Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, and of Two or more races as a percentage of total staff, excluding race/ethnicity unknown and nonresident alien.

<sup>2</sup>Race/ethnicity not collected.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. By definition, all graduate assistants are part time. Race categories exclude persons of Hispanic ethnicity.

†Not applicable.

NOTE: Full-time-equivalent staff is the full-time staff, plus the full-time equivalent of the part-time staff. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data are for all degree-granting institutions, including those with fewer than 15 employees. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2017, Human Resources component, Fall Staff section; and Spring 2017, Fall Enrollment component. (This table was prepared December 2017.)

—Not available.

<sup>1</sup>Estimated on the basis of enrollment. For methodological details on estimates, see National Center for Education Statistics, *Projections of Education Statistics to 2000*.

<sup>2</sup>Because of revised survey methods, data are not directly comparable with figures for years prior to 1987.

NOTE: Includes faculty members with the title of professor, associate professor, assistant professor, instructor, lecturer, assisting professor, adjunct professor, or interim professor (or the equivalent). Excluded are graduate students with titles such as graduate or teaching fellow who assist senior faculty. Data through 1995 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more

2-year colleges and excludes a few higher education institutions that did not grant degrees. Beginning in 2007, includes institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

<sup>1</sup>Combined total of faculty who were Black, Hispanic, Asian, Pacific Islander, American Indian/Alaska Native, and of Two or more races as a percentage of total faculty, excluding race/ethnicity unknown and nonresident alien.

<sup>2</sup>Race/ethnicity not collected.

<sup>3</sup>Only instructional faculty were classified by academic rank. Primarily research and primarily public service faculty, as well as faculty without ranks, appear under "other faculty."

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Includes institutions with fewer than 15 full-time employees; these institutions did not report staff data prior to 2007. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2014, Spring 2016, and Spring 2017 Human Resources component, Fall Staff section. (This table was prepared December 2017.)

**Table 316.10. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, control and level of institution, and sex: Selected years, 1970–71 through 2016–17**

<sup>1</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.  
NOTE: Data exclude instructional faculty at medical schools. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data for 1987–88 and later years include imputations for nonrespondent institutions. Some data have been revised from previously published figures.

**Table 316.20. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by academic rank, sex, and control and level of institution: Selected years, 1999–2000 through 2016–17**

‡Reporting standards not met (too few cases).

<sup>1</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.

<sup>2</sup>Institutions that awarded 20 or more doctor's degrees during the previous academic year.

<sup>3</sup>Institutions that awarded 20 or more master's degrees, but less than 20 doctor's degrees, during the previous academic year. This definition differs from the definition of master's institutions that is used some *Digest* tables that present postsecondary finance data.

NOTE: Data exclude instructional faculty at medical schools. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty Survey" (IPEDS-SA-99); and IPEDS, Winter 2009–10, Spring 2016, and Spring 2017, Human Resources component, Salaries section. (This table was prepared November 2017.)

**Table 316.30. Average salary of full-time instructional faculty on 9-month contracts in degree-granting postsecondary institutions, by control and level of institution and state or jurisdiction: 2016–17**

‡Reporting standards not met (too few cases).

<sup>1</sup>Institutions that awarded 20 or more doctor's degrees during the previous academic year.

<sup>2</sup>Institutions that awarded 20 or more master's degrees, but less than 20 doctor's degrees, during the previous academic year. This definition differs from the definition of master's institutions that is used some *Digest* tables that present postsecondary finance data.

NOTE: Data exclude instructional faculty at medical schools. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data include imputations for nonrespondent institutions.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2017, Human Resources component, Salaries section. (This table was prepared November 2017.)

**Table 316.50. Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting postsecondary institutions, by control and classification of institution, academic rank of faculty, and state or jurisdiction: 2016–17**  
[In current dollars]

—Not available.

<sup>1</sup>Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

NOTE: Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Changes in counts of institutions over time are partly affected by increasing or decreasing numbers of institutions submitting separate data for branch campuses.

†Not applicable.

<sup>1</sup>Research universities with a very high level of research activity.

<sup>2</sup>Research universities with a high level of research activity.

<sup>3</sup>Institutions that award at least 20 research/scholarship doctor's degrees per year, but did not have a high level of research activity.

<sup>4</sup>Institutions that award at least 50 master's degrees and fewer than 20 doctor's degrees per year.

<sup>5</sup>Institutions that primarily emphasize undergraduate education. In addition to institutions that primarily award bachelor's degrees, also includes institutions classified as 4-year in the IPEDS system, but classified as 2-year baccalaureate/associate's colleges in the Carnegie Classification system because they primarily award associate's degrees.

<sup>6</sup>Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering.

NOTE: Branch campuses are counted as separate institutions. Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from <http://carnegieclassifications.iu.edu/>. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

See notes at end of table.

**Table 317.40. Number of degree-granting postsecondary institutions and enrollment in these institutions, by enrollment size, control, and classification of institution: Fall 2015—Continued**

<sup>1</sup>Excludes institutions with no enrollment reported separately from the enrollment of an associated main campus.

<sup>2</sup>Research universities with a very high level of research activity.

<sup>3</sup>Research universities with a high level of research activity.

<sup>4</sup>Institutions that award at least 20 research/scholarship doctor's degrees per year, but did not have a high level of research activity.

<sup>5</sup>Institutions that award at least 50 master's degrees and fewer than 20 doctor's degrees per year.

<sup>6</sup>Institutions that primarily emphasize undergraduate education. In addition to institutions that primarily award bachelor's degrees, also includes institutions classified as 4-year in the IPEDS system, but classified as 2-year baccalaureate/associate's colleges in the Carnegie Classification system because they primarily award associate's degrees.

<sup>7</sup>Institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering.

<sup>8</sup>Institutions that award less than 30 percent of their awards in career and technical programs.

<sup>9</sup>Institutions that award 30 to 49 percent of their awards in career and technical programs.

<sup>10</sup>Institutions that award 50 percent or more of their awards in career and technical programs.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Further information on the research index ranking may be obtained from <http://carnegieclassifications.iu.edu>.

—Not available.

NOTE: This table indicates the year by which the institution no longer operated (generally it closed at the end of or during the prior year). Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees.

<sup>1</sup>Includes degrees in Area, ethnic, cultural, gender, and group studies; English language and literature/letters; Foreign languages, literatures, and linguistics; Liberal arts and sciences, general studies, and humanities; Multi/interdisciplinary studies; Philosophy and religious studies; Theology and religious vocations; and Visual and performing arts.

<sup>2</sup>Includes Psychology; Social sciences; and History.

<sup>3</sup>Includes Biological and biomedical sciences; Mathematics and statistics; and Physical sciences and science technologies.

<sup>4</sup>Includes Computer and information sciences; Engineering; and Engineering technologies.

<sup>5</sup>Includes Agriculture and natural resources; Architecture and related services; Communication, journalism, and related programs; Communications technologies; Family and consumer sciences/human sciences; Health professions and related programs; Homeland security, law enforcement, and firefighting; Legal professions and studies; Library science; Military technologies and applied sciences; Parks, recreation, leisure, and fitness studies; Precision production; Public administration and social services; Transportation and materials moving; and Not classified by field of study.

<sup>6</sup>Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. The new Classification of Instructional Programs was initiated in 2009–10. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; "Business" includes Business, management, marketing, and related support services and Personal and culinary services; and "Engineering technologies" includes Engineering technologies and engineering-related fields, Construction trades, and Mechanic and repair technologies/technicians. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1970–71 through 1985–86; Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:91–96); and IPEDS Fall 2001 through Fall 2016, Completions component. (This table was prepared May 2018.)

—Not available.

<sup>1</sup>Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Includes most degrees formerly classified as first-professional, such as M.D., D.D.S., and law degrees.

<sup>2</sup>Part of the increase is due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions that participate in Title IV federal financial aid programs. Data for associate's degrees and higher awards are for degree-granting institutions. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1970–71 through 1985–86; Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:87–99); and IPEDS Fall 2000 through Fall 2016, Completions component. (This table was prepared August 2017.)

<sup>1</sup>Includes degrees in area, ethnic, cultural, gender, and group studies; English language and literature/letters; foreign languages, literatures, and linguistics; liberal arts and sciences, general studies and humanities; multi/interdisciplinary studies; philosophy and religious studies; theology and religious vocations; and visual and performing arts.

<sup>2</sup>Includes biological and biomedical sciences; physical sciences; science technologies/technicians; and mathematics and statistics.

<sup>3</sup>Includes engineering; engineering technologies/technicians; mechanic and repair technologies/technicians; and construction trades.

<sup>4</sup>Includes business, management, marketing, and related support services; and personal and culinary services.

<sup>5</sup>Includes agriculture, agricultural operations, and related sciences; natural resources and conservation; architecture and related services; communication, journalism, and related

programs; communications technologies/technicians and support services; family and consumer services/human sciences; homeland security, law enforcement, and firefighting; legal professions and studies; library science; military technologies and applied sciences; parks, recreation, leisure, and fitness studies; precision production; public administration and social service professions; and transportation and materials moving.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. This table includes only those jurisdictions with 4-year institutions.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2016, Completions component. (This table was prepared March 2018.)

<sup>1</sup>Non-degree-granting institutions do not offer accredited 4-year or 2-year programs for degrees at the associate's or higher level, but they may include institutions offering programs 2 years or longer in duration for lower level awards.

<sup>2</sup>Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

<sup>3</sup>Includes design and applied arts, drama and theatre arts, film and photographic arts, and all other arts not included under "Fine and studio arts" or "Music and dance."

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Degree-granting institutions grant degrees at the associate's or higher level, while non-degree-granting institutions grant only awards below that level.

—Not available.  
 NOTE: Includes less-than-1-year awards and 1- to less-than-4-year awards (excluding associate's degrees) conferred by postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported.

Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.  
 SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:99); and IPEDS Fall 2000 through Fall 2016, Completions component. (This table was prepared August 2017.)

<sup>1</sup>Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

<sup>2</sup>Includes design and applied arts, drama and theatre arts, film and photographic arts, and all other arts not included under "Fine and studio arts" or "Music and dance."

NOTE: Data are for degree-granting postsecondary institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:98–99); and IPEDS Fall 2006 through Fall 2016, Completions component. (This table was prepared August 2017.)

**Table 321.20. Associate's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2015–16**

Year and sex	Number of degrees conferred to U.S. citizens and nonresident aliens								Percentage distribution of degrees conferred to U.S. citizens						
	Total	White	Black	Hispanic	Asian/ Pacific Islander	American Indian/ Alaska Native	Two or more races	Non- resident alien	Total	White	Black	Hispanic	Asian/ Pacific Islander	American Indian/ Alaska Native	Two or more races

—Not available.

<sup>1</sup>Excludes 1,170 males and 251 females whose racial/ethnic group was not available.

<sup>2</sup>Excludes 4,819 males and 1,384 females whose racial/ethnic group was not available.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for degree-granting postsecondary institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. For 1989–90 and later years, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/eth-

nicity for students whose race/ethnicity was not reported. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

<sup>1</sup>Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

NOTE: Data are for degree-granting postsecondary institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Inte-

grated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business, management, marketing, and related support services and Personal and culinary services. Some data have been revised from previously published figures.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions that participate in Title IV federal financial aid programs. The new Classification of Instructional Programs was initiated in 2009–10. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; "Business" includes Business, management, marketing, and related support services and Personal and culinary services; and "Engineering technologies" includes Engineering technolo-

gies and engineering-related fields, Construction trades, and Mechanic and repair technologies/technicians. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1970–71 through 1985–86; Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:91–99); and IPEDS Fall 2000 through Fall 2016, Completions component. (This table was prepared August 2017.)

**Table 322.20. Bachelor's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2015–16**

Year and sex	Number of degrees conferred to U.S. citizens and nonresident aliens								Percentage distribution of degrees conferred to U.S. citizens						
	Total	White	Black	Hispanic	Asian/ Pacific Islander	American Indian/ Alaska Native	Two or more races	Non- resident alien	Total	White	Black	Hispanic	Asian/ Pacific Islander	American Indian/ Alaska Native	Two or more races

—Not available.

<sup>1</sup>Excludes 1,121 males and 528 females whose racial/ethnic group was not available.

<sup>2</sup>Excludes 258 males and 82 females whose racial/ethnic group was not available.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. For 1989–90 and later years, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to esti-

mate race/ethnicity for students whose race/ethnicity was not reported. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

<sup>1</sup>Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natu-

ral resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business, management, marketing, and related support services and Personal and culinary services. Some data have been revised from previously published figures.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions that participate in Title IV federal financial aid programs. The new Classification of Instructional Programs was initiated in 2009–10. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; "Business" includes Business, management, marketing, and related support services and Personal and culinary services; and "Engineering technologies" includes Engineering technolo-

gies and engineering-related fields, Construction trades, and Mechanic and repair technologies/technicians. Some data have been revised from previously published figures.  
SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1970–71 through 1985–86; Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:91–99); and IPEDS Fall 2000 through Fall 2016, Completions component. (This table was prepared August 2017.)

**Table 323.20. Master's degrees conferred by postsecondary institutions, by race/ethnicity and sex of student: Selected years, 1976–77 through 2015–16**

Year and sex	Number of degrees conferred to U.S. citizens and nonresident aliens								Percentage distribution of degrees conferred to U.S. citizens						
	Total	White	Black	Hispanic	Asian/ Pacific Islander	American Indian/ Alaska Native	Two or more races	Non- resident alien	Total	White	Black	Hispanic	Asian/ Pacific Islander	American Indian/ Alaska Native	Two or more races

—Not available.

<sup>1</sup>Excludes 387 males and 175 females whose racial/ethnic group was not available.

<sup>2</sup>Excludes 1,377 males and 179 females whose racial/ethnic group was not available.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. For 1989–90 and later years, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Detail

may not sum to totals because of rounding. Some data have been revised from previously published figures.

<sup>1</sup>Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.  
NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): \*Agriculture

and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business, management, marketing, and related support services and Personal and culinary services. Some data have been revised from previously published figures.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions that participate in Title IV federal financial aid programs. The new Classification of Instructional Programs was initiated in 2009–10. Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agriculture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation;

"Business" includes Business, management, marketing, and related support services and Personal and culinary services; and "Engineering technologies" includes Engineering technologies and engineering-related fields, Construction trades, and Mechanic and repair technologies/technicians. Some data have been revised from previously published figures. SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, 1970–71 through 1985–86; Integrated Postsecondary Education Data System (IPEDS), "Completions Survey" (IPEDS-C:91–99); and IPEDS Fall 2000 through Fall 2016, Completions component. (This table was prepared August 2017.)

—Not available.

<sup>1</sup>Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were formerly classified as first-professional degrees.

<sup>2</sup>Excludes 500 males and 12 females whose racial/ethnic group was not available.

<sup>3</sup>Excludes 714 males and 21 females whose racial/ethnic group was not available.

NOTE: Data through 1990–91 are for institutions of higher education, while later data are for postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. For 1989–90 and later years, reported racial/ethnic

distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

<sup>1</sup>Excludes "Construction trades" and "Mechanic and repair technologies/technicians," which are listed separately.  
 NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the Integrated Postsecondary Education Data System (IPEDS): "Agricul-

ture and natural resources" includes Agriculture, agriculture operations, and related sciences and Natural resources and conservation; and "Business" includes Business, management, marketing, and related support services and Personal and culinary services. Some data have been revised from previously published figures.  
 SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2015 and Fall 2016, Completions component. (This table was prepared August 2017.)

**Table 324.40. Number of postsecondary institutions conferring doctor's degrees in dentistry, medicine, and law, and number of such degrees conferred, by sex of student: Selected years, 1949–50 through 2015–16**

Year	Dentistry (D.D.S. or D.M.D.)				Medicine (M.D.)				Law (LL.B. or J.D.)			
	Number of institutions conferring degrees	Number of degrees conferred			Number of institutions conferring degrees	Number of degrees conferred			Number of institutions conferring degrees	Number of degrees conferred

<sup>1</sup>Includes naturopathic medicine and degrees that were not classified by field by the reporting institution.  
NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Includes degrees that require at least 6 years of college work for completion (including at least 2 years of preprofessional training). Race categories exclude persons of Hispanic ethnicity. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex

were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Some data have been revised from previously published figures.

#Rounds to zero.  
<sup>1</sup>Includes agricultural sciences and natural resources; biological and biomedical sciences; and health sciences.  
<sup>2</sup>Distribution based on respondents reporting sex data.  
<sup>3</sup>Distribution based on U.S. citizens and permanent residents.  
<sup>4</sup>Includes Pacific Islanders and persons whose race was not reported.  
<sup>5</sup>Percentages are based on only those doctorate recipients who responded to questions about postgraduation plans.  
<sup>6</sup>Excludes doctorate recipients who indicated plans for another full-time degree program. Percentages are based on doctorate recipients reporting other definite postgraduation plans for study.  
<sup>7</sup>Includes respondents who indicated definite postgraduation study plans for traineeship, internship/clinical residency, or other study.  
<sup>8</sup>Percentages are based on only those doctorate recipients who indicated definite postgraduation plans for employment and who indicated the sector of employment.  
<sup>9</sup>Includes 2-year, 4-year, and foreign colleges and universities, and medical schools.  
<sup>10</sup>"Other" is mainly composed of elementary and secondary schools.  
<sup>11</sup>Includes doctorate recipients who indicated that they did not plan to work or study, those who indicated some other type of postgraduation plans, and those who indicated definite plans for another full-time degree program.

<sup>12</sup>Percentages are based on only those doctorate recipients who indicated definite postgraduation plans for employment and who indicated their primary work activity.  
<sup>13</sup>Percentages are based on only those doctorate recipients who indicated definite postgraduation plans and type of plans.  
 NOTE: The above classification of degrees by field differs somewhat from that in most publications of the National Center for Education Statistics (NCES). One major difference is that history is included under humanities rather than social sciences. Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Includes only graduates of research programs, which typically require the preparation and defense of a dissertation based on original research, or the planning and execution of an original project demonstrating substantial artistic or scholarly achievement. Excludes nonresearch professional practice doctor's degrees (e.g., M.D., D.D.S., and J.D.) that are conferred upon completion of a program providing the knowledge and skills for the recognition, credential, or license required for professional practice in such fields as health and theology. The number of doctor's degrees in this table differs from that reported in the NCES Integrated Postsecondary Education Data System (IPEDS), which includes both the research and nonresearch degrees. Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

†Not applicable.

<sup>1</sup>Institutions are ranked by the total number of doctor's degrees conferred during the 10-year period from July 1, 2006, to June 30, 2016.

<sup>2</sup>Includes degrees conferred by the University of Medicine and Dentistry of New Jersey, which merged with Rutgers University in 2013–14.

<sup>3</sup>Includes law degrees conferred by Texas Wesleyan University, which was acquired by Texas A&M in 2013, as well as degrees in all fields from Texas A&M Health Sciences Center.

<sup>4</sup>Includes degrees conferred by the University of Tennessee Health Sciences Center, which in 2014–15 began reporting separately from the University of Tennessee, Knoxville.

<sup>5</sup>Includes degrees conferred by the Endowed and Statutory Colleges.

NOTE: Includes Ph.D., Ed.D., and comparable degrees at the doctoral level, as well as such degrees as M.D., D.D.S., and law degrees that were classified as first-professional degrees prior to 2010–11. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2007 through Fall 2016, Completions component. (This table was prepared August 2018.)

NOTE: Data are for postsecondary institutions participating in Title IV federal financial aid programs. Includes degrees in engineering, engineering-related technologies, mechanic and repair technologies, and construction trades for 1969–70 and later years. Degrees in engineering include degrees in all areas of engineering—for example, chemical, civil, electrical, and mechanical engineering—as well as degrees in general engineering. Some data have been revised from previously published figures.

—Not available.

<sup>1</sup>Race/ethnicity not collected.

<sup>2</sup>Includes data for institutions not reporting admissions data, which are not separately shown.  
NOTE: Data are for 4-year degree-granting postsecondary institutions participating in Title IV federal financial aid programs. Graduation rates refer to students receiving bachelor's degrees from their initial institutions of attendance only. Totals include data for persons whose

race/ethnicity was not reported. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2002 through Spring 2013 and Winter 2013–14 through Winter 2016–17, Graduation Rates component; and IPEDS Fall 2010, Institutional Characteristics component. (This table was prepared December 2017.)

**Table 326.20. Graduation rate from first institution attended within 150 percent of normal time for first-time, full-time degree/certificate-seeking students at 2-year postsecondary institutions, by race/ethnicity, sex, and control of institution: Selected cohort entry years, 2000 through 2013**

—Not available.

‡Reporting standards not met (too few cases).

<sup>1</sup>Race/ethnicity not collected.

NOTE: Data are for 2-year degree-granting postsecondary institutions participating in Title IV federal financial aid programs. Graduation rates refer to students receiving associate's degrees or certificates from their initial institutions of attendance only. Totals include data

for persons whose race/ethnicity was not reported. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2002 through Spring 2014 and Winter 2013–14 through Winter 2016–17, Graduation Rates component. (This table was prepared December 2017.)

**Table 326.30. Retention of first-time degree-seeking undergraduates at degree-granting postsecondary institutions, by attendance status, level and control of institution, and percentage of applications accepted: Selected years, 2006 to 2016**

†Not applicable.

<sup>1</sup>Adjusted student counts exclude students who died or were totally and permanently disabled, served in the armed forces (including those called to active duty), served with a foreign aid service of the federal government (e.g., Peace Corps), or served on official church missions. For 4-year institutions, the adjusted cohort is based on first-time bachelor's degree-seeking students.

NOTE: Returning students data for 2-year institutions include returning students, plus students who completed their program. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2008 through Spring 2017, Fall Enrollment component; and IPEDS Fall 2006 through Fall 2015, Institutional Characteristics component. (This table was prepared December 2017.)

†Not applicable.

#Rounds to zero.

!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Includes a small percentage of students who had attained a degree and were still enrolled. Includes recipients of degrees not shown separately.

<sup>2</sup>Includes a small percentage of students who had attained an advanced degree.

<sup>3</sup>Includes students with a standard high school diploma who enrolled in postsecondary education in the same year as their graduation.

<sup>4</sup>Students starting at 2-year institutions include students whose goal was to transfer to a 4-year institution.

<sup>5</sup>Indicates the income quartile of the student, based on the student's total income in 2002 for independent students or the parents' total income in 2002 for dependent students. Income quartiles were determined separately for dependent and independent students based on percentile rankings and then combined into one variable.

NOTE: Race categories exclude persons of Hispanic ethnicity. Detail may not sum to totals because of rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2004/09 Beginning Postsecondary Students Longitudinal Study (BPS:04/09). (This table was prepared November 2011.)

**Table 326.50. Number and percentage distribution of first-time postsecondary students starting at 2- and 4-year institutions during the 2011–12 academic year, by attainment and enrollment status and selected characteristics: Spring 2014**

—Not available.

<sup>1</sup>Excludes suicides, fetal deaths, traffic fatalities, accidental deaths, and justifiable homicide (such as the killing of a felon by a law enforcement officer in the line of duty).

<sup>2</sup>Killing of another person through gross negligence (excludes traffic fatalities).

<sup>3</sup>Any sexual act directed against another person forcibly and/or against that person's will.

<sup>4</sup>Includes only statutory rape or incest.

<sup>5</sup>Taking or attempting to take anything of value using actual or threatened force or violence.

<sup>6</sup>Attack upon a person for the purpose of inflicting severe or aggravated bodily injury.

<sup>7</sup>Unlawful entry of a structure to commit a felony or theft.

<sup>8</sup>Theft or attempted theft of a motor vehicle.

<sup>9</sup>Willful or malicious burning or attempt to burn a dwelling house, public building, motor vehicle, or personal property of another.

<sup>10</sup>If an individual is both arrested and referred to college officials for disciplinary action for a single offense, only the arrest is counted.

NOTE: Data are for degree-granting institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some institutions that report Clery data—specifically, non-degree-granting institutions and institutions outside of the 50 states and the District of Columbia—are excluded from this table. Crimes, arrests, and referrals include incidents involving students, staff, and on-campus guests. Excludes off-campus crimes and arrests even if they involve college students or staff. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, Office of Postsecondary Education, Campus Safety and Security Reporting System, 2001 through 2015; and National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2002 through Fall 2015, Institutional Characteristics component. (This table was prepared September 2017.)

**Table 329.20. On-campus crimes, arrests, and referrals for disciplinary action per 10,000 full-time-equivalent (FTE) students at degree-granting postsecondary institutions, by whether institution has residence halls, control and level of institution, and type of incident: Selected years, 2001 through 2015**

Control and level of institution and type of incident	Number of incidents per 10,000 full-time-equivalent (FTE) students <sup>1</sup>														2015

—Not available.

<sup>1</sup>Although crimes, arrests, and referrals include incidents involving students, staff, and campus guests, they are expressed as a ratio to FTE students because comprehensive FTE counts of all these groups are not available.

<sup>2</sup>Excludes suicides, fetal deaths, traffic fatalities, accidental deaths, and justifiable homicide (such as the killing of a felon by a law enforcement officer in the line of duty).

<sup>3</sup>Killing of another person through gross negligence (excludes traffic fatalities).

<sup>4</sup>Any sexual act directed against another person forcibly and/or against that person's will.

<sup>5</sup>Includes only statutory rape or incest.

<sup>6</sup>Taking or attempting to take anything of value using actual or threatened force or violence.

<sup>7</sup>Attack upon a person for the purpose of inflicting severe or aggravated bodily injury.

<sup>8</sup>Unlawful entry of a structure to commit a felony or theft.

<sup>9</sup>Theft or attempted theft of a motor vehicle.

<sup>10</sup>Willful or malicious burning or attempt to burn a dwelling house, public building, motor vehicle, or personal property of another.

<sup>11</sup>If an individual is both arrested and referred to college officials for disciplinary action for a single offense, only the arrest is counted.

NOTE: Data are for degree-granting institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some institutions that report Clery data—specifically, non-degree-granting institutions and institutions outside of the 50 states and the District of Columbia—are excluded from this table. Crimes, arrests, and referrals include incidents involving students, staff, and on-campus guests. Excludes off-campus crimes and arrests even if they involve college students or staff. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.

<sup>1</sup>Bias categories correspond to characteristics against which the bias is directed (i.e., race, ethnicity, religion, sexual orientation, gender, gender identity, or disability).

<sup>2</sup>Excludes suicides, fetal deaths, traffic fatalities, accidental deaths, and justifiable homicide (such as the killing of a felon by a law enforcement officer in the line of duty).

<sup>3</sup>Any sexual act directed against another person forcibly and/or against that person's will.

<sup>4</sup>Includes only statutory rape or incest.

<sup>5</sup>Taking or attempting to take anything of value using actual or threatened force or violence.

<sup>6</sup>Attack upon a person for the purpose of inflicting severe or aggravated bodily injury.

<sup>7</sup>Unlawful entry of a structure to commit a felony or theft.

<sup>8</sup>Theft or attempted theft of a motor vehicle.

<sup>9</sup>Willful or malicious burning or attempt to burn a dwelling house, public building, motor vehicle, or personal property of another.

<sup>10</sup>A physical attack by one person upon another where neither the offender displays a weapon, nor the victim suffers obvious severe or aggravated bodily injury involving apparent broken bones, loss of teeth, possible internal injury, severe laceration, or loss of consciousness.

<sup>11</sup>The unlawful taking, carrying, leading, or riding away of property from the possession of another.

<sup>12</sup>Placing another person in reasonable fear of bodily harm through the use of threatening words and/or other conduct, but without displaying a weapon or subjecting the victim to actual physical attack.

<sup>13</sup>Willfully or maliciously destroying, damaging, defacing, or otherwise injuring real or personal property without the consent of the owner or the person having custody or control of it. NOTE: Data are for degree-granting institutions, which are institutions that grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some institutions that report Clery data—specifically, non-degree-granting institutions and institutions outside of the 50 states and the District of Columbia—are excluded from this table. A hate crime is a criminal offense that is motivated, in whole or in part, by the perpetrator's bias against a group of people based on their race, ethnicity, religion, sexual orientation, gender, gender identity, or disability. Includes on-campus incidents involving students, staff, and on-campus guests. Excludes off-campus crimes and arrests even if they involve college students or staff. Some data have been revised from previously published figures.

<sup>1</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.

<sup>2</sup>For public institutions, in-state tuition and required fees are used.

<sup>3</sup>Data for 1986–87 and later years reflect a basis of 20 meals per week, while data for earlier years are for meals served 7 days a week (the number of meals per day was not specified). Because of this revision in data collection and tabulation procedures, data are not entirely comparable with figures for previous years. In particular, data on board rates are somewhat higher than in earlier years because they reflect the basis of 20 meals per week rather than meals served 7 days a week. Since many institutions serve fewer than 3 meals each day, the 1986–87 and later data reflect a more accurate accounting of total board costs.

<sup>4</sup>Room and board data are estimated.

NOTE: Data are for the entire academic year and are average charges for full-time students. Tuition and fees were weighted by the number of full-time-equivalent undergraduates, but were not adjusted to reflect student residency. Room and board are based on

full-time students. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

†Not applicable.  
NOTE: Data are for the entire academic year and are average charges for full-time students. In-state tuition and fees were weighted by the number of full-time-equivalent undergraduates, but were not adjusted to reflect the number of students who were state residents. Out-of-state tuition and fees were weighted by the number of first-time freshmen attending the institution in fall 2016 from out of state. Institutional room and board rates are weighted by the number of full-time students. Degree-granting institutions grant associate's or higher degrees and par-

ticipate in Title IV federal financial aid programs. Some data have been revised from previously published figures. Detail may not sum to totals because of rounding.

<sup>1</sup>Average undergraduate tuition and fees are based on in-state students only.  
NOTE: Data are for the entire academic year and are average charges for full-time students. Student charges were weighted by the number of full-time-equivalent undergraduates, but were not adjusted to reflect student residency. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2000 through Fall 2016, Institutional Characteristics component; and Spring 2001 through Spring 2017, Fall Enrollment component. (This table was prepared June 2018.)

**Table 330.40. Average total cost of attendance for first-time, full-time undergraduate students in degree-granting postsecondary institutions, by control and level of institution, living arrangement, and component of student costs: Selected years, 2010–11 through 2016–17**

<sup>1</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.

NOTE: Excludes students who previously attended another postsecondary institution or who began their studies on a part-time basis. Tuition and fees at public institutions are the lower of either in-district or in-state tuition and fees. Data illustrating

the average total cost of attendance for all students are weighted by the number of students at the institution receiving Title IV aid. Detail may not sum to totals because of rounding. Some data have been revised from previously published figures.

—Not available.

<sup>1</sup>Data are based on in-state tuition only.

NOTE: Average graduate student tuition weighted by fall full-time-equivalent graduate enrollment. Excludes doctoral students in professional practice programs. Data through 1995–96 are for institutions of higher education, while later data are for degree-granting institutions. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. The degree-granting classification is very similar to the earlier higher education classification, but it includes more 2-year colleges and

excludes a few higher education institutions that did not grant degrees. Some data have been revised from previously published figures.

<sup>1</sup>Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.

<sup>2</sup>Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey of students who enrolled at any time during the school year. Includes all postsecondary institutions.

<sup>3</sup>Includes students who reported they were awarded aid, but did not specify the source or type of aid.

<sup>4</sup>Includes Department of Veterans Affairs and Department of Defense benefits.

<sup>5</sup>Includes Parent Loans for Undergraduate Students (PLUS).

<sup>6</sup>Details on federal and nonfederal work-study participants are not available.

<sup>7</sup>Includes students who were single, divorced, or widowed.

<sup>8</sup>Full-time, full-year includes students enrolled full time for 9 or more months. Part-time or part-year includes students enrolled part time for 9 or more months and students enrolled less than 9 months either part time or full time.

<sup>9</sup>Excludes students attending more than one institution.

NOTE: Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Data include undergraduates in degree-granting and non-degree-granting institutions. Data exclude students attending institutions in Puerto Rico. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2015–16 National Postsecondary Student Aid Study (NPSAS:16). (This table was prepared June 2018.)

**Table 331.20. Full-time, first-time degree/certificate-seeking undergraduate students enrolled in degree-granting postsecondary institutions, by participation and average amount awarded in financial aid programs, and control and level of institution: 2000–01 through 2015–16**

Control and level of institution, and year	Number enrolled	Number awarded financial aid	Percent awarded aid	Percent of enrolled students awarded aid				Average award for students in aid programs <sup>1</sup>							
				Federal grants	State/local grants	Institutional grants	Student loans <sup>3</sup>	Current dollars				Constant 2016–17 dollars <sup>2</sup>			
								Federal grants	State/local grants	Institutional grants	Student loans <sup>3</sup>	Federal grants	State/local grants	Institutional grants	Student loans <sup>3</sup>

<sup>1</sup>Average amounts for students participating in indicated programs.

<sup>2</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.

<sup>3</sup>Includes only loans made directly to students. Does not include Parent Loans for Undergraduate Students (PLUS) and other loans made directly to parents.

NOTE: Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs. Data through 2009–10 are for students receiving aid, while later data are for students awarded aid. Students receiving aid are those who were not only awarded aid, but also accepted it. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2002 through Spring 2011 and Winter 2011–12 through Winter 2016–17, Student Financial Aid component. (This table was prepared December 2017.)

<sup>1</sup>Data for 2009–10 are for students receiving aid, while later data are for students awarded aid. Students receiving aid are those who were not only awarded aid, but also accepted it.

<sup>2</sup>Grant and scholarship aid consists of federal Title IV grants, as well as other grant or scholarship aid from the federal government, state or local governments, or institutional sources. Title IV grants include Federal Pell Grants, Federal Supplemental Educational Opportunity Grants (FSEOGs), Academic Competitiveness Grants (ACGs), National Science and Mathematics Access to Retain Talent Grants (National SMART Grants), and Teacher Education Assistance for College and Higher Education (TEACH) Grants. The average amount of grant and scholarship aid by income level was calculated based on all students who were awarded any type of Title IV aid, even those students who were awarded zero Title IV aid in the form of grants and were awarded Title IV aid only in the form of work-study aid or loan aid.

<sup>3</sup>Net price is the total cost of attendance minus grant and scholarship aid from the federal government, state or local governments, or institutional sources. However, average net price by income level was calculated based on all students who were awarded any type of Title IV aid, even those who were awarded zero Title IV aid in the form of grants and were awarded Title IV aid only in the form of work-study aid or loan aid.

<sup>4</sup>Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis.

NOTE: Excludes students who previously attended another postsecondary institution or who began their studies on a part-time basis. Includes only first-time, full-time students who paid the in-state or in-district tuition rate (if they attended public institutions) and who were awarded Title IV aid. Excludes the approximately 17 percent of students who were not awarded any Title IV aid. Title IV aid includes grant aid, work-study aid, and loan aid. Data are weighted by the number of students at the institution who were awarded Title IV aid. Totals include students for whom income data were not available. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Spring 2011 and Winter 2016–17, Student Financial Aid component. (This table was prepared December 2017.)

**Table 331.35. Percentage of full-time, full-year undergraduates receiving financial aid, and average annual amount received, by type and source of aid and selected student characteristics: Selected years, 1999–2000 through 2015–16—Continued**

—Not available.

†Not applicable.

#Rounds to zero.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey of students who enrolled at any time during the academic year.

<sup>2</sup>Includes Parent Loans for Undergraduate Students (PLUS).

<sup>3</sup>Includes students who reported they were awarded aid but did not specify the source of aid as well as students who specified work study, vocational rehabilitation and training, and military education assistance, which are not separately shown.

<sup>4</sup>Includes Department of Veterans Affairs and Department of Defense benefits.

<sup>5</sup>Low-income students have family incomes below the 25th percentile, middle-income students have family incomes from the 25th to the 75th percentile, and high-income students have family incomes above the 75th percentile.

<sup>6</sup>The 2012 and 2016 questionnaires did not offer students the option of choosing an “Other” race category.

<sup>7</sup>Includes students who were single, divorced, or widowed.

NOTE: Full-time, full-year undergraduates are those who were enrolled full time for 9 or more months at one or more institutions. Data include undergraduates in degree-granting and non-degree-granting institutions. Constant dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to an academic-year basis. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Data exclude Puerto Rico. Race categories exclude persons of Hispanic ethnicity. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 1999–2000, 2003–04, 2007–08, 2011–12, and 2015–16 National Postsecondary Student Aid Study (NPSAS:2000, NPSAS:04, NPSAS:08, NPSAS:12, and NPSAS:16). (This table was prepared February 2018.)

†Not applicable.

‡Reporting standards not met. Either there are too few cases for a reliable estimate or the coefficient of variation (CV) is 50 percent or greater.

<sup>1</sup>Includes students who reported they were awarded aid, but did not specify the source or type of aid.

<sup>2</sup>Includes Department of Veterans Affairs and Department of Defense benefits.

<sup>3</sup>Includes Parent Loans for Undergraduate Students (PLUS).

<sup>4</sup>Details on federal and nonfederal work-study participants are not available.

<sup>5</sup>Includes students who were single, divorced, or widowed.

NOTE: Aid averages are for those students who received the specified type of aid. Detail may not sum to totals because of rounding and because some students receive multiple types of aid and aid from different sources. Full-time, full-year undergraduates were enrolled full time for 9 or more months at one or more institutions. Data include undergraduates in degree-granting and non-degree-granting institutions. Data exclude Puerto Rico. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2015–16 National Postsecondary Student Aid Study (NPSAS:16). (This table was prepared June 2018.)

**Table 331.45. Average amount of financial aid awarded to part-time or part-year undergraduates, by type and source of aid and selected student characteristics: 2015–16**  
[In current dollars. Standard errors appear in parentheses]

Data include undergraduates in degree-granting and non-degree-granting institutions. Data exclude students attending institutions in Puerto Rico. Race categories exclude persons of Hispanic ethnicity.

SOURCE: U.S. Department of Education, National Center for Education Statistics, 2015–16 National Postsecondary Student Aid Study (NPSAS:16). (This table was prepared June 2018.)

**Table 331.50. Aid status and sources of aid for full-time and part-time undergraduates, by control and level of institution: 2011–12 and 2015–16**  
[Standard errors appear in parentheses]

†Not applicable.  
!Interpret data with caution. The coefficient of variation (CV) for this estimate is between 30 and 50 percent.  
‡Reporting standards not met. The coefficient of variation (CV) for this estimate is 50 percent or greater.  
<sup>1</sup>Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey of students who enrolled at any time during the academic year.  
<sup>2</sup>Includes students who reported that they were awarded aid but did not specify the source of the aid.  
<sup>3</sup>Includes Department of Veterans Affairs and Department of Defense benefits.

<sup>4</sup>Full-time, full-year undergraduates are those who were enrolled full time for 9 or more months at one or more institutions.  
<sup>5</sup>Part-time or part-year undergraduates include those who were enrolled part time for 9 or more months and those who were enrolled for less than 9 months either part time or full time.  
NOTE: Data exclude students whose attendance status was not reported. Data include undergraduates in degree-granting and non-degree-granting institutions. Detail may not sum to totals because of rounding and because some students received multiple types of aid and aid from different sources. Data exclude Puerto Rico.
